CONDITION OF THE APPORTIONMENT AT CLOSE OF BUSINESS FRIDAY, SEPTEMBER 15, 1939

Positions in local post offices, customs districts and other field services outside of the District of Columbia which are subject to the Civil Service Act are filled almost wholly by persons who are local residents of the general community in which the vacancies exist. Certifications of eligibles are first made from States which are in arrears.

## DIVISION OF GRAZING

AMENDMENT OF THE FEDERAL RANGE CODE CONTAINING THE RULES FOR THE ADMINISTRATION OF GRAZING DISTRICTS UNDER THE TAYLOR GRAZING ACT, AS AMENDED

Pursuant to the provisions of the Taylor Grazing Act of June 28, 1934 (48 Stat. 1269), as amended by the act of June 26, 1936 (49 Stat. 1976), and the act of July 14, 1939, (Pub. No. 173, 76th Cong.), paragraphs *a*, *c*, *d*, and *g* of section 12[1] of the Federal Range Code, revised to August 31, 1938, (43 CFR, Sec. 501.12, *a*, *c*, *d*, and *g*) are amended to read as follows:

Section 12, Paragraph *a. Authorization for Establishment; Number of Members; Qualifications.* The Taylor Grazing Act provides that there shall be an advisory board of local stockmen in each grazing district. The regional grazier shall fix the number of members to be elected to such board in each district, such number to be not less than five and not more than twelve, exclusive of a wildlife representative who will not be elective but will be appointed by the Secretary of the Interior. The regional grazier may fix the number of district advisors to be elected as representatives of each class of stockmen, according to the kind of livestock owned, or may fix the number to be elected from each voting precinct established by him, or both, provided that the free-use licensees or permittees in each district will be entitled to one representative, who shall be a free-use licensee or permittee. All district advisors shall be elected in the manner herein provided and, excepting the wildlife representatives, shall be electors qualified to vote in the particular district is divided into precincts, an advisor representing a precinct shall qualify in the precinct in the same manner as in the district.

Section 12, Paragraph *c. Elections; Qualifications of Electors.* Only those persons who are qualified to receive regular, free-use, or nonuse licenses or permits will be allowed to vote in any election held pursuant to the act of July 14, 1939; provided, that in any new grazing district hereinafter established and embracing areas not theretofore within any district, the electors will be those stockmen who, prior to the establishment of the district, were regularly accustomed to using the Federal range within said district. A minor may vote if otherwise qualified, provided that upon request by his natural or legal guardian his ballot may be cast by the guardian in the name of the minor. The judges at any election will be furnished by the representative of the Division of Grazing in charge with a list of all electors entitled to vote in the district. No one whose name does not appear on such list shall be allowed to vote, provided that anyone claiming that his name has been erroneously omitted from the list may obtain and mark a ballot which will be held uncounted until the regional grazier shall have had a further opportunity to determine whether or not the party was entitled to vote. If it is found that the party was entitled to vote, his ballot shall be counted, otherwise it shall be disregarded.

Section 12, Paragraph *d. Elections—Judges; Nominations; Ballots; Registration; Challenges.* The representative of the Division of Grazing in charge of an election will choose three qualified electors to act as election judges. The electors present may then place in nomination the names of candidates, but ballots may be cast for any other person qualified to represent a particular class or precinct. Voting shall be only by ballots cast personally by qualified electors and proxies will not be recognized. Except as provided in paragraph c of this section, no elector shall receive a ballot until he has registered by signing opposite his name on the list of persons entitled to vote. Before receiving a ballot any elector may be challenged by any other elector qualified to vote in the district and thereupon the judges, or any of them, may require the elector challenged to answer such questions concerning his qualifications as a voter as may be deemed necessary. Upon his failure or refusal to answer such questions satisfactorily, he shall not be permitted to register or to receive a ballot. Each candidate may designate any qualified elector to remain within the polling places during the casting and counting of votes and the declaration of the results thereof, and such person may act as a challenger. Before any elector shall be permitted to deposit his completed ballot in the ballot box, the judges shall write "Voted" opposite his signature on the registration list.

Section 12, Paragraph *g. Appointment by Secretary of the Interior; Oath and Term of Office; Removal; Vacancies.* No person elected as a district advisor may assume office until he has been appointed by the Secretary of the Interior and has taken an oath of office. Persons elected as district advisors at the first election after the establishment of a grazing district or after July 14, 1939, shall be divided as evenly as may be into three classes by lot by the regional grazier. Those in class 1 shall hold office for one year, those in class 2 for two years and those in class 3 for three years, and until their successors are elected and have qualified. Thereafter at each election the class whose term has expired shall be elected for a term of three years. The Secretary of the Interior may remove any district advisor from office for failure to discharge his duties or for the good of the service. Upon a vacancy occurring in the office of a district advisor other than a wildlife representative by reason of resignation, removal or otherwise, the board shall recommend the name of a person to fill the vacancy and such recommendation, together with that of the regional grazier, shall be transmitted to the Director, who shall consider the recommendation and, if he concurs, transmit it to the Secretary for his consideration. A person appointed by the Secretary to fill a vacancy shall hold office until the next regular election, when a successor shall be elected to serve for the remainder of the unexpired term, if any, of the member causing the vacancy. Wildlife representatives shall hold office without term and until a successor may be appointed by the Secretary.

## FEDERAL COMMUNICATIONS COMMISSION.

[Docket No. 5771]

IN RE KNICKERBOCKER BROADCASTING COMPANY, INC. (WMCA)

ORDER TO SHOW CAUSE

At a special meeting of the Commission, held at its offices in Washington, D. C., on Tuesday, September 19, 1939, the Commission having under consideration its Order to Show Cause entered September 12, 1939, in the above-entitled matter and the affidavit of William Weisman dated September 13, 1939, filed on behalf of Broadcast Station WMCA purporting to be in compliance with the requirements of said Order to Show Cause; and

Whereas the Commission, by its Order to Show Cause in this proceeding required the Knickerbocker Broadcasting Company, Inc., at or before 11 a. m. September 15, 1939, to file a written statement under oath setting forth all facts and circumstances pertaining to the alleged interception and broadcasting of certain secret radio communications and to show cause why the Commission should not revoke the license of said Station WMCA for violation of and failure to observe the provisions of the Communications Act of 1934, as amended, constituting conduct by said licensee contrary to public interest; and

Whereas the said affidavit of William Weisman is not in forthright compliance with the Commission's Order to Show Cause in that, while apparently intended to categorically deny that the licensee of Station WMCA itself intercepted messages in violation of the Communications Act, the said affidavit does not disclose whether the station broadcast any such messages knowing the same to be so intercepted; and further, in that the said affidavit, in lieu of disclosing all facts and circumstances as required by the Commission's Order, contains in large part general averments amounting to merely conclusions of law; and further, in that there are attached to said affidavit photostatic copies of documents alleged to constitute an agreement between Knickerbocker Broadcasting Company, Inc. and the New York Herald Tribune, by which the newspaper agreed to furnish the station material for broadcast purposes, the terms of said agreement, upon the face of these documents being ambiguous and indefinite in character, and that said written documents were supplemented by oral understandings constituting the full arrangement between the parties, the nature of such oral understandings not having been disclosed in said affidavit; and the particulars with respect to performance of said contract not being disclosed by said affidavit; that said affidavit is in other respects incomplete, evasive, and not in compliance with the Commission's Order; and

Whereas the Commission has information in its possession and knowledge of facts not set out in said affidavit tending to establish that Knickerbocker Broadcasting Company, Inc., licensee of Station WMCA, New York, N. Y., caused the interception of secret radio communications sent by the Governments of Germany and Great Britain, respectively, and thereafter caused the existence, contents, substance, purport, effect, or meaning of the same, knowing that such interception was in violation of the Communications Act, to be broadcast over the facilities of Station WMCA, and used the same or information contained therein for its own benefit all without authority of the respective senders of said communications; and

Whereas the Commission, considering that said affidavit is not in compliance with the terms of its order, desires to accord an opportunity for public hear-

ing for the purpose of ascertaining all facts and circumstances pertaining to said alleged interception and broadcasting and for the purpose of permitting said Station WMCA to show cause why the Commission should not, pursuant to Section 312 (a) of the Communications Act of 1934, as amended, revoke the license of said station in accordance with the terms of the Commission's Order to Show Cause of September 13, 1939;

It is by the Commission this 20th day of September, 1939, ordered that a public hearing be held at the offices of the Commission in Washington, D. C. at 10 a. m. on Wednesday, September 27, 1939, upon the issues set forth in the Commission's Order to Show Cause of September 12, 1939, and that notice of said hearing be given to the licensee of Station WMCA by registered mail and that public notice of said hearing be given by publishing in the office of the Secretary of the Commission and in the FEDERAL REGISTER.

By the Commission.

An application having been filed with this Commission pursuant to Rule U-12C-1 for approval of the acquisition by said Central States Power & Light Corporation of said bonds; and

The Commission having on August 29, 1939 entered an order approving said acquisition on condition that the proposed transaction be executed for the purposes and in the manner represented by the application and amendments thereto; and

The applicants having thereafter represented to the Commission that at the closing of said sale said McCurdy made a claim for an allowance in the amount of approximately $41,000 for alleged increased cost, in terms of Canadian currency, of United States currency on September 12, 1939 over and above the cost thereof on September 11, 1939 due to an alleged delay on the part of Central States Power & Light Corporation in completing the closing on September 11; that applicants' representatives attending the closing denied McCurdy's right to such allowance but advised applicants that in view of the existing war it would be to the best interest of said Central States Power & Light Corporation to perform its part of said agreement and accept said bonds and the cash called for by the contract minus approximately $41,000 and seek later to recover such difference rather than risk complete nonperformance by McCurdy; and

The applicants having requested that the order of August 29, 1939 be modified so as to permit of the acquisition of such bonds by proceeding with the transaction in accordance with said advice of said representatives, such request, and, such modification if made, to be without prejudice to any right of Central States Power & Light Corporation to later recover all or any part of the amount of such claimed allowance from McCurdy or any other person, firm or corporation liable in respect thereof; and

It appearing to the Commission that such request should be granted;

*It is ordered*, That said order entered on August 29, 1939 be, and it hereby is, modified accordingly.

By the Commission.

[This document inserts a new section to be designated 19 CFR 8.83 (a)]

SEPTEMBER 19, 1939.

*To Collectors of Customs and Others Concerned:*

Your attention is invited to the following provisions of the Internal Revenue Code:

§ 2490 *Imposition of tax.* In addition to any other tax or duty imposed by law, there shall be imposed upon the following articles imported into the United States, unless treaty provisions of the United States otherwise provide, a tax at the rates set forth in section 2491, to be paid by the importer.

§ 2491 *Rate of tax.* (a) Whale oil (except sperm oil), fish oil (except cod oil, cod-liver oil, and halibut-liver oil), marine-animal oil, tallow, inedible animal oils, inedible animal fats, inedible animal greases, fatty acids derived from any of the foregoing, and salts of any of the foregoing; all the foregoing, whether or not refined, sulphonated, sulphated, hydrogenated, or otherwise processed, 3 cents per pound: *Provided*, That no whale oil (except sperm oil), fish oil, or marine animal oil of any kind (whether or not refined, sulphonated, sulphated, hydrogenated or otherwise processed), or fatty acids derived therefrom, shall be admitted to entry, after June 30, 1939, free from the tax herein provided unless such oil was produced on vessels of the United States or in the United States or its possessions, from whales, fish, or marine animals or parts thereof taken and captured by vessels of the United States.

[Sec. 8.83 (a)] The following regulations are hereby promulgated for your information and guidance in administering the above-quoted provisions of law:

If whale oil (except sperm oil), fish oil (except cod oil, cod-liver oil, and halibut-liver oil), or marine-animal oil of any kind, whether or not such whale, fish, or marine-animal oil be refined, sulphonated, sulphated, hydrogenated, or otherwise processed, or fatty acids derived from any of the foregoing, entered for consumption or withdrawn from warehouse for consumption after June 30, 1939, is claimed to be free of the import tax provided in I.R.C., Sec. 2491 (a), as a product of American fisheries, there shall be filed in connection with the entry, in addition to the documents required by article 490 of the Customs Regulations of 1937[1] [Sec. 8.83], a declaration of the master of the American fishery giving the names of the vessels which took and captured the whales, fish, or marine animals from which such oil or fatty acids were produced and stating whether such vessels at the time of taking the whales, fish, or marine animals, were documented under the laws of the United States. No vessel shall be considered to be the taking vessel within the meaning of this regulation unless the whales, fish, or marine animals from which the oil or fatty acids were produced were taken and captured directly by such vessel with the use of no other boats than those carried as its regular equipment.

No whale, fish, or marine animal oil of a class or kind for which a rate of import tax is provided in I.R.C., Sec. 2491 (a) shall be admitted without entry, notwithstanding the provisions of article 489 (b), Customs Regulations of 1937, as amended by (1938) T.D. 49682.[2]

If entry free of the import tax imposed by I.R.C., Sec. 2491 (a) is claimed for any whale, fish, or marine-animal oil or fatty acid derived therefrom because of its production in the United States, the case should be submitted to the Bureau for decision.

For the purposes of these regulations, the term "United States", when used in a geographical sense, includes only the States, the Territories of Alaska and Hawaii, and the District of Columbia (I.R.C., Sec. 3797 (9)). In view of the provisions of I.R.C., Sec. 2493 (3), oils or fatty acids of the character described in the proviso to section 2491 (a) and produced in the Philippine Islands, Virgin Islands, Puerto Rico, Guam, or American Samoa, of a class or kind for which a rate of import tax is provided in I.R.C., Sec. 2491 (a), shall not be admitted free of the import tax notwithstanding that they may have been produced from whales, fish, or marine animals taken and captured by vessels of the United States. (Sec. 2494, I.R.C.; Sec. 2494, 53 Stat. (Part 1) 268. Sec. 624, 46 Stat. 759; 19 U.S.C. 1624. R.S. 251; 19 U.S.C. 66)

Advances may be made for reconditioning other than emergency repairs or necessary repairs or income-producing reconditioning to enable the home owner (1) to sell his property to a purchaser acceptable to the Corporation, or (2) to retain tenants in the security property, or (3) to regain rental income therefrom; in cases where the Regional Manager determines that payment of the indebtedness to the Corporation is reasonably dependent on such other reconditioning; that the account is delinquent or will inevitably become delinquent unless such advance is made; that the home owner is unable satisfactorily to finance such reconditioning otherwise; and that such reconditioning is in the best interests of the Corporation all things considered. In such cases, the Service Representative shall report the facts of the case to the Control Supervisor on Form 526 prior to the preparation of Form 529 or Form 529-A (R7AB). Care shall be taken to set forth fully the type of repairs requested, the approximate cost thereof, the repayment plan, as well as a complete justification for the advance and its purpose. Such cases shall be referred by the Control Supervisor to the Analysis and Review Section, which shall carefully consider the present status of the Account, the past payment record and the present or probable paying ability of the home owner, the principal balance of the loan and the possibilities of avoiding foreclosure. If the Analysis and Review Section believes that further consideration of the advance is warranted, the Control Supervisor shall be requested to obtain Forms 529 and 529-A (R7AB), which shall be processed as provided in the Forms Manual instructions, and the Regional Manager may authorize an advance for the reconditioning in such cases, except that where the estimated cost of the reconditioning exceeds $100.00 the case shall be first submitted to the Home Office for the recommendations of the Chief, Reconditioning Section, and the Deputy General Manager in Charge of Loan Service, and the approval of the General Manager.

State Youth Administrators, or their authorized representatives, shall schedule hours of work for youth employees on resident projects. Deductions for voluntary absence from duty shall be made only when youth employees are voluntarily absent during periods when they are scheduled to work. Deductions for voluntary absence from duty for a portion of a day's scheduled work period shall be made in an amount equal to one-fourth the deduction, or multiple thereof, made for absence during a full day's scheduled work period. On both full-time and part-time resident projects, Sundays and other intervening non-work days shall not be counted in determining deductions to be made for voluntary absence.

§ 402.14 *Accident compensation.* Project employees if injured in the performance of duty and unable to work as a result thereof shall be entitled to receive payment of compensation under the provisions of the Act of February 15, 1934 (48 Stat. 351) as amended.

§ 402.15 *Pledge or assignment of wages.* Wages paid by the Federal Government may not be pledged or assigned, and any purported pledge or assignment shall be null and void.

CONDITIONS OF EMPLOYMENT

§ 402.16 *Need.* The certification of need of youth employees shall be made by public relief agencies approved by the State Youth Administrator, or in lieu thereof, shall be the responsibility of the State Youth Administrator or his authorized representative. For the purpose of certification, a youth employee shall be defined as needy if he is:

(a) *With family.* A member of a family whose income is insufficient to provide the basic requirements of all members of the family, including the youth member, regardless of whether the family is receiving or eligible for any form of public assistance; or

(b) *Without family.* Without family connections and his income is insufficient to provide his basic requirements.

§ 402.17 *Age and health.* No person under the age of 18 years, or whose age is 25 years or more, except project supervisory employees, and no one whose physical condition is such as to make his employment dangerous to his health or safety, or to the health or safety of others, may be employed on a project. This paragraph shall not be construed to operate against the employment of physically handicapped persons, otherwise employable, where such persons may be safely assigned to work which they can ably perform.

§ 402.18 *Safe working conditions.* All work projects shall be conducted in accordance with safe working conditions, and every effort shall be made for the prevention of accident.

§ 402.19. *Citizenship.* No person shall be employed on any project until such person has made an affidavit as to his United States citizenship. No alien shall be given employment or continued in employment on any project, even though such alien may have filed a declaration of intention to become an American citizen.

§ 402.20 *Capabilities.* No person shall be employed or continued in employment if his work habits are such or his work record shows that he is incapable of performing satisfactorily the work to which he may be assigned.

§ 402.21 *Advocates of violence.* No person who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States through force or violence shall be eligible for any employment which is compensated from funds appropriated to the National Youth Administration.

§ 402.22 *Oath of Allegiance.* No person may be assigned as a project supervisory employee unless such person executes an oath of allegiance before engaging in project employment.

§ 402.23 *Offers of employment.* Youth employees shall be expected to accept bona fide offers of public or private employment provided that:

(a) *Capabilities.* The employee is capable of performing such work;

(b) *Prevailing wage.* The wage for such employment is not less than the prevailing wage for such work in the community;

(c) *Union relationship.* Such employment is not in conflict with established union relationships; and

(d) *Working conditions.* Such employment provides reasonable working conditions.

No youth employee who refuses a bona fide offer of private employment under the conditions provided in this section shall be retained in employment for the period such private employment would be available. However, a worker shall be entitled to immediate resumption of his previous employment status if he is still in need and if he has lost his private employment through no fault of his own. Youth awaiting assignment who refuse to accept private employment shall be ineligible for employment on any project for the period during which the private employment would be available.

§ 402.24 *Political activities.* All persons paid from funds appropriated to the National Youth Administration shall observe the following rules relating to political activities:

(a) *No favors or rewards.* No person, directly or indirectly, shall promise any employment, position, work, compensation, or other benefit provided or made possible under the program of the National Youth Administration to any person as consideration, favor, or reward for any political activity or for the support of or opposition to any candidate or any political party in any election.

(b) *No discrimination.* No person shall deprive, attempt to deprive, or threaten to deprive by any means, any person of any employment, position, work, compensation, or other benefit provided or made possible under the program of the National Youth Administration on account of race, creed, color, or any political activity, support of, or opposition to any candidate or any political party in any election.

(c) *No solicitation.* No person shall knowingly solicit or knowingly be in any manner concerned in soliciting any assessment, subscription or contribution for the campaign expenses of any individual or political party from any person entitled to or receiving compensation or employment provided for by the program of the National Youth Administration.

(d) *No interference in elections.* No person employed in any administrative or supervisory capacity by any agency of the Federal Government whose compensation or any part thereof is paid from funds appropriated to the National Youth Administration shall use his official authority or influence for the purpose of interfering with an election or affecting the results thereof. While such persons shall retain the right to vote as they please and to express privately their opinions on all political subjects, they shall take no active part directly or indirectly in political management or in political campaigns or in political conventions. Any persons who violate the provisions of this section shall be subject to immediate discharge.

(e) *No running for political office.* No person employed in any administrative or supervisory capacity may be a candidate for any state, district, county, or municipal office (such office requiring full time of such person and to which office a salary or per diem attaches), in any primary, general or special election or who is serving as a campaign man-

ager or assistant thereto for any such candidate.

(f) *No furnishing lists for political purposes.* No person shall furnish or disclose, or assist in furnishing or disclosing, for political purposes, any list or names of persons receiving compensation or benefits provided for by the program of the National Youth Administration, to a political candidate, committee, or campaign manager, or to any person for delivery to a political candidate, committee, or campaign manager.

§ 402.25 *Voting.* Every person working for the National Youth Administration who is of legal age and meets other legal requirements retains his right to vote in any election, for any candidate he chooses. When the hours during which polling places are open or any other conditions prevent employees from freely exercising their voting privileges, scheduled hours of work may be adjusted to provide the necessary time for this purpose. Project employees shall not be paid for any allowance of time during which to vote, but they shall be permitted through a re-scheduling of hours to work their full quota of hours during the pay roll month in which the time off is granted.

ASSIGNMENT, CLASSIFICATION AND SEPARATION

§ 402.26 *Responsibility.* The State Youth Administrator or his authorized representative shall be responsible for the assignment, classification, transfer and termination of project employees paid from funds appropriated to the National Youth Administration. Youth employees shall be registered with employment offices designated by the Bureau of Employment Security of the Social Security Board.

EFFECTIVE DATE

§ 402.27 *Superseded and rescinded material.* These rules and regulations shall become effective at the beginning of pay roll periods on and after September 15, 1939, and shall supersede Administrative Order No. 2, dated July 13, 1939, and Administrative Order No. 4, dated August 16, 1939,[1] which shall be rescinded upon the effective date of this order.

IN THE MATTER OF PUBLIC HEARING FOR PURPOSE OF RECEIVING EVIDENCE UPON BASIS OF WHICH REGULATIONS MAY BE PROMULGATED FIXING AND ESTABLISHING A DEFINITION AND STANDARD OF IDENTITY FOR EACH OF THE FOLLOWING FOODS: CREAM, LIGHT CREAM, COFFEE CREAM, TABLE CREAM

REPORT OF PRESIDING OFFICER, SUGGESTED FINDINGS OF FACT, SUGGESTED CONCLUSIONS AND ORDER

*Report of Presiding Officer*

Pursuant to, and under the authority of, a notice in the above-entitled matter issued and filed by the Secretary of Agriculture on March 25, 1939, with the Archivist of the United States and published in the FEDERAL REGISTER (Vol. 4, No. 59, pp. 1355–1356), Tuesday, March 28, 1939[1] wherein the undersigned was designated as Presiding Officer to conduct in the place of the Secretary the public hearing herein, such hearing being in conformity with Section 701, subsection (e), of the Federal Food, Drug, and Cosmetic Act [Sec. 701, 52 Stat. 1055; 21 U.S.C. 371 (e)], and under and by virtue of the authority in said notice specifically recited (Sec. 401, 52 Stat. 1046; 21 U.S.C. 341), the said hearing was convened, as were all the hearings therein called, by the undersigned Presiding Officer at the time and place specified in said notice. Thereupon, there was read into the record that portion of said notice of the Secretary setting the time and place for the hearings; stating the purposes thereof; making specific reference to the proposed regulations, thereinafter set forth, and reciting that such proposed regulations were subject to adoption, rejection, amendment, or modification by the Secretary, in whole or in part, as the evidence adduced at the respective hearings warranted; making specific reference to the Rules of Procedure governing all the hearings published in the FEDERAL REGISTER January 13, 1939,[2] and designating the Presiding Officer.

Five copies of the FEDERAL REGISTER dated March 28, 1939, containing the notice and proposals of the Secretary, were offered and received in evidence, and each was marked "Government's Exhibit No. 1".

Certain announcements applicable to this hearing, as well as to all the hearings covered by said notice, were made with respect to the order of the procedure within the discretion of the Presiding Officer under the Rules hereinbefore mentioned; and as to appearances, the filing or suggested Findings of Fact, Conclusions and Order by the Presiding Officer, notice thereof, and the time that would be allowed for the filing of objections and exceptions thereto, proposed findings, written arguments and briefs by interested parties. Thereupon, the general order in which the several hearings would be held was announced; and subsequently this hearing was continued until 10:15 o'clock, A. M., May 10, 1939, at Room 3106, South Building, Department of Agriculture, Washington, D. C., where it proceeded, with several adjournments and intermissions intervening, until 1:45 o'clock, P. M., May 12, 1939, at which time the hearing was formally closed.

A review of the evidence, as well as the proposed findings of fact, briefs and arguments, discloses no substantial conflict with respect of the percentage of the output of cream passing across State lines; the minimum milk fat content of cream suggested under the Federal Advisory standard; the prevailing minimum milk fat content of most of the cream now on the market; the inexactness of the Babcock plant test generally used during the conditioning and adjusting process for determining and controlling the milk fat content of cream; and the accuracy and reliability of the Roese-Gottlieb method for ascertaining such milk fat content in the finished product.

There are points of conflict in the evidence, however, with respect of the principal subject matter of the hearing, namely, the definition and standard of identity for cream within the milk fat range of the proposal of the Secretary: the common or usual name or names for cream within the proposed range; and the method which should be prescribed for ascertaining the milk fat content of cream.

*Title, chapter, and section numbers used herein correspond to those used in the codified regulations of the Bureau of Marine Inspection and Navigation, Department of Commerce, filed with the Codification Board June 30, 1938. Section 1.1 was originally Section 600.1 of Title 10, CFR.

[1] 4 F.R. 1355 DI.

[2] 4 F.R. 223 DI.

Since the Federal Advisory Standard, or Standards, is frequently mentioned in the evidence and two of the Findings of Fact are based thereon, it should be here stated that such standards were based upon technical information and data acquired by the Food Standards Committee, a committee set up by the Department of Agriculture, and that committee's recommendation thereon to the Secretary, in the form of proposed administrative regulations, which, when adopted and announced by the Secretary, were known as Federal Advisory Standards. Since the enactment of the Federal Food, Drug, and Cosmetic Act of 1938, such information and data become the basis for proposed regulations which become the subject matter of public hearings under the Act. [R. 13–14; Fed. Food, Drug, and Cosmetic Act (52 Stat. 1040; 21 U.S.C. 301; Sec. 401 (52 Stat. 1046; 21 U.S.C. 341); Sec. 701 (a), (e) (52 Stat. 1055; 21 U.S.C. 371 (a), (e))]

In making findings of fact herein in respect of common or usual names, consideration has been given to the informative character of such names; and in respect of the method of determining the milk fat content, one of the principal factors entering into a definition and standard of identity, consideration has been given to exactness, reliability and scientific recognition.

Upon the basis of substantial evidence received at the hearing and appearing in the transcript, to which specific references are made in each instance following each of the findings, the undersigned Presiding Officer makes and suggests the findings of fact hereinafter set forth; and he further suggests that the Secretary of Agriculture issue an order setting out therein and as part thereof such findings of fact, omitting therefrom references to the pages of the Transcript of evidence, and that in and by such order the Regulation hereinafter set forth be promulgated:

*Suggested Findings of Fact*

*Meaning of milk as used herein.* The word "milk" as used in these findings means cows' milk.

1. *Cream—Identity in General.* Cream, in general, is the sweet, fatty liquid or semi-liquid separated from milk, with or without the addition thereto and intimate admixture therewith of sweet milk or sweet skim milk. It may be pasteurized or homogenized, or pasteurized and homogenized. (R., 32, 33, 92, 121, 135)

2. *Percentage crossing State lines.* That approximately 2 percent of the output of cream in the United States passes in commerce across State lines. (R., 71, 85, 98)

3. *Federal advisory standard—Minimum milk fat.* The Federal Advisory Standard for minimum milk fat of 18 percent for cream was established by the Department of Agriculture in 1903, and had not been changed up to the time of the enactment of the Federal Food, Drug, and Cosmetic Act of 1938; and in 1919 a minimum fat content for whipping cream of 30 percent was so established, and had not been changed up to the time of the enactment of said act. (R., 15)

4. *Federal advisory standard followed.* That more than one-third of the States have adopted and now follow the Federal Advisory Standard fixing the minimum milk fat content for cream at 18 percent; and such standard is permissive in other States. (R., 39, 40, 41, 79–80, 111; O. I. P. Ex. No. 4).

5. *Range milk fat content—Designation—Not uniform.* There are wide variations in the milk fat range, as well as in the designation, of cream as among and within the several States and cities where the range and designation are not established by law. (R., 20, 71, 75, 76, 84, 133–134; Gov. Ex. No. 2; O. I. P. Exs. Nos. 1, 2, 3)

6. *Minimum milk fat content established by States—Designations.* That more than three-fifths of 40 States which have established minimum standards for cream have established a minimum of 18 percent for "Cream"; five States a minimum of 18 percent for "Light Cream"; 17 States a minimum of 30 percent for "Whipping Cream", of which States 15 have established both a minimum milk fat content for "Cream" at 18 percent and for "Whipping Cream" at 30 percent. (R., 18–20, 77, 104, 111, 125, 135; Gov. Ex. No. 2; O. I. P. Ex. No. 4)

7. *Babcock milk fat test approximate.* That the Babcock test is a well known and generally recognized test used in many milk plants during the conditioning and adjusting process for determining and controlling the milk fat content of cream; that by this test a quick approximation may be made of the milk fat content; that such content cannot thereby be accurately determined, but only approximately within a range of one-half to one percent of the true milk fat content; that to assure a definite milk fat content in the finished product, when this test is used during the adjusting process in the plant, it is necessary to allow for a variation of from one percent to two percent. (R., 95, 99–100, 103, 105, 111–112)

8. *Roese-Gottlieb method accurate.* That the Roese-Gottlieb method, as set forth in "Official and Tentative Methods Of Analysis Of The Association Of Official Agricultural Chemists", Fourth Edition, 1935, page 277, under the caption, "Fat, Roese-Gottlieb Method—Official", is a well known, accurate and generally recognized method for ascertaining definitely the milk fat content of cream; that this method is not generally used in plants during the conditioning and adjusting process; that the time required by this method renders its use undesirable as a part of the adjusting or processing technique. (R., 26–29, 92, 111–112)

9. *Prevailing minimum milk fat content.* That most of the cream on the market at this time which contains less than 30 percent milk fat has a minimum milk fat content of 20 percent or more (R., 22–25, 126, 127; Gov. Ex. No. 3; O. I. P. Ex. No. 1).

10. *Milk fat range—Common or usual names—Synonymous names.* That the common or usual names for cream containing milk fat of not less than 18 percent but less than 30 percent are: "Cream", "Light Cream", "Coffee Cream", "Table Cream"; that those names are synonymous for cream of that milk fat range. (R., 18–20, 23–25, 57–58, 111, 124–125, 135; Gov. Ex. No. 2; O. I. P. Ex. No. 2)

*Suggested Conclusions and Order*

Upon the basis of the foregoing Findings of Fact, it is concluded that the following regulation should be promulgated:

REGULATION FIXING AND ESTABLISHING A REASONABLE DEFINITION AND STANDARD OF IDENTITY FOR THE FOOD COMMONLY KNOWN AS CREAM, LIGHT CREAM, COFFEE CREAM, TABLE CREAM

§ 18.500 *Cream—Light Cream, Coffee Cream, Table Cream—Identity.* Cream, Light Cream, Coffee Cream, Table Cream, is the sweet, fatty liquid or semiliquid separated from milk, with or without the addition thereto and intimate admixture therewith of sweet milk or sweet skim milk. It may be pasteurized or homogenized, or both. It contains not less than 18 percent, but less than 30 percent, of milk fat, as determined by the method prescribed in "Official and Tentative Methods of Analysis Of The Association of Official Agricultural Chemists", Fourth Edition, 1935, page 277, under "Fat, Roese-Gottlieb Method—Official". For the purposes of this section the word "milk" means cows' milk.

*Time Allowed for Filing Objections and Exceptions*

Within 10 days after the receipt of a copy of the FEDERAL REGISTER containing this report, together with the suggested findings of fact, conclusions in the form of a regulation, and order, any interested party may transmit to and file with the Hearing Clerk, Office of the Solicitor, United States Department of Agriculture, Washington, D. C., objections to any matter set out therein, and written argument or brief in support of any exceptions to any rulings of the Presiding Officer at said hearing, such objections or exceptions making specific reference to the pertinent pages of the Transcript

of the Evidence and the proceedings, or to the pertinent findings or conclusions.

This the 14th day of September 1939.

*Presiding Officer.*

IN THE MATTER OF PUBLIC HEARING FOR PURPOSE OF RECEIVING EVIDENCE UPON BASIS OF WHICH REGULATIONS MAY BE PROMULGATED FIXING AND ESTABLISHING A DEFINITION AND STANDARD OF IDENTITY FOR THE FOLLOWING FOOD: WHIPPING CREAM, HEAVY CREAM

REPORT OF PRESIDING OFFICER, SUGGESTED FINDINGS OF FACT, SUGGESTED CONCLUSIONS AND ORDER

*Report of Presiding Officer*

Pursuant to, and under the authority of, a notice in the above-entitled matter issued and filed by the Secretary of Agriculture on March 25, 1939, with the Archivist of the United States and published in the Federal Register (Vol. 4, No. 59, pp. 1355–1356), Tuesday, March 28, 1939,[1] wherein the undersigned was designated as Presiding Officer to conduct in the place of the Secretary the public hearing herein, such hearing being in conformity with Section 701, Subsection (e), of the Federal Food, Drug, and Cosmetic Act [Sec. 701, 52 Stat. 1055; 21 U.S.C. 371 (e)], and under and by virtue of the authority in said notice specifically recited (Sec. 401, 52 Stat. 1046; 21 U.S.C. 341), the said hearing was convened, as were all the hearings therein called, by the undersigned Presiding Officer at the time and place specified in said notice. Thereupon, there was read into the record that portion of said notice of the Secretary setting the time and place for the hearings; stating the purposes thereof; making specific reference to the proposed regulations, thereinafter set forth, and reciting that such proposed regulations were subject to adoption, rejection, amendment, or modification by the Secretary, in whole or in part, as the evidence adduced at the respective hearings warranted; making specific reference to the Rules of Procedure governing all the hearings published in the Federal Register January 13, 1939,[2] and designating the Presiding Officer.

Five copies of the FEDERAL REGISTER dated March 28, 1939, containing the notice and proposals of the Secretary, were offered and received in evidence, and each was marked "Government's Exhibit No. 1."

Certain announcements applicable to this hearing, as well as to all the hearings covered by said notice, were made with respect to the order of the procedure within the discretion of the Presiding Officer under the Rules hereinbefore mentioned; and as to appearances, the filing of suggested Findings of Fact, Conclusions and Order by the Presiding Officer, notice thereof, and the time that would be allowed for the filing of objections and exceptions thereto, proposed findings, written arguments and briefs by interested parties. Thereupon, the general order in which the several hearings were to be held was announced, and subsequently this hearing was adjourned until 1:45 o'clock, p. m., May 10, 1939, at Room 3106, South Building, Department of Agriculture, Washington, D. C., where it proceeded on May 10, 1939, and, after adjournment over on the following day, on May 12, 1939, until 1:45 o'clock, p. m. at which time the hearing was formally closed.

Although there were many matters within the scope of the hearing concerning which there was little conflicting evidence, there was considerable conflict in the evidence upon the principal subject matter of the hearing, namely, a definition and standard of identity for Whipping Cream or Heavy Cream. The points of conflict in the evidence revolved around the milk fat ranges within, approximately, the range set forth in the proposals of the Secretary, as such ranges vary in various sections of the country and particularly in those States and cities where such range has not been established by law; and coincident with such varying ranges, and frequently within the same range and in the same States and cities, the varied and multiple designations assigned to products within the same or similar milk fat ranges.

Upon the whole record, it appears that the names "Whipping Cream" and "Heavy Cream" are not synonymous throughout the United States; that they are not applied to one product with a definite milk fat range. Although there are many and varied regional and local designations for products with varying milk fat ranges within the range, or the approximate range, of the proposal of the Secretary, many such designations, or names, may not be known as common or usual names, nor recognized as such, in the absence of knowledge by consumers, generally, throughout the country, of the respective identities of the products to which such names are applied.

The Federal Advisory Standard, the basis of two of the findings of fact, was based upon technical information and data acquired by the Food Standards Committee, a committee set up by the Department of Agriculture. The recommendation of that committee in the form of a proposed administrative regulation became, when adopted and announced by the Secretary, what was known as the Federal Advisory Standard. Since the enactment of the Federal Food, Drug, and Cosmetic Act of 1938, such information and data so acquired by the Food Standards Committee become the basis for regulations proposed by the Secretary; and such proposed regulations in turn become the subject matter of public hearings under that act.

In making herein suggested findings of fact in respect of common or usual names, the vast area of the country and the many and varied regional and local trade practices obtaining have not been overlooked, nor has the informative, or lack of informative, character of such names to consumers generally; and likewise, in respect of the method of determining the milk fat content of the product, one of the principal factors entering into a definition and standard of identity, exactness, reliability and scientific recognition, or the lack thereof, has not been overlooked.

Upon the basis of substantial evidence received at the hearing and appearing in the transcript, to which specific references are made in each instance following each of the findings, the undersigned Presiding Officer makes and suggests the findings of fact hereinafter set forth; and he further suggests that the Secretary of Agriculture issue an order setting out therein and as part thereof such findings of fact, omitting therefrom references to the pages of the transcript of evidence, and that in and by such order the Regulations hereinafter set forth be promulgated:

*Suggested Findings of Fact*

1. *Cream—Identity in General.* That cream, in general, is the sweet, fatty liquid or semiliquid separated from cows' milk, with or without the addition thereto and intimate admixture therewith of sweet milk or sweet skim milk. It may be pasteurized or homogenized, or pasteurized and homogenized. (R. 102–104, 113–114)

2. *Percentage Crossing State Lines.* That approximately 2 percent of the output of cream in the United States passes in commerce across State lines. (R. 49–50)

3. *Whipping Cream—Federal Advisory Board Minimum Milk Fat.* That the Department of Agriculture in 1919 established a minimum milk fat content for whipping cream of 30 percent; that this was known as the Federal Advisory Standard; that such Advisory Standard had not been changed up to the time of the enactment of the Federal Food, Drug, and Cosmetic Act of 1938. (R. 14–15).

4. *Federal Advisory Standard Followed.* That one-third of the States have established a minimum milk content of not less than 30 percent for a product which is designated as whipping cream, and such standard is permissive in other States. (R. 20, 31, 32, 37; Gov't. Ex. No. 2)

5. *Lack of Uniformity in Milk Fat Range and Designation—Whipping Cream—Heavy Cream.* That there are many variations in the milk fat range and much diversity in the designations of cream on the market containing not less than 30 percent milk fat and within the several States and cities where no standards and designations are established by law; that the term "Whipping Cream" or "Light Whipping Cream" is most frequently used to identify cream containing not less than 30 percent milk fat; that the term "Heavy Cream", or "Heavy Whipping Cream", is most frequently used to identify cream containing not less than 36 percent milk fat. (R. 30–32, 35–37, 40, 92–93, 95; Gov't Ex. No. 2; O. I. P. Ex. Nos. 1, 2, 3)

6. *Prevailing Milk Fat Range of Whipping Cream.* That most of the product on the market at this time, which is designated as "Whipping Cream", or "Light Whipping Cream", contains not less than 30 percent, but less than 36 percent, of milk fat. (R. 20–22, 23, 30–32, 35, 37, 40, 92–93, Gov't. Exs. Nos. 2, 3; O. I. P. Exs. Nos. 1, 2, 3)

7. *Prevailing Milk Fat Range of Heavy Cream.* That most of the product on the market at this time which is designated as "Heavy Cream", or "Heavy Whipping Cream", contains more than 36 percent milk fat. (R. 22–23, 31, 35, 39–40, Gov't. Ex. No. 3; O. I. P. Exs. Nos. 1, 2, 3)

8. *Babcock Milk Fat Test Approximate.* That the Babcock test is a test used in many milk plants during the adjusting and standardizing process to govern or gauge the milk fat content of cream; that by this test the milk fat content of cream cannot be accurately determined, but only approximately within a range of one-half to one percent of the true milk fat content; that to assure a definite milk fat content in the finished product, when this test is used during the adjusting and standardizing process, allowance for a variation of one percent is made. (R. 78–79)

9. *Roese-Gottlieb Method Accurate.* That the Roese-Gottlieb method, as set forth in *"Official And Tentative Methods Of Analysis Of The Association Of Official Agricultural Chemists"*, Fourth Edition, 1935, page 277, under the caption, *"Fat, Roese-Gottlieb Method—Official"*, is a well known, accurate and generally recognized method for ascertaining definitely the milk fat content of cream; that this method is not generally used in plants during the conditioning and adjusting process; that the time required by this method renders its use undesirable as a part of the adjusting or processing technique. (R. 24–30, 80–81, 90–91)

10. *Whipping Cream—Light Whipping Cream—Identity.* That the sweet fatty liquid or semiliquid separated from cows' milk, with or without the addition thereto and intimate admixture therewith of sweet milk or sweet skim milk, containing not less than 30 percent, but less than 36 percent, of milk fat is commonly known as "Whipping Cream" or "Light Whipping Cream". (R. 23–30, 31, 32, 35, 37, 40, 105; Gov't. Ex. No. 2; O. I. P. Exs. Nos. 1, 2, 3, 4)

11. *Heavy Cream—Heavy Whipping Cream—Identity.* That the sweet fatty liquid or semiliquid separated from cows' milk, with or without the addition thereto and intimate admixture therewith of sweet milk or sweet skim milk, containing not less than 36 percent milk fat, is commonly known as "Heavy Cream" or "Heavy Whipping Cream." (R. 31, 32, 35, 37, 40, 106; Gov't. Ex. No. 2; O. I. P. Exs. Nos. 1, 2, 3, 4)

*Suggested Conclusions and Order*

Upon the basis of the foregoing findings of fact, it is concluded that the following regulation should be promulgated:

## FEDERAL POWER COMMISSION.

[Docket Nos. IT-5580, IT-5584]

IN THE MATTER OF NEW ENGLAND POWER COMPANY AND IN THE MATTER OF BELLOWS FALLS HYDRO-ELECTRIC CORPORATION AND CONNECTICUT RIVER POWER COMPANY

ORDER CONSENTING TO WITHDRAWAL OF APPLICATION, AND INITIATING PROCEEDINGS AND SETTING HEARING ON UNLICENSED PROJECT SITUATED ON THE CONNECTICUT RIVER IN AND NEAR BELLOWS FALLS, VERMONT

SEPTEMBER 22, 1939.

Commissioners: Clyde L. Seavey, Chairman; Claude L. Draper, Basil Manly, Leland Olds, John W. Scott.

Upon application and petition filed September 1, 1939, in the first above entitled matter, by New England Power Company (referred to as the New England Company), a Massachusetts corporation, whereby the said company:

(i) Seeks to withdraw its application, filed July 20, and amended July 22, 1939, for an order pursuant to Section 203 of the Federal Power Act authorizing and approving the merger and consolidation of its facilities subject to the jurisdiction of this Commission with the electric facilities of the Bellows Falls Hydro-Electric Corporation (referred to as the Bellows Falls Company), a Vermont corporation, and with certain of the facilities of the Connecticut River Power Company (referred to as the Connecticut Company), a New Hampshire corporation; and

(ii) Prayed that this Commission rescind its order of July 26, setting a hearing to be held September 13, 1939, on the said application, which said hearing has been postponed to September 25, 1939;

It appearing from the application, filed July 20, 1939, as amended, and exhibits thereto, from the aforesaid application for withdrawal thereof, from the petition for a declaratory determination disclaiming jurisdiction filed June 10, 1939, as subsequently amended, by the aforesaid three companies, and from an investigation made by the Commission that:

(a) The Connecticut River from its mouth to far above Bellows Falls, Vermont, in its natural condition, prior to the construction of any improvements or obstructions, was susceptible to use and was regularly used for transportation of merchandise and lumber by boats, rafts, and otherwise, in commerce among the colonies and states of New Hampshire, Vermont, Massachusetts and Connecticut and with other colonies and states and foreign nations; was improved for navigation by numerous projects undertaken from time to time particularly during the early part of the nineteenth century; was improved for navigation past Bellows Falls by the respondent Bellows Falls Company which, under the name of The Company for Rendering Connecticut River Navigable by Bellows Falls, for more than half a century maintained and operated a dam, canal, and locks at Bellows Falls and collected substantial amounts in tolls from boats, rafts, and other traffic on the River; as improved from time to time, was used for commercial navigation which flourished for many years, by rafts, flat boats, steam boats, and otherwise; was known and recognized as an important public highway for commercial navigation by the legislatures, chief executives, courts, and people of the states of Vermont, New Hampshire, Massachusetts, and Connecticut; was used commercially for long log driving which continued at least until approximately 1915, and for pulpwood floating, which continued at least until approximately 1926; and was used until comparatively recent years for numerous ferries for the transportation of commodities, vehicles and passengers between the states of Vermont and New Hampshire;

(b) In its natural condition and as from time to time improved, the Connecticut River from its mouth to far above Bellows Falls, Vermont, was actually navigable, by boats, rafts, and otherwise, for the transportation of passengers and commodities in commerce among the colonies and states of New Hampshire, Vermont, Massachusetts and Connecticut, and with other colonies and states and foreign nations;

(c) The Connecticut River from its mouth to far above Bellows Falls, Vermont, is navigable waters of the United States within the meaning of that term as used in the several River and Harbor Acts enacted by Congress, the Federal Water Power Act and the Federal Power Act and is a stream over which Congress has jurisdiction under its authority to regulate commerce with foreign nations and among the several states;

(d) The Bellows Falls Company was originally chartered as a company for improving navigation on the Connecticut River, and for that purpose constructed, from time to time reconstructed, operated, and maintained a dam across Connecticut River, a canal, locks, and appurtenant facilities in the towns of Bellows Falls, Vermont and Walpole, New Hampshire; the nature of its operations subsequently changed and from prior to September 19, 1890, until about the year 1907 it maintained a dam, canal, gates, water wheels, and appurtenant facilities in approximately the same location, which, of themselves and together with water wheels, water conduits, and appurtenant facilities owned, maintained, and operated by other persons were used for the development, transmission or utilization of power across, along, from, or in the Connecticut River;

(e) About the year 1907 the Bellows Falls Company constructed a new concrete dam in approximately the same location as the former dam; and thereafter until about the year 1926 maintained and operated such new dam together with a canal, gates, water wheels, water conduits, and appurtenant facilities, which it continued to operate and maintain, all of which of themselves and together with water wheels, water conduits, and appurtenant facilities owned, maintained, and operated by other persons were used for the development, transmission or utilization of power across, along, from, or in the Connecticut River;

(f) During the years 1926, 1927 and 1928 the Bellows Falls Company constructed a new hydroelectric project consisting of a dam across the Connecticut River located close to where the former dam was located, with roller gates and flashboards for raising the maximum level of the reservoir thereby impounded approximately 11 feet above the maximum level of the reservoir impounded by the former dam, an enlarged canal located in approximately the same position as the former canal, a power house containing three 17,000 kva generators each driven by a water turbine rated at 20,000 hp. on a 60-foot head, and appurtenant facilities (except as hereinafter recited in subparagraph (g)) including part of a primary line transmitting power from the project to the point of junction, at Pratts Junction, in the Town of Sterling, Massachusetts, with the interconnected primary transmission system of the New England Power Company; and said company converted an existing transmission line into a part of said project as a primary line transmitting power from the project to the point of junction with the interconnected primary transmission system of the Central Vermont Public Service Company, at Charlestown, Vermont; and said company from thenceforth operated and maintained the same, and continues to do so;

(g) Simultaneously with the construction of said dam and other structures or subsequently thereto the Connecticut Company constructed and has subsequently maintained and operated a part of said hydroelectric project consisting of the remaining part of the primary line to Pratts Junction, referred to in subparagraph (f), above, and converted a part of an existing transmission line between the Vernon Plant of said Company, and Bellows Falls, into a part of said project, and from thenceforth said parts of lines have been operated and maintained by it as parts of said project, and continue to be so operated;

(h) The Bellows Falls Company and the Connecticut Company propose to continue to operate and maintain said project and parts thereof substantially as heretofore;

(i) The operation and maintenance of the aforesaid dam from September 19, 1890, to March 3, 1899, was without the authorization of Congress and insofar as located within the State of New Hampshire was without any authorization by law, and was in violation of Section 9 of the River and Harbor Act of 1890, and as amended;

(j) The operation and maintenance of the dam as aforesaid from March 3, 1899, to about 1907, and the construction, operation, and maintenance of the aforesaid dam constructed in about 1907 and of the aforesaid dam constructed in the years 1926, 1927, and 1928, were and are without the consent or affirmative authorization of Congress, and without license or authorization being sought or obtained under the Federal Water Power Act, and were and are in violation of Sections 9 and 10 of the River and Harbor Act of 1899;

(k) The operation and maintenance of said project and of parts thereof after August 26, 1935, was not and is not under and in accordance with the terms of any permit or valid existing right-of-way granted prior to June 10, 1920 (within the meaning of those terms as used in Section 23 (b) of the Federal Power Act) and was not and is not under and in accordance with the terms of a license granted pursuant to the Federal Power Act, and was and is in violation of Section 23 (b) of that Act;

(I) The aforesaid hydroelectric project is so maintained and operated as to affect the interests of interstate and foreign commerce with respect to navigable capacities of navigable waters of the United States downstream from said dam; and the issuance of an order requiring the licensing of said project is appropriate, expedient and in the public interest for the conservation and utilization of navigation and water power resources of the region;

The Commission finds that:

(1) It is necessary and appropriate to carry out the provisions of the Federal Power Act, and it is in the public interest that the proceedings hereinafter provided for be had;

And the Commission *orders* that:

(A) The withdrawal of the aforesaid application by the New England Power Company is consented to, and the hearing on the said application set for September 25, 1939, is hereby dismissed, upon the express condition that such action on the part of this Commission:

(i) Shall be without prejudice to the proceedings hereinafter provided for and without waiver of jurisdiction with respect to the aforesaid hydroelectric project, including appurtenant transmission lines;

(ii) Shall not be construed as consenting to the merger of the facilities referred to in the said application or to the transfer of said hydroelectric project;

(B) A proceeding is hereby initiated, in which the Bellows Falls Company and Connecticut Company are made parties respondent, for the purpose of determining the following:

(i) The correctness and sufficiency of the recitals made in paragraphs (a) to (I), above, inclusive, and any other facts relevant thereto;

(ii) The findings which should be made by the Commission with reference thereto;

(iii) Whether, to conserve and utilize the navigation and water power resources of the region, it is appropriate, expedient, and in the public interest, or, to carry out any of the provisions of the Federal Power Act, it is otherwise necessary or appropriate, that said respondents or any of them be ordered to cease, within a reasonable time to be fixed by the Commission, to operate and maintain the aforessid hydroelectric project, or parts thereof, except under and in accordance with the terms of a license or licenses granted under the Federal Power Act;

(iv) Whether any other action should be taken by the Commission in the premises;

(C) A public hearing on the issues set forth above be held beginning at ten o'clock A. M.; October 23, 1939, in the Commission's Hearing Room, 1800 Pennsylvania Avenue, NW., Washington, D. C., for the purpose of taking evidence thereon and of affording the respondents and any other interested persons an opportunity to be heard and to make such showing of facts with respect to the issues raised as they may desire;

(D) That on or before October 18, 1939, the respondents file their responses to this order in conformity with the requirements specified for answers to formal complaints in Section 1.50 of the Commission's Rules of Practice and Regulations.

By the Commission.

## TITLE 24—HOUSING CREDIT

### FEDERAL HOUSING ADMINISTRATION

AMENDMENTS OF REGULATIONS [1] ISSUED BY THE ADMINISTRATOR IN CONNECTION WITH PROPERTY IMPROVEMENT LOANS UNDER TITLE I OF THE NATIONAL HOUSING ACT, AS AMENDED, EFFECTIVE SEPTEMBER 1, 1939

§ 501.3 (c), (e) and (f) (Regulation III, Sections 3, 5 and 6) are amended to read as follows:

(c) Shall be payable in equal monthly, semi-monthly or weekly installments. The final installment may be slightly more or less than the other installments, subject to such exceptions as may be made by the Administrator. Notes may not provide for a first payment less than six days nor more than two calendar months from the date of the note in the case of Class 1 and Class 2 loans nor less than six days nor more than six calendar months from the date of the approval of the Certificate of Conformity in the case of Class 3 loans. However, if fifty-one percent or more of the income of the maker is derived directly from the sale of agricultural crops, commodities, or livestock produced by him, a note may be made payable in installments corresponding to income periods shown on the credit statement. In such cases, the first payment must be made within twelve months of the date of the note and at least one payment must be made during each calendar year thereafter and the proportion of total principal to be paid in later years must not exceed the proportion of total principal payable in earlier years.

(e) Shall not have a final maturity in excess of three years and thirty-two days from the date thereof in the case of Class 1 and Class 2 (a) loans, nor in excess of ten years and thirty-two days in the case of Class 2 (b) loans, nor in excess of fifteen years and five calendar months in the case of Class 3 loans.

(f) May provide for a late charge, to be paid by the maker, not to exceed five cents (5¢) for each $1.00 of each installment more than fifteen days in arrears in the case of Class 1 and Class 2 loans, and not to exceed two cents (2¢) for each dollar of each installment more than fifteen days in arrears in the case of Class 3 loans. In lieu of late charges, notes may provide for interest on past due installments at a rate not in excess of the contract rate in the jurisdiction in which the note is drawn. No late charge or interest on a past due installment may be accrued in excess of $5.00. The borrower must be billed for the penalties collected as such, and evidence of such billing must be in the file if claim is made under the Contract of Insurance.

§ 501.6 (e) (Regulation VI, Section 5) is amended to read as follows:

(e) The prior credit approval of the Administrator shall be obtained on all Class 1 and Class 2 loans which increase the net amount outstanding, exclusive of financing charges, to any individual borrower to an amount in excess of $2,500 with respect to any obligation incurred pursuant to the provisions of Title I of the National Housing Act since July 1, 1939.

§ 501.11 (Regulation XI) is amended to read as follows:

Class 1 and Class 2 loans shall be reported on the proper form to the Federal Housing Administration at Washington, D. C., within 31 days from the date of the note or the date upon which it was purchased. Class 3 loans shall be reported in a like manner within 31 days of the first disbursement of any of the proceeds of the loan. Any loan refinanced as provided in Regulation X shall likewise be reported on the proper form within 31 days from the date of refinancing.

§ 501.12 (b) (4) (Regulation XII, Section 2, subsection (d)) is amended by adding at the end thereof a new paragraph to read as follows:

(5) The Administrator will credit to the insurance reserve of the insured institution conveying property to him under the provisions of this section the net amount which he may realize from the sale of the property, such credit to be made at such time as the Administrator may determine.

§ 501.13 (d), and (e), and (f) (4) (Regulation XIII, Sections 4, and 5, and Section 6, subsection (d)), are amended to read as follows:

(d) Shall be made to a borrower who is the fee simple owner of the land upon which the new structure is to be built, or who holds such land under a lease from the United States Government for an irrevocable term of at least six months beyond the maturity of the loan, or a lease having a term of at least thirty years to run from the date of the note, and who establishes to the satisfaction of the insured institution that, in addition to the loan, he has an investment in the property in cash, in land, or in an interest in the land in an amount equal to at least five per centum of the appraised value of the completed property as determined by the insured institution. The forms of lease used under this section shall be subject to the prior approval of the Administrator. In the event the property covered by a Class 3 loan is sold to an eligible borrower who assumes and agrees to pay the debt and whose credit is satisfactory to the insured institution, the seller may be released by the insured institution from his obligation under the loan upon notice thereof to the Administrator.

(e) Shall be secured by collateral security in the form of a duly recorded first mortgage, first deed of trust or similar instrument which constitutes a first lien upon such fee simple or leasehold interest in the land and buildings, appurtenances, and improvements thereon. At its option an insured institution may extend, for a period up to fifteen years from its original date, any Class 3 loan heretofore insured under the acts of February 3, 1938 or June 3, 1939 amending the National Housing Act, and the unpaid balance of any such loan shall be so amortized as to be fully paid at the end of said fifteen year term; provided that all notes so modified shall be subject to all the other provisions of the regulations of September 1, 1939, as amended, except that they shall not be subject to the payment of any insurance charge.

(f) (4) Prior to disbursing the proceeds of the loan or any portion thereof, the insured institution shall either (1) satisfy itself that the structure has been completed and obtain a certificate signed by the borrower and the builder to the effect that it has been completed in accordance with the plans or sketches and specifications, or (2) in the case of progress payments during construction, it shall satisfy itself that the value of the work done and materials on the site at the time of any such progress payment is equal to at least one hundred and ten per cent of such payment plus all such progress payments theretofore made, or that any such progress payment is due under a schedule of payments set out in the building contract.

§ 501.16 (j) (Regulation XVI, Section 10) is amended to read as follows:

(j) Amounts which may be salvaged by the Administrator with respect to a loan in connection with which an institution has been reimbursed under its Contract of Insurance shall not be added to the insurance reserve remaining to the credit of such institution except as provided in § 501.12 (b) (4) in the case of Class 3 loans.

§ 501.17 (f) (Regulation XVII, Section 6), is amended to read as follows:

(f) The insurance charge paid by the insured institution shall not be charged to the borrower if such charge would cause the total payments made by the borrower to exceed the maximum permissible amount which may be charged to the borrower for interest, discount and all other charges in connection with the transaction.

The Amendments contained herein are hereby declared to have the same force and effect as if included in and made a part of each Contract of Insurance, and shall be effective September 25, 1939.

## MANUFACTURERS' EXCISE TAX ON TOILET PREPARATIONS

### CHAPTER III OF REGULATIONS 46, APPROVED JUNE 18, 1932, AMENDED

*To Collectors of Internal Revenue and Others Concerned:*

In conformity with the provisions of section 3 of the Revenue Act of 1939, approved June 29, 1939 (Public, No. 155, 76th Cong., 1st sess.), which amends section 3401 of the Internal Revenue Code (53 Stat. Part 1) (derived from section 603 of the Revenue Act of 1932), and under the authority contained in section 3450 of the Internal Revenue Code, Chapter III of Regulations 46, as amended [Subpart D, Part 303, Title 26, Code of Federal Regulations], but only as prescribed and made applicable to the Internal Revenue Code by Treasury Decision 4885,[1] approved February 11, 1939 [Part 465, Subpart B of such Title 26], is further amended to read as follows:

"CHAPTER III—TOILET PREPARATIONS, ETC.

Section 3401 of the Internal Revenue Code—

There shall be imposed upon the following articles, sold by the manufacturer, producer, or importer, a tax equivalent to 10 per centum of the price for which so sold: Perfumes, essences, extracts, toilet waters, cosmetics, petroleum jellies, hair oils, pomades, hair dressings, hair restoratives, hair dyes, aromatic cachous, toilet powders, and any similar substance, article, or preparation, by whatsoever name known or distinguished; any of the above which are used or applied or intended to be used or applied for toilet purposes.

REVENUE ACT OF 1939

SECTION 3. TOILET PREPARATIONS TAX AMENDMENTS.

(a) Section 3401 of the Internal Revenue Code (relating to the tax on toilet preparations) is amended by inserting at the end thereof the following new paragraphs:

"In the case of a sale by a manufacturer to a selling corporation of an article to which the tax under this section applies, the transaction shall be prima facie presumed to be otherwise than at arm's length if either the manufacturer or the selling corporation owns more than 75 per centum of the outstanding stock of the other, or if more than 75 per centum of the outstanding stock of both corporations is owned by the same persons in substantially the same proportions. Sales by a manufacturer to a selling corporation shall in all other cases be prima facie presumed to be at arm's length.

"Notwithstanding section 3441 (a), in determining, for the purpose of this section, the price for which an article is sold, whether at arm's length or not, there shall be included any charge for coverings and containers of whatever nature, only if furnished by the actual manufacturer of the article, and any charge incident to placing the article in condition packed ready for shipment, only if performed by the actual manufacturer of the article, but there shall be excluded the amount of the tax imposed by this section, whether or not stated as a separate charge. Whether sold at arm's length or not, a transportation, delivery, insurance, or other charge, and the wholesaler's salesmen's commissions and costs and expenses of advertising and selling (not required by the foregoing sentence to be included), shall be excluded from the price only if the amount thereof is established to the satisfaction of the Commissioner, in accordance with the regulations."

(b) The amendments made by subsection (a) shall be effective only with respect to sales made after the date of the enactment of this Act.

"ARTICLE 22 (a) [Section 303.22 (a)]. *Scope of tax.* The tax attaches to the sale by the manufacturer of the articles enumerated in section 3401 of the Internal Revenue Code (derived from section 603 of the Revenue Act of 1932) and similar articles commonly or commercially known as toilet articles, which are used or applied, or intended to be used or applied, for toilet purposes. Any article advertised or held out to be suitable for toilet purposes, or for any purposes for which the articles enumerated in the section are customarily used, will be subject to the tax, regardless of the name by which it may be known or distinguished. The tax attaches to the sale by the manufacturer of any preparation which is used or applied or intended to be used or applied for toilet purposes or used in connection with the bath or care of the body, or applied to the clothing as a perfume or to the body as a toilet article. The fact that any particular product, preparation, or substance coming within the scope of the Act may have, or be held out to have, a medicinal, stimulating, remedial, or curative value does not exempt it from the tax, if it is used as an adjunct to the toilet or for toilet purposes.

"The tax will not attach to an article which is not a finished product or is not susceptible of use for toilet purposes but is only suitable for use in the manufacture of articles subject to tax.

"Shampoo oils and liquids containing 5 percent or less of saponaceous matter are taxable as toilet preparations.

"ART. 22 (b) [Section 303.22 (b)]. *Rate of tax.* The tax is payable by the manufacturer at the rate of 10 percent of the sale price as determined under article 22 (c), or 10 percent of the fair market price as established under article 22 (d), whichever is applicable.

"ART. 22 (c) [Section 303.22 (c)]. *Sale price.* Subject to the qualifications and additional exclusions specified in this article with respect to sales made after June 29, 1939, the sale price for purposes of the tax on all sales other than sales coming within the purview of section 3441 (b) of the Internal Revenue Code (same as section 619 (b) of the Revenue Act of 1932) shall be determined in accordance with the provisions of section 3441 (a) of the Internal Revenue Code (derived from section 619 (a) of the Revenue Act of 1932) and articles 8 to 14, inclusive, of these regulations. [Sections 303.8 to 303.14, inclusive, Title 26, Code of Federal Regulations]

"In determining the sale price for purposes of the tax on sales made after June 29, 1939,—

"(i) any charge for coverings and containers of whatever nature shall be included in the price only if furnished by the actual manufacturer of the article;

"(ii) any charge incident to placing the article in condition packed ready for shipment shall be included in the price only if performed by the actual manufacturer of the article; and

"(iii) the wholesaler's salesmen's commissions and costs and expenses of advertising and selling shall be excluded from the price only if the amount thereof is established to the satisfaction of the Commissioner, in accordance with these regulations. (See article 69) [section 303.69, Title 26, Code of Federal Regulations]

"ART. 22 (d) [Section 303.22 (d)]. *Fair market price.* Subject to the qualifications and additional exclusions specified in this article with respect to sales made after June 29, 1939, the sale price for purposes of the tax on articles sold (1) at retail, (2) on consignment, or (3) otherwise than through an arm's length transaction and at less than the fair market price, shall be the price for which such articles are sold in the ordinary course of trade, by manufacturers or producers thereof, as determined by the Commissioner in accordance with the provisions of section 3441 (b) of the Internal Revenue Code (derived from section 619 (b) of the Revenue Act of 1932) and article 15 of these regulations. [Section 303.15, Title 26, Code of Federal Regulations]

"In determining the fair market price under section 3441 (b) of the Internal Revenue Code as the basis for tax with respect to sales made after June 29, 1939,—

"(i) any charge for coverings and containers of whatever nature shall be included in the price only if furnished by the actual manufacturer of the article;

"(ii) any charge incident to placing the article in condition packed ready for shipment shall be included in the price only if performed by the actual manufacturer of the article; and

"(iii) the wholesaler's salesmen's commissions and costs and expenses of advertising and selling shall be excluded from the price only if the amount thereof is established to the satisfaction of the Commissioner, in accordance with these regulations. (See article 69 [section 303.69, Title 26, Code of Federal Regulations])

"ART. 22 (e) [Section 303.22 (e)]. *Sales otherwise than through an arm's length transaction.* The determination whether a sale was made otherwise than through an arm's length transaction depends necessarily upon the particular facts of each case. (See article 15 [section 303.15, Title 26, Code of Federal Regulations])

"With respect to sales by a manufacturer to a selling corporation made after June 29, 1939, the transaction shall be presumed prima facie to be otherwise than at arm's length, if either the manufacturer or the selling corporation owns more than 75 per cent of the outstanding stock of the other, or if more than 75 per cent of the outstanding stock of both corporations is owned by the same persons in substantially the same proportions. In all other cases, sales by a manufacturer to a selling corporation made after June 29, 1939, shall be presumed prima facie to be at arm's length unless the facts of the particular case establish a conclusion to the contrary."

(This Treasury decision is prescribed pursuant to section 3401 of the Internal Revenue Code (53 Stat. Part 1), as amended by section 3 of the Revenue Act of 1939 (Public, No. 155, 76th Cong., 1st sess.) and section 3450 of the Internal Revenue Code.)

(c) The terms "seizing officer," "officer seizing," etc., mean any officer, authorized and designated by the order of the Secretary dated August 31, 1939, (T. D. 31[1]) to carry out the provisions of the Act, who initially seizes property or adopts a seizure initially made by any other officer or by a private person.

(d) The term "custodian" means the officer required under the order of the Secretary dated August 31, 1939, (T. D. 31) to take custody of particular property which has been seized pursuant to the Act.

(Sec. 8, Act of Aug. 9, 1939, Public, No. 357, 76th Cong., 1st sess.) [T. D. 31, Aug. 31, 1939]

§ 153.2 (Article 2) *Custody and storage.* All property seized under the provisions of this Act shall be placed and remain in the custody of the custodian for the district in which the seizure was made. The seizing officer shall store the property in a place designated, either generally or in a particular case, by the custodian. The place of storage shall be in the judicial district in which the seizure occurred.

(Sec. 605, 46 Stat. 754; 19 U.S.C. 1605) [Sec. 8, Act of Aug. 9, 1939, Public, No. 357, 76th Cong., 1st sess.]

§ 153.3 (Article 3) *Appraisement.* The custodian shall appraise the property to determine the domestic value at the time and place of appraisement. The domestic value shall be considered the price at which such or similar property is freely offered for sale at the time and place of appraisement. If there is no market for the property at the place of appraisement, the domestic value shall be considered the value in the principal market nearest the place of appraisement.

(Sec. 606, 46 Stat. 754; 19 U.S.C. 1606) [Sec. 8, Act of Aug. 9, 1939, Public, No. 357, 76th Cong., 1st sess.]

§ 153.4 (Article 4) *Advertisement.* If the appraised value does not exceed $1,000, the custodian shall cause a notice of the seizure and of the intention to forfeit and sell or otherwise dispose of the property to be published once a week for at least three successive weeks in a newspaper of general circulation in the judicial district in which the seizure occurred.

The notice shall (1) describe the property seized and show the motor and serial numbers, if any; (2) state the time, cause and place of seizure; and (3) state that any person desiring to claim the property may, within twenty days from the date of first publication of the notice, file with the custodian a claim to the property and a bond with satisfactory sureties in the sum of $250.

(Sec. 28 (a), 52 Stat. 1089; 19 U.S.C., Supp. IV, 1607) [Sec. 8, Act of Aug. 9, 1939, Public, No. 357, 76th Cong., 1st sess.]

§ 153.5 (Article 5) *Requirements as to claim and bond.* The bond shall run to the United States, have sureties approved by the custodian, and be conditioned that in case of condemnation of the property the obligor shall pay all the costs and expenses of the proceedings to obtain the condemnation. When a claim and bond are received by the custodian, he shall, if he finds the documents in proper form and the sureties satisfactory, transmit the documents, together with a description of the property and a complete statement of the facts and circumstances surrounding the seizure, to the United States Attorney for the district in which the seizure was made for the purpose of proceeding to a condemnation of the property in the manner prescribed by law. If the documents are not in satisfactory condition when first received, a reasonable time for correction may be allowed. If correction is not made within a reasonable time the documents may be treated as nugatory, and the case shall proceed as though they had not been tendered.

The filing of the claim and the giving of the bond does not entitle the claimant to possession of the property, but stops the summary proceedings. The bond shall be on Bureau of Narcotics Form 171, and there shall be endorsed thereon a description of the seized property, which must, in every case, be signed by the claimant in the presence of the witnesses to the bond, and attested by them. The costs and expenses secured by the bond are such as are incurred after the filing of the bond, including storage costs, safeguarding, court fees, marshal's costs, etc.

(Sec. 608, 46 Stat. 755; 19 U.S.C. 1608) [Sec. 8, Act of Aug. 9, 1939, Public, No. 357, 76th Cong., 1st sess.]

§ 153.6 (Article 6) *Summary forfeiture.* If the appraised value does not exceed $1,000, and a claim and bond are not filed within the twenty days hereinbefore mentioned, the custodian shall declare the property forfeited and shall note the declaration of forfeiture on his records of the case. The custodian shall immediately advise the head of the bureau or agency to which he belongs of

[1] 4 F.R. 3840 DI.

the action which he has taken. Thereafter the property shall be retained in the custodian's district or delivered elsewhere for official use, or otherwise disposed of, in accordance with official instructions duly received by the custodian.

(Sec. 28 (b), 52 Stat. 1089; 19 U.S.C., Supp. IV, 1609) [Sec. 8, Act of Aug. 9, 1939, Public, No. 357, 76th Cong., 1st sess.]

§ 153.7 (Article 7) *Judicial forfeiture.* If the appraised value is greater than $1,000, (or if the appraised value is not more than $1,000, but a claim and satisfactory bond have been received, [Sec. 153.5]), the custodian shall transmit a description of the property and a complete statement of the facts and circumstances surrounding the seizure to the United States Attorney for the judicial district in which the seizure was made for the purpose of instituting condemnation proceedings. If the property has been advertised, the United States Attorney shall be furnished with copies of the newspapers containing the advertisements.

(Sec. 610, 46 Stat. 755; 19 U.S.C. 1610) [Sec. 8, Act of Aug. 9, 1939, Public, No. 357, 76th Cong., 1st sess.]

§ 153.8 (Article 8) *Petition for remission or mitigation of forfeiture.* Any person interested in any property within the scope of these regulations which has been seized, or which has been forfeited either summarily or by court proceedings, may file a petition for remission or mitigation of the forfeiture. Such petition shall be filed in duplicate with the custodian for the district in which the seizure occurred; shall be addressed to the Secretary of the Treasury; and shall be executed and sworn to by the person alleging the interest in the property.

The petition shall state in clear and concise terms the following:

(1) A complete description of the property, including motor and serial numbers, if any, and the date and place of seizure.

(2) The interest of the petitioner in the property, which shall be supported by bills of sale, contracts, mortgages, or other satisfactory documentary evidence.

(3) The facts and circumstances, to be established by satisfactory proof, relied upon by the petitioner to justify remission or mitigation.

Where the petition is for restoration of the proceeds of sale or for value of the property, if retained or delivered for official use, it must be supported by satisfactory proof that the petitioner did not know of the seizure prior to the declaration or condemnation of forfeiture and was in such circumstances as prevented him from knowing of the same.

(Secs. 613 and 618, 46 Stat. 756, 757; 19 U.S.C. 1613 and 1618) [Sec. 8, Act of Aug. 9, 1939, Public, No. 357, 76th Cong., 1st. sess.]

§ 153.9 (Article 9) *Time for filing petition.* A petition for remission or mitigation of a forfeiture must be seasonably filed. Where the petition is for restoration of the proceeds of sale, it must be filed within 90 days after the date of sale. If the property has been authorized for official use, the date of retention or delivery shall be regarded as the date of sale thereof for the purpose of computing the time in which a petition for remission or mitigation may be filed.

(Secs. 613 and 618, 46 Stat. 756, 757; 19 U.S.C. 1613 and 1618) [Sec. 8, Act of Aug. 9, 1939, Public, No. 357, 76th Cong., 1st sess.]

§ 153.10 (Article 10) *Handling of petition.* The custodian, upon receipt of a petition, shall cause such investigation to be made as the facts in the case may warrant, and thereafter shall transmit it, together with the report of any investigation made, to the Treasury Department and the Secretary of the Treasury, if he finds that the forfeiture was incurred without wilful negligence or without any intention on the part of the petitioner to defraud the revenue or to violate the law or finds the existence of such mitigating circumstances as to justify the remission or mitigation of the forfeiture, may remit or mitigate the forfeiture upon such terms and conditions as he deems reasonable and just.

If the petition involves a matter which has been referred to the Department of Justice for the institution of court proceedings, the custodian shall transmit the petition, immediately upon receipt, to the United States Attorney for the district in which the seizure occurred and notify the petitioner of such action.

(Sec. 618, 46 Stat. 757; 19 U.S.C. 1618) [Sec. 8, Act of Aug. 9, 1939, Public, No. 357, 76th Cong., 1st sess.]

§ 153.11 (Article 11) *Promulgation of regulations.* In pursuance of Section 8 of the Act of August 9, 1939, Public, No. 357, 76th Congress, 1st. session, and the Order of the Secretary dated August 31, 1939 (T.D. 31), the foregoing regulations are hereby made and promulgated.

Upon presentation of such copies in proper form, the copies will be received in evidence.

8. Subpoenas requiring the attendance of witnesses or the presentation of documents at the hearing may be issued by the Administrator of the Wage and Hour Division of the United States Department of Labor in his discretion and any person may apply in writing for the issuance by the Administrator of a subpoena. powered, after due notice and opportunity for hearing, to enter into marketing agreements with processors, producers, associations of producers, and others engaged in such handling of any agricultural commodity or product thereof as is in the current of interstate or foreign commerce, or which directly burdens, obstructs, or affects interstate or foreign commerce in such commodity or product thereof; and

Whereas, under the terms and provisions of said act, the Secretary of Agriculture is empowered to issue orders applicable to processors, associations of producers, and others engaged in the handling of any agricultural commodity or product thereof specified in subsection (2) of section 8c, such orders to regulate only such handling of such agricultural commodity or product thereof as is in the current of interstate or foreign commerce or which directly burdens, obstructs, or affects interstate or foreign commerce in such commodity or product thereof; and

Whereas, the Secretary, having reason to believe that the execution of a marketing agreement and the issuance of an order with respect to the handling of milk in the New Orleans, Louisiana, marketing area would tend to effectuate the declared policy of the act, gave, on June 16, 1939, notice of a hearing to be held on July 5, 1939, at Amite, Louisiana, and on July 6, 1939, at New Orleans, Louisiana, and at said times and places conducted public hearings at which all interested parties were afforded an opportunity to be heard on the proposed marketing agreement and proposed order; and

Whereas, after said hearings and after the tentative approval of a marketing agreement by the Secretary on September 8, 1939, handlers of more than 50 percent of the volume of milk covered by this order, which is marketed within the New Orleans, Louisiana, marketing area, refused or failed to sign such tentatively approved marketing agreement; and

Whereas, the Secretary determined, on the 25th day of September 1939, said determination being approved by the President of the United States on the 26th day of September 1939, that said refusal or failure to sign said tentatively approved marketing agreement tends to prevent the effectuation of the declared policy of the act and that the issuance of this order is the only practical means, pursuant to such policy, of advancing the interests of producers of milk in said area and is approved or favored by more than two-thirds of the producers who participated in a referendum conducted by the Secretary and who, during the month of June 1939 (said month having been determined by the Secretary to be a representative period), were engaged in the production of milk for sale in said marketing area; and

Whereas, the provision of the order providing for the payment to all producers delivering milk to the same handler of uniform prices for all milk delivered by them is approved or favored by at least three-fourths of the producers who participated in a referendum conducted by the Secretary and who, during the month of June 1939 (said month having been determined by the Secretary to be a representative period), were engaged in the production for market of milk covered in such order, said approval being separate and apart from the approval of producers as set forth above; and

Whereas, the Secretary has found and proclaimed the period August 1919–July 1929 to be the base period to be used in connection with the ascertainment of the purchasing power of milk handled in the New Orleans, Louisiana, marketing area; and

Whereas, the Secretary finds that the expenses which the market administrator will necessarily incur during any 12-month period of time for the maintenance and functioning of such agency for the administration of this order will be approximately $25,000 and that the payment by each handler of 4 cents per hundredweight on all milk received from producers is a proper maximum pro-rata share of such expenses; and

§ 942.0 *Findings.* Whereas, the Secretary finds, upon the evidence introduced at said hearings:

1. That milk received by handlers who distribute milk in said marketing area, which originates in States other than Louisiana, enters the current of interstate commerce; that the milk received by such handlers which originates in the State of Louisiana is inextricably intermingled with that milk which is in the current of interstate commerce in such a way that it is impossible to regulate the milk originating in States other than Louisiana without regulating that milk which originates in the State of Louisiana; that the handling of milk in the New Orleans, Louisiana, marketing area is in the current of interstate commerce or directly burdens, obstructs, or affects interstate commerce;

2. That the prices calculated to give milk handled in said marketing area a purchasing power equivalent to the purchasing power of such milk, as determined pursuant to section 2 and section 8e of said act, are not reasonable in view of the price of feeds, the available supplies of feed, and other economic conditions which affect the supply of, and demand for, such milk, and that the minimum prices set forth in this order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest;

3. That this order regulates the handling of milk in the same manner as and is applicable only to handlers defined in a marketing agreement upon which hearings have been held; and

4. That orderly marketing conditions for milk flowing into the New Orleans, Louisiana, marketing area are threatened with disruption which will result

in an impairment of the purchasing power of milk handled in said marketing area, and that the issuance of this order and all its terms and conditions will tend to effectuate the declared policy of said act:

Now, therefore, the Secretary of Agriculture, pursuant to the authority vested in him by the act, hereby orders that such handling of milk in the New Orleans, Louisiana, marketing area as is in the current of interstate commerce or as directly burdens, obstructs, or affects interstate commerce shall, from the effective date hereof, be in compliance with the following terms and conditions:

§ 942.1 *Definitions*—(a) *Terms.* The following terms shall have the following definitions:

(7) The term "handler" means any person, irrespective of whether such person is a producer or an association of producers, wherever located or operating, who engages in such handling of milk, which is disposed of as milk in the marketing area, as is in the current of interstate commerce, or which directly burdens, obstructs, or affects interstate commerce in milk and its products. This definition shall be deemed to include a cooperative association with respect to any milk received from producers at any plant operated by such cooperative association.

(8) The term "cooperative association" means any cooperative association of producers which the Secretary determines (a) to have its entire activities under the control of its members, and (b) to have and to be exercising full authority in the sale of milk of its members.

§ 942.2 *Market administrator*—(a) *Designation.* The agency for the administration hereof shall be a market administrator who shall be a person selected by the Secretary. Such person shall be entitled to such compensation as may be determined by, and shall be subject to removal at the discretion of, the Secretary.

(b) *Powers.* The market administrator shall:

(1) Administer the terms and provisions hereof.

(2) Report to the Secretary complaints of violation of the provisions hereof.

(c) *Duties.* The market administrator shall:

(1) Within 45 days following the date upon which he enters upon his duties, execute and deliver to the Secretary a bond, conditioned upon the faithful performance of his duties, in an amount and with surety thereon satisfactory to the Secretary.

(2) Pay, out of the funds provided by Sec. 942.9, the cost of his bond, his own compensation, and all other expenses necessarily incurred in the maintenence and functioning of his office.

(3) Keep such books and records as will clearly reflect the transactions provided for herein, and surrender the same to his successor or to such other person as the Secretary may designate.

(4) Publicly disclose to handlers and producers, unless otherwise directed by the Secretary, the name of any person who, within 2 days after the date upon which he is required to perform such acts, has not (a) made reports pursuant to Sec. 942.3, or (b) made payments pursuant to Sec. 942.8 and Sec. 942.9.

(5) Promptly vertify the information contained in the reports submitted by handlers.

§ 942.3 *Reports of handlers*—(a) *Submission of reports.* Each handler shall report to the market administrator, in the detail and on forms prescribed by the market administrator, as follows:

(1) On or before the 4th day after the end of each delivery period (a) the receipts of milk at each plant from producers and new producers, (b) the receipts of milk at each plant from handlers, (c) the quantity of milk, if any, produced by such handler, (d) the receipts of milk from any other source, (e) the utilization of all receipts of milk for the delivery period, and (f) the name and address of each new producer.

(2) On or before the 20th day after the end of each delivery period his producer pay roll, which shall show for each producer and new producer (a) the total delivery of milk with the average butterfat test thereof, (b) the net amount of the payment to such producer and new producer made pursuant to Sec. 942.8, and (c) the deductions and charges, if any, made by the handler.

(b) *Verification of reports.* Each handler shall make available to the market administrator or his agent (1) those records which are necessary for the verification of the information contained in the reports submitted in accordance with this section, and (2) those facilities which are necessary for the sampling and weighing of the milk of each producer and new producer.

§ 942.4 *Classification of milk*—(a) *Milk to be classified.* All milk received by each handler, including milk produced by him, if any, shall be classified by the market administrator in classes set forth in paragraph (b) of this section, subject to the provisions of paragraph (c) of this section.

(b) *Classes of utilization.* The classes of utilization of milk shall be as follows:

(1) Class I milk means all milk, including skimmed milk, disposed of as fluid milk, plain or flavored, and all milk not specifically accounted for as Class II milk or Class III milk.

(2) Class II milk means all milk (excepting milk from which the skimmed milk was disposed of as Class I milk) disposed of as cream (for consumption as cream), creamed cottage cheese, ice cream, and ice cream mix.

(3) Class III milk means all milk (excepting milk from which the skimmed milk was disposed of as Class I milk) used or disposed of as a milk product other than those specified in Class I milk and in Class II milk, and all milk accounted for as actual plant shrinkage but not to exceed 2 percent of the total receipts of milk from producers and new producers.

(c) *Interhandler and nonhandler sales.* Milk, including skimmed milk, disposed of by a handler to another handler or to a person who is not a handler but who distributes milk or manufactures milk products shall be classified by the market administrator as Class I milk: Provided, That if such selling handler, on or before the date fixed for filing reports pursuant to Sec. 942.3, furnishes to the market administrator a statement which is signed by the buyer and the seller that such milk was disposed of as other than Class I milk by the receiving handler or person, then such milk shall

be classified accordingly, subject to verification by the market administrator.

§ 942.5 *Minimum prices*—(a) *Class prices.* Except as set forth in paragraph (c) of this section, each handler shall pay, at the time and in the manner set forth in Sec. 942.8, not less than the following prices for milk of 4.0 percent butterfat content received at plants located in the 61–70 mile freight zone described in paragraph (b) of this section:

Class I milk—$2.32 per hundredweight: *Provided*, That with respect to Class I milk disposed of under a program approved by the Secretary for the sale or disposal of milk to low-income consumers, including persons on relief, the price shall be not less than that provided by such program.

Class II milk—$1.65 per hundredweight.

Class III milk—The price per hundredweight calculated by the market administrator as follows: subtract 2 cents from the average wholesale price per pound of 92-score butter at Chicago, as reported by the United States Department of Agriculture for the delivery period during which such milk was received, multiply by 4, and add 30 percent thereof.

(b) *Location differentials.* (1) The market administrator shall from time to time publicly announce the freight zone location of each handler's country plant or plants, according to the railway mileage distance between the country plants of the handler and the railroad terminal in the city of New Orleans, or according to the highway mileage distance between the country plant and the City Hall in New Orleans, whichever is shorter. Except as set forth in subparagraph (2) of this paragraph, the minimum price for milk received at any plant located in a freight zone other than the 61–70 mile zone and disposed of as Class I milk in the marketing area, shall be the minimum price for Class I milk applicable pursuant to this section, plus or minus the amount indicated in the following schedule, for the freight zone in which the plant is located:

| *Freight zone miles* | *Cents per hundredweight* |
|---|---|
| 0– 10 | +13.0 |

| 131–140 | −10.0 |
| 141–150 | −11.5 |
| Each additional 10 miles | Minus an additional 1.0 cent. |

(2) The minimum price of milk received from producers and new producers at a plant in which such milk is bottled and loaded for wholesale or retail delivery and disposed of as Class I milk in the marketing area shall be the minimum price for Class I milk provided in paragraph (a) of this section, plus 28 cents per hundredweight.

(3) The minimum price of milk received from producers and new producers at a plant in which such milk is bottled and loaded for wholesale or retail delivery in the marketing area and disposed of as Class II milk shall be the minimum price for Class II milk provided in paragraph (a) of this section, plus 20 cents per hundredweight.

(4) For the purpose of this section, the milk which was disposed of during each delivery period by each handler as Class I milk shall be considered to have been the milk received by such handler at plants within and nearest to the marketing area.

(c) *Sales outside the marketing area.* The price to be paid by a handler for milk received from producers and new producers and disposed of as Class I milk outside the marketing area, in lieu of the price otherwise applicable pursuant to paragraph (a) of this section, shall be, as ascertained by the market administrator, such price as is being paid, for milk of equivalent use, to dairy farmers supplying the market in which such milk was disposed, subject to a reasonable allowance for transportation.

§ 942.6 *Handlers who are also producers*—(a) *Application of provisions.* No provision hereof shall apply to a handler who is also a producer and who receives no milk from producers or an association of producers, except that such handler shall make reports to the market administrator at such time and in such manner as the market administrator may request, and shall permit the market administrator or his agent to verify such reports.

(b) *Milk purchased from producers.* In the case of a handler who is also a producer and who received, during the delivery period, milk from producers or new producers, the market administrator, before making the computations set forth in Sec. 942.7 (a) (1), shall (a) exclude the milk received by such handler in each class from other handlers, and (b) exclude from such handler's Class I milk that milk of such handler's own production which was disposed of as certified milk.

§ 942.7 *Computation and announcement of uniform prices to producers.* (a) For each delivery period the market administrator shall compute, subject to the provisions of Sec. 942.6, for each handler the uniform price per hundredweight of milk received by such handler during such delivery period as follows:

(1) For each plant, multiply the quantity of milk received from producers, new producers, and the quantity of milk of his own production disposed of in each class by the price applicable pursuant to Sec. 942.5;

(2) For each plant, multiply the hundredweight of milk received from producers, not including new producers, by the Class I location differential for such plant applicable pursuant to Sec. 942.5 (b) (1);

(3) Add to the amount computed pursuant to subparagraph (1) of this paragraph, the amount of the Class I location differential for each plant located in a zone beyond the 61–70 mile zone, computed pursuant to subparagraph (2) of this paragraph and subtract from the amount computed pursuant to subparagraph (1) of this paragraph, the amount of the Class I location differential for each plant located in a zone nearer than the 61–70 mile zone, computed pursuant to subparagraph (2) of this paragraph;

(4) Subtract from the sum computed pursuant to subparagraph (3) of this paragraph an amount determined by multiplying the quantity of milk received from new producers by the Class III price; and

(5) Divide the amount computed pursuant to subparagraph (4) of this paragraph by the hundredweight of milk received from producers, not including new producers. This result shall be known as the uniform price for such delivery period for milk (containing 4.0 percent butterfat) received from producers at plants located in the 61–70 mile freight zone.

(b) On or before the 6th day after the end of each delivery period the market administrator shall mail to all handlers, and publicly announce, the uniform price for each handler as determined pursuant to this paragraph, and the Class III price for such delivery period.

§ 942.8 *Payment for milk*—(a) *Time and method of payment.* On or before the 10th day after the end of each delivery period, each handler shall make payment, subject to the butterfat differential set forth in paragraph (c) of this section and to the location differentials set forth in paragraph (d) of this section, for the total value of milk received from producers and new producers during the delivery period, computed pursuant to Sec. 942.7 (a), as follows:

(1) To each producer to whom payment is not made pursuant to subparagraph (3) of this paragraph, at not less than the uniform price computed pursuant to Sec. 942.7 (a) for the quantity of milk received from such producer;

(2) To each new producer to whom payment is not made pursuant to subparagraph (3) of this paragraph, at the Class III price for the quantity of milk received from such new producer;

(3) To a cooperative association, with respect to milk which it causes to be delivered to a handler from producers and new producers who have signed membership agreements or other contracts with the cooperative association, which agreements or contracts expressly authorize the cooperative to collect the amount due such producers and new producers for their milk, and pursuant to which authorization the cooperative association is collecting payment for milk on behalf of its producers and new producers, or expressly assumes such responsibility by some authorized act of the board of directors, or of the membership in accordance with its bylaws, the total amount of money which such handler is obligated to pay for milk received from such producers and new producers, calculated as follows: (a) multiply the volume of milk received from such producers by not less than the uniform price computed pursuant to Sec. 942.7 (a), (b) multiply the volume of milk received from such new producers by the Class III price, and (c) add together the resulting amounts.

(b) *Errors in payments.* Errors in making any of the payments prescribed in this section shall be corrected not later than the date for making payments next following the determination of such errors.

(c) *Butterfat differential.* If during the delivery period any handler has received from any producer milk having an average butterfat content other than 4.0 percent, such handler, in making the payments prescribed in subparagraphs (1) and (3) of paragraph (a) of this section, shall add for each one-tenth of 1 percent of average butterfat content in milk above 4.0 percent not less than, or shall deduct for each one-tenth of 1 percent of average butterfat content in milk below 4.0 percent not more than, 4 cents per hundredweight. If during the delivery period any handler has received from any new producer milk having an average butterfat content other than 4.0 percent, such handler, in making the payments prescribed in subparagraphs (2) and (3) of paragraph (a) of this section, shall add or subtract, as the case may be, for each one-tenth of 1 percent of average butterfat content in milk above or below 4.0 percent, 4 cents per hundredweight.

## TITLE 41—PUBLIC CONTRACTS

## DIVISION OF PUBLIC CONTRACTS

IN THE MATTER OF THE EXTENSION OF THE MINIMUM WAGE DETERMINATION OF THE SECRETARY OF LABOR FOR THE LUGGAGE AND SADDLERY INDUSTRIES TO THE MANUFACTURE OF CARRIER'S TIE STRAPS AND LEATHER POUCHES

This matter is before me pursuant to Section 1 (b) of the Public Contracts Act (49 Stat. 2036; 41 U.S.C. Sup. III 35), entitled "An Act to provide conditions for the purchase of supplies and the making of contracts by the United States, and for other purposes", (hereinafter called the Act). On July 24, 1939, the Administrator of Public Contracts issued a notice of opportunity to show cause (4 F. R. 3446, D. I.) why the decision of the Secretary of Labor dated July 12, 1938, In the Matter of the Determination of the Prevailing Minimum Wages in the Luggage and Saddlery Industries (3 F. R. 1733, D. I.) should not be amended to include the manufacture or supply of carrier's tie straps and leather pouches (consisting of a leather pouch or pocket of holster type with belt loop used for carrying pliers and knife), and to show cause why in law and fact the minimum wages for employees engaged in the performance of contracts with agencies of the United States Government subject to the provisions of the Act of June 30, 1936 (49 Stat. 2036; 41 U.S.C. Sup. III 35) for the manufacture of these commodities should not be 40 cents an hour or $16.00 per week of forty hours, arrived at either upon a time or piece work basis for the States of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, Pennsylvania, New Jersey, Maryland, Delaware, Washington, Oregon, California, Idaho, Nevada, Arizona, Montana, Wyoming, Utah, Colorado, and New Mexico; and 37.5 cents an hour or $15.00 per week of forty hours, arrived at either upon a time or piece work basis, for the other 26 States and the District of Columbia.

This notice was based upon evidence before the Department showing that companies manufacturing carrier's tie straps and leather pouches (consisting of a leather pouch or pocket of holster type with belt loop used for carrying pliers and knife) follow similar manufacturing processes to those followed in the manufacture of luggage; that the majority of luggage manufacturers also manufacture such commodities; and that the same minimum wage prevails in the manufacture of such commodities as has been found by the Secretary of Labor to prevail in the manufacture of luggage.

Notice of opportunity to show cause was sent to all known members of the industry, to trade unions, to trade publications, and to trade associations in the field. Notice was given to all other interested parties by publication in the FEDERAL REGISTER (4 F.R. 3446, DI.).

Responses to the notice were received from seven companies. Four of these companies do not manufacture such commodities and are not affected by this action. Two of the other three companies advised the Administrator by letter that carrier's tie straps and leather pouches are regarded as products of the Luggage and Saddlery Industries, that the prevailing wage scale in the manufacture of these products is substantially the same as that in the manufacture of luggage and saddlery, and alleged that such commodities should be produced under the same labor standards. One company stated in its reply that it does not manufacture luggage and saddlery although it manufactures carrier's tie straps and leather pouches during two months of each year. The company also stated that its minimum wage scale is lower than that prevailing in the Luggage and Saddlery Industries.

On the basis of the evidence, the Public Contracts Board has submitted findings of fact and recommendations. The Board has found that carrier's tie straps and the leather pouches described above are manufactured in plants which are included within the

[1] Code of Federal Regulations section numbers.

scope of the minimum wage determination for the Luggage and Saddlery Industries or in closely similar plants; and that in the manufacture of these products, the prevailing minimum wage corresponds with the minimum wage determination made by the Secretary of Labor for the Luggage and Saddlery Industries.

On the basis of these findings, the Board recommends that the decision of the Secretary of Labor, dated July 12, 1938, In the Matter of the Determination of the Prevailing Minimum Wages in the Luggage and Saddlery Industries, be extended to include the manufacture of carrier's tie straps and leather pouches (consisting of a leather pouch or pocket of holster type with belt loop used for carrying pliers and knife).

I have examined these findings and recommendations of the Board and the evidence and other matters of record, together with the recommendations of the Administrator of Public Contracts, and I am of the opinion that such findings and recommendations are correct, and I adopt them as my own.

Therefore, I hereby proclaim,

That the minimum wage determination of July 12, 1938, for the Luggage and Saddlery Industries is extended to the manufacture of carrier's tie straps and leather pouches (consisting of a leather pouch or pocket of holster type with belt loop used for carrying pliers and knife).

This determination shall be effective and the minimum wages hereby established shall apply to all contracts for these products with agencies of the United States Government subject to the provisions of the Act of June 30, 1936 (49 Stat. 2036; 41 U.S.C. Sup. III 35), bids for which are received on or after October 11, 1939.

## TITLE 42—PUBLIC HEALTH

### FEDERAL SECURITY AGENCY—PUBLIC HEALTH SERVICE

[No. 7]

AMENDMENT TO THE REGULATIONS FOR THE GOVERNMENT OF THE UNITED STATES PUBLIC HEALTH SERVICE, 1931

FURNISHING OF MEDICAL RELIEF TO PERSONNEL OF UNITED STATES COAST AND GEODETIC SURVEY AND THEIR DEPENDENTS

*To Commissioned Officers and All Others Concerned:*

Pursuant to the authority contained in section 2 of the Act of April 26, 1939 (Public, No. 48, 76th Cong.), the Regulations for the Government of the United States Public Health Service, approved June 18, 1931, are hereby changed by amending paragraphs 603 (3) and 639 and by adding paragraphs 639a–639g, to read as follows:

§ 603. * * *

§ 3. Commissioned officers, ships' officers, and members of the crews of the vessels of the United States Coast and Geodetic Survey, active and retired, including those on shore duty and those on detached duty, and dependent members of families of such personnel.

§ 639. Commissioned officers, ships' officers, and members of the crews of the vessels of the United States Coast and Geodetic Survey on active duty, including those on shore duty and those on detached duty, shall receive hospital or out-patient relief at all relief stations of the Public Health Service without regard to length of service, on certificate of officers of the United States Coast and Geodetic Survey, identifying the applicant. Commissioned officers may sign their own certificates.

§ 639a. Retired commissioned officers, retired ships' officers and retired members of the crews of the vessels of the United States Coast and Geodetic Survey shall, upon presentation of evidence establishing their status, be furnished with hospital care at any United States marine hospital, and with out-patient relief at any first-, second-, or third-class station and dental relief at any station where there is a full-time dental officer on duty. When hospital care is required, the patient shall present himself at a marine hospital for admission; the expense of transfer from second- and third-class stations shall not be a charge against appropriations of the Public Health Service.

§ 639b. In emergency, at places where there is no Public Health Service relief station, officers of the United States Coast and Geodetic Survey may procure either hospital or out-patient relief for commissioned officers, ships' officers, and members of the crews of the vessels of the Coast and Geodetic Survey on active duty, including those on shore duty and those on detached duty, requiring it, and shall immediately report to the Surgeon General of the Public Health Service, through Coast and Geodetic Survey headquarters, forwarding as a part of the report the certificate of the attending physician as to the necessity for immediate treatment and the probable duration of the treatment required. Vouchers on proper forms duly certified by the said officer and signed by the person rendering the bill shall be forwarded to the Surgeon General through Coast and Geodetic Survey headquarters.

§ 639c. At ports where there is a relief station of the Public Health Service, when commissioned officers, ships' officers, and members of the crews of the vessels of the United States Coast and Geodetic Survey on active duty, including those on shore duty and those on detached duty, on account of injury or illness, require the immediate attention of a physician, and on account of the exigency of the case it is impossible to convey the patient to the relief station, temporary provision for medical attendance or care may be made by an officer of the United States Coast and Geodetic Survey, who will immediately report his action to the Public Health Service relief station at the port, and the treatment thereafter will be conducted by the Public Health Service, if in the judgment of the proper officer of the Public Health Service it may be done without detriment to the patient. Vouchers for such emergency treatment will be forwarded to the Surgeon General through said officer for approval and payment. Unreasonable charges for emergency relief will not be allowed.

§ 639d. Commissioned officers, ships' officers, and members of the crews of the vessels of the United States Coast and Geodetic Survey on active duty, including those on shore duty and those on detached duty, shall be admitted to hospital only in cases where the gravity of the disease or injury from which they suffer is such as to require hospital treatment, in the opinion of an officer of the Public Health Service, or of a reputable physician designated by the Administrator to act at a place where no regular relief station has been established, or of a physician temporarily employed as provided in paragraphs 639b and 639c.

§ 639e. Commissioned officers, ships' officers, and members of the crews of the vessels of the United States Coast and Geodetic Survey, including those on shore duty and those on detached duty, while on authorized leave or sick leave may receive medical and surgical relief only at regular established relief stations of the Public Health Service.

§ 639f. Commissioned officers who receive subsistence allowance as part of their compensation shall while receiving hospital treatment, reimburse the Government in the amount of one subsistence allowance as fixed by law.

§ 639g. Upon written application, in approved form, by commissioned officers, ships' officers, and members of the crews of the vessels of the United States Coast and Geodetic Survey, active or retired, the dependent members of families of such personnel shall be furnished medical advice and out-patient treatment at first-, second-, and third-class relief stations of the Public Health Service, and hospitalization at marine hospitals, if suitable accommodations, as determined by the medical officers in charge, are available therein, at a per-diem cost to the commissioned officer, ship's officer, or member of the crew concerned equivalent to the uniform per-diem reimbursement rate for Government hospitals as approved by the President for each fiscal year.

The term "dependent members of families" shall include only those relatives who are wholly dependent upon the commissioned officer, ship's officer, or member of the crew for support and shall not include persons employed by him.

The relationship of dependents, such as wife, son, daughter, etc., including full name, shall be stated in the application, and dependents shall be identified to the relief officer by certification of the applicant's commanding officer. Dependents of retired personnel will be identified by means of a certificate furnished by Coast and Geodetic Survey headquarters at time of retirement. Retired personnel will produce this certificate when seeking relief for dependents and execute necessary application for treatment at the station on blank forms provided for the purpose. At any second- or third-class relief station, except in cases of emergency, medical advice and out-patient treatment will be furnished dependent members of families only during the regular office hours of the relief station.*

Division of Marketing and Marketing Agreements.

DETERMINATION OF THE SECRETARY OF AGRICULTURE, APPROVED BY THE PRESIDENT OF THE UNITED STATES, WITH RESPECT TO AN ORDER REGULATING THE HANDLING OF MILK IN THE NEW ORLEANS, LOUISIANA, MARKETING AREA

Whereas the Secretary of Agriculture, pursuant to the powers conferred upon him by Public Act No. 10, 73d Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, having reason to believe that the execution of a marketing agreement and the issuance of an order, both of which regulate the handling of milk in the New Orleans, Louisiana, marketing area, would tend to effectuate the declared policy of the act, gave, on the 16th day of June 1939, notice of a public hearing which was held at Amite, Louisiana, on July 5, 1939, and at New Orleans, Louisiana, on July 6, 1939, and at said times and places all interested parties were afforded an opportunity to be heard on said proposed marketing agreement and proposed order; and

Whereas after said hearing and after the tentative approval by the Secretary, on September 8, 1939, of a marketing agreement, handlers of more than fifty percent of the volume of milk covered by such proposed order, which is marketed within the New Orleans, Louisiana, marketing area, refused or failed to sign such tentatively approved marketing agreement relating to milk:

Now, therefore, the Secretary of Agriculture, pursuant to the powers conferred upon him by said act, hereby determines:

1. That the refusal or failure of said handlers to sign said tentatively approved marketing agreement tends to prevent the effectuation of the declared policy of the act;

2. That the issuance of the proposed order is the only practical means, pursuant to such policy, of advancing the interests of producers of milk which is produced for sale in said area; and

3. That the issuance of the proposed order is approved or favored by over two-thirds of the producers who participated in a referendum conducted by the Secretary and who, during the month of June 1939, said month having been determined by the Secretary to be a representative period, were engaged in the production of milk for sale in said area.

In witness whereof, H. A. Wallace, Secretary of Agriculture of the United States, has executed this determination in duplicate and has hereunto set his hand and caused the official seal of the Department of Agriculture to be affixed hereto in the city of Washington, District of Columbia, this 25th day of September 1939.

§ 705.103 *Conditions of payment*—(a) *Promotion of conservation and good range management.* Payments for carrying out range-building practices are conditioned upon the adoption or maintenance of conservative range management practices designed to secure or maintain a good stand of grass or other palatable forage plants and in bringing about such use of the forage resources of the ranch as will most effectively carry out the purposes of the Soil Conservation and Domestic Allotment Act. Payments under the 1940 Range Conservation Program will be made only with respect to those ranching units on which the county committee certifies that such range management practices have been followed. The range-building practices approved by the county committee for any ranching unit shall be practices which the county committee finds are needed on the ranch in order to promote conservation and good range management.

(b) *Payments limited to range-building allowance.* The range-building payment with respect to any ranching unit shall not exceed the range-building allowance for such ranching unit. Payment will be made only if range-building practices are carried out according to specifications recommended by the State committee and approved by the regional director. Payments made for carrying out range-building practices shall not be subject to the provisions of Section 701.101 of the 1940 Agricultural Conservation Program Bulletin.

(c) *State or Federal aid.* No payment will be made for practices carried out with labor, seed, trees, and materials furnished entirely by any State or Federal agency other than the Agricultural Adjustment Administration, or for practices with respect to which a portion of the labor, seed, trees, or other materials used in carrying out such practices is furnished by a State or Federal agency other than the Agricultural Adjustment Administration, if such portion represents one-half or more of the total cost of carrying out such practices. If a portion of the labor, seed, trees, or other materials used in carrying out any practice is furnished by a State or Federal agency other than the Agricultural Adjustment Administration and such portion represents less than one-half of the total cost of carrying out such practice, payment will be made for such practice at one-half of the rate specified in Section 705.101: *Provided*, That labor, seed, trees, and materials furnished to a State, political subdivision of a State, or any agency thereof by an agency of the same State shall not be deemed to have been furnished by "any State • • • agency" within the meaning of this paragraph. Trees purchased from a Clark-McNary Cooperative State Nursery shall not be deemed to be paid for in whole or in part by a State or Federal agency. No payment will be made for the planting and protection of forest trees planted under a cooperative agreement entered into with the Forest Service in connection with the Prairie States Forestry Project.

§ 705.104 *Changes in leasing arrangements and other devices.* No payment will be made to any person who has for 1940 made any change from the 1939 leasing arrangements of range land for the purpose of, or which would have the effect of, diverting to such person any payment to which any lessee would be entitled if the 1939 leasing arrangements of such range land were in effect for 1940. If the State committee finds that any person who files an application for a payment pursuant to the provisions of the 1940 Range Conservation Program has made any change from the 1939 leasing arrangements of such range land or has employed any other scheme or device whatsoever for the purpose of, or which would have the effect of, depriving any other person of any payment or share therein to which such other person otherwise would be entitled, the Secretary may withhold in whole or in part from the person participating in such a scheme or device, or require such person to refund in whole or in part, the amount of any payment which has been or otherwise would be made to such person for performance in connection with the 1940 Range Conservation Program.

§ 705.105 *Eligibility for payment*—(a) *Persons eligible to file application.* Application for range-building payment may be made only by ranch operators. Range-building payments will be made to (1) a sole ranch operator, or (2) each ranch operator of a group of two or more ranch operators, provided they all signify in the application for the range-building payment a per centum of the total payment to be made to each ranch operator. In case there are two or more ranch operators, the application must be made by all of them, except that in cases where any ranch operator refuses to sign the application for payment the county committee shall determine the percentage share of each ranch operator and payment of his percentage share will be made to each ranch operator applying for payment in accordance with such determination.

(b) *Time and manner of filing application and information required.* Payment will be made only upon application submitted through the county office, on or before a date fixed by the regional director but not later than March 31, 1941. The Secretary reserves the right (1) to withhold payment to any ranch operator who fails to file any form or furnish any information required with respect to any ranching unit in which such ranch operator is interested, and (2) to refuse to accept any application for payment if any form or information required is not submitted to the county office within the time fixed by the regional director. At least two weeks' notice to the public shall be given in advance of the expiration of a time limit for filing prescribed forms.

(c) *Excess cotton acreage.* Any person who makes application for payment with respect to any ranching unit located in a county in which cotton is planted in 1940 shall file with such application a statement that the applicant has not knowingly planted or caused to be planted during 1940 cotton on land in any farm in which he has an interest in excess of the cotton acreage allotment established for the farm for 1940 and that cotton was not planted in excess of such allotment by his authority or with his consent.

Any person who knowingly plants cotton on his farm in 1940 on acreage in excess of the cotton acreage allotment established for the farm for 1940 shall not be eligible for any payment under the provisions of the 1940 Range Conservation Program. Any person having an interest in the cotton crop on a farm on which cotton is planted in 1940 on acreage in excess of the cotton acreage allotment for the farm for 1940 shall be presumed to have knowingly planted cotton on his farm on acreage in excess of such farm cotton acreage allotment if notice of the farm allotment is mailed to him prior to the completion of the planting of cotton on the farm, unless the farmer establishes the fact that the excess acreage was planted to cotton due to his lack of knowledge of the number of acres in the tract(s) planted to cotton. Such notice, if mailed to the operator of the farm, shall be deemed to be notice to all persons sharing in the production of cotton on the farm in 1940.

§ 705.106 *Payment restricted to effectuation of the purposes of the program.* All or any part of any payment which otherwise would be made to any person under the 1940 Range Conservation Program may be withheld (1) if he has adopted any practice which the Secretary determines tends to defeat any of the purposes of the 1940 or previous range conservation programs, (2) if, by means of any corporation, partnership, estate, trust, or any other device, or in any manner whatsoever, he has offset, or has participated in offsetting, in whole or in part, the performance for which such payment is otherwise authorized, or (3) if, with respect to forest land or woodland owned or controlled by him, he adopts any practice which the regional director finds is contrary to sound conservation practices.

No payment will be made to any person if it is determined in accordance with instructions issued by the Agricultural Adjustment Administration that, with respect to any ranch which he owns or operates, the stand of grass has been decreased or the forage, tree growth or watershed has been injured by overgrazing in 1940.

§ 705.107 *Payments computed and made without regard to claims.* Any payment or share of payment shall be computed and made without regard to questions of title under State law, without deduction of claims for advances (except as provided in Section 705.111), and without regard to any claim or lien against any crop or livestock, or proceeds thereof, in favor of the owner or any other creditor.

§ 705.108 *Increase in small payments.* The total payment computed for any person with respect to any ranching unit shall be increased as follows:

(1) Any payment amounting to 71 cents or less shall be increased to $1.00;

(2) Any payment amounting to more than 71 cents but less than $1.00 shall be increased by 40 percent;

§ 705.109 *Payments limited to $10,000.* The total of all payments made in connection with programs for 1939 under Section 8 of the Soil Conservation and Domestic Allotment Act to any individual, partnership, or estate with respect to farms, ranching units, and turpentine places located within a single State, Territory, or possession, shall not exceed the sum of $10,000 prior to deduction for association expenses in the county or counties with respect to which the particular payment is made. The total of all payments made in connection with programs for 1939 under Section 8 of the Soil Conservation and Domestic Allotment Act to any person other than an individual, partnership or estate with respect to farms, ranching units and turpentine places in the United States (including Alaska, Hawaii, and Puerto Rico) shall not exceed the sum of $10,000 prior to deduction for association expenses in the county or counties with respect to which the particular payment is made.

All or any part of any payment which has been or otherwise would be made to any person under the 1940 Agricultural Conservation Program, including the Range Conservation Program, may be withheld or required to be returned if he has adopted or participated in adopting any scheme or device, including the dissolution, reorganization, or formation of any corporation, partnership, estate, trust, or by any other means, which was designed to evade, or would have the effect of evading, the provisions of this section.

§ 705.110 *Deductions for association expenses.* There shall be deducted pro rata from the payments with respect to any ranching unit all or such part as the Secretary may prescribe of the estimated administrative expenses incurred or to be incurred by the county agricultural conservation association in the county in which the ranching unit is located.

§ 705.111 *Assignments.* Any person who may be entitled to any payment in connection with the 1940 Range Conservation Program may assign his interest in such payment as security for cash loaned or advances made for the purpose of financing the making of a crop in 1940. No such assignment will be recognized unless the assignment is made in writing on Form ACP–69 in accordance with instructions (ACP–70) issued by the Agricultural Adjustment Administration and unless such assignment is entitled to priority as determined under the instructions governing the recording of such assignments issued by the Agricultural Adjustment Administration.

Nothing contained in this Section 705.111 shall be construed to give an assignee a right to any payment other than that to which the ranch operator is entitled nor (as provided in the statute) shall the Secretary or any disbursing agent be subject to any suit or liability if payment is made to the ranch operator without regard to the existence of any such assignment.

§ 705.112 *Establishment of grazing capacities.* There shall be established a grazing capacity for each ranching unit for which an application for determination of grazing capacity is received on or before a date established by the regional director as affording reasonable opportunity for the filing of such applications. In determining grazing capacity, consideration shall be given to the following: (a) composition, palatability, and density of forage growth; (b) climatic fluctuations; (c) distribution and character of watering facilities; (d) topographic and cultural features; (e) presence or absence of rodents and poisonous plant infestations; and (f) number and classes of livestock previously carried. The average of the individual grazing capacities established for all ranching units in a county shall not exceed the county average grazing capacity limit established by the Agricultural Adjustment Administration on the basis of available statistics.

§ 705.113 *Appeals.* Any person may within 15 days after notice thereof is forwarded to or available to him request the county committee in writing to reconsider its recommendation or determination in any of the following matters respecting any ranching unit in which he has an interest: (a) eligibility to file an application for payment, (b) grazing capacity established for the range land in such ranching unit, or (c) any other matter affecting the right to or the amount of his payment with respect to the ranching unit. The county committee shall notify such person of its decision in writing within 15 days after receipt of such written request for reconsideration. If such person is dissatisfied with the decision of the county committee, he may, within 15 days after such decision is forwarded to or made available to him, appeal in writing to the State committee. The State committee shall notify such person of its decision in writing within 30 days after the receipt of the appeal. If such person is dissatisfied with the decision of the State committee he may, within 15 days after such decision is forwarded to or made available to him, request the regional director to review the decision of the State committee.

Written notice of any decision rendered under this section by the county or State committee shall also be issued to each person known to it who, having an interest in the operation of the ranching unit, may be adversely affected by such decision. Only a person who shows that he is adversely affected by the outcome of any request for reconsideration or appeal may appeal the matter further, but any person who, having an interest in the operation of the ranching unit, would be affected by the decision to be made on any reconsideration by the county committee or subsequent appeal shall be given a full and fair hearing if he appears when the hearing thereon is held.

§ 705.114 *State and regional bulletins, instructions and forms.* The Agricultural Adjustment Administration is hereby authorized to make such determinations and to prepare and issue such State and regional bulletins, instructions, and forms as may be required pursuant to the provi-

sions hereof in administering the 1940 Range Conservation Program.

### DEPARTMENT OF AGRICULTURE.

#### Division of Marketing and Marketing Agreements.

DETERMINATION OF THE SECRETARY OF AGRICULTURE, APPROVED BY THE PRESIDENT OF THE UNITED STATES, WITH RESPECT TO AN AMENDMENT TO ORDER NO. 27 REGULATING THE HANDLING OF MILK IN THE NEW YORK METROPOLITAN MARKETING AREA

Whereas the Secretary of Agriculture, pursuant to the powers conferred upon him by Public Act No. 10, 73d Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, having reason to believe that the execution of a marketing agreement and the issuance of an amendment to Order No. 27,[1] both of which regulate the handling of milk in the New York Metropolitan marketing area, would tend to effectuate the declared policy of the act, gave, on August 17, 1939, notice of a public hearing which was held at Syracuse, New York, on August 24, 1939, and at New York City, New York, on August 25, 1939, and at said times and places afforded all interested parties an opportunity to be heard on said proposed marketing agreement and proposed amendment to Order No. 27; and

Whereas after said hearing and after the tentative approval by the Secretary on September 12, 1939, of a marketing agreement, handlers of more than fifty percent of the volume of milk covered by such proposed amendment to Order No. 27, which is produced for sale in the New York Metropolitan marketing area, refused or failed to sign such tentatively approved marketing agreement relating to milk:

Now, therefore, the Secretary of Agriculture, pursuant to the powers conferred upon him by said act, hereby determines:

1. That the refusal or failure of said handlers to sign said tentatively approved marketing agreement tends to prevent the effectuation of the declared policy of the act;

2. That the issuance of the proposed amendment to Order No. 27 is the only practical means, pursuant to such policy, of advancing the interests of producers of milk which is produced for sale in said area; and

3. That the issuance of the proposed amendment to Order No. 27 is approved or favored by over two-thirds of the producers who participated in a referendum conducted by the Secretary and who, during the month of July 1939, said month having been determined by the Secretary to be a representative period, were engaged in the production of milk for sale in said area.

In witness whereof, H. A. Wallace, Secretary of Agriculture of the United States, has executed this determination in duplicate and has hereunto set his hand and caused the official seal of the Department of Agriculture to be affixed hereto in the city of Washington, District of Columbia, this 27th day of September 1939.

Commissioners: Clyde L. Seavey, Chairman; Claude L. Draper, Basil Manly, Leland Olds, John W. Scott.

It appearing to the Commission that:

(a) On August 19, 1938, the Colorado-Interstate Gas Company filed with the Federal Power Commission its agreement, dated October 3, 1929, with the Colorado-Wyoming Gas Company, designated in the files of the Commission as Colorado-Interstate Gas Company Rate Schedule F.P.C. No. 3, providing for the sale of natural gas by the Colorado-Interstate Gas Company to the Colorado-Wyoming Gas Company for resale;

(b) On August 19, 1938, the Colorado-Interstate Gas Company filed with the Commission its supplemental agreement, dated October 8, 1929, with the Colorado-Wyoming Gas Company, designated in the files of the Commission as Supplement No. 1 to Colorado-Interstate Gas Company Rate Schedule F.P.C. No. 3, modifying that article of said Rate Schedule F.P.C. No. 3 which specifies the prices to be paid for the natural gas sold;

(c) Said agreement of October 3, 1929, as modified by the supplemental agreement of October 8, 1929, provides for certain periodic increases in the rates to be paid by the Colorado-Wyoming Gas Company, which proposed increases are to take effect at the expiration of each five year period during the life of said agreement;

(d) On August 26, 1939, the Colorado-Interstate Gas Company, acting pursuant to the provisions of Section 54.3-C of the Rules of Practice and Regulations Under the Natural Gas Act and Commission Order No. 57, filed with the Commission a document, dated August 25, 1939, designated in the files of the Commission as Supplement No. 1 to Supplement No. 1 to Colorado-Interstate Gas Company Rate Schedule F.P.C. No. 3, providing that in accordance with the terms of said agreement of October 3, 1929, as modified by said supplemental agreement of October 8, 1929, an increased rate for natural gas sold to the Colorado-Wyoming Gas Company would take effect on September 28, 1939;

(e) Said Supplement No. 1 to Supplement No. 1 to Colorado-Interstate Gas Company Rate Schedule F.P.C. No. 3 sets forth certain statements purporting to justify the proposed increase in rates;

(f) The increased schedule of rates contained in said Colorado-Interstate Gas Company Rate Schedule F.P.C. No. 3, as modified by Supplement No. 1 thereto, which the said Supplement No. 1 to Supplement No. 1 proposes to make effective on September 28, 1939, may result in excessive rates to the Colorado-Wyoming Gas Company, or place an undue burden upon ultimate consumers of natural gas, which increased schedule of rates has not been shown to be justified;

The Commission finds that:

It is necessary, desirable and in the public interest that the Commission enter upon a hearing concerning the lawfulness of the proposed increased rates or charges and that said proposed increased rates or charges be suspended pending such hearing and the decision thereon but not for a longer period than five months from September 28, 1939;

The Commission, upon its own motion, orders that:

(A) A public hearing be held on October 30, 1939, at 10 o'clock a. m., in the hearing room of the Federal Power Commission, in the Hurley-Wright Building, 1800 Pennsylvania Avenue NW., Washington, D. C., concerning the lawfulness of the rates which the document of August 25, 1939, designated in the files of the Commission as Supplement No. 1 to Supplement No. 1 to Colorado-Interstate Gas Company Rate Schedule F.P.C. No. 3, proposes to make effective as of September 28, 1939;

(B) Pending such hearing, the agreement of October 3, 1929, as modified by the supplemental agreement of October 8, 1929, between the Colorado-Interstate Gas Company and the Colorado-Wyoming Gas Company, as filed with the Commission on August 19, 1938, and as further modified by the document of August 25, 1939, as filed with the Commission on August 26, 1939, designated in the files of the Commission as Colorado-Interstate Gas Company Rate Schedule F.P.C. No. 3, and Supplement No. 1, and Supplement No. 1 to Supplement No. 1 thereto, respectively, in so far as they provide for an increase in rates to take effect as of September 28, 1939, be and the same are hereby suspended for the period of five months beyond September 28, 1939, unless the Commission shall otherwise order;

(C) During the said period of suspension the rates now being collected and received by the Colorado-Interstate Gas Company from the Colorado-Wyoming Gas Company, as provided in the said Colorado-Interstate Gas Company Rate Schedule F.P.C. No. 3 and Supplements Nos. 1 and 3 thereto, shall remain and continue in full force and effect.

By the Commission.

## TITLE 24—HOUSING CREDIT

## UNITED STATES HOUSING AUTHORITY

### PART 612—PREPARATION OF DRAWINGS AND SPECIFICATIONS *†

Sec.
612.1 General requirements.
612.2 Review and approvals.
612.3 Number of copies for review.
612.4 Architect's responsibility.
612.5 Construction costs and cost estimates.
612.6 Scope of Architect's work.
612.7 General suggestions.
612.8 Job program.
612.9 Method of bidding.
612.10 Contract documents and bid forms.
612.11 Evaluation of bids.
612.12 Construction difficulties.
612.13 Increased overhead.

§ 612.1 *General requirements.* As indicated in the "Terms and Conditions" accompanying the loan contracts, the final plans, specifications and contract documents to be used for the construction of a project must meet with the approval of the USHA before construction contracts may be awarded by the local housing authority. To facilitate and aid the local housing authority and its architect, the following points are suggested: As soon as feasible after the loan contract is executed, it is suggested that an authorized member or representative of the local authority accompanied by the architests (and the architects' designers and engineers, as necessary) visit the USHA regional office. The architects should send in advance, or bring with them, preliminary studies, these to consist of a site plan, sketch plans of the housing types, a description of the proposed type of construction, a tabulation of the unit distribution, and the pertinent data used in formulating the preliminary studies. The preliminary studies should be based upon such considerations as the site boundaries and adequate information as to the topography, detailed knowledge or maps of the utilities systems available and proposed, the proper system of heating, and the estimates of cost in the Application as approved and adjusted to the then current situation. The studies prepared in connection with the Application, if fulfilling the above requirements, will suffice for this purpose. When the architects and the members or representatives of the local authority arrive to confer with the USHA there will be a comprehensive discussion of the entire problem with the various specialists and technicians of the USHA participating. It is desirable that the architects and members or representatives plan to remain in the regional office for a time sufficiently long so that when they leave they may carry with them working agreements, reduced to sketches and memoranda, as to the following: (1) Housing types; (2) Heating, cooking, and utilities systems; (3) Site plan and site engineering; (4) Unit plans and unit distribution; (5) Types and materials of construction; (6) Program for tests of sub-soil conditions; (7) Overall estimates and cost limitations; (8) The system of bidding; (9) Other pertinent matters which can be readily disposed of at that time. These agreements will be adequate to enable the architects to proceed expeditiously with the preparation of full preliminary plans and specifications. The full preliminary drawings and outline specifications are those to which reference is made in Article 3 (a) of the suggested form of Architect's Contract. Immediately following their visit to the regional office the architects should proceed with these drawings and specifications on the basis of the working agreements. Except in unusual cases, it is not contemplated that the full preliminary drawings and outline specifications need be submitted to the regional office for review but that they will be reviewed in the field and working agreements given as in the case of the preliminary studies.*† [Sec. B]

§ 612.2 *Review and approvals.* As soon as working agreements on the preliminary drawings and outline specifications have been reached the architects should proceed with the final plans, specifications and contract documents. The local authority may, in its discretion, submit these in whole or in part to the USHA regional office for review prior to completion, but this will not be necessary and in general will not be considered desirable since such submission may involve delays. It is contemplated that the USHA project adviser will, in each case, maintain close contact with the local authority during the development of the final plans and specifications and that he will arrange for field reviews by such technical and other specialists from the USHA as may be necessary in order to secure prompt disposition of all questions as they arise. However the final plans, specifications and contract documents should be submitted to Washington not lated than the time of advertising for bids in order that they may be reviewed at an early date prior to or during the period of bidding and be modified as may be found necessary by addenda. The suggested form of Architect's Contract anticipates that the final plans will be drawn in ink on tracing cloth. At the option of the local housing authority, pencil working drawings, if fully adequate for the purpose, will be entirely satisfactory to the USHA. However, if the contract contemplates the preparation of drawings in ink on tracing cloth and the local authority and the architects agree to substitute pencil working drawings, a suitable adjustment of the fee should be made part of the agreement. Throughout the period from loan contract to construction contract, the staff members of the USHA, in order to expedite the work, are authorized to reach such informal working agreements in the field, as the work progresses, as may be necessary. These agreements will be summarized in written memoranda given to the local authority by staff members of the USHA. Likewise, on matters which require review and discussion in the regional office, working agreements can be reached during visits of the local housing authority or its staff in the regional office, or by letter following the review of plans or other documents. In order to determine that the project complies with the terms of the United States Housing Act, the USHA finds it necessary to make a review and check of all drawings and specifications before or during the bidding period and prior to approval for contract purposes. However, it should be borne in mind that the primary responsibility for the success of the project rests with the local authority and, through them, with their technical aids, and that the plans and specifications must be so conceived, prepared and checked as to insure this success. Local authorities are, therefore, urged to review the plans and specifications thoroughly and painstakingly prior to submission for approval. By such procedure the facilities of the USHA will not be overtaxed, the USHA will be able to render more prompt service in the review and approval of contract documents, and the chances for errors and oversights which lead to unsatisfactory conditions or to increased cost, or both, will be greatly diminished.*† [Sec. C]

§ 612.3 *Number of copies for review.* As indicated in the "Terms and Conditions", six complete sets of plans, specifications, and other contract documents as proposed for bidding should be submitted to the USHA for review at the time of advertising for bids, or before. In addition, and during the process of development of the drawings and specifications and whenever these are submitted to the regional office for purposes of securing informal approval and suggestions, the number of copies will have to be determined in the light of circumstances at that time, but it is anticipated that in no case will the number of copies of drawings or other documents submitted for these purposes exceed eight. It is suggested that the number of copies of contract documents to be supplied by the architect, and for which blank spaces are provided in Section 6 of the suggested form of Architect's Contract, be made to conform to the above.*† [Sec. D]

§ 612.4 *Architect's responsibility.* No approval, formal or informal, by the USHA shall be construed to relieve the architect of his responsibility to the local housing authority as to the accuracy and completeness of the plans and other contract documents. The Architect should submit, with his final working drawings and specifications, a statement to the effect that the requirements of the local Building Department and of other agencies, public or private, having jurisdiction, have been complied with, or exemptions to existing requirements have been obtained.*† [Sec. E]

§ 612.5 *Construction costs and cost estimates.* The United States Housing Act [1] sets a maximum limit on the cost per room and per dwelling unit, and a further limit on the total cost of a project is established in the loan contract. It is obvious that architects must design within these limits. The preliminary cost estimates and those based on the working drawings should be low enough to allow for a margin of about five per cent to cover extras during construction. These, however, are to be regarded as maximum cost limits, and do not relieve the architect of his responsibility to design for the lowest costs attainable in his locality consistent with good construction and good planning. Sec. 15 (5) of the Act specifies "(a) that such projects will not be of elaborate or expensive design or materials, and economy will be promoted both in construction and administration, and (b) that the average construction cost of the dwelling units (excluding land, demolition and non-dwelling facilities) in any such project is not greater than the average construction cost of dwelling units currently produced by private enterprise, in the locality or metropolitan area concerned, under the legal building requirements applicable to the proposed site, and under labor standards not lower than those prescribed in this Act." After execution of loan contract the estimate of development cost in the Application as approved for the loan contract will be transcribed by the USHA to Form No. USHA-512; subject to such modifications as may be agreed upon between the local authority and the USHA this will become the preliminary budget. When the plans and specifications are completed, and prior to the advertising for bids, the local authority will submit its final estimate of total development cost. The local authority or its architects should, in the interim period, make at least one additional estimate in order to recognize its own position in relation to costs. Upon request of the local authority these interim estimates will be reviewed by USHA representatives in the field or, if the local authority desires, in the regional office, but there is no requirement that the local authority submit interim estimates to the USHA.*† [Sec. F]

§ 612.6 *Scope of architect's work.* The architect should obtain, at the outset of his work, a definite statement from the local housing authority setting forth the limits of the work to be covered by his plans and specifications, so that all street improvement and utility work which is not to be performed by the city or other outside agency, may be shown on his drawings. It should be the Architect's responsibility to coordinate his drawings with plans to be prepared by other agencies in connection with the housing project; further, to obtain from the city approval of his drawings for street and utility work to be performed in city streets or on land which it is proposed to dedicate to the city.*† [Sec. G]

§ 612.7 *General suggestions.* The following observations, while in a sense self-evident, are made in the hope that they will promote a certain degree of consistency in the work of all the architects operating under the program of the United States Housing Act, and that this, in turn, will facilitate the review of the plans and specifications by the USHA.

(a) The drawings should indicate completely the scope of the work to be executed, while the specifications should cover only that which the drawings are not competent to explain. The drawings should be carefully coordinated with the specifications to avoid omissions, repetitions, inconsistencies and contradictions; likewise the several parts and divisions of the specifications should be coordinated within themselves.

(b) Notes on the drawings should be specific as to extent of work and kinds of materials, but should avoid naming exact varieties of materials or trade names.

(c) Drawings should include complete door, window, and interior finish schedules, placed on drawings where most available for reference. A schedule of buildings, dwelling units and rooms should also be included. Schedules should be carefully checked with drawings and specifications.

(d) Each drawing should be properly described in the legend or index and should be dated and numbered to facilitate handling, recording and filing.*† [Sec. H]

§ 612.8 *Job program.* The Job Program form shall be considered as an outline under which all matters having to do with the composition of the project are initiated, considered, and determined step by step up to the time when the final plans, specifications and other construction contract documents are ready for bidding purposes. The essential point in the procedure is that the various items of the Job Program form shall be disposed of as early as possible and in logical sequence rather than that the material be assembled for consideration and disposition as a whole. The Job Program form should be used as a check list to see that no items are overlooked in the development of the project.*† [Sec. I]

§ 612.9 *Method of bidding.* Part 610 includes a discussion of letting general contracts on the basis of dividing a project into two or more parts, and of segregating from general construction contracts such items as plumbing, heating, and electrical work. It is here restated that local authorities should give consideration to this question and should weigh the several advantages and disadvantages of such a procedure, taking into consideration the fact that certain state laws make it necessary, on public works, to segregate and take separate bids on parts of the work other than the general construction. However, it should be borne in mind that the complications attendant upon splitting the work into a number of contracts are manifold, and that these complications increase much more rapidly than in direct proportion to the number of contracts. The following discussion is intended as an aid to local authorities in reaching its determination relative to this important question.

To begin with, the local authority should attempt, in the early stages of the work, to formulate its policy with regard to the manner in which bids should be taken and the alternates to be included, since this has an important bearing upon the site plan itself, and upon the manner in which the drawings are prepared. For example, it will be appreciated that certain site plans lend themselves more readily to several general contracts than do others, and that the distribution of utilities, arrangement of walks, and other features, are also involved in this problem. With respect to the drawings, these should contemplate the effect which alternates will have upon related work. Hence, an early decision as to the division of contracts, if any, and with respect to the taking of alternate bids will enable the plans to be prepared, and the specifications written, in a manner less susceptible to misunderstandings and disputes during construction than would otherwise be the case. A multiplicity of contracts and alternates involves the four major considerations set out in the four sections immediately following.*† [Sec. J]

§ 612.10 *Contract documents and bid forms.* Contract and bid forms must be prepared in such manner that the requirements desired may be clearly and unmistakably understood by all intending bidders. The difficulties may not be readily apparent until an attempt is made to set up the documents, nor are they always perceived at that time. However, to form some conception of the difficulties involved in a relatively simple case—assume the hypothetical problem of one project divided into four bidding areas for general construction

*§§ 612.1 to 612.13 issued under the authority contained in § 8, 50 Stat. 891; 42 U.S.C., Sup. IV, 1408.

†The source of §§ 612.1 to 612.13 is Bulletin 13, revised April 17, 1939.

[1] United States Housing Act of 1937, as amended, 50 Stat. 888; 42 U.S.C., Sup. IV, 1401 (hereinafter referred to as the "Act").

purposes, with one area including a building, or buildings, for which an alternate is proposed to exclude these buildings; then assume that it is necessary under state laws, to take separate bids for plumbing, heating, electrical work, and that it seems desirable to separate the paving work as well as the landscaping work from the general contracts; in addition, assume that alternates are desired covering four items on the construction work, and as few as two items each on the mechanical trades. With the necessary provision that overall bids must also be taken in order to insure that the lowest possible price has been obtained, such a case as is cited may involve the taking of as many as 80 to 100 base bids and 200 to 400 alternate bids. Under such circumstances, a long and painstaking analysis of the bid documents becomes necessary in order to insure that there is no overlapping of items or gaps to be bridged by extra expenditures after the contracts have been awarded.*† [Sec. J]

§ 612.11 *Evaluation of bids.* The mere process of tabulation of bids under the hypothetical case cited is no small task, but the evaluation of these bids after they have been tabulated is not only difficult, but may be even impossible in some cases. It is easy to conceive that in order to pick out the lowest possible combination of bids, it may become necessary to do so on a basis that may not produce the best possible results, and that in certain cases the awards may be determined by virtue of the acceptance or rejection of certain alternates, a situation almost certain to produce embarrassment for the local authority. In certain states where the law requires that awards be made on the basis of the base bids, without regard to alternates, it is altogether probable that certain desirable alternates may be accepted only if excessive prices are paid; the conclusion is that in such states the base bid should include the most desirable materials and methods, covering those that are less desirable by the alternates. In all events, the number of alternates should be held to the minimum.*† [Sec. J]

§ 612.12 *Construction difficulties.* The presence of a large number of contractors on any one project leads to confusion, division of responsibility, and delays. For example, contemplate a situation under which a central heating plant and its steam distribution lines is under one contract, and the heating system within the buildings, is under one, or more, other contracts. Under such a situation, if the heating of one or more of the buildings is unsatisfactory, both contractors will disclaim any responsibility, each charging the other with the fault. Each contractor must have access to his site, and such access will frequently cross the area under the jurisdiction of another contractor. Claims arising out of difficulties due to surface drainage will often develop. Delays are certain to ensue. From a management point of view, differences in equipment and in types of materials resulting from divided contracts impose added maintenance costs. Other difficulties too numerous to cite can be readily forecast.*† [Sec. J]

§ 612.13 *Increased overhead.* It is obvious that under a large number of contracts a local authority must assume the function of coordination which normally belongs to a general contractor, and that the administrative cost of such coordination accounts for at least a considerable portion of the savings which may seem to result from a division of the contracts. Moreover, the direct supervision cost may increase in more or less direct proportion to the number of contractors engaged. The foregoing statements are not in any sense intended to indicate that the USHA desires to interfere with any reasonable proposals that local authorities may make relative to the manner of securing bids. It is appreciated that many local authorities desire to keep contracts small enough so that legitimate local competition can be had. The argument has also been advanced that local contractors will have a greater personal interest in the work and that they are easier to get back on the job to remedy such latent defects as normally develop on construction work. The USHA is sympathetic with these and other arguments that have been advanced, but it feels a proper responsibility to see that all proposals for the division of work and for the inclusion of alternate bids should be kept within reasonable bounds and to that end it is prepared to discuss each individual problem as it develops. In conclusion, the point is again stressed that early consideration of this particular problem is most advisable.*† [Sec. J]

§ 613.1 *Grade studies.* A careful study of yard grades should be made early in the project design for use as a guide in establishing building floor elevations and for obtaining a satisfactory balance of cut and fill. The study should include fixing the finished grades of walks and driveways and of planted and surfaced areas, and the calculation of earthwork quantities. While the grades so fixed will be subject to subsequent adjustment, the study should be made thoroughly at the outset in order to avoid subsequent change in building elevations, or objectionable grade conditions.*† [Part I]

§ 613.2 *Starting point of grade studies.* Established street grades must obviously serve as the starting point for working out finished grades for the project site, and these should be fully determined before grade studies are begun. (Sewer grade elevations must also be taken into account.) If street grades have not been established, or if alteration in established grades is required, definite action or approval by the city should be obtained. On vacant sites where extensive new streets or drives must be planned, roadway profiles should be prepared at the outset and grades established. If such streets are to be dedicated to the public use, the proposed grades should be approved by the city.*† [Part I]

§ 613.3 *Method of indicating finished grades.* Site grading may be studied conveniently in contours and, except in the case of sites with little slope, finished grade contours may be indicated on preliminary site or block plans. On working drawings in the majority of cases, it is preferable to indicate finished grades by elevations rather than by contours. In staking out surface improvements, contour grades must be translated into elevations and if this is done in advance on the working drawings, the designer's intentions will be better understood and carried out. Where grade contours are used, slight changes in grades made during the preparation of the working drawings (many final adjustments are always neecssary) necessitate laborious alteration in the contours. Grade elevations and grade contours should generally not be shown together as conflicting requirements may result. Finished grade elevations should be shown, in general, wherever they are required for carrying out grading work and yard improvement construction (assuming uniform slopes between points where finished grades are indicated). This includes grades along street curbs and sidewalks, at the corners of all buildings, at yard walk intersections, at points of change in the rate of slope in walks and surfaced areas, and at the top and bottom of banks. Contours of the existing surface should be shown on site or block plans where finished grade elevations are indicated; these may be shown at one-foot intervals on comparatively flat sites, and at intervals of two feet or more on steeper sites. (They may be placed in very light dotted lines on the back of the tracings to save trouble in erasures.) However, existing grade contours may be omitted from block plans when they make these drawings too confused and a special grade map may be prepared to show present grades, controlling finished grades, grades at buildings and floor elevations. This map would serve principally for computation of earthwork quantities.*† [Part I]

§ 613.4 *Surface drainage.* Two basic requirements should be observed in planning yard drainage: 1. All yard areas of whatever nature should be sloped for drainage, with outlet provided for the escape of surface water. 2. Except in special cases, all surfaced areas should be designed to drain into walkways, streets, driveways, or inlets to underground drains, as the case may be, without depending upon the escape of surface water laterally across grassed areas. If these requirements are not observed, pooling of water on walks and surfaced areas is certain to occur and, except in the extreme South, snow and ice will impede drainage during the winter season and become a source of inconvenience and hazard to tenants. Profiles of walks and drives should be smooth and present a pleasing appearance, without sharp breaks in grades. Earth banks, which should be avoided wherever possible, should have a curved profile at top and bottom. A very shallow sod gutter, sloping toward an outlet, at the top of banks will aid in preventing wash; and the bottom of banks adjacent to walks should be at least two feet from the walks.*† [Part I]

§ 613.5 *Building floor elevations.* Breaks in floor levels should be avoided, so far as possible, in fixing building elevations. Where the topography is such that breaks must be introduced, they should be limited to 18 inches, if possible. The grade levels of building floor will be governed not only by yard drainage requirements but by architectural considerations and by sewer depths.*† [Part I]

§ 613.6 *Maximum and minimum grades.* Tables showing the approximate maximum and minimum slopes for yard areas which experience has shown to be desirable are available from the USHA.

In climates where snow and ice are common, the slopes of surfaced areas should, where practicable, be kept well within the maximum rates shown in the tables. For low maintenance, with reference particularly to power mowing, it is very desirable that grassed slopes be not steeper than five to one, although it should be borne in mind that a power mower will negotiate a 3 to 1 slope and that such slopes may be used occasionally where it is not practicable to secure a flatter slope. It is often difficult to give walks and other yard areas the necessary minimum pitch; for example, where a walkway parallels closely a row house building, variable riser heights may be necessary in steps at building entrances; and on very flat sites, walkways may have to be laid to a profile consisting of a series of high points and depressions, with drainage to surface inlets in the depressions.*† [Part I]

§ 613.7 *Surface inlets.* Underground drains and inlets for carrying off storm water require an appreciable outlay in first cost and maintenance, but experience indicates that failure to provide adequate facilities of this kind may result in increased maintenance, property damage, and inconvenience to tenants. In general, surface inlets should be located immediately adjacent to and connected with walkways. If placed in grassed areas apart from walks, the inlets will fail to drain the walks properly, especially when the ground is covered with snow and ice. Complete reliance should not be placed on a single inlet or a single drain, if its stoppage would result in the flooding of a building floor, in other property damage, or in inconvenience to tenants; drainage facilities should be so arranged that if any one inlet or drain is stopped, the overflow will escape into a service drive or another drain without causing serious damage.*† [Part I]

§ 613.8 *Layout of walkways.* The location of walkways should be designed to give direct access to buildings and circulation between buildings, facilitate deliveries and the collection of refuse, etc., and protect the landscape development of the site. Failure to provide walks along all natural courses of traffic will result in increased landscape maintenance. It has been found that where walks parallel to row houses are located at some distance from the buildings, and necessitate relatively long approach walks, paths will be formed in the lawn area between dwelling entrances. The location of rear walks close to buildings may discourage this but will also tend to limit privacy and make the allotment of ground areas to the tenants for their own maintenance more difficult. Roundings at walk intersections will tend to increase walk costs but facilitate lawn maintenance.*† [Part II]

§ 613.9 *Widths.* The following walkway widths have been found generally satisfactory:

| | |
|---|---|
| Main circulation walks | 5 feet and up. |
| Main approach walks to apartment buildings | 5 feet. |
| Secondary approach walks to apartment buildings | 4 feet. |
| Approach walks to row houses: | |
| Single entrance, front | 3 feet. |
| Single entrance, rear | 2 feet. |
| Double entrance, front | 4 feet. |
| Double entrance, rear | 3 feet. |

Stepping stones, or walks even less than 2 feet wide, may be used in special cases.*† [Part II]

§ 613.10 *Design.* Plain concrete is generally the best material for walkways in low-rent housing developments. Various other materials possess architectural advantage, but are, as a rule, more expensive to lay or maintain. Bituminous walks have proven unsatisfactory, due in part to the difficulty of obtaining good compaction. Division of concrete walks into "flags" by full depth joints will prevent cracking and facilitate maintenance, since the flags can be raised easily in case of settlement. Walks should have a cross slope when adjacent to buildings, and a slight crown when in open areas; ¼ inch per foot is recommended in each case. Special fitting or warping may be required at walk intersections and at surface inlets to carry out the scheme of drainage. Precast concrete slabs may be used in very narrow walkways for maximum economy.*† [Part II]

§ 613.11 *Steps.* Steps in yard walks are a source of inconvenience and hazard and are to be avoided wherever possible. A single riser should never be used. Long flights of steps without landings are also to be avoided and, in cold climates, the use of a hand rail should be considered for all flights containing more than about six risers. The height of risers should be not less than 4 inches and not more than 7 inches. Where the system of garbage collection by the project management involves the use of small trucks over walkways, steps must not be used in walks leading to the collection stations.*† [Part II]

§ 613.12 *Layout of streets and driveways.* Driveways should be designed to discourage through traffic while affording easy access for the service needs of the project. They may be designed to provide some parking space also, and should be laid out to serve as a convenient location for utility lines. Project streets and drives must afford access to hydrants by fire fighting equipment, and the local fire department's advice with respect to this element of the site plan should be obtained. It should be noted, however, that such access by fire fighting equipment will rarely be necessary; hence, practicable, rather than convenient, access should be provided. The driveway layout should permit the use of existing street and alley pavements when such use is feasible. Driveways of sufficient width or importance to be considered as streets should be planned for dedication to the public use, and street parking areas arranged in a manner acceptable to the city.*† [Part III]

*§§ 613.1 to 613.30 issued under the Authority contained in § 8, 50 Stat. 891; 42 U.S.C., Sup. IV, 1408.

†The source of §§ 613.1 to 613.30 is Bulletin 14, Aug. 23, 1938.

§ 613.13 *Widths.* Sixteen feet may be taken as a minimum width for two-lane service drives and 9 or 10 feet for single lane drives. Two-lane drives can frequently be operated "one-way" to advantage. Three-lane drives (or streets), which will accommodate parking on one side, should be not less than 26 feet wide, and drives accommodating parking on both sides should be at least 32 feet wide. Curbs should have a radius at intersections of at least 12 feet; where feasible, 15 to 20 feet is more desirable.*† [Part III]

§ 613.14 *Section.* A "dished" section (drainage to center) is most economical for service drives in so far as drainage is concerned; further, this section facilitates crossing street sidewalks at sidewalk grade, which is a desirable arrangement for driveways serving light traffic. The dished section also eliminates the positive need for curbing, although a low monolithic curb (assuming the driveway is of concrete) is most desirable for the protection of adjoining planted areas, fencing, and other improvements. A crowned section is recommended for (1) all driveways having other than concrete surfacing, (2) drives more than two lanes in width, and (3) long, important or "front" driveways, even if only two-lane (for appearance reasons). The pavement cross-section should show subdrains where soil and climatic conditions warrant them.*† [Part III]

§ 613.15 *Surfacing material.* From the viewpoint of maintenance cost, concrete makes a very satisfactory surfacing material for service driveways; and with respect to first cost, a concrete pavement with monolithic curb is little or no more costly than a good, premixed bituminous surfacing laid on a stone base, and provided with concrete curbs and gutters. Where there is an existing base which can be utilized, bituminous surfacing will be far less expensive than concrete; and where very low costs are imperative, a macadam or gravel base course with light surface treatment may be used, or untreated surfacing may be laid. The advice of municipal or State authorities should be obtained concerning the specifications best adapted to conditions and to materials available locally. Soil and climatic conditions, the nature of traffic, and cost limitations will govern the design of the surfacing used in each case. State highway or city standards are convenient for reference and compliance with them may be specified. Where there is but a limited amount of surfacing of any one kind to be laid, the inclusion of a brief description of the essential requirements in the general specifications for the project, rather than reference to an elaborate State specification, may result in lower costs. Concrete is an economical and satisfactory material for curbs, except at important street intersections, where stone is preferable.*† [Part III]

§ 613.16 *Space required for parking.* The space per car required for parking on streets and drives, with allowance for ample clearance, is roughly 150 square feet; on special parking areas the space required per car is about 215 square feet and upwards. This difference is due to the fact that in parking areas considerable space must be provided for car maneuvering, while in streets and driveways the traffic-way is used for this purpose. A parking area width of about 54 feet is needed for two lines of cars parked "head in," with maneuvering space between the rows.*† [Part IV]

§ 613.17. *Surfacing material.* Comparison of the space requirements for parking on streets and for parking in special areas indicates that, for equal construction cost, a lower cost type of surfacing must be used for special parking areas. Nevertheless, deterioration of the surfacing is equally severe in both types of area, and cheaper types will probably require higher maintenance cost. The type of surfacing selected—e. g., untreated macadam, or similar material with light surface treatment, or a more permanent type of pavement—will depend on the character of the project and varying local conditions, and no definite recommendations can be stated. Dustless, "trackless" material, having low maintenance cost, is of course desirable, but cost limitations may necessitate the use of a material which is not satisfactory in every respect. For areas on which tenants may do much repair work on their cars, tar-mix topping will be preferable to asphalt because it will be less damaged by dripping oil and gasoline. Curbing or other type of barrier should generally be provided along the edges of parking areas.*† [Part IV]

§ 613.18 *Fences.* Fencing is useful for various purposes in housing projects, e. g., along project boundaries to prevent trespassing, along steep banks, around play areas for protection of children, around drying yards and most important, along yard division lines for enclosing tenants' yards. Fencing may preferably be omitted from the initial project development, when doubt exists as to its need, and installed later as required in the way which will best serve its purpose. Although no definite recommendation with respect to the extent and location of fencing can be made, the decision to use it should be based on consideration of the types of dwellings, the habits of the people housed, climate, and topography. The following advantages should be weighed in determining which areas are to be fenced and how: 1. demarcation of yard lines, and definite placing of responsibility for yard maintenance on the tenants; 2. protection of vegetable and flower gardens, if any; 3. provision of enclosures for small children; 4. protection of laundry hanging. However, these advantages must be weighed against the added cost and the possible loss in attractiveness. Substantial chain-link fencing is recommended for fences around play areas, along project boundaries, etc. Although this type has also been used extensively for tenants' yards, consideration should be given to some less expensive type, such as several strands of heavy wire supported on light steel posts. Where clothes drying facilities are provided in tenants' yards, the clothes poles may be set in the fence line and used to replace heavy end or gate posts required.*† [Part V]

§ 613.19 *Location of utility lines.* Main sewer, water, and gas lines should be placed in city streets or project driveways wherever possible. With these lines in the city streets, the project will incur no responsibility for their maintenance; with these lines in project driveways, the project will be relieved of their maintenance in the event that the drives are later dedicated to the city. Such location also makes utility lines more accessible for maintenance and does not require the granting of easements through yard areas. Where practicable, utility lines in project streets and driveways, should be at the side of the pavement. Special attention should be given in the landscape and utility design to coordinating the locations of utility lines with the locations of trees throughout the site.*† [Part VI]

§ 613.20 *Sewerage system.* The sewerage system comprises all sewers—sanitary, storm, and combined—culverts, and other subsurface drains needed to conduct sanitary sewage and storm water from the project site.*† [Part VII]

§ 613.21 *Basis of design.* Local codes and the practice of the local city engineering department will serve generally as a satisfactory basis of design, and these may be supplemented, if necessary, by reference to "Recommended Minimum Requirements for Plumbing," issued by the Bureau of Standards, United States Department of Commerce. Therefore, the following material covers only certain points which have been found to require special attention in connection with sewerage and drainage systems for housing projects.*† [Part VII]

§ 613.22 *Existing sewers.* A thorough investigation should be made to determine whether or not the existing or proposed main sewers will be adequate at all times to carry away sanitary sewage and storm water without back-flooding. The necessary information may be available from the city engineering department, or a field inquiry may be necessary to determine whether any basement flooding or similar condition has been experienced in the area during heavy rains. Experience has shown that unless a very thorough investigation is made and proof obtained that the sewers are of ample capacity, serious trouble will be experienced later. The investigation should be extended to cover all main and trunk sewers which affect drainage from the project site. If the present sewerage facilities are not entirely adequate, additional sewers or drains must be provided or precautionary measures taken to prevent flooding of basements or other damage to the project. When old street sewers or services are to be utilized in the project sewer system—particularly when such lines will be project-maintained—they should be examined to determine whether their condition is satisfactory for incorporation in the new system. This precaution is important in order to guard against substantial extras during construction. If such sewers are not found in good condition, they should receive any necessary repairs.*† [Part VII]

§ 613.23 *Roof drainage.* The connecting of downspouts to sewers is an important item of project cost. This is especially true where the sewerage system is not of the combined type, and where row houses with pitched roofs requiring storm sewers along both sides are used. Where soil conditions, topography, and building coverage permit, the roof water may, in occasional cases, be discharged on to splash blocks from which it will flow over lawn and surfaced areas.*† [Part VII]

§ 613.24 *Surface inlets.* The location of yard inlets is fixed by the project grades, but the grade studies and yard drainage system design should be carried out jointly, in order to avoid, on the one hand, excessive filling to shed the water to border streets and, on the other, an unnecessarily expensive system of drains. Where a surface inlet discharges directly into a combined sewer, a catch basin with water seal should be provided; where the discharge is into a storm sewer (and the city code permits), or where the discharge subsequently will pass through a catch basin, a simple inlet without water seal or catchment space may be used. Trapped basins are undesirable where not strictly necessary, because they require more maintenance than simple inlets and standing water may be a breeding place for mosquitoes. Three feet each way is a convenient interior, horizontal dimension for yard catch basins and inlets; and brick makes a satisfactory material for walls, as it facilitates adjustment in the elevations of the castings. Surface inlet gratings should be specified to be set at least two inches below adjoining yard grades in order to intercept drainage effectively. Gratings in yard areas should be heavy enough to keep children from removing them.*† [Part VII]

§ 613.25 *Water distribution system.* The water distribution system comprises all new water mains and service lines, outside of building lines (or to a point near the building lines), needed for domestic water supply and fire protection for the project. While local regulations and practice will generally govern the water system design in public rights-of-way, these requirements should be checked to insure an adequate supply for domestic uses and fire protection.*† [Part VIII]

§ 613.26 *Maximum rates of flow.* Although the average daily water consumption per dwelling unit on housing projects may vary from less than 200 gallons per day to almost 300 gallons, depending on the nature of the development and climatic conditions, these figures have no direct relation to the maximum rates of flow, or "maximum momentary demand," on which pipe sizes should be based. A table of recommended maximum rates of flow for determining sizes of water supply piping to housing projects and to buildings within projects may be obtained from the USHA.*† [Part VIII]

§ 613.27 *Pipe sizes.* Using the maximum rates of flow provided in the table referred to in Sec. 613.25 as a basis of design, pipe diameters should be calculated to give not less than 15 lbs. per sq. inch pressure at any fixture (preferably 20 lbs. for flush valves) with the ordinary minimum pressures in city mains. Where fire hydrants are located on supply lines, the domestic demand may be taken as the daily average consumption (ordinarily it will be negligible compared with the demand for hose streams) and pipe sizes should comply with the minimum requirements of the National Board of Fire Underwriters.*† [Part VIII]

§ 613.28 *Layout of services.* The simplest and (with respect to first cost) most economical arrangement for water supply is generally a single service to each building or small group of buildings. However, unless water is purchased at a flat rate or meter readings are "pooled," this arrangement may add greatly to the cost of water. Where water is purchased on a sliding scale, every effort should be made to arrange for the pooling of meter readings, so that all water consumed will be billed as if taken through a single service. If this arrangement is not feasible, it will generally be advantageous to take water through a master meter (for larger projects, through two or more connections off different mains, each connection with its master meter) and provide a distribution system within the project. The choice of method must be based on comparative cost analyses, weighing both first cost and project operating cost. Fire hydrants should be located on metered lines only when the cost of providing separate fire lines would be excessive. The local fire department, or other municipal authority, should be consulted on the location of all fire hydrants.*† [Part VIII]

§ 613.29 *Gas distribution system.* Pipe sizes, materials, and the layout of the gas distribution system will be governed by conditions of gas purchase, by the nature of the soil, and the characteristics of the gas supply (source, pressure, water content, etc.). The recommendations of the local department or company may generally be taken as an acceptable basis of design, and reference may be made to "Standards for Gas Service," published by the United States Department of Commerce, National Bureau of Standards, or to the latest recommendations of the Distribution Committee of the American Gas Association. The installation of drip-pots at proper points should not be overlooked.*† [Part IX]

§ 613.30 *Street improvements.* The work referred to under this heading consists principally of street paving, street sidewalks, main water lines and main sewers and their appurtenances, which, although built as a part of the project and included in the general contract work, will be taken over and maintained by the municipality. Plans for such work should contain the full detail required for design and construction, with street profiles when necessary, grading details for intersections, plans for incidental changes in utilities, etc. Plans for street work must conform generally to established city standards. In general, the controlling design consideration, as in other elements of the project development, should be the lowest first cost compatible with low maintenance cost. Expensive types of street pavement, such as sheet asphalt or brick on concrete base, should be avoided when possible. It is recommended that plans for street work be kept separate, in so far as practicable, from plans for work within the site. This will facilitate obtaining approval of plans for street work from the city, which approval should be obtained from the municipal department having jurisdiction.*† [Part X]

## TITLE 26—INTERNAL REVENUE

## BUREAU OF INTERNAL REVENUE

[T. D. 4948]

### INCOME TAX

AMENDING ARTICLE 27 (A)-3 (A) OF REGULATIONS 101, AND SUCH ARTICLE AS MADE APPLICABLE TO THE INTERNAL REVENUE CODE, TO PROVIDE THAT A RENEWAL WILL NOT PREVENT AN INDEBTEDNESS FROM BEING WITHIN SECTION 27 (A) (4) OF THE INTERNAL REVENUE CODE AND THE REVENUE ACT OF 1936

*To Collectors of Internal Revenue and Others Concerned:*

PARAGRAPH A. Regulations 101[1] as made applicable to the Internal Revenue Code

[1] 4 F.R. 616, 700, 802 DI.

by Treasury Decision 4885, approved February 11, 1939, (Part 465, Subpart B of Title 26, Code of Federal Regulations) are hereby amended by inserting immediately preceding article 27 (a)–1 (section 9.27 (a)–1 of such Title 26) the following:

SEC. 222. REVENUE ACT OF 1939 (RENEWAL OF INDEBTEDNESS).

(a) Section 27 (a) (4) of the Internal Revenue Code (relating to corporation credit for amounts used or set aside to pay indebtedness) is amended by inserting at the end thereof the following new sentence: "A renewal (however evidenced) of an indebtedness shall be considered an indebtedness."

(b) The amendment made by subsection (a) shall be applicable to taxable years beginning after December 31, 1938.

* * * * *

PAR. B. Regulations 101 are hereby amended by inserting immediately preceding article 27 (a)–1 (section 9.27 (a)–1 of Title 26, Code of Federal Regulations) the following:

SEC. 222. REVENUE ACT OF 1939 (RENEWAL OF INDEBTEDNESS).

* * * * *

(c) Section 27 (a) (4) of the Revenue Act of 1938 (relating to corporation credit for amounts used or set aside to pay indebtedness) is amended by inserting at the end thereof the following new sentence: "A renewal (however evidenced) of an indebtedness shall be considered an indebtedness."

(d) The amendment made by subsection (c) shall be applicable to taxable years beginning after December 31, 1937.

PAR. C. Article 27 (a)–3 (a) of Regulations 101 (section 9.27 (a)–3 (a) of Title 26, Code of Federal Regulations) and the same article of Regulations 101 as made applicable to the Internal Revenue Code by Treasury Decision 4885, approved February 11, 1939, (Part 465, Subpart B of such Title 26) are hereby amended by striking out the last paragraph thereof and by amending the first paragraph to read as follows:

"(a) *Indebtedness.* The term 'indebtedness' means an obligation of the corporation, absolute and not contingent, to pay, on demand or within a given time, in cash or other medium, a fixed amount, existing at the close of business on December 31, 1937, and evidenced by a bond, note, debenture, certificate of indebtedness, mortgage, or deed of trust, issued by the corporation and in existence at the close of business on December 31, 1937, or by a bill of exchange accepted by the corporation prior to, and in existence at, the close of business on December 31, 1937. If the indebtedness was so evidenced at the close of business on December 31, 1937, it is still an indebtedness within the meaning of section 27 (a) (4) though, prior to the time payment is made or amounts are irrevocably set aside, it has been renewed. Such renewal need not be evidence by one of the types of instruments enumerated in section 27 (a) (4), but it is sufficient if the debtor-creditor relationship evidenced by one of such instruments at the close of business on December 31, 1937, continues. An indebtedness once so renewed may be again renewed without depriving the corporation of the benefits of section 27 (a) (4). Indebtedness incurred after December 31, 1937, is not indebtedness within the meaning of section 27 (a) (4) even though the proceeds of the loan are used to discharge an indebtedness falling within the provisions of that section, as, for example, where money is borrowed from A to pay B, but, if the creditor remains the same and the transaction is in effect a renewal, the mere fact that it takes the form of a new borrowing, the proceeds of which are simultaneously used to discharge the prior obligation, will not of itself prevent the transaction from being a renewal within the meaning of section 27 (a) (4) and this article.

"The mere substitution, after December 31, 1937, of several instruments for one instrument, or one instrument for several instruments, existing at the close of business on such date, where there is no change in terms except the substitution of a series of different amounts equal in the aggregate to the total principal amount of the instrument or instruments surrendered (as, for example, where two $50,000 bonds are issued in exchange for one $100,000 bond, or where one $100,000 bond is issued in exchange for two $50,000 bonds), or the reissue of a lost or destroyed instrument, or the issue of a new instrument to a transferee, will not deprive a corporation of the benefits of section 27 (a) (4).

"Indebtedness incurred through the assumption of the liabilities of another is not indebtedness within the meaning of section 27 (a) (4) unless such assumption took place prior to January 1, 1938, and such indebtedness was evidenced at the close of business on December 31, 1937, by one or more of the instruments enumerated in such section, issued by the taxpayer prior to, and in existence at, the close of business on such date."

[Order No. 282]

ORDER REQUIRING CODE MEMBERS TO FILE REPORTS AND CONTRACTS PURSUANT TO SECTIONS 10 AND 4, II, (A) OF THE BITUMINOUS COAL ACT OF 1937

The Director being of the opinion that the effective administration of the Bituminous Coal Act of 1937 requires that all written contracts claimed to be exempt from the provisions of Section 4, II, (e) of the Bituminous Coal Act of 1937, on the grounds that they are lawful and bona fide and were entered into prior to June 16, 1933, be filed with the Bituminous Coal Division; and

The National Bituminous Coal Commission, having on the 15th day of July, 1937, issued its Order No. 14[1] which, among other things, directed each Code Member, within twenty (20) days from the date of such Order, to file with the proper Statistical Bureau of the Commission copies of all contracts for the sale of coal entered into on or before the 26th day of April, 1937, and which contracts are claimed to have been in effect at any time after that date:

Now, therefore, *it is ordered*, That each Code Member file with the Bituminous Coal Division in Washington, D. C., within fifteen (15) days from the date of this Order, or, in the case of a person who becomes a Code Member after the date of this Order, within fifteen (15) days from the date of his acceptance of the Code, a notarized report setting forth the following information:

(a) Whether or not he has outstanding any lawful and bona fide written contract entered into prior to June 16, 1933, which he believes comes within the proviso of the first sentence of Section 4, II, (e) of the Bituminous Coal Act of 1937;

(b) Identifying such contracts, if any, by stating the names of the parties thereto, and the date such contracts were entered into;

(c) A statement as to which of such contracts, if any, were filed with the National Bituminous Coal Commission pursuant to its Order No. 14.

*It is further ordered*, That all Code Members shall file together with such report certified copies of all contracts claimed to be exempt from the provisions of Section 4, II, (e) of the Act by reason of the fact that they are lawful and bona fide written contracts entered into prior to June 16, 1933, unless such contracts have been filed with the National Bituminous Coal Commission pursuant to its Order No. 14.

## TITLE 31—MONEY AND FINANCE: TREASURY

### DIVISION OF PRINTING

[1939—Department Circular No. 618]

INSTRUCTIONS FOR PREPARING TREASURY DEPARTMENT FORM 780, REVISED, WITH OUTLINE OF SIMPLE PROCEDURE FOR KEEPING RECORDS OF UNITED STATES TAX-EXEMPTION CERTIFICATES AND TAX-EXEMPTION IDENTIFICATION CARDS

SEPTEMBER 29, 1939.

*To the heads of the Executive Departments, Independent Establishments, and Agencies of the United States:*

1. In order to insure the proper distribution and control of United States Tax-Exemption Certificates and Tax-Exemption Identification Cards, to insure the Federal and other taxing agencies concerned against the loss of revenue through the unauthorized use of the said forms, and to insure the return of unused certificates to the issuing office, existing regulations require that all departments, establishments, and agencies of the Federal Government maintain an adequate record of such certificates and identification cards and that semiannual returns reflecting the status of these forms be submitted to the Treasury Department, Division of Printing. (See in this connection General Accounting Office General Regulations 86, Revised, paragraph 11.)

2. These returns will be made hereafter on Treasury Form 780, Revised (Semiannual Return—United States Government Tax-Exemption Certificates and Tax-Exemption Identification Cards), for each six months' period ending March 31 and September 30 of each year beginning with the return covering the period ending September 30, 1939. Such returns will not be supported by detailed schedules (Treasury Form 779) as heretofore required.

3. *Treasury Form 780, revised.* There is attached hereto,[1] as Exhibit A, a specimen copy of Treasury Form 780, Revised (Semiannual Return—United States Government Tax-Exemption Certificates and Tax-Exemption Identification Cards). Revisions have been made in this form to adapt it to the procedure for maintaining records with respect to the accountability for tax-exemption certificate books and tax-exemption identification cards suggested below.

4. *Departmental accountability records.* Each department, establishment and agency of the Government shall maintain proper accountability records from which may be ascertained readily:

(a) The quantity of unused books of tax-exemption certificates on hand and available for distribution to persons authorized to use them;

(b) The quantity of books in the possession of persons authorized to use the tax-exemption certificates;

(c) The quantity of books which have been returned by the persons to whom issued for reissue or cancellation; and

(d) The quantity of books which have been completely used within the six months' period for which the return is to be made.

5. *Suggested accountability records.* In order to simplify the preparation of the semiannual return (Treasury Form 780, Revised), it is suggested that consideration be given by each department, establishment, and agency to the maintenance of card records appropriately filed similar to those shown by the attached chart (Exhibit B).[1] This plan when applied to the maintenance of accountability records of books of tax-exemption certificates will operate as follows:

(a) When books are received there would be prepared—

(1) A chronological record showing the number of books received.

(2) A card record for each book providing places for subsequently inserting the name of the person to whom the book is furnished and the inclusive numbers of the certificates contained in each book. These cards will be placed in a file in numerical sequence as illustrated in the attached chart. The detailed form of such card record would depend on the policy of the department with respect to the nature and extent of the data relative to the use of individual certificates which it is desired to record on each such card and the nature of administrative reports required of users of books.

(b) When unused books are returned to the Division of Printing, Treasury Department, they will be entered on a chronological record of books returned, and the appropriate cards will be removed from the "New Book" numerical file (File 1 on attached Exhibit B).

(c) When books are issued to persons authorized to use them, the card representing the book will be withdrawn from the numerical file (File 1), the name of the user will be inserted thereon, and the card filed in alphabetical sequence in the "Books in Use" file (File 2, Exhibit B).

(d) When partially used books are returned for reissue, the corresponding card will be removed from the alphabetical file (File 2) and transferred to a file for partially used books maintained in numerical sequence (File 3).

(e) When books are completely used, the covers of such books (Standard Form 1094a, Revised), with inclosed completed tabulation sheet will be returned by the user to the administrative office concerned, and on the basis of these the corresponding cards will be removed from the alphabetical "Books in Use" file (File 2) and placed in numerical sequence in the "Completely Used Books" file (File 4). Entries may be made on these cards from the tabulation sheet opposite the appropriate certificate to indicate the dates (and other desired data) with respect to the individual certificates used. The books and tabulation sheets should be retained as a detailed record of the certificates used.

6. *Preparation of Return (Treasury Form 780, Revised) From Accountability Record Cards.* Where the above system is used the required semiannual return (Treasury Form 780, Revised) can be prepared largely through a count of the cards as follows:

| Item | Source |
|---|---|
| (1) Balance on hand at beginning of period: | |
| (a) Unissued (New). | Previous report (item 6). |
| (b) Unissued (Partially used). | Previous report (item 6). |
| (c) In use | Previous report (item 6). |
| (2) Procured from issuing office during period. | Record of books (or cards) received during period. |
| (3) Total to be accounted for. | Total of Items (1) and (2) above. |
| (4) Unused books and cards returned to issuing office during period. | Record of books and cards returned. |
| (5) Books completely exhausted and cards voided during period. | Section 4 of the file on Exhibit B. (These cards should be removed after each reporting period.) |
| (6) Balance on hand at end of period: | |
| (a) Unissued (New). | Section 1 of file on Exhibit B. |
| (b) Unissued (Partially used). | Section 3 of file on Exhibit B. |
| (c) In use | Section 2 of file on Exhibit B. |

7. *Consolidated Return to be Submitted by Each Department, Establishment, and Agency to Division of Printing, Treasury Department (Return of Field Offices or Other Subdivisions to be Submitted to Administrative Office Concerned).* Each department, establishment and agency shall designate an official to serve as procuring officer. Such procuring officer for each department, establishment, and agency will be required to submit a *consolidated* return (Treasury Form 780, Revised) covering all tax-exemption certificate books and tax-exemption identification cards procured by that department, establishment, or agency from the Treasury Department, Division of Printing. It will be the responsibility of such procuring officer to maintain the necessary accountability records and to provide for the necessary administrative reports covering books and cards issued to field offices and other subdivisions of the particular department, establishment, or agency for reissue to individual users in order that such consolidated returns can readily be prepared.

[1] Not filed with original document; requests for copies should be addressed to Division of Printing, Treasury Department.

8. *Tax-Exemption Certificate Books in Use Outside Continental Limits of the United States.* The status of books 60 days prior to the close of the semiannual period may be utilized as the basis for compiling the return for books in the possession of officials who are outside the continental limits of the United States. Reports received by the procuring officer relating to such books (although such reports do not include transactions during the last 60 days of the semiannual period) may, for the purpose of preparing the return, be regarded as the status at the close of the semiannual period and be merged with the other reports that are dated the last day of the semiannual period.

By direction of the Secretary.

W. N. THOMPSON,
*Acting Administrative Assistant to the Secretary.*

## TITLE 41—PUBLIC CONTRACTS

## DIVISION OF PUBLIC CONTRACTS

### IN THE MATTER OF THE DETERMINATION OF THE PREVAILING MINIMUM WAGES IN THE PAPER AND PULP INDUSTRY

This matter is before me pursuant to Section 1 (b) of the Act of June 30, 1936 (49 Stat. 2036; 41 U.S.C. Sup. III, 35), entitled "An Act to provide conditions for the purchase of supplies and the making of contracts by the United States, and for other purposes" (hereinafter called the Act). The Public Contracts Board, created in accordance with Section 4 of said Act by Administrative Order dated October 6, 1936, held a hearing on March 27, 1939, in the above entitled matter.

Notice of this hearing[1] was sent to all known members of the industry, to trade unions, to trade publications, and to trade associations in the field. Invitation to attend the hearing was extended through the national press to all other interested parties.

Appearances were entered by representatives of several individual members of the industry, the American Paper and Pulp Association, the National Paperboard Association, International Brotherhood of Paper Makers, International Brotherhood of Pulp, Sulphite and Paper Millworkers, and Paper Workers Organizing Committee. Testimony was presented by representatives of the American Paper and Pulp Association and the National Paperboard Association.

A survey of the wages paid in the paper and pulp industry as of October, 1938 and supplementary data were received at the hearing and made a part of the record.

On the basis of the evidence, the Board made its findings and recommended that I find the prevailing minimum wage in the industry to be the amount indicated for each of the following groups of States: 35 cents an hour or $14.00 per week of forty hours, arrived at either upon a time or piece work basis, for the States of Virginia, North Carolina, South Carolina, Georgia, Alabama, Tennessee, Kentucky, Mississippi, Louisiana, Arkansas, Oklahoma, Florida, and Texas; 50 cents an hour or $20.00 per week of forty hours, arrived at either upon a time or piece work basis, for the States of Washington, Oregon, and California; and 40 cents an hour or $16.00 per week of forty hours, arrived at either upon a time or piece work basis, for the District of Columbia and the other 32 States.

On June 8, 1939, the Administrator, Division of Public Contracts, circularized the Board's recommendations in order that all parties might have full opportunity to register their objection or approval before a decision in the matter was made by the Secretary of Labor. Several briefs were filed expressing approval of or objection to the Board's recommendations. A brief objecting to the recommendations was filed by the American Paper and Pulp Association in behalf of the industry. This brief alleged that the definition of the industry as contained in the Board's recommendations was too restrictive; that the industry did and does have an apprenticeship, learner and handicapped worker problem and may wish to establish a need for a tolerance for such workers at a subsequent time; that the wage structure in the industry warrants the establishment of a central zone lying between the Northern and Southern regions in accordance with the grouping made under the National Recovery Administration; that the Pacific Coast States should be grouped with the Northern States for purposes of a minimum wage determination; and that the recommendations did not give sufficient consideration to the minimum wage paid to female workers in the industry.

The evidence of record appears to show adequately the wage structure in that industry which is engaged in the manufacture of pulp and other fiber, and the primary conversion of pulp and other fiber into paper and paperboard, and in addition, the manufacture and conversion of primary paper into toilet paper and paper towels, coated book paper and paper shipping sacks. It was alleged by the National Paperboard Association that the wage survey did not include the manufacture of certain paperboard items. The record shows, however, that the prevailing minimum wage in the manufacture of such paperboard is similar to that prevailing in the manufacture of paper and the paperboard covered by the survey.

For this reason and for the further reason that it is not possible to segregate properly by definition the paperboard products referred to by the National Paperboard Association, such products will be regarded as within the industry as defined for this determination. If the companies manufacturing any paperboard items not covered by the survey should in the future be deprived of Government contracts because of this wage determination, they will be given another opportunity to file complete information with the Department for further consideration.

The evidence of record indicates that there are approximately 125,000 production workers in the industry as defined. The survey covered approximately 90,000 such workers, or 80 percent of the total employees in the industry. It appears that this survey adequately shows the wage structure existing in the industry.

Slightly over 27,000 workers are reported as receiving base rates. This number includes the employees of the industry receiving minimum wages and constitutes ample basis for finding the prevailing minimum wage in the industry.

A tabulation of the base rates shows appreciable wage differentials in different sections of the country. The Southern States show lower wage rates in general than the Northern States, while the highest rates are found in the far West.

In the Southern States, 4,423 workers are found at the base rates ranging from 25 to 52 cents an hour. The heaviest concentration is found at 40 cents an hour, but below this rate are found 54.4 percent of the workers in this locality receiving base rates. At 34, 35 and 36 cents an hour are found 629 workers or 14.2 percent of the total base rate employees. This represents the central tendency of distribution, and the Board's recommendation that I find 35 cents an hour to be the prevailing minimum wage for the Southern States appears to be supported by the record. In the Northern States 20,023 employees are found at base rates ranging from 25 to 64 cents an hour. The outstanding concentration takes place at 40 cents an hour, and the Board has recommended that I find 40 cents an hour to be the prevailing minimum wage in the Northern States. It appears, however, that a considerable number of employees in the Northern States receive wages at 38 and 39 cents an hour, and I find in this case that the midpoint of the three 1-cent intervals of 38, 39 and 40 cents represents the central tendency of the distribution.

In the States of California, Oregon, and Washington, 2,651 workers are at the base rates and 21.9 percent are found at 50 cents an hour. The Board's recommendation that I find the prevailing minimum wage for these States to be 50 cents an hour appears to be supported by the evidence.

The contention made by the American Paper and Pulp Association that I find a prevailing minimum wage for a central zone appears not to be substantiated by the evidence of record; the contention that the States of Washington, Oregon, and California should be included with the Northern States likewise appears to be not supported by the record.

Although no showing for the need of a tolerance for apprentices, superannuated, or handicapped workers have been made, if the need for a tolerance for such workers is established in the future, the matter of modifying this determination will be considered.

It is noted that there exists in the industry a practice whereby the employees of the industry for the sake of convenience pay, through the instrumentality of the employer's disbursing office, certain obligations. Whether or not such practice contravenes the provisions of Section 1 (b) of the Act must be decided only upon full disclosure of all facts involved.

Where there exists at the plant of any bidder on Government contracts subject to the provisions of the Public Contracts Act a practice of so using its disbursing office for the convenience of its employees, and where this practice has been in existence at the plant for a long continued period of time, the bidder should submit a full statement of the facts to the Administrator, Division of Public Contracts, for a determination as to whether or not the practice contravenes the provisions of Section 1 (b) of the Act.

I have examined the findings of the Board and the record of the hearing, together with the briefs filed, and in the light of the facts

I hereby determine

The minimum wage for employees engaged in the performance of contracts with agencies of the United States Government subject to the provisions of the Act of June 30, 1936 (49 Stat. 2036; 41 U.S.C. Sup. III 35), for the manufacture or furnishing of pulp and other fiber and the primary conversion of pulp and other fiber into paper and paperboard, and in addition, the manufacture and conversion of primary paper into toilet paper and paper towels, coated book paper and paper shipping sacks, to be the amount indicated for each of the following groups of States:

For the States of Virginia, North Carolina, South Carolina, Georgia, Alabama, Tennessee, Kentucky, Mississippi, Louisiana, Arkansas, Oklahoma, Florida, and Texas, 35 cents an hour or $14.00 per week of forty hours, arrived at either upon a time or piece work basis;

For the States of Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Pennsylvania, Delaware, Maryland, West Virginia, Ohio, Indiana, Michigan, Wisconsin, Illinois, Missouri, Iowa, Minnesota, North Dakota, South Dakota, Nebraska, Kansas, New Mexico, Colorado, Wyoming, Montana, Idaho, Utah, Arizona, Nevada, and the District of Columbia, 39 cents an hour, or $15.60 per week of forty hours, arrived at either upon a time or piece work basis;

For the States of Washington, Oregon, and California, 50 cents an hour or $20.00 per week of forty hours, arrived at either upon a time or piece work basis.

This determination shall be effective and the minimum wages hereby established shall apply to all such contracts, bids for which are solicited on or after October 15, 1939.

[1] Opened for entry at this time only by successful contestants under the Act of July 26, 1892 (27 Stat. 270).

The farm unit plats referred to above were approved on the date of this notice and are on file in the office of the Superintendent, Bureau of Reclamation, Fairfield, Montana, and in the local land office at Great Falls, Montana.

2. *Limit of acreage for which entry may be made or water secured.* For the farm units described above, and any other lands covered by this notice which may become subject to homestead entry, the limit of area of public land per entry, representing the area which, in the opinion of the Secretary of the Interior, may be reasonably required for the support of a family upon such land, is fixed at the amounts shown upon the said farm unit plats for the respective farm units thereon. The maximum limit of area for which water may be secured for state lands or lands in private ownership shall be 160 acres of irrigable land for each land owner.

3. *Preference rights to ex-service men.* Pursuant to the provisions of joint Public Resolution No. 85, 71st Congress, approved June 12, 1930 (46 Stat., 580), and until January 23, 1940, the farm units described above with the exceptions mentioned and indicated in paragraph 1, will be open to entry only by officers, soldiers, sailors, or marines who have served in the Army or Navy of the United States, in any war, military occupation, or military expedition, and have been honorably separated or discharged therefrom or placed in the regular Army or Naval Reserve. The same preference rights are applicable to those citizens of the United States who served with the allied armies during the World War and who were honorably discharged, upon their resumption of citizenship in the United States, provided the service with the allied armies was similar to the service with the Army of the United States for which recognition is granted in the aforesaid Public Resolution No. 85: *Provided, however,* That they must be qualified to make entry under the homestead laws and also possess the qualifications as to industry, experience, character, and capital required of all applicants under this notice.

4. *Preference rights by contest.* An applicant claiming a preference by contest under the Act of July 26, 1892 (27 Stat., 270), for the farm units designated in paragraph 1 as being subject to such preference, shall attach to his application a statement supporting his claim. Such statement shall include the name and serial number of the local land office.

5. *Applicants must be qualified.* No entry shall be accepted by the local land office until the applicant therefor has satisfied the examining board appointed for the Sun River Project to consider such matters, that he is possessed of such qualifications (in addition to the qualifications required under the homestead laws) as to industry, experience, character, and capital, as in the opinion of the board are necessary to give reasonable assurance of success by the prospective settler.

6. *Requirements as to industry, experience, character and capital.* Each applicant must possess good health and have had at least two years' actual experience in farm work and farm practice. He must have at least $2,000 in money free of liability or the equivalent thereof in livestock, farming equipment, or other assets deemed by the examining board to be as useful to the applicant as money, except as otherwise provided in paragraph 8 hereof.

7. *Examining board.* An examining board of three members has been appointed by the Secretary of the Interior, to consider the fitness of each applicant to undertake the development and operation of a farm on the Sun River Project. Each applicant, except those described in paragraph 13 (a), must appear in person before the examining board, and the Superintendent, who is the member representing the United States, and who will act as secretary of the board, will notify each applicant of the period of time set for his appearance and examination. The members of the board will be present at the project office when the opening is being held, and interested applicants, and particularly non-residents, will be examined at such times as it is convenient for them to be present. There must be, of course, some limit of time covering this feature, and the board will fix this limit, and will also announce such other incidental rules as will necessitate one appearance only by each applicant. Careful investigation shall be made to verify the statements and representations made by applicants, to the end that no misunderstanding may prevail, either regarding the applicant's fitness or his appreciation of the problem before him.

8. *Determination of relative standing of applicants.* The relative standings of the applicants will be based upon a percentage rating with the following maximum weights given to the four prescribed qualifications:

| | *Percent* |
|---|---|
| Character | 15 |
| Industry | 20 |
| Capital | 30 |
| Farm experience | 35 |

Applicants will be rated according to the following schedules and no applicants will be considered eligible who fall below the minimum named in any one of the headings of these schedules, or who do not, in the opinion of the board, possess the health and vigor necessary for active farm work:

| Character: | *Percent* |
|---|---|
| [1] Fair | 5 |
| Good | 6 to 10 |
| Excellent | 11 to 15 |
| Industry: | |
| [1] Fair | 5 |
| Good | 6 to 10 |
| Excellent | 11 to 20 |
| Capital: | |
| [1] $2,000 to $2,999 | 27 |
| $3,000 to $3,999 | 28 |
| $4,000 to $4,999 | 29 |
| $5,000 or above | 30 |

[1] Minimum.

*Provided,* That in the event an applicant does not possess sufficient unencumbered assets for the establishment of an economically sound farming operation upon one of the farm units described in paragraph 1, but he is able within 15 days from the date of his appearance before the examining board for examination, to furnish a certificate or other satisfactory showing that he will be granted a loan by the Farm Security Administration, Department of Agriculture, of an amount of money which will be sufficient, either itself or together with his personal net worth as determined from his original farm application, for the establishment of an economically sound farming operation, the examining board, under authority of the Act of August 7 ,1939 (Public No. 307—76th Congress, 1st Session), will reconsider his application for making such change in the applicant's rating on capital as will reflect the additional asset of the loan assured to him by the Farm Security Administration. To enable the examining board to give a definite rating to each application, in accordance with the scale set forth under "Capital" in this paragraph 8, the exact total amount of any such prospective loan shall be stated in the certificate or other showing presented. *Provided, however,* That no loan by the Farm Security Administration shall be considered in lieu of the possession by any applicant of equivalent actual assets after June 30, 1940. *Provided, further,* That where such farm units have or may be improved by means of funds made available by the Farm Security Administration, the Secretary of the Interior, as authorized by the said Act of August 7, 1939, shall require the entryman of any such unit to enter into a mortgage contract with the Farm Security Administration to repay the value of such improvements thereon before entry is allowed.

| Farm experience: | *Percent* |
|---|---|
| A. In farming other than irrigation: | |
| 2 years, any time | [1] 10 |
| Additional credit of 5% to be allowed for each year in farming other than irrigation for more than 2 years, up to a total of 7 years (10% for 2 years, plus 5% per year up to 5 additional years), or a maximum of | 35 |
| B. In irrigation farming: | |
| 2 years, any time | 15 |
| 2 years, in last 4 years | 20 |
| 2 years, in last 2 years | 25 |
| 3 years, in last 4 years | 30 |
| 3 or more years in responsible charge of irrigation farm in last 4 years | 35 |

[1] Minimum.

In determining the percentages to be given for experience under irrigated farming, the members of the examining board may reduce the percentages from 1 to 5 percent, if, in their judgment, the experience indicated by the applicant as having been gained in other irrigated areas is not of the type that would justify his being rated for farming under the particular conditions on the Sun River project, at any of the percentages above listed.

9. *When, and how to apply for a farm unit.* Any person desiring to acquire any of the farm units described in paragraph 1 must, as a first step, secure from the Superintendent, Fairfield, Montana, or from the Commissioner, Bureau of Reclamation, Washington, D. C., a farm application blank. The blanks will be available on and after the date of this notice, and full answer must be made to each question propounded therein. The farm application must designate in the first paragraph the particular farm desired. If the applicant claims a preference right on account of military service, he shall attach to this application an affidavit setting forth such military service. The affidavit shall state the applicant's time of service, the unit of which he was a member, the date on which he was honorably discharged, or separated, or transferred to the Regular Army or Naval Reserve, and that he did not refuse to wear the uniform of such service or to perform the duties thereof. If the applicant claims a preference right on account of military service with the allied armies during the World War, the affidavit should also state, if true, that the service with the allied armies was similar to the service with the Army of the United States for which recognition was granted in the said Public Resolution No. 85. There shall be attached to said affidavit a copy of such honorable discharge or separation from the service, or the order of transfer to the Regular Army or Naval Reserve. In the event that the original of an applicant's honorable discharge or of such order of transfer has been lost or otherwise is not readily available for copying purposes, a record of his military service and of his discharge, separation or transfer under the seal of the War Department may be furnished in lieu of the copy of the aforementioned original, and shall be attached to said affidavit.

10. *When and where to file the farm application.* The farm application with the proof to be furnished by the ex-service man, must be filed with the Superintendent at Fairfield, Montana, in person, if convenient, or by mail, or otherwise, prior to October 25, 1939, if the applicant desires to qualify under paragraph 11 below. No advantage will accrue to an applicant presenting his application in person rather than by mail, and, if the applicant does not reside at Fairfield, Montana, his application should be mailed. Farm applications received on or after October 25, 1939, will be filed and noted in the order of their receipt.

11. *Simultaneous filing of farm applications.* All applications received prior to October 25, 1939, the date of opening, will be held and treated as simultaneously filed.

12. *Preference rights for ex-service men not filing in accordance with Paragraph 11.* In order that ex-service men may take advantage of the preference right as provided in paragraph 3 of this notice, in the event that they fail to file prior to October 25, 1939, as set forth in paragraph 11 above, their applications together with the proof to be furnished by them, must be filed in the office of the Superintendent, Fairfield, Montana, on or prior to January 23, 1940 the day before the date upon which the farm units herein described, except those units for which applications of ex-service men have been accepted, become open to entry by the general public. No advantage will accrue to an applicant presenting his application in person rather than by mail.

13. *Showing of applicants and selection thereof.* (a) Where the applicant, in the original application which he filed, failed to make a *prima facie* case—that is, where the applicant (1) does not possess good health; (2) fails to make the necessary showing as to character; (3) fails to make the necessary showing as to industry; (4) fails to make the necessary showing as to citizenship; (5) does not show at least two years' farm experience; (6) does not possess the assets required in paragraph 6; (7) is disqualified because of having already made homestead entry; (8) is the owner of more than 160 acres of land in the United States; (9) has not furnished any or satisfactory evidence of military service; (10) or is otherwise disqualified, the application shall be rejected and the applicant notified thereof by registered mail, with return receipt demanded, and of his right to appeal to the Secretary of the Interior within 10 days from receipt of such notification. All appeals allowed under this Public Notice No. 27 must be filed in the office of the Superintendent at Fairfield, Montana, and within 10 days from receipt by applicants of rejection notices.

(b) Each applicant who makes a *prima facie* case and has not been previously examined by the board shall be notified by the board, by registered mail, with return receipt demanded, of the time within which he must appear before it. After such personal examination, and after consideration of the showing made in the application, the board will rate the applicant in accordance with the scale set forth above, and place such rating in red ink, with the initials of each member of the board upon the face of the farm application blank. Should the applicant fail to appear for examination after due notice, his application will receive no further consideration by the board at that time. Should he later appear his application may be considered for any farm then remaining unassigned. The date of receipt of his application shall then be considered as being the day he actually appeared before the board. The rating necessary to establish qualification is the minimum named in Paragraph 8 of this Public Notice No. 27 for each of the requirements as to character, industry, capital and farm experience and the applications of all who fail to attain this minimum shall be rejected and the applicants notified thereof by registered mail, with return receipt demanded, and of their right to appeal to the Secretary

of the Interior within 10 days from receipt of such notification. After the expiration of the appeal periods fixed by the above mentioned notices, if any are required, to applicants who failed to make prima facie cases and to those who failed to attain the minimum rating, and in the absence of any pending appeals, the board shall select the 81 applicants having the highest ratings (there being 81 farm units described in paragraph 1 subject to entry and which number of units may be increased if any of the farm units subject to preference rights under the Act of July 26, 1892 (27 Stat., 270) later become available for disposal to other applicants). Immediately following the selection of the successful applicants the board shall send a notice by registered mail with return receipt demanded to each of the other applicants below the first 81 in qualification ratings, advising him of his rating, and that since the number of qualified applicants exceeds the number of available farms, his application must be held for rejection. Each applicant whose application is so held may appeal to the Secretary of the Interior within 10 days of receipt of such notice. In the event that any of the 81 applicants with the highest ratings fail to fulfill the requirements of paragraph 14 hereof, the examining board will select other applicants in the order of their qualification ratings to replace those of the selected applicants who failed to complete their filings before the land office. If necessary, the same procedure will be followed until homestead filings have been completed for all of the public land farm units opened to entry by this Public Notice. In the event that the number of qualified applicants is less than the number of available farm units, and also if in such case there are several applications for the same farm unit, the board shall assign a farm unit to each of such applicants. Whenever practicable, the board shall allow the applicants to exercise a choice of farms; and if it is found practicable to do so, the applicants will be given the right of selection, regardless of other applications, in the order of their ratings. The intent of the law is to select the best qualified applicants for the farms available, and the Government reserves the right to assign the farms regardless of individual preferences. Where two or more applicants have received identical ratings a drawing shall be made by the examining board to determine its selections and the order in which the available farms shall be awarded.

14. *Notification of applicant that he has been selected.* After the expiration of the period or periods fixed by notices to applicants in the contingencies named in paragraph 13 above, or any other that may arise, and upon the completion of action which may become necessary because of such notices, the board shall notify each applicant selected for a farm by registered mail with return receipt demanded, that he has been selected for a farm unit. Such notice will also advise the selected applicant of the steps which he must take within 10 days from the receipt thereof to pay the charges required by the Greenfields Irrigation District for operation and maintenance or the delivery of water, before he is entitled to file a homestead application with the local land office to enter the farm unit designated in connection with his selection. Upon a proper showing by the said District that the selected applicant has made payment of such charges before the expiration of the said 10 day period, the secretary of the examining board will furnish each such applicant by registered mail, unless delivered to him in person, a certificate stating that his qualifications to enter public lands, as required by subsection C of Section 4 of the Act of December 5, 1924 (43 Stat., 702), have been passed upon and approved by that board. Such certificate, in which the applicant's ratings will also be stated, and a copy of which will be forwarded by the secretary of the board to the local land office immediately upon the issuance thereof, must be attached by the applicant to his homestead application when he files such application at the local land office at Great Falls, Montana. Such homestead application shall be made within 15 days from the date of the receipt by the applicant of the said certificate. Failure to make application for homestead entry within that period will render the application subject to rejection.

15. *Failure of selected applicant to complete transaction.* If the applicant fails to comply with any of the requirements named above the board will select the next highest in qualification rating, and when the list has been exhausted, and if there still remain lands unallotted, the board will consider applications filed thereafter in the order filed, and such applications will otherwise be handled by the board as prescribed in paragraph 13.

16. *General entry.* On and after January 24, 1940 any farm units described in paragraph 1 above which remain unentered, shall be subject to entry under this notice by any person having the necessary qualifications. If, on January 24, 1940, prior to 2 p. m., the number of applications filed exceeds the number of available farm units, then the right to make entry for any such farm unit shall be determined in accordance with paragraph 13 of this notice, the provisions of which shall continue in effect in a similar manner in the future if the number of applications at any time exceeds the number of remaining available farm units.

17. *Warning against unlawful settlement.* No person shall be permitted to gain or exercise any right under any settlement or occupation of any of the public lands covered by this notice except under the terms and conditions prescribed by this notice: *Provided, however,* That this shall not affect any valid existing right obtained by settlement or entry while the land was subject thereto.

18. *All land to be included in an irrigation district.* Substantially all of the lands covered by this Public Notice are within the Greenfields Irrigation District organized under the laws of the State of Montana. For any of the lands covered by this notice which are not within that district, the applicant will take the proper steps necessary to have his land included in that district.

19. *Contract with Greenfields Irrigation District.* A contract was entered into June 22, 1926, between the United States and the Greenfields Irrigation District, providing for payment of charges and operation of works.

20. *Construction charges.* The construction cost shall be paid in accordance with the contract dated June 22, 1926, between the United States and the Greenfields Irrigation District.

21. *Operation and maintenance charges.* Under the terms of the said contract between the United States and the Greenfields Irrigation District, the District has assumed the control and operation and maintenance of the Greenfields division, including all of the lands covered by this Public Notice. Each selected applicant for any of the farm units described in this notice shall, as a condition precedent to the filing of homestead application with the local land office, pay to the Greenfields Irrigation District such charges in connection with the delivery of water to said applicant during the year in which the application is filed as may be established and required therefor by the District; and each such selected applicant or holders of private land and the existing unperfected homestead entries shown on the farm unit plats referred to in paragraph 1 hereof shall pay to said District in advance any applicable operation and maintenance charges as may be established and required by the District, in accordance with the District's contract with the United States. In the event of defaults in payment of operation and maintenance charges due to the District, with respect to any lands covered by this notice, delivery of irrigation water to lands so in default shall be withheld by the District in accordance with the provisions in said District contract.

22. *Reservation of rights of way for county highways and access roads.* Rights of way are reserved for county highways along all section lines, such rights of way being 30 feet in width on each side of said section lines. Other rights of way to interior farm units are reserved where indicated on the said farm unit plats.

23. *Waiver of mineral rights.* All homestead entries for any of the above described farm units, and for any lands covered by this notice which may become subject to such entry, will be subject to the laws of the United States governing mineral land and all homestead applicants under this notice must waive the right to the mineral content of the land, if required to do so by the Land Office, otherwise the homestead application will be rejected or the homestead entry cancelled.

*Under Secretary.*

*United States of America—Before Federal Trade Commission*

[File No. 21-307]

IN THE MATTER OF TRADE PRACTICE RULES FOR THE PUBLIC SEATING INDUSTRY

*Promulgation*

Due proceedings having been held under the trade practice conference procedure in pursuance of the Act of Congress approved September 26, 1914, as amended (Federal Trade Commission Act), and other provisions of law administered by the Commission;

*It is now ordered*, That the trade practice rules[1] of Group I and Group II, as hereinafter set forth, which have been approved and received, respectively, by the Commission in this proceeding, be promulgated as of October 3, 1939.

*Statement by the Commission*

Trade practice rules for the Public Seating Industry, as hereinafter set forth, are promulgated by the Federal Trade Commission under its trade practice conference procedure.

The rules provide for the elimination and prevention of false advertising, deceptive selling methods, and certain other unfair trade practices, and are issued in the interest of protecting the purchasing public and maintaining fair competitive conditions in the industry. They constitute a revision and extension of the rules which had heretofore been issued by the Commission for this industry on June 23, 1931, and take the place of such previously issued rules.

The products of the industry to which the rules relate include fixed or connected seating for such public places as theaters, auditoriums, lodges, assembly halls, shoe stores, stadia, and other similar buildings and structures; various types of pewing, chancels, choir stalls and related furniture and accessories for ecclesiastical purposes; seats and benches for courthouses, hospitals, etc.; various types of school furniture; portable chairs with folding seats in both single and multiple units and portable folding seating in single units for other than household use. These products are fabricated or assembled from wood, plywood, iron, steel, non-ferrous metals, or any combination of these materials. Members of the industry are engaged in manufacturing or distributing the above-mentioned products. The manufacturers' sales aggregate approximately $25,000,000 annually, according to information furnished the Commission.

The proceeding for the establishment of new trade practice rules was instituted upon application of the industry. In the course thereof a draft of the rules as proposed for the industry was made available upon public notice issued by the Commission to all interested or affected parties, affording them opportunity to present their views, including such pertinent information, suggestions or objections as they desired to submit, and to be heard in the premises. Accordingly, public hearing pursuant to such notice was held in Washington on August 17, 1939, and all matters submitted in the proceeding were duly received and considered.

Thereafter, and upon consideration of the entire matter, final action was taken by the Commission whereby it approved and received, respectively, the rules appearing herein under Group I and Group II.

THE RULES

These rules promulgated by the Commission are designed to foster and promote fair competitive conditions in the interest of the industry and the public.

[1] These rules supersede the rules previously promulgated for this industry on June 23, 1931.

*Group I*

The unfair trade practices which are embraced in the Group I rules are considered to be unfair methods of competition, unfair or deceptive acts or practices, or other illegal practices, prohibited, within the purview of the Federal Government, by acts of Congress, as construed in the decisions of the Federal Trade Commission or the courts; and appropriate proceedings in the public interest will be taken by the Commission to prevent the use, by any person, partnership, corporation or other organization, of such unlawful practices in or directly affecting interstate commerce.

§ 20.1 RULE 1. *Misrepresentation of industry products.* It is an unfair trade practice to make or publish, or cause to be made or published, directly or indirectly, any false, misleading or deceptive statement or representation (whether in the form of advertisement, label, brand, guarantee, warranty, testimonial, endorsement, depiction, illustration, or other form of representation, however disseminated or published):

(a) Concerning the grade, quality, quantity, substance, character, nature, origin, size or preparation of any products of the Public Seating Industry; or

(b) Concerning the manufacture, sale or distribution of any such products; or

(c) Concerning any other matter in relation to such products.

§ 20.2 RULE 2. *False invoicing.* Withholding from or inserting in invoices or sales tickets any statements or information by reason of which omission or insertion a false record is made, wholly or in part, of the transactions represented on the face of such invoices or sales tickets, with the effect of thereby misleading or deceiving the purchasing or consuming public, is an unfair trade practice.

§ 20.3 RULE 3. *Use of false or deceptive selling methods, etc.* The use of false or deceptive selling methods which have the tendency and capacity or effect of misleading or deceiving the purchasing or consuming public is an unfair trade practice.

§ 20.4 RULE 4. *Misuse of terms "close-outs", "obsolete items", "discontinued lines", etc.* It is an unfair trade practice to advertise, describe or otherwise represent regular lines of merchandise as "Close-outs", "Obsolete Items", "Discontinued Lines", or by words or representations of similar import, when such are not true in fact; or to so advertise, describe or otherwise represent merchandise where the capacity and tendency or effect thereof is to lead the purchasing or consuming public to believe such merchandise is being offered for sale and sold at greatly reduced prices or at so-called "bargain" prices, when such is not the fact.

§ 20.5 RULE 5. *Defamation of competitors or disparagement of their products.* The defamation of competitors by falsely imputing to them dishonorable conduct, inability to perform contracts, questionable credit standing, or by other false representations, or the false disparagement of the grade, quality or manufacture of the products of competitors or of their business methods, selling prices, values, credit terms, policies or services, is an unfair trade practice.

§ 20.6 RULE 6. *Commercial Bribery.* It is an unfair trade practice for a member of the industry directly or indirectly to give, or offer to give, or permit or cause to be given, money or anything of value to agents, employees or representatives of customers or prospective customers, or to agents, employees or representatives of competitors' customers or prospective customers, without the knowledge of their employers or principals, as an inducement to influence their employers or principals to purchase or contract to purchase public seating products manufactured or sold by such industry member or the maker of such gift or offer, or to influence such employers or principals to refrain from dealing in the products of competitors or from dealing or contracting to deal with competitors.

§ 20.7 RULE 7. *Unfair threats of infringement suits.* The circulation of threats of suit for infringement of patents or trade-marks among customers or prospective customers of competitors, not made in good faith but for the purpose or with the effect of harassing or intimidating such customers or prospective customers, or of unduly hampering, injuring or prejudicing competitors in their businesses, is an unfair trade practice.

§ 20.8 RULE 8. *Procurement of competitors' confidential information by unfair means and wrongful use thereof.* It is an unfair trade practice for any member of the industry to obtain information concerning the business of a competitor, by bribery of an employee or agent of such competitor, by false or misleading statements or representations, by the impersonation of one in authority, or by any other unfair means, and to use the information so obtained in such a manner as to injure said competitor in his business or to suppress competition or unreasonably restrain trade.

§ 20.9 RULE 9. *Inducing breach of contract.* Inducing or attempting to induce the breach of existing lawful contracts between competitors and their customers or their suppliers by any false or deceptive means whatsoever, or interfering with or obstructing the performance of any such contractual duties or services by any such means, with the purpose and effect of unduly hampering, injuring or prejudicing competitors in their businesses, is an unfair trade practice.

§ 20.10 RULE 10. *Enticing away employees of competitors.* Wilfully enticing away the employees of competitors, with the purpose and effect of unduly hampering, injuring or prejudicing competitors in their businesses, is an unfair trade practice.

§ 20.11 RULE 11. *Substitution of products.* The practice of shipping or delivering products which do not conform to samples submitted, to specifications upon which the sale is consummated, or to representations made prior to securing the order, without the consent of the purchasers to such substitutions and with the tendency, capacity or effect of misleading or deceiving purchasers, prospective purchasers or the consuming public is an unfair trade practice.

§ 20.12 RULE 12. (a) *Prohibited discriminatory prices, or rebates, refunds, discounts, credits, etc.*[1] *which effect unlawful price discrimination.* It is an unfair trade practice for any member of the industry engaged in commerce,[2] in the course of such commerce, to grant or allow, secretly or openly, directly or indirectly, any rebate, refund, discount, credit, or other form of price differential,[3] where such rebate, refund, discount, credit, or other form of price differential effects a discrimination in price between different purchasers of goods of like grade and quality, where either or any of the purchases involved therein are in commerce,[2] and where the effect thereof may be substantially to lessen competition or tend to create a monopoly in any line of commerce,[2] or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination or with customers of either of them:

*Provided, however*—

(1) That the goods involved in any such transaction are sold for use, consumption, or resale within any place under the jurisdiction of the United States;

(2) That nothing herein contained shall prevent differentials which make only due allowance for differences in the cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which such commodities are to such purchasers sold or delivered;

(3) That nothing herein contained shall prevent persons engaged in selling goods, wares, or merchandise in commerce[2] from selecting their own customers in bona fide transactions and not in restraint of trade;

(4) That nothing herein contained shall prevent price changes from time to time where made in response to changing conditions affecting either (a) the market for the goods concerned, or (b) the marketability of the goods, such as, but not limited to, actual or imminent deterioration of perishable goods, obsolescence of seasonal goods, distress sales under court process, or sales in good faith in discontinuance of business in the goods concerned.

(b) *Prohibited brokerage and commissions.* It is an unfair trade practice for any member of the industry engaged in commerce,[2] in the course of such commerce, to pay or grant, or to receive or accept, anything of value as a commission, brokerage, or other compensation, or any allowance or discount in lieu thereof, except for services rendered in connection with the sale or purchase of goods, wares, or merchandise, either to the other party to such transaction or to an agent, representative, or other intermediary therein where such intermediary is acting in fact for or in behalf, or is subject to the direct or indirect control, of any party to such transaction other than the person by whom such compensation is so granted or paid.

(c) *Prohibited advertising or promotional allowances, etc.* It is an unfair trade practice for any member of the industry engaged in commerce[2] to pay or contract for the payment of advertising or promotional allowances or any other thing of value to or for the benefit of a customer of such member in the course of such commerce as compensation or in consideration for any services or facilities furnished by or through such customer in connection with the processing, handling, sale, or offering for sale of any products or commodities manufactured, sold, or offered for sale by such member, unless such payment or consideration is available on proportionally equal terms to all other customers competing in the distribution of such products or commodities.

(d) *Prohibited discriminatory services or facilities.* It is an unfair trade practice for any member of the industry engaged in commerce[2] to discriminate in favor of one purchaser against another purchaser or purchasers of a commodity bought for resale, with or without processing, by contracting to furnish or by furnishing, or by contributing to the furnishing of, any services or facilities connected with the processing, handling, sale, or offering for sale of such commodity so purchased upon terms not accorded to all purchasers on proportionally equal terms.

(e) *Inducing or receiving an illegal discrimination in price.* It is an unfair trade practice for any member of the industry engaged in commerce,[2] in the course of such commerce, knowingly to induce or receive a discrimination in price which is prohibited by the foregoing provisions of this Rule 12.

(f) *Purchases by schools, colleges, universities, public libraries, churches, hospitals, and charitable institutions not operating for profit.* The foregoing provisions of this Rule 12 relate to practices within the purview of the Robinson-Patman Antidiscrimination Act, which Act and the application thereunder of this Rule 12 are subject to the limitations expressed in the amendment to such Robinson-Patman Antidiscrimination Act, which amendment was approved May 26, 1938, and reads as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That nothing in the Act approved June 19, 1936 (Public, Numbered 692, Seventy-fourth Congress, second session), known as the Robinson-Patman Antidiscrimination Act, shall apply to purchases of their supplies for their own use by schools, colleges, universities, public libraries, churches, hospitals, and charitable institutions not operated for profit. (52 Stat. 446; Supp. 4 U.S.C. Title 15, Sec. 13c)

§ 20.13 RULE 13. *Aiding or abetting use of unfair trade practices.* It is an unfair trade practice for any person, firm or corporation to aid, abet, coerce or induce another, directly or indirectly, to use or promote the use of any unfair trade practice specified in these rules.

*Group II*

Compliance with the trade practice provisions embraced in Group II rules is considered to be conducive to sound business methods and is to be encouraged and promoted individually or through voluntary cooperation exercised in accordance with existing law. Nonobservance of such rules does not, *per se*, constitute violation of law. Where, however, the practice of not complying with any such Group II rules is followed in such manner as to result in unfair methods of competition, or unfair or deceptive acts or practices, corrective proceedings may be instituted by the Commission as in the case of a violation of Group I rules.

RULE A. *Maintenance of accurate records.* It is the judgment of the industry that each member should independently keep proper and accurate records for determining his costs.

RULE B. *Blind bids.* In cases of competitive bidding, the practice of receiving or making so-called "blind bids", which discount the lowest competitive bid regardless of the amount, tends to destroy competitive bidding, and is condemned by the Industry.

A Committee on Trade Practices is hereby created by the industry to cooperate with the Federal Trade Commission and to perform such acts as may be legal and proper to put these rules into effect.

Promulgated and issued by the Federal Trade Commission as of October 3, 1939.

[SEAL] OTIS B. JOHNSON, *Secretary.*

[F. R. Doc. 39-3645; Filed, October 2, 1939; 1:06 p. m.]

[1] Paragraph (a) of Rule 12 shall not be construed as embracing practices prohibited by paragraphs (b), (c) and (d) of this rule.

*Sections 625.1 to 625.23 issued under the authority contained in Sec. 8, 50 Stat. 891; 42 U.S.C., Sup. IV, 1408.

†The source of section 625.1 to 625.23 is Bulletin 4, revised June 30, 1939.

(such) * * * project, but not beyond the point of physical completion."[1] The attention of local authorities is invited to the fact that the definition of development cost excludes therefrom all items which are not necessary to the development of the project. (b) The development cost of the project constitutes the basis for computing the amount of the loan and the amount of the annual contributions or capital grants which the USHA may make on the project.*† [Part I]

§ 625.2 *Eligible items; general.* All applicable items set forth under sections 625.3 through 625.14 may be included in the development cost of the project. The item set forth under Sec. 625.15 shall be included only in estimates of development cost.*† [Part II]

§ 625.3 *Acquisition of site.* Under this heading may be included: (a) Cost of real property purchased (including real property acquired by direct purchase, through condemnation proceedings, or in exchange for bonds of the local authority). This may include: (1) Land for future development as well as land for immediate development; (2) Land needed within the project boundaries for playgrounds, recreation areas and other open spaces, provided such land is of reasonable area and is destined primarily for use by the occupants of the project; (3) Land needed within the project boundaries for new streets and alleys (which in general should be dedicated to the public use), provided such streets or alleys are of reasonable area in relation to the needs of the project.

(b) Fair value of real property donated by the local government or otherwise for any of the purposes specified in subheadings a–1 through a–3, above. No value shall be included for land in vacated streets or alleys.

(c) Value of remitted taxes or special assessments levied on real property included in the project and unpaid or delinquent when such property was acquired.

(d) Expenses of land acquisition, including land surveys, appraisals, title information, options, legal services and expenses, commissions, recording fees and similar costs.

(e) Costs, if any, in connection with supervision of the relocation of tenants living in dwellings demolished on the project site.

(f) Net cost of demolition and clearing, including the demolishing and clearing away of structures, other improvements, and debris on the project site. In computing such net cost, the value of salvage, if any, shall be deducted.

The cost of real property purchased specifically for the project shall be its actual purchase price, and the fair value of real property donated shall be its fair market value as of the date of the Loan Contract with the USHA. Such price or value shall, however, be subject to prior approval by the USHA.

The attention of local authorities is invited to the fact that the USHA cannot allow in development cost either the value or the cost of the following: (1) Land, if any, acquired for schools, parks of substantial size, or similar public improvements which are available to the public at large. (2) Land in vacated streets or alleys. (3) Land, if any, acquired for the purpose of equivalent elimination of unsafe or insanitary dwellings and not forming part of the project site. § 625.4 *Site improvement.* Construction costs of site improvement may include: (a) Rough grading of land, except such grading as may serve in lieu of excavations for structures.

(b) Excess excavation and foundation costs in connection with buildings, utilities, or other site improvements where the unusual character of the subsoil or topography of the site is such as to require piling, caissons, underpinning, removal of solid rock, or very unusual depth of footings. The term "very unusual depth of footings" shall not be applicable to conditions ordinarily encountered (such as old basements, cesspools, and the like, and insecure pockets of earth of moderate extent), but shall be applicable only where such conditions are clearly of an extraordinary extent. (Costs of normal excavations and foundations for structures shall be included under Section 625.5 (a) in the case of nondwelling structures and under Section 625.6 (a) in the case of dwelling structures).

(c) Streets, alleys, and sidewalks on public rights-of-way traversing, adjoining, or leading to the project site, which are reasonable in relation to the needs of the project, but only to the extent that the cost of such items is (or customarily would be) assessed against or paid by the title-holder of the project site.

(d) Utility mains (generally maintained by the municipality or a public utility company), including storm and sanitary sewers, water, gas, electricity, street lighting, and fire and police alarm systems, if any, which traverse, adjoin, or lead to the project site, and which are reasonable in relation to the needs of the project, but only to the extent that the cost of such items is (or customarily would be) assessed against or paid by the title-holder of the project site.

(e) Utility branches and connections (generally maintained by the project) up to but outside of building walls, including storm and sanitary sewers, water, gas, electricity and yard lighting systems, but excluding mains, if any, from a central heating plant. § 625.5 *Non-dwelling buildings, spaces and equipment.* Construction costs of non-dwelling building and spaces may include:

(a) Community buildings or spaces for the use of the occupants of the project, including buildings or spaces for health, education, and recreation, provided such facilities are necessary and otherwise unavailable and provided the buildings or spaces required therefor are of reasonable size in relation to the needs of the occupants of the project. In so far as possible arrangements should be made by the local authority for the maintenance and operation of such facilities by other agencies without expense to the project.

(b) Administrative buildings or spaces, and project service and storage spaces.

(c) Electricity generating plants, including spaces or separate buildings, and mechanical installations.

(d) Garages or shelters for automobiles for rent to tenants where absolutely necessary or essential.

(e) The value of any non-dwelling spaces provided within dwelling structures and included under (a) through (d), above, shall be computed by the local authority, subject to approval by the USHA.

Non-dwelling equipment costs may include:

(a) Equipment necessary for outdoor playgrounds and other outdoor spaces.

(b) Equipment necessary for indoor community purposes, including equipment for health, education, and recreation buildings or spaces.

(c) Maintenance equipment.

If the project includes a central heating plant, the entire cost thereof including heating and domestic hot-water mains and returns, equipment, and structure, shall be included as dwelling facilities under this subheading. Incinerators, community laundries and fixtures, if any, domestic hot water heaters, space heaters which are installed in a fixed position, lighting fixtures, and fixed cabinets, cupboards, or shelving shall also be included hereunder.

§ 625.7 *Pre-occupancy charges.* Under this heading may be included:

(a) Direct costs of selection of initial tenants.

§ 625.8 *Architectural and engineering costs.* Under this heading may be included:

(a) Fees fixed by contract for architectural and engineering services, including fees for engineers and landscape architects. Fixed fees shall not, however, exceed the schedule approved by the USHA.

(b) Other professional fees for consultants and similar advisers.

(c) Cost of the clerk of works, inspectors and other costs of inspection paid by the local authority in addition to the supervision included in the fixed fees for architectural and engineering services. If supervision is not included in the fixed fee contracts, the entire cost to the local authority for supervision and inspection shall be included under this subheading.

(d) Sundry costs such as travel in connection with architectural and engineering services, borings and test pits, blue printing (in addition to blue printing furnished under fixed fee contracts for architectural and engineering services), and models. Costs of travel included hereunder shall be subject to the limitations set forth under Section 625.10.*† [Part II, Heading F]

§ 625.9 *Administrative costs.* Under this heading may be included administrative costs of the local authority directly traceable to the project and that portion of the its general overhead and statistical survey expense properly allocable to the project. Such administrative costs shall include such items as (1) executive salaries, (2) technical salaries (excluding costs of preparing plans and specifications or supervision and inspection), (3) salaries of staff at the project site (except salaries of the supervisory and inspection staff, if any, which are included under Sec. 625.8, (4) legal services and expenses (except cost of services or expenses in connection with acquisition of land which are included under Section 625.3 (d)), (5) travel (except travel included under Sec. 625.8 (d)), (6) office rent, (7) furniture and fixture expenses for offices, (8) office supplies, (9) printing, (10) communications service, (11) photographs, (12) insurance and fidelity bond premiums, (except insurance or bonds carried by construction contractors which are discussed under Sec. 625.14 (b)), (13) advertising (legal notices and similar advertisements), (14) fiscal agent fees and similar expenses, (15) USHA Construction Adviser expense, (16) informational service expense, and (17) statistical survey expense.*† [Part II, Heading G]

§ 625.10 *Travel.* The item of travel in Sec. 625.9 (5) shall include only expenses of travel necessary in connection with the project. The maximum charge which may be made to development cost for travel by employees of the local authority shall be actual transportation expenses plus (1) any taxi fares, long distance telephone calls, or related expenses necessarily incident to the performance of official business and (2) an allowance of $5.00 per day per person in lieu of subsistence. Expenses for travel of members of the local authority or others not receiving compensation for their services may be charged upon the same basis, except that the maximum allowance in lieu of subsistence shall be $10.00 per day per person. The local authority, may, however, include subsistence expenses upon the basis of actual expenses incurred, provided that the total of such expense does not exceed the per diem allowance stated above.*† [Part II, Heading G]

§ 625.11 *Salary and expense of construction adviser.* The attention of local authorities is invited to the fact that there are included under Sec. 625.9 (15), the salaries and expenses which the USHA pays for its Construction Adviser staff assigned to the project. These amounts shall be regarded as administrative costs in the development of the project and the local authority shall use project development funds for reimbursing the USHA for the amounts agreed upon to cover such salaries and expenses.*† [Part II, Heading G]

§ 625.12 *Ineligible administrative expenses.* The attention of local authorities is invited to the fact that there are certain types of administrative expenses which are ineligible for inclusion in development cost. Among such expenses are the following: (a) Dues or fees for membership in associations or organizations on the part of members of the local authority or its employees. (b) Expenses incurred in travel to or attendance at meetings or conventions not specifically related to and necessary in the development of the particular project. (c) Expenses incurred by officials or representatives of local authorities in making visits to other housing developments unless such travel previously has been approved by communication from the USHA in Washington. (d) Expenses incurred for entertainment, meals or refreshments. (e) Expenses incurred in collecting general data and information for use in preliminary site selection or expenses incurred in making real property inventories or other general surveys to establish the need for low-rent housing or slum clearance in the community (or, if any such work is done as a relief project, the amount of such expenses representing the sponsor's share thereof) other than that portion of such expenses, if any, which, subject to USHA approval, is determined to be necessary to the development of the project. (f) Expenses incurred prior to the execution of the Loan Contract with the USHA other than that portion of such expenses, if any, which is approved after audit by the USHA as necessary to the development of the project. (g) Expenses incurred by officers or prospective officers of the local authority for informational purposes in excess of the amount approved in advance by the USHA as necessary to the development of the project.*† [Part II, Heading G]

§ 625.13. *Scope of activities of local authorities.* The rulings set forth in Sec. 625.12, as to items ineligible for inclusion in development cost, shall not be interpreted as any limitation on the part of the USHA as to the scope of the activities in which local authorities may or should engage. The activities of such authorities are matters for local determination in accordance with state and local law and the public opinion of the community. These rulings are set forth merely as examples of administrative expenses which, in the absence of special circumstances, the USHA cannot regard as so directly traceable to the project or so necessary to its development as to be eligible for inclusion in its development cost.*† [Part II, Heading G]

§ 625.14 *Carrying charges.* Under this heading may be included:

(a) Interest on funds for development costs borrowed from the USHA or from other sources, up to the date of physical completion of the project or up to any earlier date which marks the beginning of the period for which annual contributions are paid by the USHA. If annual contributions are paid from an earlier date or dates with respect to a part or parts of the project, interest shall not be included as a carrying charge on such part or parts of the project after the date or dates from which such annual contributions are paid with respect thereto.

(b) No cost of insurance or completion bonds during construction shall be included under this Section. The suggested forms of contracts prepared by the USHA require contractors to furnish completion bonds and to carry fire, liability, and workmen's compensation insurance until the completion of the project. The cost of such bonds and insurance is payable by the contractor and shall, in estimates of development cost, be included as part of the appropriate costs under Sections 625.4, 625.5 and 625.6.*† [Part II, Heading H]

[1] Section 2 (5) of the United States Housing Act of 1937, as amended, 50 Stat. 891; 42 U.S.C., Sup. IV, 1408, (hereinafter referred to as the "Act").

§ 625.15 *Allowance for changes and extras during development.* In all estimates of development cost (including those at the time of application and at the letting of the main construction contract) there shall be included an "Allowance for Changes and Extras During Development." Such allowance (unless otherwise agreed to by the USHA) shall be equal to five percent (5%) of the total of items under Sections 625.3 to 625.14 inclusive: *Provided, however,* That if the costs of site acquisition have been definitely determined, the amount representing such costs shall be excluded from the total upon which such allowance is computed. In the local authorities' books of account the cost of actual changes and extras shall be charged to the appropriate development account, rather than to "Allowance for Changes and Extras During Development." At the completion of the project, no amount shall be shown in the actual development cost under the heading "Allowance for Changes and Extras During Development." The account "Allowance for Changes and Extras During Development" is not to be confused with the 10 percent margin of safety which, under the terms of the Loan Contract, may be used, if specifically authorized by the USHA, for the purpose of meeting unanticipated extra costs during construction and other contingencies. Such margin of safety shall not be included in the Development Cost Estimate.*† [Part II, Heading I]

§ 625.16 *Construction by contract.* All items set forth in Sections 625.3 to 625.15 inclusive, which are executed specifically for the project, on a normal business basis, shall be counted at their actual cost upon approval of such cost by the USHA. The actual cost of the items set forth under Sections 625.4, 625.5 and 625.6 will ordinarily be contract prices since the Terms and Conditions incorporated in the Loan Contract require that all work in the construction of the project be done under contract. Except in case of an emergency (i. e., an unforeseen occurrence or combination of circumstances involving the public welfare or the protection of work already done on the project or which endangers life or property and calls for immediate action or remedy), a waiver of this requirement shall be obtained from the USHA before the cost of any items under Sections 625.4, 625.5 and 625.6 which are executed on any basis other than a contract basis may be included in development cost.*† [Part III]

§ 625.17 *Relief labor and force account work.* The fair value to the local authority of any items executed by relief labor (other than relief labor paid for by the Federal Government), or by labor employed by the municipality or any other agency, may be included in the development cost of the project, provided such labor is paid prevailing wages or fees. Development cost shall not include any value for amounts paid by the Federal Government for relief labor. [Part III]

§ 625.18 *Prevailing wages and fees.* Section 16 (2) of the Act requires that "the wages or fees prevailing in the locality" be paid to all architects, technical engineers, draftsmen, technicians, laborers, and mechanics employed in the development of the project. No item executed for inclusion in the project by any persons of the foregoing classes who are paid less than such prevailing wages or fees may be included in development cost.*† [Part III]

§ 625.19 *Assessable improvements.* The cost to the local authority of any improvements which are constructed by the municipality or other public agency for the public use and which are customarily financed by means of assessments or charges against the title-holder of the property serviced thereby may be included in the development cost of the project, irrespective of whether prevailing wages or fees are paid. If any such assessable improvements are executed by relief labor paid for by the Federal Government, the portion of the sponsor's share of the cost thereof which is applicable to the project may be included in its development cost.*† [Part III]

§ 625.20 *USHA participation.* The Act provides that the total amount of the outstanding loan or loans made by the USHA for a project on which annual contributions are paid by the USHA shall not exceed 90 percent of the total development cost of the project. In cases where other agencies of the Federal Government supply a portion of the development cost, the total amount of the outstanding loan or loans made by the USHA, plus the portion of development cost supplied by such other agencies, may not exceed 90 percent of the total development cost of the project.*† [Part IV]

§ 625.21 *Local participation.* At least 10 percent of the development cost of all projects aided by USHA annual contributions must be supplied by sources other than the USHA. Any portion of development cost supplied (through funds borrowed for the project, capital donations, or in exchange for bonds of the local authority) by the local authority or by any other local agency, in any of the forms listed under Sections 625.3 through 625.14 may be included in the 10 percent local participation.*† [Part IV]

§ 625.22 *Cost per room and per family dwelling unit.* Sec. 15 (5) of the Act limits the cost of the dwelling facilities of the project to an average of $4,000 per family dwelling unit ($5,000 in cities of over 500,000 population) and to an average of $1,000 per room ($1,250 in cities over 500,000 population).

The cost of dwelling facilities shall include all costs listed under Sec. 625.6 (Dwelling Buildings and Equipment), together with the applicable pro rata share of the costs listed under Sections 625.8 (Architectural and Engineering Costs), 625.9 (Administrative Costs), and 625.14 (Carrying Charges). In making estimates of the cost of dwelling facilities, there shall be included the applicable pro rata share of the amount set forth under Sec. 625.15 (Allowance for Changes and Extras During Development). The room count to be used in determining the cost of dwelling facilities per room is prescribed in Part 622.*† [Part V]

§ 625.23 *Construction cost per family dwelling unit.* Sec. 15 (5) (h) of the Act provides that the average construction cost of dwelling units shall not be greater than the average construction cost of "dwelling units currently produced by private enterprise, in the locality or metropolitan area concerned, under the legal building requirements applicable to the proposed site, and under labor standards not lower than those prescribed" in the Act. The construction cost of dwelling units shall include only the costs specified under Sec. 625.6 (a). The construction cost of dwelling units shall not include any of the items listed under Sec. 625.6 (b), nor any portion of the costs specified under Sec. 625.8, Sec. 625.9 or Sec. 625.14. In making estimates of the "construction cost of dwelling units", there shall be included no pro rata share of the amount set forth under Sec. 625.15.*† [Part VI]

## TITLE 25—INDIANS

## OFFICE OF INDIAN AFFAIRS

### REGULATIONS GOVERNING THE OPERATION OF THE UNITED STATES SHIPS "NORTH STAR" AND "BOXER"

The following regulations are hereby prescribed for the operation of the United States ships *North Star* and *Boxer* as supply ships between Seattle, Washington, and stations of the Office of Indian Affairs and other Government agencies in the Territory of Alaska.

1. The Manager of the Consolidated Purchasing and Shipping Office in Seattle, Washington, shall have full responsibility for the operation of the ships for the Department of the Interior, including repair, upkeep, payment of bills, and recommendations for the employment of personnel.

Tentative itineraries for each voyage shall be made by the Seattle office in consultation with the Juneau office and submitted to the Division of Territories and Island Possessions for approval. The work of the Office of Indian Affairs will have preference and the General Superintendent of the Office of Indian Affairs in Juneau, Alaska, is authorized to use the ships to perform any special services which may arise and to act in emergencies. The Manager of the Seattle office shall be kept informed of any action taken pursuant to this authority.

2. The Manager of the Seattle office shall furnish the Juneau office and the Division of Territories and Island Possessions advance estimates of the annual repairs and reconditioning costs of the *North Star* and *Boxer*, and of costs involved in any proposed changes in personnel. Funds to meet the expense of operating the ships, the payment of commercial freight, lighterage, longshoring, and other freight expenses shall be advanced, when available, from the appropriation "Education of Natives of Alaska" to the Treasury Regional Disbursing Officer in Seattle.

3. All agencies and activities of the Federal Government (except the Alaska Education Division) and co-operatives of natives for which freight is transported, shall be charged their pro rata share of the expense of the voyage. Such charges shall be billed on transfer vouchers (Standard Form 1080), and payments shall be credited to the Alaska Education appropriation. Bills will be prepared by the Seattle office as promptly as possible and forwarded to the Juneau office for appropriate action.

4. The Juneau office is authorized to detail a nurse to make all regular trips on the *North Star*. The duties of the nurse shall consist of:

(1) Attention to health problems in villages visited.

(2) The assignment of quarters to all passengers.

(3) Approval of passengers for medical and destitution travel.

(4) Responsibility for the welfare of natives on board the ship.

When it is advisable to do so, the Juneau office is authorized to detail a nurse to the *Boxer*. Her duties will be identical to those prescribed for the nurse on the *North Star*.

5. Natives shall be employed on the *North Star* and the *Boxer* to fill all positions for which they may be qualified. Appointments to such positions will be proposed by the Seattle office with the approval of the Juneau office.

Three additional ordinary seamen positions are hereby established for the *North Star*, and one additional position is hereby established for the *Boxer*. As a general rule, appointments to these positions will be made only after the ships have reached Alaska. Their duties, in general, shall be to assist in discharging and lightering freight, to act as helpers in the engine room, and to perform special work at stations, such as repairing light plants and other equipment. As a training measure, the additional positions shall be filled by native boys.

6. In the employment of natives on the ships, a power of attorney shall be secured from each employee authorizing the manager of the Consolidated Purchasing and Shipping Office to deduct from his pay an amount sufficient to cover the cost of returning the employee from Seattle to Alaska. Such deductions shall be deposited with the General Superintendent for credit to the individual Indian money accounts of the employees.

7. Officers and members of the crew on both vessels are hereby prohibited from engaging in trade with the natives. The Office of Indian Affairs shall endeavor to provide an employee who will travel on the ships and arrange for the disposition of native handicraft articles. In the absence of a full-time employee for this work, it shall be performed by one of the officers of the crew selected by the Manager of the Consolidated Purchasing and Shipping Office with the approval of the General Superintendent.

8. The ships' messes will be provided from the appropriation for the operation of the vessels, and deductions for subsistance of the officers and members of the crew and other employees of the ships will be made on the pay rolls at the rate of $20 per month.

Deductions shall be made monthly from the compensation of employees of the ships for quarters occupied by them, in accordance with the following schedule:

*North Star*

| | |
|---|---|
| Captain's quarters | $18.50 |
| Officers, engineers, and nurses | 13.50 |

*Boxer*

| | |
|---|---|
| Captain's quarters | 12.50 |
| Officers and engineers (single room) | 10.00 |
| Sailors | 4.50 |

9. No private passengers (excepting Federal employees, their families, and natives of Alaska) shall be transported on either the *North Star* or the *Boxer* between points where adequate services are provided by commercial vessels. Where such commercial ships are not available, and where accommodations can be furnished on the *North Star* and the *Boxer* without detriment to Government business, private travelers may be transported at the rate of $1.50 per day. No charge will be made for infants under one year of age. For children one to twelve years of age, one-half the adult rate shall be charged. The full adult rate will be charged all persons over twelve years of age.

10. All agencies and activities of the Federal Government except the Alaska Education Division will be billed at the rate of $1.50 per day for each employee traveling on official business.

11. In the booking of passage on the ships, preference shall be given to employees of the Office of Indian Affairs and to natives of Alaska.

12. Rates for transporting personal property of Government employees on the ships shall be the same as for Government shipments, provided that in no case shall an employee be charged in excess of $10 per ton for not to exceed 3 tons each year, and $25 for each ton in excess of 3 tons.

## DEPARTMENT OF LABOR.

### Wage and Hour Division.

IN THE MATTER OF APPLICATION FOR EXEMPTION OF THE COLD STORAGE OF APPLES IN APPLE STORAGE WAREHOUSES IN THE "APPALACHIAN AREA" FROM THE MAXIMUM HOURS PROVISIONS

Whereas, applications have been filed by the Winchester Cold Storage Company, Inc., and sundry other parties for the exemption of the cold storage of apples in apple storage warehouses located in the "Appalachian area" from the maximum hours provisions of the Fair Labor Standards Act of 1938, as a branch of an industry of a seasonal nature within the meaning of Section 7 (b) (3) and Part 526 of the Regulations issued thereunder, and

Whereas, it appears from the said application that:

(1) apples are produced and harvested in the said "Appalachian area" during the regularly recurring season, September to November, and

(2) that in the "Appalachian area" the great bulk of such apples enter into cold storage in local warehouses which are restricted to apple storage, and that in other areas the great bulk of apples do not enter into cold storage in local warehouses at all, or if they do, such warehouses are not restricted to apple storage, and

(3) that such apples enter into cold storage during a regularly recurring season, late September through November, running nearly concurrently with but lagging somewhat after the harvest, and

(4) that such apples customarily move out of these warehouses during the regularly recurring season, November through March, only an unsubstantial amount remaining in storage after March and moving out thereafter, and

(5) during a portion of the year (generally April through August and part of September) the cold storage of apples in these apple storage warehouses ceases apart from such work as maintenance, repair, clerical and sales work, because the apples in the form in which they are stored are not available, and

(6) these apple storage warehouses exist for the purpose of warehousing and do warehouse apples exclusively save for an unsubstantial amount of other products, and

(7) whereas all of these warehouses are located in a district designated as the "Appalachian area" in the States of Pennsylvania, Maryland, West Virginia and Virginia, which includes all apple storage warehouses located

(a) between the Allegheny Mountains on the west, the Blue Ridge Mountains on the east, U. S. Route No. 30 on the north, and U. S. Route No. 58 on the south, and

(b) in the Virginia counties of Albemarle, Nelson, Amherst, Bedford and Henry.

Now, therefore, upon consideration of the facts stated in the said applications, the Administrator hereby determines, pursuant to Section 526.5 (c) of the Regulations, that a *prima facie* case has been shown for the granting of an exemption, pursuant to Section 7 (b) (3) of the Fair Labor Standards Act of 1938 and Part 526 of the Regulations issued thereunder to the cold storage of apples in apple storage warehouses in the "Appalachian area".

In the above:

The term "cold storage" of apples is used in the commonly accepted meaning and includes the receiving into storage, the maintaining in storage, and the moving out of storage of such apples.

The term "apple storage warehouses" is understood to designate those warehouses which exist for the purpose of warehousing and do warehouse apples exclusively save for an unsubstantial amount of other products.

In accordance with the procedure established by Section 526.5 (c) of the Regulations, the Administrator for fifteen days following the publication of this determination will receive objection to the granting of the exemption and request for hearing from any interested person. Upon receipt of objection and request for hearing, the Administrator will set the application for the hearing before himself or an authorized representative.

If no objection and request for hearing is received within fifteen days, the Administrator will make a finding upon the *prima facie* case shown upon the application.

This application may be examined at Room 313, 939 D Street NW., Washington, D. C.

Signed at Washington, D. C., this 3rd day of October, 1939.

## FEDERAL POWER COMMISSION.

[Docket No. G-139]

IN THE MATTER OF MISSISSIPPI RIVER FUEL CORPORATION

ORDER FIXING DATE OF HEARING AND SUSPENDING RATE SCHEDULE

SEPTEMBER 29, 1939.

Commissioners: Clyde L. Seavey, Chairman; Claude L. Draper, Basil Manly, Leland Olds, John W. Scott.

It appearing to the Commission that:

(a) On August 24, 1938, the Mississippi River Fuel Corporation filed with the Federal Power Commission its agreement, dated August 26, 1936, with the Illinois Power and Light Corporation (predecessor to the Illinois Iowa Power Company), designated in the files of the Commission as Mississippi River Fuel Corporation Rate Schedule F.P.C. No. 17, providing for the sale of natural gas by the Mississippi River Fuel Corporation to the Illinois Power and Light Company for resale;

(b) By the terms of said agreement of August 26, 1936, it was to continue in effect for a period of two years from and after August 1, 1936, and has since been extended to and including September 30, 1939, by certain supplemental agreements of various dates which have been filed with the Commission and are designated in the files of the Commission as Supplements Nos. 2, 3, 4, and 6 to Mississippi River Fuel Corporation Rate Schedule F.P.C. No. 17;

(c) On August 31, 1939, the Mississippi River Fuel Corporation filed with the Commission its supplemental agreement, dated July 31, 1939, with the Illinois Iowa Power Company, designated in the files of the Commission as Supplement No. 7 to Mississippi River Fuel Corporation Rate Schedule F.P.C. No. 17, providing that the rates and charges now being collected and received by the Mississippi River Fuel Corporation from the Illinois Iowa Power Company, as set forth in said Rate Schedule F.P.C. No. 17, shall remain and continue in effect to and including December 31, 1939, after which last named date an increase in rates and charges specified in said Supplement No. 7 shall become effective, and the said Supplement No. 7 further provides that all other terms and conditions of the said agreement of August 26, 1936 (Rate Schedule F.P.C. No. 17), shall remain and continue in effect for an indefinite period;

(d) The increased schedule of rates and charges provided in the said Supplement No. 7 to Mississippi River Fuel Corporation Rate Schedule F.P.C. No. 17, may result in excessive rates and charges to the Illinois Iowa Power Company, or place an undue burden upon ultimate consumers of natural gas, which has not been shown to be justified;

The Commission finds that:

It is necessary, desirable and in the public interest that the Commission enter upon a hearing concerning the lawfulness of the proposed increased rates or charges and that said proposed increased rates or charges be suspended pending such hearing and the decision thereon, but not for a longer period than five months beyond January 1, 1940;

The Commission, upon its own motion, orders that:

(A) A public hearing be held on December 12, 1939, at 10 o'clock, a. m., in the Hearing Room of the Federal Power Commission, in the Hurley-Wright Building, 1800 Pennsylvania Avenue NW., Washington, D. C., concerning the lawfulness of the rates and charges which the said supplemental agreement of July 31, 1939, designated in the files of the Commission as Supplement No. 7 to Mississippi River Fuel Corporation Rate Schedule F.P.C. No. 17, proposes shall be made effective for the three year period from and after December 31, 1939;

(B) Pending such hearing the supplemental agreement of July 31, 1939 (Supplement No. 7), in so far as it provides for an increase in rates to take effect as of January 1, 1940, be and the same is hereby suspended for the period of five months beyond January 1, 1940, unless the Commission shall otherwise order;

(C) During the said period of suspension the rates and charges now being collected and received by the Mississippi River Fuel Corporation from the Illinois Iowa Power Company, as provided in the said Mississippi River Fuel Corporation Rate Schedule F.P.C. No. 17, shall remain and continue in full force and effect.

By the Commission.

## FEDERAL TRADE COMMISSION.

*United States of America—Before Federal Trade Commission*

[Docket No. 3889]

IN THE MATTER OF NATIONAL NUMBERING MACHINE COMPANY, INC.

*Complaint*

The Federal Trade Commission having reason to believe that the party respondent named in the caption above and hereinafter more particularly described, at various times since June 19, 1936, has violated and is now violating the provisions of Subsection (a) of Section 2 of the Clayton Act, as amended by the Robinson-Patman Act, approved June 19, 1936 (U. S. C. Title 15, Section 13), issues its complaint stating its charges with respect thereto as follows:

PARAGRAPH 1. Respondent, National Numbering Machine Company, Inc., is a corporation organized and existing under and by virtue of the laws of the State of New York, with its office and place of business at 1 Beekman Street, New York, New York. Said respondent was incorporated in 1936 and from that time up to June 1938, manufactured special made-to-order typographic numbering machines. Thereafter respondent commenced the production of typographic numbering machines for stock. Respondent sells and distributes such machines in commerce between and among the various states of the United States causing said machines to be shipped and transported from their place of manufacture in New York, New York, to purchasers thereof located in the various states of the United States.

PAR. 2. For more than twenty-five years prior to June, 1938, typographic numbering machines were manufactured, sold and distributed in the United States by four producers, all located in New York City. Two of such producers sell and distribute their machines at list prices of $12.00 per machine for the five-wheel type and $14.00 per machine for the six-wheel type. The other two sell and distribute their machines at list prices of $13.00 for the five-wheel type and $15.00 for the six-wheel type. All of said machines are sold and distributed to dealers at a functional discount of 33⅓% from list price and are sold and distributed to users at a discount from list price of 5%

on purchases of six to eleven machines, 10% on purchases of twelve to twenty-four machines, 15% on purchases of twenty-five to forty-nine machines, and 20% on purchases of fifty machines or more.

PAR. 3. In June, 1938, respondent began the manufacture, sale and distribution of stock typographic numbering machines at list prices of $13.00 for the five-wheel type and $15.00 for the six-wheel type per machine. Several months after June, 1938, however, respondent in an effort to compete more effectively with the better-known machines of its older and better established competitors reduced its list prices thereon to $11.00 for the five-wheel type and $13.00 for the six-wheel type and offered discounts to the trade generally from said list prices of 35% on purchases of six to twelve machines, 40% on purchases of twelve to twenty-five machines, 40% plus 5% on purchases of twenty-five to one hundred machines and special discounts on purchases of 100 machines or more.

PAR. 4. In the course and conduct of its business as aforesaid, respondent is now and during the time herein mentioned has been in substantial competition with other corporations, individuals, partnerships and firms engaged in the business of manufacturing, selling and distributing typographic numbering machines in commerce between and among the various states of the United States.

PAR. 5. In the course and conduct of its business as above described, respondent has discriminated in price and is now discriminating in price between different purchasers buying typographical numbering machines of like grade and quality for resale to dealers and users by giving and allowing to some of its purchasers of said machines lower prices than those given or allowed to other of its purchasers competitively engaged one with the other in the resale of the said machines to dealers and ultimate users within the United States. Respondent, since June, 1938, sold 300 of said machines of both the five and six-wheel type to the Craftsmen Machinery Company of Boston, Massachusetts, at a net price of $5.00 per machine and at or about the same time has sold 100 machines of like grade and quality to the American Wood Type Manufacturing Company of New York City at a net price of $6.00 per machine, both of which concerns are dealers in said machines and are in active competition one with the other for the resale of said machines to the same prospective purchasers. The Craftsmen Machinery Company has advertised and resold a substantial number of the machines so purchased at unit prices of $7.50 for the five-wheel type and $8.50 for the six-wheel type. The respondent has likewise, since June, 1938, sold for resale machines of like grade and quality in quantities of five or less to various other concerns, corporations, individuals, firms and partnerships at net prices varying from $6.00 to $8.00 per machine.

PAR. 6. The general effect of said discriminations in price made by said respondent as above set out has been and may be substantially to lessen competition with respondent and with the favored purchasers; to tend to create a monopoly in respondent and in said favored purchasers in the line of commerce in which said respondent and said favored purchasers are engaged; to injure, destroy or prevent competition in the sale and distribution of said typographic numbering machines between respondent and its competitors and between the said favored purchasers of said machines receiving such discriminatory prices and other less favored competing purchasers of the same machines not receiving said discriminatory prices.

PAR. 7. The foregoing alleged acts of said respondent are in violation of Section 2 (a) of the Clayton Act, as amended by the Robinson-Patman Act, approved June 19, 1936 (U.S.C., Title 15, Section 13).

Wherefore, the premises considered, the Federal Trade Commission, on this 12th day of September, 1939, now issues its complaint against said respondent, stating its charges in that respect as hereinabove set out.

NOTICE

Notice is hereby given you, National Numbering Machine Company, Inc., respondent herein, that the 20th day of October, A. D., 1939, at 2 o'clock in the afternoon, is hereby fixed as the time, and the offices of the Federal Trade Commission in the City of Washington, D. C., as the place, when and where a hearing will be had on the charges set forth in this complaint, at which time and place you will have the right, under said Act, to appear and show cause why an order should not be entered by said Commission requiring you to cease and desist from the violations of the law charged in the complaint.

You are notified and required, on or before the twentieth day after service upon you of this complaint, to file with the Commission an answer to the complaint. If answer is filed and if your appearance at the place and on the date above stated be not required, due notice to that effect will be given you. The Rules of Practice adopted by the Commission with respect to answers or failure to appear or answer (Rule VII) provide as follows:

In case of desire to contest the proceeding the respondent shall, within twenty (20) days from the service of the complaint, file with the Commission an answer to the complaint. Such answer shall contain a concise statement of the facts which constitute the ground of defense. Respondent shall specifically admit or deny or explain each of the facts alleged in the complaint, unless respondent is without knowledge, in which case respondent shall so state.

* * * * *

Failure of the respondent to file answer within the time above provided and failure to appear at the time and place fixed for hearing shall be deemed to authorise the Commission, without further notice to respondent, to proceed in regular course on the charges set forth in the complaint.

If the respondent desires to waive hearing on the allegations of fact set forth in the complaint and not to contest the facts, the answer may consist of a statement that respondent admits all the material allegations of fact charged in the complaint to be true. Respondent by such answer shall be deemed to have waived a hearing on the allegations of fact set forth in said complaint and to have authorised the Commission, without further evidence, or other intervening procedure, to find such facts to be true, and if in the judgment of the Commission such facts admitted constitute a violation of law or laws as charged in the complaint, to make and serve findings as to the facts and an order to cease and desist from such violations. Upon application in writing made contemporaneously with the filing of such answer, the respondent, in the discretion of the Commission, may be heard on brief, in oral argument, or both, solely on the question as to whether the facts so admitted constitute the violation or violations of law charged in the complaint.

In witness whereof, the Federal Trade Commission has caused this, its complaint, to be signed by its Secretary, and its official seal to be hereto affixed, at Washington, D. C., this 12th day of September, A. D. 1939.

By the Commission.

Whereas, the Secretary further finds:

(1) that the amendment to the marketing agreement, as amended, regulating the handling of walnuts grown in California, Oregon, and Washington, executed by the Secretary on October 3, 1939, and upon which a hearing was held in San Francisco, California, on September 6, 1939, was signed by handlers (excluding cooperative associations of producers who were not engaged in processing, distributing, or shipping the aforesaid walnuts or products thereof) who, during the 1938–39 crop year, handled not less than fifty (50) percent of the volume of such walnuts covered by this order, produced within the production area defined in said order, as amended;

(2) that the order, as heretofore amended and as hereby amended, regulates the handling of such walnuts in the same manner as the marketing agreement, as amended, does, and that this order is made applicable only to persons in the respective classes of industrial and commercial activities specified in the aforesaid marketing agreement, as amended;

(3) that the issuance of this order, amending the aforesaid order, as amended, is favored by producers of walnuts who, during the 1938–39 crop year (which the Secretary hereby determines to be a representative period) produced for market, within the production area specified in said order, as amended, at least two-thirds of the volume of such commodity produced for market within such production area;

(4) that the issuance of this order, amending the aforesaid order, as amended, is favored and approved by at least two-thirds of the producers who, during the 1938–39 crop year (which the Secretary hereby determines to be a representative period), were engaged, in the production area specified in said order, as amended, in the production for market of walnuts:

Now, therefore, it is hereby ordered, pursuant to the provisions of the aforesaid act, that said order, as amended, is hereby further amended in the respects stated hereinafter, and it is further ordered that the handling of walnuts grown in California, Oregon, and Washington, in the current of interstate or foreign commerce, or so as directly to burden, obstruct, or affect interstate or foreign commerce in such walnuts, from and after the date hereinafter specified, shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, as hereby further amended in the following respects:

1. By deleting the period at the end of the first sentence in section 2, article III (Sec. 901.4(b)) of the aforesaid order, as amended, and inserting, in lieu thereof, a semicolon and the following:

"and the salable percentage for the crop year September 1, 1939, to August 31, 1940, shall be sixty (60) percent."

(11) No registration will be accepted until satisfactory evidence is presented to the Secretary of State that the applicant for registration has organized an active and responsible governing body which will serve without compensation, and which will exercise a satisfactory administrative control, and that the funds collected by the registrant will be handled by a competent and trustworthy treasurer.

(12) No registration will be accepted if the means proposed to be used to solicit or collect contributions include the employment of solicitors on commission or any other commission method of raising money; the use of the "remit or return" method of raising money by the sale of merchandise or tickets; the giving of entertainments for money-raising purposes if the estimated costs of such entertainments, including compensation, exceed 30 percent of the gross proceeds, or any other wasteful or unethical method of soliciting contributions.

(13) No registration will be accepted until the Secretary of State has been informed in writing by a responsible officer of the applicant for registration that he has read these regulations.

(14) The Secretary will exercise the right reserved under regulation (7) to revoke any registration upon receipt of evidence which leads him to believe that the registrant has failed to maintain such a governing body as that described under regulation (11), has failed to employ such a treasurer as that described under regulation (11), has employed any of the methods for soliciting contributions set forth under regulation (12), has employed unethical methods of publicity, or has failed to attain a reasonable degree of efficiency in the conduct of operations.

(15) The sworn statement to be submitted by registrants in accordance with regulation (6) shall be supplemented by such further information as the Secretary of State may deem necessary.

SEC. 5. That for tests or investigations authorized by the Secretary of the Interior under the provisions of this Act, other than those performed for the Government of the United States or State governments within the United States, a reasonable fee covering the necessary expenses shall be charged, according to a schedule prepared by the Director of the Bureau of Mines and approved by the Secretary of the Interior, who shall prescribe rules and regulations under which such tests and investigations may be made. All moneys received from such sources shall be paid into the Treasury to the credit of miscellaneous receipts.

## BUREAU OF MINES

[Schedule 1C]

PROCEDURE FOR APPLYING FOR TESTS MADE ON ALL EXPLOSIVES AND BLASTING DEVICES BY THE EXPLOSIVES DIVISION OF THE BUREAU OF MINES

PRESCRIBED CONDITIONS AND REQUIREMENTS FOR PERMISSIBILITY WHEN USED IN COAL MINES AND SCHEDULE OF FEES FOR THE TESTS

*Authorization*

This schedule furnishes information relating to tests made by the Explosives Division of the Bureau of Mines. The province and duty of this Bureau to conduct scientific and technological tests for investigations concerning explosives were established by the Act of Congress of May 16, 1910 creating the Bureau of Mines, and the amended Act (37 Stat. 681) approved February 25, 1913.

The provisions of the latter Act pertaining to the testing of explosives and fees therefore are included in the following sections of the Act:

SEC. 2. That it shall be the province and duty of the Bureau of Mines, subject to the approval of the Secretary of the Interior, to conduct inquiries and scientific and technologic investigations concerning mining, and the preparation, treatment, and utilization of mineral substances with a view to improving health conditions, and increasing safety, efficiency, economic development, and conserving resources through the prevention of waste in the mining, quarrying, metallurgical, and other mineral industries; to inquire into the economic conditions affecting these industries; to investigate explosives and peat; and on behalf of the Government to investigate the mineral fuels and unfinished mineral products belonging to, or for the use of, the United States, with a view to their most efficient mining, preparation, treatment and use; and to disseminate information concerning these subjects in such manner as will best carry out the purposes of this Act.

SEC. 3. That the director of said bureau shall prepare and publish, subject to the direction of the Secretary of the Interior, under the appropriations made from time to time by Congress, reports of inquiries and investigations, with appropriate recommendations of the Bureau, concerning the nature, causes, and prevention of accidents, and the improvement of conditions, methods, and equipment, with special reference to health, safety, and prevention of waste in the mining, quarrying, metallurgical, and other mineral industries; the use of explosives and electricity, safety methods and appliances, and rescue and first-aid work in said industries; the causes and prevention of mine fires; and other subjects included under the provisions of this Act.

SEC. 4. • • •

SEC. 5. That for tests or investigations authorized by the Secretary of the Interior under the provisions of this Act, other than those performed for the Government of the United States or State governments within the United States, a reasonable fee covering the necessary expenses shall be charged, according to a schedule prepared by the Director of the Bureau of Mines and approved by the Secretary of the Interior, who shall prescribe rules and regulations under which such tests and investigations may be made. All moneys received from such sources shall be paid into the Treasury to the credit of miscellaneous receipts.

It should be noted that these moneys are not credited to the Bureau of Mines and that the cost of all tests are met by appropriations made to the Bureau of Mines not augmented by such fees.

*Nature of Tests and Definitions*

The Bureau of Mines is prepared to test:

I. Explosives for use in:

(a) *Coal mines.* To determine their permissibility. This portion of the present schedule supersedes Schedule 17C; [1]

(b) Metal mines, tunnels, quarries and other engineering operations to determine their characteristics. This portion of the present schedule supersedes Schedule 1B. [2]

II. Blasting devices for use in:

*Coal mines.* To determine their permissibility. This portion of the present schedule supersedes Schedule 20. [3]

III. Explosives or blasting devices under any one of the individual tests listed in this schedule.

*All reports on the results of tests made by this Bureau must be considered confidential and retained as such within the applicant's organization.*

*Definitions*

For the sake of brevity and clearness certain terms which will be used throughout this schedule are defined as follows:

*Approval.* An approval is an official certification in the form of a report on a special class of coal mining explosives and coal mining blasting devices, issued only by the Director of the Bureau of Mines, to a responsible organization stating that an investigation of its explosive or device has shown that this meets satisfactorily all the conditions and requirements for permissibility hereinafter set forth.

Reports of tests other than the complete series required for the determination of permissibility are not approvals and should not be construed as such.

*Basic sample.* The term "Basic sample" is used only in connection with permissible explosives. It is applied to the original sample which was tested to determine the permissibility of the explosive. Chemical and physical characteristics of future samples bearing the same brand name are checked against the basic sample.

*Equivalent.* An ingredient which will not materially alter the properties of the explosive and that will produce the same result as the original substance shall be considered an equivalent. In matters affecting its approval, the Bureau will deem itself sole judge of the question of equivalence.

*Ingredients.* Those substances reported as found by the Bureau of Mines in the original sample of explosive submitted as the basic sample shall be considered the ingredients of that permissible explosive.

*Lot of permissible explosives.* The term "lot of permissible explosives" as used in applying the tolerances is defined as all that explosive in the magazine from which a field sample or manufacturer's sample is procured, bearing identical case markings.

*Permissible.* An adjective used to designate complete assemblies having formal approval of the Bureau of Mines

[1] Procedure for testing explosives for permissibility for use in coal mines with test requirements and schedule of fees, 1935.

[2] Procedure for testing explosives used in metal mines, tunnels, quarries and other engineering operations with test requirements and schedule of fees, 1936 (amended in 1939).

[3] Permissible blasting devices; procedure in testing, fees and requirements for approval, 1938.

for use in mines having atmospheres which may become inflammable by reason of the presence of gas and coal dust, or gas or dust alone.

*Permissible explosive.* A permissible explosive must be similar in all respects to the "basic" sample which has passed certain tests prescribed by the Bureau to determine its safety for use in coal mines. It is permissible only when used in accordance with the conditions prescribed by the Bureau.

*Permissible blasting device.* The term "blasting device" applies to all devices designed for breaking down coal, excluding (a) hydraulic and mechanical devices; (b) explosives. As the only blasting devices for which a complete system for testing for permissibility has been established are devices in which the blasting agent is liquid carbon dioxide, only this class of blasting devices may be tested under this schedule.

A permissible blasting device must be similar in all respects to the model which has passed certain tests prescribed by the Bureau to determine its safety for use in coal mines. It is permissible only when used in accordance with the conditions prescribed by the Bureau.

*Tolerances.* The tolerances promulgated by the Bureau of Mines provide for reasonable limits of variation in the results of analyses and tests of field samples of permissible explosives or check tests of permissible blasting devices in comparing these samples with the basic samples or the devices originally approved.

### *Application*

Before the Bureau of Mines will make any tests on an explosive or a blasting device, the manufacturer or user must file an application in the form of a letter (there are no application blanks to be filled out) requesting the tests desired with a statement as to the nature of the explosive or blasting device to be tested. This application must be addressed to the Director, Bureau of Mines, Washington, D. C., and accompanied by a certified check or bank draft payable to the Treasurer of the United States to cover all fees for the tests. A copy of the application shall be sent by the applicant to the Explosives Division, Bureau of Mines, 4800 Forbes St., Pittsburgh, Pa. If an applicant be a manufacturer of explosives, he must furnish with the application the formula of the explosive. The Bureau's engineers will review the application and make recommendations to the Director as to whether the tests should be undertaken or not.

Explosives containing incompatibles (that is, substances that will react when mixed) or those containing chlorates, chlorites, and perchlorates, will not be accepted for tests, because previous investigations made by the Bureau of Mines and general experience in handling explosives of this type have demonstrated their hazardous nature. In the public interest, the Bureau cannot approve such explosives for use in the mineral industries.

Tests will not be continued upon those explosives which fail to pass a test with the Bureau's pendulum friction device when the fiber-faced shoe is used or which fail to pass the large impact test. Furthermore, tests will be discontinued on any sample of explosive which (a) is found to be chemically unstable; or (b) shows leakage of liquid explosive ingredient; or (c) is in such condition that exudation of liquid explosive ingredient would occur in handling or transportation; or (d) fails to detonate or explode completely for two or more charges while any of the permissibility tests are being made in 1¼-inch diameter cartridges or larger under a confinement equal to or greater than 1 atmosphere with a No. 6 electric detonator; or (e) in the rate of detonation test if it does not detonate in any one trial through the entire meter length in cartridges 1¼ inches in diameter or larger (an explosive is not permissible in any diameter less than the minimum in which it propagates for the entire length); or (f) if in the explosion by influence test, which is to be made as soon as possible after the receipt of the explosive, the sensitivity is not satisfactory; or (g) if a 680-gram (1½ pound) charge of explosive and original wrapper evolves 158 liters (5.58 cu. ft.) or more of poisonous gases in Bichel gage tests; or (h) if the unit deflective charge exceeds 454 grams; or (i) if it fails to pass any trial shot at Gallery No. 1.

### *Fees*

The following schedule of fees has been established and approved by the Secretary of the Interior, and these fees will be charged on and after the date of this schedule.

I. (a) *For the determination of the permissibility of explosives.* Complete official test of each explosive to determine its permissibility for use in coal mines, $250.00.

The determination of the permissibility of an explosive for use in coal mines involves the following tests: (1) Physical examination; (2) chemical analysis; (3) unit deflective charge; (4) gallery tests 1 and 4; (5) gaseous products of explosion; (6) rate of detonation; (7) pendulum friction; (8) explosion by influence. Other tests may be made if, in the opinion of the Bureau of Mines, they are required to establish the safety of the explosive. Such additional tests may be necessary when the cartridge is of exceptional construction or contains ingredients of an unusual or unique nature, or when any other questionable features are presented.

For any further tests other than 1 to 8 inclusive that may be carried out on an explosive, additional fees will be charged in accordance with this schedule under "I (b)" below, and for special tests not herein enumerated, that are authorized by the Director, fees will be charged to cover the cost of the work actually performed.

In case an explosive is withdrawn or fails to pass any of the official tests, fees (in accordance with this schedule under I (b)) will be charged for all the tests and analyses made up to the time of withdrawal or failure, plus a handling charge of $5.00. The balance of the fees submitted will be returned to the applicant.

I. (b) *For all individual tests[4] on explosives, particularly those used in metal mines, tunnels, quarries, and other engineering operations, and for all special tests on coal mine and other explosives.*

1. Chemical analysis of explosives, $25.00.

Chemical analyses, which are made on all samples tested under I (a) or I (b). The results of these analyses will be furnished only to the manufacturer and then only when covered by a fee. Users will not be furnished with the results of chemical analyses except in the case of a dispute involving the manufacturer where the Bureau consents to act as an umpire at the request of both parties.

2. Physical examination (for each size of cartridge), $3.00.

3. For three experimental small lead-block tests, $9.00.

4. For three rate-of-detonation tests, $9.00.

8. Explosion by influence (halved-cartridge method), $4.00.

9. For one gage test to determine the gaseous products of explosion (this test does not include the determination of the oxides of nitrogen), $15.00.

The chemical analysis of the gaseous products of a permissible explosive will be furnished only to the manufacturer. For explosives other than permissible this analysis may be furnished to either the user or manufacturer.

10. For pendulum friction test to determine sensitiveness to frictional impact, $7.00.

11. For three experimental shots in Trauzl lead blocks, $10.00.

12. For three experimental shots to determine the calories developed, $13.00.

13. For small impact test to determine sensitiveness to direct impact, $5.00.

14. For large impact to determine sensitiveness to direct impact, $22.00.

15. For maximum pressure by Bichel pressure gauge test, $25.00.

16. For other tests at estimated cost.

17. Changing of brand name or the listing of the same explosive under more than one brand name, per additional name, $5.00.

[4] The methods of making chemical analyses and physical tests are briefly described hereinafter.

II. *For the determination of the permissibility of blasting devices in which the blasting agent is liquid carbon dioxide.*

1. Official test of each device to determine its permissibility for use in coal mines but under one condition only as to weight of carbon dioxide, weight of heater ingredient and thickness of disc, $115.00.

A complete official test of a blasting device for use in coal mines may involve the following: (a) Physical examination, (b) analysis of any chemical material used as the blasting agent or for the initiation or advancement of the reaction taking place, (c) propulsive strength by ballistic pendulum, (d) gallery tests with gas-air mixture containing 6 percent of natural gas (Test 1) and also with 4 percent of gas and coal dust (20 pounds on side shelves) (Test 4), (e) gaseous products.

Other tests may be made if in the opinion of the Bureau of Mines they are required to establish the safety of the blasting device.

2. For each additional condition (this includes cost of making gallery tests Nos. 1 and 4), $60.00.

3. For chemical analysis of each additional heater, $25.00.

4. Physical examination, $15.00.

5. For each experimental shot in Gallery No. 1: Test 1, $4.00; Test 4, $5.00.

6. For three experimental shots in ballistic pendulum, $13.00.

7. For one gauge test to determine the gaseous products of explosion, $21.00.

### *Instructions for Submitting Explosives and Equipment for Blasting Devices*

The manufacturer[5] or applicant desiring tests to be made on an explosive or blasting device should not ship any samples until advised to do so. After such advice has been received, the manufacturer or applicant may ship, prepaid, to the Explosives Division, Explosives Testing Station, Bureau of Mines, Bruceton, Pa., the samples to be tested. These shipments shall be properly labeled and otherwise shall comply with I. C. C. regulations. Postal regulations do not permit explosives to be forwarded through the mails and this should never be done.

I. (a) *Explosives submitted for complete official tests for permissibility.* The quantities and sizes required for complete official tests for permissibility are as follows:

(1) Seventy-five pounds of each explosive in 1¼ by 8-inch cartridges, but if the cartridge count per 50-pound case is less than 150 cartridges then 225 cartridges is the minimum quantity required.

(2) Fifty cartridges of each in the smallest diameter in which it is desired the explosive shall become permissible except when this smallest diameter is 1¼ by 8 inches.

(3) Ten cartridges of each in any diameter other than those covered by items (1) and (2) in which it is desired the explosive shall become permissible.

(4) Should the manufacturer later desire to market other diameters the Bureau will establish the basic data for grams of wrapper and apparent specific gravity for those diameters. Fee (item I (b) (2)) will be charged for each diameter. If the diameter is smaller than the smallest permissible diameter approved on the basic sample or any subsequently submitted sample, a propagation test will be required and charged for (item I (b) (4)). No retest for propagation can be made on a given diameter which fails in any one trial or for any diameter less than that on which failure occurred.

I. (b) *Explosives submitted for other tests.* The quantities and sizes of cartridges of explosive required for tests other than the permissibility tests outlined above will be determined by the Bureau's engineers.

II. *Blasting devices submitted for complete official tests for the permissibility.* (1) One complete device, with two sets of assembly and detail drawings that show the construction of the device and the materials of which it is made should be forwarded to the Explosives Division, Explosives Testing Station, Bruceton, Pa. All materials shall be shipped prepaid.

(2) When the device has been inspected by the Bureau's engineers, the applicant will be notified of the amount of fees to be deposited, the number of additional devices and other materials that will be required for the tests.

(3) The applicant shall at his own expense ship to and install at the Explosives Testing Station, Bruceton, Pa., such equipment and materials as may be necessary for carrying out the tests.

### *Conditions and Requirements Under Which Tests on Explosives and Blasting Devices Will Be Made*

The conditions under which tests will be made on explosives and blasting devices are as follows:

*Storage requirements*—(a) *Explosives.* The cases in which the explosives are delivered by the manufacturer will be opened and the explosives will be placed in slide-lid boxes which will be stored in one of the Bureau's magazines for at least 30 days before tests are commenced, other than the tests under (c). This storage requirement will not be waived for explosives submitted for tests on permissibility, but may be waived for other explosives if in the judgment of the explosives engineers of the Bureau this is desirable.

(b) *Heater elements.* For blasting devices, the heater elements will be handled in the same manner as under (a).

*Preliminary tests on explosives.* As soon as possible after its receipt, an explosive will be analyzed chemically, an explosion by influence test will be made, and either a pendulum friction or large impact test, or both, will be made.

*General conditions governing testing.* (a) Tests on explosives and blasting devices will be made at the Explosives Testing Station of the Bureau of Mines at Bruceton, Pa., and will be made in the order of receipt of the explosives or blasting devices. When explosives or blasting devices from more than one applicant are received on the same day, preference will be given to the earliest application.

(b) The applicant will be notified of the date of starting the tests in ample time to have a representative present to witness them.

(c) No one is to be present at or participate in the tests except the Bureau of Mines' employees, representatives of the applicant desiring tests to be made, and such other persons as may be mutually agreed upon by the applicant and the Bureau. Witnesses shall be present in the capacity of observers only. The conduct of the tests shall be entirely in the hands of the Bureau.

(d) Tests for a manufacturer are limited to samples of explosives which are his own product.

### *Methods of Testing*

(1) *Chemical testing.* The Bureau of Mines' methods for the analysis of explosives are described in its Bulletins Nos. 51, 96, and 219, its Technical Papers Nos. 78, 160, 162, and 282, and its Report of Investigations 3337.[6]

(2) *Physical testing.* The routine physical tests which are made by the Bureau of Mines on explosives, particularly for determination of permissibility for use in coal mines, are described in

A method for the determination of moisture in explosives containing explosive oils of high volatility is described on pages 15 and 16, and the apparatus used is illustrated in figure 7.

Bulletin 346[1] and may be briefly stated as follows:

(a) *Physical examination.* The physical examination of an explosive is made on four cartridges taken at random from the shipment of explosive or heater element (for blasting device). The apparent specific gravity is determined from the weight of each cartridge and of the sand displaced when the cartridge is embedded in this sand which is contained in a cylinder. The average of the four determinations made is taken as the apparent specific gravity; also the average weight of the cartridges is taken as the weight of cartridge.

From the weights for ingredients and wrapper for each cartridge the weight of wrapper per 100 grams of explosive is derived. The color and consistency of the explosive and the color of its wrapper are observed and recorded.

(b) *Unit deflective charge.* The "unit deflective charge" for an explosive is the weight of explosive that has been found to deflect the ballistic pendulum of the Bureau of Mines to the same extent as one-half pound of Pittsburgh Testing Station Standard 40 percent straight nitroglycerin dynamite.

(c) *Gallery tests.* Before an explosive is admitted to the Bureau of Mines permissible list, it must pass without a single ignition the following tests in Gallery No. 1:

*Test 1.* Ten trials, each with a charge of the explosive equal to the unit deflective charge, are made. Each charge is fired into a mixture of natural gas and air containing 8.0±0.3 percent of methane and ethane at a temperature of 25°±5° C.

Preliminary to charging the explosive into the borehole of the steel cannon a primer is made from one of the cartridges. This cartridge is punched centrally on one end for the detonator and then slit lengthwise with two or three cuts about 4 inches long near the opposite end. A No. 6 electric detonator is inserted in the hole and the primer thus made is pushed gently and firmly to the back of the borehole with the detonator facing outward. The primer thus fills entirely the back of the borehole with no air spaces. The remaining cartridges of the charge are then slit lengthwise two or three times, loaded into the borehole and tamped in front of the primer. One pound of milled plastic fireclay is then tamped firmly into the borehole and the charge fired into the gallery.

*Test 4.* Five trials each using a 1½ pound charge of explosive are fired without stemming into a mixture of natural gas and air containing 4.0±0.2 percent of methane and ethane and 20 pounds of bituminous coal dust, part of which is brought into suspension in the air. Preliminary to charging the explosive into the borehole, a 2-inch length is cut from one of the cartridges and a No. 6 electric blasting cap is inserted centrally in the cut portion to form a primer. The remaining cartridges of the charge are then slit and are tamped firmly into the borehole. The primer is then placed against the main charge with the charged end of cap pointing toward the charge of explosive and the charge is then fired without stemming.

(d) *Gaseous products of explosion.* To determine these products a charge consisting of 200 grams of explosive from 1¼-inch diameter cartridges weighed free of the wrapper, together with the proportionate quantity of original wrapper is fired in a 15-liter Bichel gage from which the air has been evacuated. The charge is fired by means of a No. 6 electric blasting cap. Five minutes after the shot is fired the pressure is observed and recorded. A sample of gases is drawn from the gage for a chemical analysis and the average percentage of each gas present is computed from two shots. The volume of the poisonous gases must not exceed 158 liters per 1½ pounds of explosives for a permissible explosive.

(e) *Rate of detonation.* The rate of detonation is determined with the Mettegang recorder. The explosive to be tested is placed in a thin sheet-iron tube 42 inches in length and ¼ inch larger in exterior diameter than the cartridge being tested. The tube is perforated transversely at two places by holes, ⅜ inch in diameter. The first hole is 2 inches from the cap end of the tube and the centers of the two holes are exactly 1 meter apart. These holes are covered with friction tape wrapped around the tube. The ends of the cartridges are cut off but the explosive is otherwise maintained in its original wrapper and the tube is charged as a continuous file. Through the explosive at the center of each hole there is passed a 4-inch piece of double cotton-covered copper wire (B. & S. gage No. 28).

The assembled tube is suspended in the bombproof and two pieces of wire are then attached to complete two separate electrical circuits from the Mettegang recorder. A No. 6 electric blasting cap is embedded centrally in one end of the file of explosive so that the charged end of the cap is ½ inch from the first wire through the explosive. The legs of the cap are then connected to the firing line. After the charge is fired the readings on the sooted drum of the Mettegang recorder are made. From these readings and the known speed of rotation of the drum the rate of detonation of the explosive is computed.

If the detonation of the entire file is not complete in any trial that diameter and all smaller diameters shall be deemed non-permissible.

(f) *Pendulum friction test.* This test is made with the pendulum friction device, which consists of a steel anvil (on which a 7-gram charge of explosive is placed) and a swinging shoe, which is attached to the lower end of a rigid, steel pendulum rod. In testing an explosive for permissibility, a steel shoe or a hard-fiber-faced shoe is used. This shoe, which can be dropped from different heights above the anvil, passes over the anvil a number of times. The device is adjusted so that it swings across the face of the anvil 18±1 times before coming to rest when there is no explosive on the anvil. Ten separate trials are made. In order to pass the test a permissible explosive must not show in any trial using the hard-fiber-faced shoe dropped from a height of 1.5 meters, a result more unfavorable than an almost indistinguishable local crackling. A field sample of a permissible explosive must pass the same test, except that in the retests the height of fall of the shoe shall be 1.35 meters.

(g) *Explosion by influence tests.* The halved-cartridge method is employed. In this method a hole for imbedding a No. 6 electric blasting cap is made in the center of one end of a 1¼ by 8-inch cartridge. Before inserting the cap the cartridge is cut in the middle at right angles to its axis; the two cut ends are placed facing each other with their axes in line. The two halves are spaced the required distance apart by rolling them in paper. The tube thus formed is held in place by carpet tacks. Just prior to firing, the detonator is inserted in the outer end of one of the half-cartridges.

The greatest distance between the halves of the cartridge at which both halves detonate in four shots without any failures is termed the "sensitiveness" of the explosive. The minimum distance at which no explosion occurs in four shots is also determined.

(h) *Large impact test.* This test is made on a 1-inch length of a 1¼ inch diameter cartridge, cut from the center of the cartridge. This 1-inch length of explosive in its original wrapper is placed on the anvil of the large impact device with the cylindrical axis of the cartridge vertical and the weight of 25 kilograms dropped 10 times from a height of 15 centimeters, fresh charges being used each time. Attached centrally to the lower end of the falling weight is a steel pin 2 inches long and 1⅜ inches in diameter. This steel pin falls directly on the sample under examination. This test is made at the option of the Bureau of Mines when as a result of a review of the chemical analysis of the explosive, or from other cause, any question concerning the sensitiveness to impact of the explosive arises. Failure of the explosive on any trial shall constitute a failure to pass the test, and such failure shall disqualify an explosive from further testing.

### *Provisions for the Permissibility of Explosives and Blasting Devices*

The Bureau reserves the right to rescind for cause, at any time, any approval granted under this schedule. An explosive or blasting device which has passed all tests necessary to place it on any of the Bureau's permissible lists may, therefore, be omitted from future lists.

An explosive or blasting device is permissible in use only when it satisfies the following requirements:

I. (a) *Permissible explosives.* 1. That the explosive is in all respects similar to the sample submitted by the manufacturer for test.

2. That electric detonators (not fuse and detonators) are used of not less efficiency than No. 6, the detonating charge of which shall consist of a one-gram mixture of 80 parts of mercury fulminate and 20 parts of potassium chlorate (or their equivalents)—and that the required electric firing must be done by means of a permissible-type blasting unit.

3. That the explosive, if frozen, shall be thawed thoroughly in a safe and suitable manner before use.

4. That the quantity used for a shot does not exceed 680 grams (1½ pounds), and that it is properly confined with clay or other incombustible stemming.

5. That the diameter of the cartridge used must be not less than that determined by tests.

6. That the shot is not fired in the presence of a dangerous percentage of firedamp.

7. That the shot is not a dependent shot, is not bored into the solid, and does not have a burden so heavy that the shot obviously is liable to blow out.

8. That the explosive be stored under proper conditions so that it does not undergo change in character.

II. *Blasting devices.* 1. That the device is in all respects similar to the sample submitted for tests.

2. That the permissible conditions of charging as to thickness of disk, weight of heater ingredient, and weight of carbon dioxide charge are met, and that the device is properly confined with clay or other incombustible stemming.

3. That the lead wires shall be connected to either type of shell top (end or side connection) only after the shell has been placed in the borehole and further, that the terminal plug when the end connection shell top is used, shall not be inserted into the shell until these connections are being made.

4. That the device shall not be fired in the presence of a dangerous percentage of firedamp.

5. That the device shall not be charged with the heater ingredient and carbon dioxide in the mine.

*Wording, purpose, and use of approval plate for permissable blasting devices—Approval plate.* Manufacturers shall attach, stamp, or mold an approval plate on each permissible blasting device. The plate shall bear the seal of the Department of the Interior, Bureau of Mines, and be inscribed as follows: "Permissible Blasting Device Approval No. ____, issued to the ---------- Company."

When deemed necessary, appropriate cautions shall be added. The size and position of the approval plate shall be satisfactory to the Bureau.

Where the nature of the device is such that it is not feasible to attach a permanent metal approval plate, a paper label may be used if permitted by the Bureau of Mines and in addition there shall be stamped, etched, or otherwise engraved on the device the following: "B. M. No. ____." This is an abbreviation to indicate "Bureau of Mines Approval No. ____."

*Purpose.* The approval plate or label is an identifying mark which enables any one to tell at a glance that the device is of the permissible type. By the plate or label the manufacturer shows that his device complies with the Bureau's requirements and that it has been approved for use in coal mines.

*Use.* Permission to place the Bureau's approval plate or label on his device obligates the manufacturer to maintain the quality of his product and to see that each device is constructed according to the drawings that have been accepted by the Bureau and are in the Bureau's files, and further to instruct the user that the device is only permissible when used as the Bureau prescribes. Blasting devices exhibiting changes in design that have not been approved are not permissible and must not bear the Bureau's approval plate or label.

*Instructions on handling future changes in design of a blasting device.* When the manufacturer desires to make any changes in the design of a blasting device he must first of all obtain the Bureau's approval of the change before making the change.

### *Active and Inactive Lists*

The Bureau maintains active and inactive lists of permissible explosives and permissible blasting devices. The active lists are published annually and the inactive lists include those permissible explosives or blasting devices which have not been manufactured during any calendar year or those placed upon these lists at the request of manufacturers. The Bureau will transfer an explosive or blasting device from the inactive list to the active list upon the request of the manufacturer, provided the explosive or blasting device meets the regulations then in force.

### *Field Sampling*

The Bureau of Mines will from time to time collect and reexamine permissible explosives and blasting devices found in commercial shipments and in the field in order to determine how closely they conform to the basic samples. To govern the interpretation of such tests the tolerances given hereafter are applied. If the explosive or blasting device (including heater element) does not pass the retests or exceeds the tolerances for chemical analysis or physical tests, such failure may be due to either (1) improper manufacture or (2) improper storage.

The manufacturer is responsible for the first but the consumer or owner is responsible for the second because the manufacturer has no control over the conditions of storage when the explosive or heater element has once passed from his ownership. The manufacturer should exercise due care that the quality of the raw materials, as well as the weighing and incorporation of them, shall be similar in all respects to those employed in the making of the original sample.

The user should employ only explosives or heater elements which are in first-class condition and freshly manufactured. Explosives or heater elements should be stored in well ventilated magazines and if possible the temperature therein should be kept below 90° F. Boxes of explosives should be placed in the magazine so that the cartridges lie horizontally. It is well to purchase explosives or heater elements only in such quantities that they can be used promptly. The explosives or heater elements purchased first should be used first, accordingly older explosives or heater elements should not be stored under or behind a fresh consignment.

*Tolerances as applied to field or manufacturers' samples*—I. *For permissible explosives.* Tolerances which provide for reasonable limits of variation in the results of analyses and tests of field samples and manufacturers' samples of permissible explosives were established July 1, 1915, subsequently amended November 15, 1920, February 26, 1921, and further modified in this schedule. The tolerances as enumerated below supersede all previous tolerances.

(1) *Chemical analysis of field samples.* (A) *Moisture.* The tolerances for moisture shall be in accordance with those shown in Table 1:

(C) *Impurities in ammonium nitrate* may include ammonium chloride and ammonium sulphate. The tolerance for the sum of the last two items is 4 percent of the sum of all the items included as "commercial ammonium nitrate" (viz ammonium nitrate, chloride and sulphate).

(D) *Other ingredients or their equivalents.* For ingredients in quantities of 60 percent or more the tolerance shall be ±3 percent of the total explosive.

For ingredients in quantities not exceeding 60 percent the tolerances shall be in accordance with those shown in Table 2.

(2) *Physical tests of field samples.* (A) The volume of poisonous gases from 600 grams of the explosive including its wrapper, must be less than 158 liters by one trial or the average of two or three trials. The volume of poisonous gases emitted by a field sample must be within a tolerance of ±15 percent of the volume emitted by the basic sample. Where the volume is over 137.3 liters and less than 158 liters then the minus 15 percent tolerance will be the only one applied.

(B) *Rate of detonation* by Mettegang recorder in sheet steel tubes; ±15 percent of that shown by the basic sample.

(C) *Unit defective charge.* Plus or minus 10 percent of that shown by the basic sample.

(D) *Grams of wrapper* (for any size). Plus or minus 2 grams of that shown by the basic sample.

(E) *Apparent specific gravity.* Plus or minus 7.5 percent of that shown by the basic sample.

(F) *Gallery tests.* (a) *Test 1* must pass five shots with a charge of 90 percent of that used for the basic sample. (b) *Test 4* must pass two shots with a charge of 612 grams. (c) Pendulum friction test must pass with hard fiber-faced shoe falling from a height of 1.35 meters.

*Notification regarding field samples of explosives.* (1) If the explosive fails to pass gallery tests, pendulum friction test, or if the poisonous gases exceed the tolerance, the Bureau will declare that particular lot of explosive not permissible, and a copy of the notification to the consumer or owner will be furnished the manufacturer. The notification will state that the explosive did not meet the requirements.

(2) If the explosive exceeds the tolerance for any items of the chemical analysis, for grams of wrapper per 100 grams of explosive, for apparent specific gravity, for rate of detonation, or for unit deflective charge, the manufacturer only will be advised of the results except that should these results, in the opinion of the explosives engineer, indicate that the explosive is unsafe for use, then the operator or owner will be warned immediately.

II. *For permissible blasting devices.* The construction of blasting devices will be checked against the basic device. The same tolerances will be applied to the ingredients of the heater as are applied to the ingredients of permissible explosives.

*General Statement*

1. In conformity with subsection (e) of Section 701 of the Federal Food, Drug, and Cosmetic Act [Section 701, 52 Stat. 1055; 21 U.S.C. 371 (e)], the Secretary of Agriculture on his own initiative published on March 7, 1939, which appeared on page 1143 of the FEDERAL REGISTER, a notice of a public hearing to be held on April 10, 1939, in the South Ballroom, Tenth Floor, Raleigh Hotel, Twelfth Street and Pennsylvania Avenue N. W., Washington, D. C., for the purpose of receiving evidence upon the basis of which, in pursuance of the authority vested in the Secretary of Agriculture by the provisions of Sections 401, 403 (g), (2), and 403 (h), (1) and (2) [Secs. 401, 403 (g), (2), and 403 (h), (1) and (2), 52 Stat. 1046 and 1047; 21 U.S.C. 341, 343 (g), (2), and 343 (h), (1) and (2)], regulations may be promulgated (a) (1) fixing and establishing a reasonable definition and standard of identity, and (2) requiring the label declaration of certain optional ingredients; (b) (1) fixing and establishing a reasonable standard of quality, and (2) specifying the form and manner of label statements of substandard quality; and (c) (1) fixing and establishing a reasonable standard of fill of container, and (2) specifying the form and manner of label statements of substandard fill of containers; for each of the foods commonly known as canned peaches, canned apricots, canned pears, and canned cherries. The notice contained a proposal, in general terms, for defining and so standardizing each of such foods. John McDill Fox was designated as presiding officer to conduct such hearing. Thereafter, a public hearing was held at the time and place specified, and John McDill Fox acted as presiding officer. (Government's Exhibit No. 1.)

2. At said hearing the presiding officer announced that he would first hold a hearing for the purpose of receiving evidence upon the basis of which a regulation may be promulgated fixing and establishing a reasonable definition and standard of identity for the food commonly known as canned peaches.

3. In pursuance of such announcement, a hearing was held for the purpose of receiving evidence upon the basis of which a regulation may be promulgated fixing and establishing a reasonable definition and standard of identity for the food commonly known as canned peaches, and the hearing was continued, with reference to the other proposals, to dates subsequently to be announced.

4. On April 14, 1939, at 1:45 p. m., the hearing on the definition and standard of identity proposal for canned apricots was convened and held on April 14, and at 6:10 p. m., was adjourned until May 1, 1939, and resumed on May 1, 1939, and concluded on May 2, 1939, at 11:50 a. m. It was ordered that all evidence with reference to the sucrose-dextrose issue introduced in evidence at the hearing on the definition and standard of identity proposal for canned peaches be incorporated in this record. Page references to the record of the hearings conducted on May 1, 1939, and May 2, 1939, are cited as "C. R. —". All interested persons were notified, pursuant to the rules of procedure, of their opportunity to file proposed findings of fact and written argument.

5. Within the time announced at the hearing within which interested persons might file proposed findings of fact, written argument, or both, various interested persons filed proposed findings of fact, together with written argument in support thereof, based upon the evidence adduced at the hearing which, if granted, would modify the proposal contained in the FEDERAL REGISTER.

6. Pursuant to the rules of procedure, the presiding officer, therefore, makes this his report and suggests that the Secretary issue the regulation hereinafter set forth and make, on the basis of the substantial evidence of record at the hearing, the findings of fact herein contained as part of the order promulgating and making public such regulation.

*Suggested Findings*

1. Canned apricots are prepared from mature apricots. (R. pp. 22, 23, 35)

2. Such apricots are in one of the following forms of units: whole peeled, whole unpeeled, halves peeled, halves unpeeled, peeled quarters, unpeeled quarters, peeled slices (peeled sliced), unpeeled slices (unpeeled sliced), peeled mixed pieces of irregular sizes and shapes, unpeeled mixed pieces of irregular sizes and shapes. (R. pp. 22, 23, 35, 46) Such forms of units are not mixed in canning. (R. pp. 22, 45) Each such form of units has its own designation. (R. pp. 22–23, 45) Canned apricots are not prepared in any other forms of units. (R. pp. 23, 45) Apricots of each such form of units are an optional apricot ingredient. (R. pp. 23, 34, 45, 46)

3. Except in the case of whole apricots, canned apricots are pitted. (R. p. 45)

4. Canned apricots contain a suitable liquid packing medium. (R. pp. 24, 34, 45–46) It may be the natural juice of the apricot obtained by precooking the apricots so that such juice exudes, or it may be an added liquid. (R. pp. 36, 48, 92)

5. Water is a suitable liquid packing medium. (R. pp. 25, 45)

6. The natural juice of the apricot is a suitable liquid packing medium. (R. pp. 65, 86–87, 88)

7. A water solution of sugar is a suitable liquid packing medium. (R. pp. 45, 78–82); (Identity of Peaches, R. pp. 37, 38, 48, 53, 92, 156, 183, 214)

8. Sugar is defined in Webster's International Dictionary on page 2521 thereof (C. R., Other Interested Parties' Exhibit No. 4) as:

"1. A sweet crystallizable substance, colorless or white when pure, occurring in many plant juices, and forming an important article of human food;—called specif. *cane sugar, sucrose,* and *saccharose.* The chief sources of sugar are the sugar cane and the sugar beet, the completely refined products of which are identical and form granulated sugar, loaf sugar, etc., of commerce. The cane juice, obtained by expression, is treated with lime to remove impurities, filtered, and evaporated to crystallization. The mother liquor, or molasses, is removed by draining or (now usually) by a centrifugal. The crude yellowish or brown sugar thus obtained is usually refined at central plants by redissolving, clarifying, decolorizing, and recrystallizing. In the case of beets the sugar is removed by extraction with water (diffusion) and carried to the refined state in one operation. Crude cane sugar is often sold as *brown sugar,* but crude beet sugar has an unpleasant flavor. Some sugar is also made from palm trees, maple trees, etc. Sugar forms fine monoclinic crystals melting at 186° C. (367° F.), which dissolve in about half their weight of water at ordinary temperature. Chemically, it is a disaccharide of the formula $C_{12}H_{22}O_{11}$, formed by union of one molecule of dextrose with one of levulose. It does not reduce Fehling solution and does not ferment directly, but is converted by diastase (or by heating with acids) into the fermentable mixture called *invert sugar.* It is dextrorotatory, a property which is used in estimating the strength of its solutions. Sugar is a food, and also serves as a condiment and preservative for other foods. See Food 1.

"2. By extension, any of a class of sweet, soluble compounds comprising the simpler carbohydrates. See Carbohydrate. The simple sugars, those not decomposable by hydrolysis, are called *monosaccharides.* Complex sugars are formed by the condensation of two, three, or four molecules of simple sugar and are called *disaccharides, trisaccharides,* and *tetrasaccharides.* For the structure and classification of simple sugar, see Monosaccharide. Among the important natural sugars are *sucrose* (See def. 1), or *cane sugar, dextrose* (d-*glucose*), or *grape sugar, levulose* (d-*fructose*), or *fruit sugar, lactose,* or *milk sugar,* and *maltose,* or *malt sugar.* Some of these, and also many others, have been made synthetically."

9. Prior to the hearing, a letter was addressed to the Secretary of Agriculture asking for a definition of the word "sugar" as used in the proposal, which letter was answered under the signature of the Secretary of Agriculture, which answer reads as follows and is Other Interested Parties' Exhibit No. 2, Identity of Peaches:

"We have your letter of March 30 referring to proposals for food standards to be considered at public hearings on April 10, 1939. You inquire as to our interpretation of the words 'Water solution of sugar, of 25° Brix or more' and 'Water solution of sugar, of less than 25° Brix' as used in these proposals.

"The word 'sugar' as used therein refers to sugar as defined in the current advisory definition and standard of identity for sugar under the present

Food and Drugs Act, which you will find on page 11 of the enclosed F. D. 2, definition 1, under 'A. Sugar and Sugar Products.' These are merely proposals. The final standards will be based on evidence adduced at the public hearing and any interested party is, of course, invited to submit proposals for other packing mediums."

10. In S.R.A., F.D. No. 2, Rev. 5 (Identity of Peaches, Other Interested Parties' Exhibit No. 2), under "Sugars and Related Substances", the following appears:

"A. Sugar and Sugar Products

"1. *Sugar.* Sucrose (saccharose) obtained chiefly from sugarcane and sugar beets. Granulated, loaf, cut, milled, and powdered sugars are different forms of sugar, containing at least 99.5 percent of sucrose."

Under "B. Dextrose and Related Products", the following appears:

"1. *Dextrose.* The product chiefly made by the hydrolysis of starch or a starch-containing substance, followed by processes of refining and crystallization *

"a. Anhydrous dextrose contains not less than 99.5 percent of dextrose and not more than 0.5 percent of moisture.

"b. Hydrated dextrose contains not less than 90 percent of dextrose and not more than 10 percent of moisture, including water of crystallization.

"* When derived from cornstarch, dextrose is known commercially as refined corn sugar."

11. Starch is a polysaccharide. Sucrose is a disaccharide. Dextrose and levulose are monosaccharides. (C.R. p. 32)

12. Polysaccharides such as starch have a higher caloric value per gram than the disaccharides such as sucrose, and the disaccharides have a higher caloric value per gram than the monosaccharides such as dextrose and levulose. (C. R. p. 32)

13. By the dictionary definition, the simple sugars, monosaccharides, are not decomposable by hydrolysis. (C. R., Other Interested Parties' Exhibit No. 4)

14. Sugar, as described in the Encyclopedia Britannica on page 523 (C. R., Other Interested Parties' Exhibit No. 5), applies to over 100 substances, having distinctive properties and scientific names; for example, sucrose, glucose, fructose, lactose, maltose, etc.

15. "As ordinarily understood, of course, by chemists, and physiologists, sugar is just one of the break-down products of two other large nutritive ingredients, namely, ordinary starch from plants, and starch from animals. Now as they are digested or hydrolized, you get ultimately a double sugar, nutritively it is like cane sugar, or beet sugar, and then when they are inverted, further changed into the form that they are absorbed and actually utilised in the body, we have dextrose and levulose, so that beginning with starch you have the double sugars, maltose and fructose, and then you have the simple sugars, which is the ultimate product.

"There are other forms of sugars that can be utilised by various bacteria, but not by man." (Identity of Peaches, Carlson p. 159)

16. Crystalline dextrose manufacture was made commercially possible in 1923 by the granting of the Newkirk patents (October 23, 1923; September 16, 1924; January 6, 1925) on corn starch hydrolysis and the economical separation of high purity dextrose from the converter liquors. (Identity of Peaches, Other Interested Parties' Exhibit No. 3)

17. Not until 1926 was chemically pure dextrose accepted by the United States Pharmocopoeia. (Identity of Peaches, Other Interested Parties' Exhibit No. 3)

18. Not until 1930, when the Secretary of Agriculture ruled that refined dextrose (corn sugar) could be used in the manufacture of food products without label declaration, was the utilization of dextrose by canners, preservers, beverage manufacturers and allied food industries seriously considered. (Identity of Peaches, Other Interested Parties' Exhibit No. 3)

19. In 1930, the Secretary of Agriculture ruled:

"Corn sugar (dextrose) when sold in packages must be labeled as such; when sold in bulk must be declared as such; but the use of pure refined corn sugar as an ingredient in the packing, preparation, or processing of any article of food in which sugar is a recognized element need not be declared upon the label of any such product.

"Nothing in this ruling shall be construed to permit the adulteration or imitation of any natural product such as honey by the addition of any sugar or other ingredient whatever.

"The term 'sugar', with or without the parenthetical expression 'sucrose', as used in the definitions to designate the sweetening agent in manufactured food products, is to be interpreted, wherever necessary to effect the purpose of the foregoing decision, as including dextrose (pure, refined corn sugar)." (Identity of Peaches, Other Interested Parties' Exhibit No. 1)

20. The great bulk of consumers regard "sugar" as the common or usual name of sucrose, i. e., cane or beet sugar. (Identity of Peaches, R. pp. 53, 132, 177, 350, 360, 397, 404, 416, 424, 442, 453, 461, 465, 472)

21. Within the past 3½ years, refined corn sugar (dextrose) has been used in the canning of apricots. (Identity of Peaches, R. p. 275)

22. Prior to that time, cane or beet sugar (sucrose) was the only sugar used in the canning of apricots. (Identity of Peaches, R. pp. 199–200, 275–276, 369, 400, 422, 442, 472); (Identity of Peaches, Other Interested Parties' Exhibit No. 3)

23. The simple sugar, dextrose, is now obtainable by hydrolysis from corn starch; is called "refined corn sugar"; and is now used in combination with cane or beet sugar (sucrose) in a water solution as a liquid packing medium for canned apricots. (Identity of Peaches, R. pp. 199–200, 258, 275); (Identity of Peaches, Other Interested Parties' Exhibits Nos. 3 and 4)

24. Refined corn sugar (dextrose) and cane or beet sugar (sucrose) differ in sweetness, in food value, in manner of absorption, in solubility, and their solutions differ in viscosity, in osmotic pressure, and in boiling temperature. (Identity of Peaches, R. pp. 66–67, 174–175, 177, 257, 260–261, 265, 333–345, 347, 370–371, 398, 427, 499–500, 513–517); (C. R. pp. 21, 22, 52, 53, 54, 55, 57); (Identity of Peaches, Other Interested Parties' Exhibit No. 3) A water solution of refined corn sugar (dextrose) as the liquid packing medium cannot be used alone in the canning of apricots. The maximum amount of refined corn sugar (dextrose) which has been so used for commercial purposes, in combination with cane or beet sugar (sucrose), is 33⅓% refined corn sugar (dextrose) and 66⅔% cane or beet sugar (sucrose) or cane and beet sugar (sucrose). (Identity of Peaches, R. pp. 199–200, 258, 275.) Refined corn sugar (dextrose) is not as sweet as cane or beet sugar (sucrose), being generally regarded as from 50% to 75% as sweet as cane or beet sugar (sucrose). (Identity of Peaches, R. pp. 66–67, 174–175, 217, 260–261, 499–500, 513–517.) Consumers are accustomed to gauge sweetness according to that of cane or beet sugar (sucrose). (Identity of Peaches, R. p. 218)

25. Refined corn sugar (dextrose) sells on the open market at a cheaper price than cane or beet sugar (sucrose). (Identity of Peaches, R. pp. 189, 239); (C. R. p. 58); (C. R., Affidavits of A. B. Saroni, H. P. Nachtrieb, and Phillip Kelley)

26. Another sugar, refined corn sugar (dextrose), is now used in the canning of apricots, as well as cane sugar and beet sugar (sucrose), and it will promote honesty and fair dealing in the interest of consumers to differentiate between the kinds of sugars used in preparing the liquid packing medium of canned apricots. (Identity of Peaches, R. pp. 66–67, 398, 406, 424, 427, 437, 471, 492)

27. A label statement of the origin of such sugars used in preparing such liquid packing medium will promote honesty and fair dealing in the interest of the consumer. (Identity of Peaches, R. pp. 424, 492)

28. The use of the qualifying words "cane sugar", "beet sugar", followed by their chemical name "sucrose", and "refined corn sugar", followed by its chemical name "dextrose", will promote honesty and fair dealing in the interest of the consumer. (Identity of Peaches, R. pp. 41, 42, 57, 58, 71, 100, 102, 120, 121, 132, 163, 229, 239, 404, 425, 450, 453); (C. R. pp. 67–69)

29. A water solution of sugar is used not only as a liquid packing medium but also as a sweetening agent. (Identity of Peaches, R. pp. 72, 163, 172, 174, 175, 231, 256)

30. Such sweetening agent is called sirup. (Identity of Peaches, R. pp. 71, 120)

31. There are four water solutions of cane or beet sugar (sucrose) or cane and beet sugar (sucrose) known as sirups to consumers and used in the industry, to wit: light, medium, heavy, and extra heavy. (R. pp. 69–70); (Identity of Peaches, R. pp. 120, 121, 126, 131, 229, 297, 425) It is a customary trade and consumer practice so to distinguish them. (Identity of Peaches, R. pp. 41, 61, 131, 229, 424) Such sirups are measured and distinguished by their specific gravity as determined by the Brix hydrometer. The Brix hydrometer is a reliable instrument for testing specific gravity of liquid solutions and is in general use. (R. pp. 26, 74); (Identity of Peaches, R. p. 40, 136) A water solution of cane or beet sugar (sucrose) or cane and beet sugar (sucrose) which does not show a reading of 10° on the Brix hydrometer does not sweeten the finished canned apricots sufficiently to be known as a sirup for this food. (R. pp. 49, 69, 74, 86)

32. When such sirups are prepared from cane or beet sugar (sucrose) or cane and beet sugar (sucrose), they have, respectively, the following readings on the Brix hydrometer: not less than 10° but less than 25°, not less than 25° but less than 40°, not less than 40° but less than 55°, and not less than 55°, but when such sirups of equivalent sweetness are prepared from a mixture of cane or beet sugar (sucrose) or cane and beet sugar (sucrose) and refined corn sugar (dextrose), they do not have the above readings on the Brix hydrometer because of the difference in sweetness between refined corn sugar (dextrose) and cane or beet sugar (sucrose). However, the Brix reading of a sucrose sirup equivalent in sweetness to that of any such mixture is obtained by adding the percent by weight of cane or beet sugar (sucrose), or both, in such mixture to two-thirds of the percent by weight of refined corn sugar (dextrose) in such solution. Such calculated Brix readings (sucrose equivalents) are identical with the limits above set forth. (R. pp. 27–28, 37, 48, 53, 56, 69, 70, 72)

33. Due to the fact that in canned apricots which have been prepared with a liquid packing medium consisting of a water solution of cane or beet sugar (sucrose) or cane and beet sugar (sucrose), there will be present in addition to sucrose, due to inversion, levulose and dextrose and that in canned apricots which have been prepared with a liquid packing medium consisting of a water solution of a mixture of cane or beet sugar (sucrose) or cane and beet sugar (sucrose) and refined corn sugar (dextrose), there will likewise be present sucrose, and due to inversion, levulose and dextrose, the consumer would have no way of telling, from an examination of the finished canned apricots, the optional sugar ingredient used. It will, therefore, promote honesty and fair dealing in the interest of the consumer to require a label statement of the optional sugar ingredient used in the preparation of the liquid packing medium. (Identity of Peaches, R. p. 492)

34. The common or usual names of such sirups are light sirup, medium sirup, heavy sirup, and extra heavy sirup, qualified by the name of the kind or kinds of sugar used to make such sirups. (R. pp. 27–28, 37, 48, 53, 56, 69, 70, 72)

35. The liquid of the finished canned apricots is not more than 40° as determined by the Brix hydrometer. (R. pp. 29, 34, 45, 66, 67)

36. Canned apricots may or may not be seasoned. (R. pp. 30, 34, 45, 46)

37. Spice is a suitable seasoning agent. (R. pp. 30, 45)

38. Flavoring is a suitable seasoning agent. (R. pp. 30, 45)

39. A vinegar is a suitable seasoning agent. (R. pp. 30, 45)

40. Apricot kernels are a suitable seasoning agent, except in the case of whole apricots. (R. pp. 30, 31, 45)

41. Apricot pits, in limited amounts, are a suitable seasoning agent, except in the case of whole apricots. (R. pp. 30, 45, 65) The number of pits suitable for such purpose is limited to not more than one to each eight ounces of finished canned apricots. (R. pp. 30–31, 93, 94, 98, 100)

42. Such seasoning agents are used singly or in combination, except that apricot pits and apricot kernels are not used in combination. (R. pp. 31, 45)

43. It is essential that canned apricots be sealed in a container. (R. pp. 45, 46)

44. It is essential to so process canned apricots by heat as to prevent spoilage. (R. pp. 32, 45, 46)

45. Honesty and fair dealing in the interest of the consumer requires that the optional apricot ingredient, the optional liquid packing medium, and the optional seasoning ingredients be declared on the label. (R. pp. 32–33, 92); (Identity of Peaches, R. pp. 140, 191, 201, 210, 220, 238, 239, 259, 337, 338, 339, 349, 350, 351, 360, 367, 369, 370, 371, 398, 399, 401, 406, 415, 417, 419, 420, 421, 422, 424, 427, 433, 436, 438, 442, 471, 484, 485, 492); (C. R. p. 59); (C. R., Other Interested Parties' Exhibit No. 8a)

46. The common or usual name of unpeeled canned apricots is the name of the form of unit, qualified by the term "unpeeled." (R. pp. 23, 53, 67, 73–74, 83, 84, 85)

47. The common or usual name of peeled canned apricots is the name of the form of unit, qualified by the term "peeled." (R. pp. 23, 53, 67, 73–74, 83, 84, 85)

48. The common or usual name of water is water. (R. pp. 27–28, 69, 74)

49. The common or usual name of the natural juice of the apricot is apricot juice. (R. pp. 69, 74)

50. The common or usual name of sucrose is sugar; and the common or usual name of dextrose is refined corn sugar (dextrose). (Identity of Peaches, R. pp. 53, 61, 177, 215, 351, 367, 372, 373, 397, 398, 404, 416, 424, 461, 465, 510); (C. R. pp. 48, 49, 70)

51. The common or usual name of spice used as a seasoning is spice. (R. pp. 32, 53, 69, 72, 74–75)

52. The common or usual name of flavoring used as a seasoning is flavoring. (R. pp. 32, 53, 69, 72, 74–75)

53. The common or usual name of a vinegar used as a seasoning is vinegar. (R. pp. 32, 53, 69, 72, 74–75)

54. The common or usual name of apricot pit kernels used as a seasoning is apricot kernels. (R. pp. 32, 53, 69, 72, 74–75)

55. The common or usual name of apricot pits used as a seasoning is apricot pits. (R. pp. 32, 53, 69, 72, 74–75)

56. Honesty and fair dealing in the interest of the consumer requires that when spices, flavoring, vinegar, apricot pits, or apricot kernels are used that the label bear the words "Spiced", or "With Added Spice", or "Spice Added"; "With Added Flavoring", or "Flavoring Added"; "With Added Vinegar", or "Vinegar Added"; "Seasoned with Apricot Pits", or "Seasoned with Apricot Kernels", as the case may be; but if two or more of such optional ingredients are present, such words may be combined as, for example, "With Added Spice, Flavoring and Vinegar." In lieu of the words "Spice" or "Spiced" and "Flavoring", the common or usual name of the spice or flavoring may be used. (R. pp. 34, 74–75)

57. Honesty and fair dealing in the interest of the consumer requires that wherever the name "apricots" appears on the label so conspicuously as to be easily seen under customary conditions of purchase, the names of the optional ingredients present shall immediately and conspicuously precede or follow such name, without intervening written, printed, or graphic matter, except that the specific varietal name of the apricots may so intervene. (R. pp. 33, 54, 75, 96)

*Suggested Conclusion in the Form of a Regulation*

Upon the basis of the foregoing findings of fact, the following reasonable definition and standard of identity for the food commonly known as canned apricots is hereby suggested to be promulgated as a regulation:

## FEDERAL TRADE COMMISSION.

*United States of America—Before Federal Trade Commission*

[Docket No. 3646]

IN THE MATTER OF THE C. F. SAUER COMPANY, A CORPORATION

*Amended Complaint*

The Federal Trade Commission, having reason to believe that the party respondent, named in the caption hereof and hereinafter more particularly designated and described, since June 19, 1936, has violated and is now violating the provisions of Section 2 of the Clayton Act, as amended by the Robinson-Patman Act, approved June 19, 1936 (U.S.C. Title 15, Section 13), hereby issues its amended complaint, stating its charges with respect thereto as follows:

*Count I*

PARAGRAPH 1. The respondent, C. F. Sauer Company, is a corporation, organized and existing under the laws of the State of Virginia, with its principal office and place of business located at 2000 West Broad Street, in the City of Richmond, State of Virginia. The respondent is engaged in manufacturing, selling and distributing numerous grocery products, and owns and operates two manufacturing plants, one located in Greenville, South Carolina, and one located in Richmond, Virginia. Mayonnaise and salad dressing are manufactured at respondent's plant located in Greenville, and are sold and distributed from said plant, and from respondent's plant at Richmond. Extracts, spices, tea, pepper, drugs, insecticides and other commodities are manufactured, processed and packaged at, and are sold and distributed from respondent's plant located at Richmond.

The respondent has sold, and sells, its commodities, in general, to three groups of customers: wholesale grocers, retail chain grocers and retail grocers.

Respondent facilitates its sales by the use of a large staff of traveling salesmen, numbering approximately seventy, who travel in the various states of the United States securing orders, which are forwarded to the home office in Richmond, Va., for execution. Many additional orders are secured from customers through the mails after solicitation by salesmen and others.

PAR. 2. Since June 19, 1936, in the course and conduct of its business, the respondent has been and is now manufacturing the aforesaid commodities, in the aforesaid plants, and has sold, shipped, and does now sell and ship, such commodities in commerce between and among the various states of the United States from the states in which its factories are located, across state lines to purchasers thereof located in states other than the states in which respondent's said plants are located.

PAR. 3. Since June 19, 1936, while engaged, as aforesaid, in commerce among the several states of the United States and the District of Columbia, the respondent has been, and is now, in the course of such commerce, directly and indirectly discriminating in price between different purchasers of commodities of like grade and quality, which commodities are sold for use, consumption, and resale within the several states of the United States and the District of Columbia, in that the respondent has been, and is now, selling such commodities to some purchasers at a higher price than the price at which such commodities are sold to other purchasers generally competitively engaged with the favored purchasers.

Respondent effects said discriminations by granting and allowing larger discounts and rebates from list prices and lower net prices to some of such purchasers than to others. The extent of said discriminations in price varies from differentials of approximately five per cent to differentials of approximately thirty-three per cent, depending upon the commodity sold and the customer, or either.

PAR. 4. Dixie Home Stores is a corporation organized and existing, since approximately May 1937, under the laws of the State of South Carolina. It is engaged in business as a retail grocery chain, and has its principal place of business, purchasing agent, and warehouse in Greenville, South Carolina. It has purchased and received delivery of approximately six thousand dollars worth of commodities from respondent each month from approximately May 1937 to date, which commodities are destined to be and are distributed by Dixie Home Stores through its own facilities to approximately one hundred and seventy retail grocery stores which it owns and operates. A large number of said stores are located in all sections of South Carolina and in the western section of North Carolina, and a few are located in the northeastern section of Georgia. Each of said stores is in competition in those areas with other persons, firms, partnerships, and corporations, who are similarly engaged in the grocery business and purchase commodities of like grade and quality from respondent.

Dixie Home Stores was organized and brought into existence about May 1937 by merging and consolidating two retail grocery chains, namely, Dixie Stores and Home Stores, each of which, prior to consolidation and merger, was an independent corporation organized and existing under the laws of the State of South Carolina. Home Stores had its principal place of business at Columbia, South Carolina, and Dixie Stores had its principal place of business at Greenville, South Carolina, in which latter city Dixie Home Stores now has its similar facilities and respondent has one of its plants.

Each of said corporations maintained its purchasing agent and warehouse at their respective principal places of busi-

ness, where each purchased and received delivery of approximately three thousand dollars worth of commodities from respondent each month from June 19, 1936, to approximately May 1937, which commodities were destined to be and were distributed by each, respectively, to approximately eighty-five retail grocery stores which each owned and operated. The approximate eighty-five retail grocery stores of the Home Stores were located in the central and southern sections of South Carolina and in the northeastern section of Georgia, while the approximate eighty-five retail grocery stores of Dixie Stores were located in the northern and western sections of South Carolina, and the western section of North Carolina. These stores, although now owned and operated by Dixie Home Stores, retain their respective names as Home Stores and as Dixie Stores in the communities where located.

Approximately the same net prices, discounts and other allowances granted by respondent to Dixie Home Stores, as hereinafter alleged in Paragraph Eight, and in Exhibit A, were granted and allowed by respondent to Dixie Stores and to Home Stores, respectively, prior to consolidation, although respondent sold to Dixie Stores and to Home Stores, respectively, only approximately one-half the dollar quantity of commodities now sold to Dixie Home Stores. The Home Stores and the Dixie Stores through their respective retail stores were, and the Dixie Home Stores through its retail stores were and are, in competition, in the area where each of such stores is located, with other purchasers of respondents commodities who pay higher net prices and receive smaller discounts and other allowances than said Home Stores, Dixie Stores and Dixie Home Stores.

PAR. 5. Approximately the same net prices, discounts and other allowances alleged in Paragraph Eight and in Exhibit A to have been granted and allowed by respondent to Thomas & Howard Companies have been, and are being, granted and allowed by respondent to approximately twelve firms and their branches, each of which is engaged in the wholesale grocery business and the names and locations of which are as follows:

1. Thomas and Howard Company of Columbia, S. C., with branches at Camden, Newberry and Darlington, South Carolina;

2. Thomas and Howard Company of Greenville, S. C., with a branch at Seneca, South Carolina;

3. Thomas and Howard Company of Charleston, S. C., with a branch at Allendale, South Carolina;

4. Thomas and Howard Company of Chester, S. C.;

5. Thomas and Howard Company of Spartanburg, S. C.;

6. Thomas and Howard Company of Sumter, S. C.;

each of which is a corporation organized and existing under the laws of the State of South Carolina;

7. Thomas and Howard Company, Inc., of Charlotte, N. C., with branches at Salisbury and Rocky Mount, N. C.;

8. Thomas and Howard Company of Hickory, N. C.;

each of which is a corporation organized and existing under the laws of the State of North Carolina;

9. Thomas and Howard Company of Durham, N. C.;

10. Thomas and Howard Company of Greensboro, N. C.;

each of which is organized and does business as a partnership;

11. Timberlake Grocery Company of Thomasville, Georgia;

12. Christiansburg Canning Company of Pulaski, Virginia.

The Timberlake Grocery Company was organized and is doing business as a corporation under the laws of the State of Georgia, and The Christiansburg Canning Company was organized and is doing business under the laws of the State of Virginia; and each of which is referred to, and known by the trade as Thomas and Howard Companies, although they do not use the words "Thomas and Howard Company" in the respective names under which they do business.

Each of said firms purchase from approximately three thousand dollars worth to approximately thirty-five thousand dollars worth of commodities from respondent each year, and the aggregate of the purchases of all of said firms is approximately three hundred thousand dollars worth per year. Respondent solicits orders from each of said firms and its branches individually, at their respective and geographically separated place of business, from purchasing officers who purchase exclusively for their respective firms; and respondent delivers commodities when purchased to their respective individual warehouses located at their respective places of business.

Each of said firms is a separate, distinct and independent legal and business entity, doing business with respondent as aforesaid, yet the basis upon which respondent grants the same net prices, discounts, and other allowances to each of said firms and its branches is that respondent considers and treats the purchases of all of them collectively as constituting the purchases of a single purchaser, and grants to each of said firms and its branches the net prices, discounts and other allowances which respondent has determined are applicable to a single purchaser who purchases approximately three hundred thousand dollars worth of said commodities a year upon solicitation at and delivery to a single point. Although respondent has no such purchaser buying such a volume under such circumstances, respondent uses a hypothetical purchaser purchasing under such circumstances as a standard in granting said preferences to Thomas and Howard Companies and in refusing to grant similar preferences to other and competing purchasers, who, as individual firms, do not and cannot purchase such a volume, under such circumstances, but who do purchase as great a volume of commodities in a year as many of said firms.

When said firms are considered as a single purchaser, they do a volume of business which constitutes a substantial portion of the entire wholesale grocery business in the states where located, and they are so strategically located geographically in those states as to blanket those areas. Each of said Thomas and Howard Companies and branches are in competition, in the area where located, with other purchasers from respondent who are similarly engaged in the distribution of grocery commodities and who are charged and who pay higher net prices and receive smaller net discounts and other allowances than said Thomas and Howard Companies and branches; and some of the customers of each of said Thomas and Howard Companies and branches are in competition, in the areas where such customers are located, with customers of such other distributors. When all of said Thomas and Howard Companies and branches are treated as a single purchaser and each is accorded the terms of sale which respondent has determined are applicable to such a hypothetical purchaser, each of said firms and its branches exerts in its competitive area the same power that could be exerted by such hypothetical firm if located in each of such areas.

PAR. 6. Rose-Phillips Company is a corporation, organized and existing under the laws of the State of South Carolina, having its principal place of business at Greenwood, South Carolina, and engages in the wholesale grocery business, buying groceries, vegetables, fruits, and other varieties of food and household commodities and selling such commodities to retail grocery stores, some of which are in competition with some of the retail grocery stores of Dixie Home Stores. It serves a large part of the trade area served by Thomas and Howard Company, of Newberry, South Carolina, and to a limited extent it serves the trade area served by Thomas and Howard Company of Spartanburg, South Carolina, and Thomas and Howard Company of Greenville, South Carolina. Rose-Phillips Company was a purchaser of respondent's products on June 19, 1936, and continued to be a purchaser of respondent's products for some time thereafter. Rose-Phillips Company ceased to purchase commodities from respondent some months after June

19, 1936, when respondent refused to grant and allow to said company the same net prices, discounts and other allowances which respondent granted and allowed to competitors of said company, namely, the Thomas and Howard Companies, and to competitors of said company's customers, namely, Home Stores, Dixie Stores and Dixie Home Stores. The foregoing allegations with respect to Rose-Phillips Company are equally applicable to many other of respondent's customers and former customers.

PAR. 7. Some of said discriminations in prices are effected through the use by respondent of three price lists. Each of said price lists states the prices at which the respondent instructs its salesmen and representatives to quote certain commodities, some of which are on each list. As to some commodities which appear on each list, a different price is stated in each list, one list stating the lowest price, another list stating a higher price, and another list stating the highest price at which such commodities are sold. Such lists are effective concurrently, but each list is used in quoting prices to only certain customers, the customers quoted from each list being mutually exclusive. Respondent furnishes one or more of such lists to some of its salesmen and representatives together with the names of the customers to be quoted therefrom. The majority of respondent's customers are quoted prices from the list containing the highest prices; a smaller number of customers are quoted from the list containing prices lower than those contained in the first; and the smallest number of customers are quoted from the list containing the lowest prices. Respondent secures the enforcement of such policy by threatening to discharge and discharging any salesman who deviates therefrom by quoting a customer from any list other than the one specified by the respondent or who informs a customer of the existence of a list price lower than the list price specified by respondent to be quoted to that customer.

PAR. 8. Specific illustrations of said discriminations are as follows, to wit: Respondent sold miscellaneous spices of like grade and quality to the following purchasers at the following prices; to Dixie Home Stores at a net price of forty cents per dozen packages; to Milner Stores, which is a retail grocery chain located in various sections of North Carolina, at a net price of fifty cents per dozen packages; to McGee & Bleckley, Anderson, South Carolina, Rose-Phillips Company of Greenwood, South Carolina, and many other wholesale grocers, at a net price of sixty cents per dozen packages. Respondent, therefore, sold such spices to Dixie Home Stores at a price which is twenty per cent less than the price to Milner Stores, and more than thirty-three per cent less than the price to McGee & Bleckley, Rose-Phillips Company and many others; and to Milner Stores at a price approximately seventeen per cent less than the price at which it sold such spices to McGee & Bleckley and many other purchasers.

Respondent sold Sauer's Salad Dressing of like grade and quality, in pint sizes to the following purchasers at the following prices: to Dixie Home Stores at a net price of one dollar and sixty-five cents per dozen; to Rose-Phillips Company, and many others, at a net price of two dollars and one cent per dozen. Respondent, therefore, sold such salad dressing to Dixie Home Stores at a price which is approximately eighteen per cent less than the price to Rose-Phillips Company and many other purchasers.

Respondent sold Number Five Vanilla of like grade and quality to the following purchasers at the following prices: to the Thomas and Howard Companies at a net price of one dollar and forty-five cents per dozen; to Augusta Grocery Co., of Augusta, Georgia, Seneca Grocery Company, Rose-Phillips Company, Talmage Bros. & Co., Inc., of Athens, Georgia, and many others, all of whom are wholesale grocers, at a net price of one dollar and sixty-seven cents. Respondent, therefore, sold such extracts to said Thomas and Howard Companies at more than thirteen per cent less than to Augusta Grocery Co., Seneca Grocery Company, Rose-Phillips Company, Talmadge Bros. & Co., Inc., and many other purchasers. Further illustration of said discriminations are shown in a comparative table, marked Exhibit A, attached to and hereby made a part of this complaint. Each of the firms listed in Exhibit A are or have been purchasers of respondent. In each specific illustration of respondent's discriminations in prices alleged above, and in Exhibit A, the sales to the favored and the unfavored purchasers accruing during an interval of time during which there was no upward or downward movement in the prices of said commodities.

PAR. 9. The effect of the discriminations in prices as hereinbefore set forth may be substantially to lessen competition in the sale and distribution of the said commodities in the respective lines of commerce in which respondent and its customers are engaged, and has been, and may be, to injure, destroy, or prevent competition in the sale and distribution of said commodities with the respondent and with its customers who receive the benefits of such discriminatory prices.

PAR. 10. Such discriminations in prices by respondent between different purchasers of goods of like grade and quality in interstate commerce in the manner and form aforesaid are in violation of the provisions of Section 2 (a) of the Act described in the preamble hereof.

*Count II*

PAR. 1. Paragraphs One, Two, Four, Five and Six of Count I are hereby referred to, and by that reference incorporated herein as fully and completely as they would be if set forth here in verbatim.

PAR. 2. While engaged in commerce in the conduct of its business, and in the course of such commerce, as above alleged and described, respondent is now and has been, subsequent to June 19, 1936, engaged in manufacturing, processing, and packaging such commodities for sale, and selling such commodities to customers competitively engaged with each other in the handling, offering for sale, and sale of such commodities to consumers, and to others for resale to consumers; and the respondent contracts to pay and pays to some, but not all, of such customers, and to representatives of some, but not all, of such customers for the benefit of the customers represented, valuable consideration, in the form of credit memoranda, checks, and otherwise, in consideration of and as compensation for transportation and advertising services and facilities, contracted to be furnished and furnished by and through such customers directly, and by such customers acting through such representatives in connection with the handling, offering for sale, and sale of said commodities as have been theretofore sold by respondent to them.

PAR. 3. Respondent makes such payments as compensation for advertising services and facilities in connection with the offering for sale, and sale of such commodities on at least two bases, namely:

(1) On a basis of a percentage of the net cost of the commodities purchased;

(2) On a basis of a definite fixed sum, the amount of which is not calculable by any determinable method.

Such payments are not available on proportionally equal terms to all customers competing in the distribution of such commodities, in that:

(1) The same was not available, for example, to the following customers of respondent: J. Drake Edens, Columbia, S. C.; Standard Grocery Company, Greenwood Jitney Jungle, Inc., Miller Stores, all of Greenwood, S. C.; and P. P. Pearson and Williams Piggly Wiggly Store of Gastonia, N. C.

(2) With reference to payments calculated on the basis of a percentage of the net cost of the commodities purchased, respondents grant to some of such customers receiving such payments a greater percentage than to others, and to some of such customers such percentage is not available at all. For example, respondent sells Dukes Mayonnaise in pint sizes to Thomas and Howard Companies and grants them payment of five percent and five percent; and also to Dixie Home Stores; Lipscomb & Russell Company of Greenville, S. C.; McGee & Bleckley and Anderson Hardware Company of Anderson, S. C.; Augusta Grocery Company, of Augusta, Georgia; Talmage Bros. & Co., Inc., of Athens, Georgia; The Great Atlantic & Pacific Tea Com-

NOTICE

mitted constitute the violation or vio-

(4) That the applicant file with this

pany, of Charlotte, N. C., and many others, and grants them payments of only five percent.

Respondent sells Sauer's Salad Dressing and miscellaneous spices to Dixie Home Stores, and grants it payments of five percent; and also to Lipscomb Russell Company, McGee & Bleckley, Anderson Hardware Company, Augusta Grocery Company, Copeland Grocery Company, of Elberton, Ga., Seneca Grocery Company, of Seneca, S. C., and many others, and grants them no payments on such purchases.

(3) With reference to the payments made on a basis of a definite fixed sum, the amount of which is not calculable on any determinable basis; the respondent grants to some of such customers receiving such payments a greater sum than to others, and to some of such customers, such payments are not available at all.

For example, the respondent pays to the following customers directly and through the representatives of such customers for the benefit of the customers represented:

Charlotte, N. C.: Retail Grocers Ass'n, $40.00 per month. Independent Food Dealers Ass'n, $25.00 per month.

Washington, D. C.: Nation-Wide Stores, 5% on net purchases. District Grocery Stores, $40.00 per month.

Richmond, Va.: Monogram Food Stores, 5% on net purchases. Richmond Food Stores, 5% on net purchases. Sunny South Stores, $380.00 per year.

The payments made to customers directly or to the representatives of such customers for their benefit on a percentage basis as illustrated above are set out for the purpose of comparison.

Further illustrations as to the amounts of such payment made to competing customers of respondent as compensation for advertising services and facilities are set out in Exhibit A.

PAR. 4. Respondent pays compensation to some of such customers for transportation services and facilities in connection with the handling of such commodities by making deductions from invoice prices on the face of the invoice, and such deductions are made under the following circumstances.

As a general practice and policy, the prices which respondent quotes and which appear on its invoices include the cost of transportation by common carrier to customers, and a common carrier is usually employed which receives its lawful charges from respondent or from the customer. When a customer pays the transportation charges to the common carrier, such charges are deducted from the invoice prices at the time the customer makes remittance to respondent.

Some of respondent's customers use trucks to deliver merchandise from their respective places of business to purchasers who are located in the neighborhood of Greenville, South Carolina, and Richmond, Virginia, in which cities respondent's plants are situated. Sometimes respondent's customers have trucks in those cities for the purpose of receiving goods from suppliers and transporting them to their respective places of business, and such goods do not require the total capacity of such trucks.

In order to aid some of such customers to utilize or to more fully utilize such trucks on their return trip, respondent has delivered to such customers at the door of its plants, since June 19, 1936, commodities purchased by them for transportation by such customers to their respective places of business; and in consideration of and compensation for such handling of such commodities, respondent, as above alleged, deducts from the invoice prices a sum equal to the common carrier charges for such transportation.

Under such circumstances, the cost of such handling to such purchasers, who transport their own purchases, was and is substantially less than the tariff charges by common carrier for the same services and facilities; and the savings thus effected result in a lower per unit cost for such commodities to such customer than the cost to customers to whom purchases are transported by common carrier. Other such customers similarly situated have requested respondent to so handle such commodities as they have purchased from respondent, and to receive such payments as compensation therefor, but respondent has denied such request, and their purchases are transported to them by common carrier.

In that such payments for transportation services and facilities have been and are granted to some such customers and denied to others, such payments are not available on proportionately equal terms to all customers competing in the distribution of such commodities.

PAR. 5. Such acts of respondent since June 19, 1936, in interstate commerce, in the manner and form aforesaid, in paying and contracting to pay valuable consideration to and for the benefit of some customers for services and facilities furnished by and through such customers, in connection with the handling, sale and offering for sale of commodities theretofore sold to them by respondent without such payments being available on proportionately equal terms to all other competing customers is in violation of the provisions of Section 2 (d) of the Robinson-Patman Act, further described in the preamble hereof.

*Wherefore, the premises considered,* the Federal Trade Commission on the 29th day of September, A. D. 1939, now issues this its amended complaint against said respondent.

soil-depleting acreages does not exceed the total soil-depleting acreage allotment for the farm under the 1939 Agricultural Conservation Program.

(b) *Eligible rye.* Rye grading No. 2 or better or rye grading No. 3 solely on the factor of test weight but otherwise grading No. 2 or better, produced in 1939, beneficial title to which is and always has been in the eligible producer. Rye grading tough, ergoty, light smutty, smutty, light garlicky, or garlicky shall not be eligible for a loan.

(c) *Eligible storage.* Shall consist of farm bins and granaries which are of such substantial and firm construction as to afford safe storage of the rye for a period of two (2) years and permit effective fumigation for the destruction of insects and afford protection against rodents, other animals, thieves, and weather, as determined by the county agricultural conservation committees.

§ 209.2 *Areas.* Loans will be made on eligible rye stored on farms in the states of Michigan, Minnesota, Montana, Nebraska, North Dakota, South Dakota, Wisconsin and Wyoming.

§ 209.3 *Amount of loans.* The loan value for eligible rye grading No. 2 or better, or rye grading No. 3 solely on the factor of test weight but otherwise grading No. 2 or better, shall be twenty-two (22) cents per bushel less than the applicable farm storage loan value for No. 2 Hard Winter wheat (under the 1939 wheat loan program of Commodity Credit Corporation) or thirty-eight (38) cents per bushel, whichever is lower.

§ 209.4 *Maturity and interest rate.* All loans upon the security of rye will be made directly by Commodity Credit Corporation and the notes evidencing such loans will be payable on demand or in any event not later than April 30, 1940. All loans will bear interest at the rate of four (4) per cent per annum. Notes evidencing such loans must be dated on or before December 31, 1939.

§ 209.5 *Farm storage.* Rye stored on the farm must have been stored in the granary at least thirty (30) days prior to its inspection for measurement, sampling and sealing. In accordance with regulations issued by the Secretary of Agriculture, the state and county agricultural conservation committees will inspect and approve storage facilities and will arrange for measuring, sampling, grading and sealing the rye collateral in approved structures. Chattel mortgages covering farm-stored rye must be executed and filed in accordance with the applicable state law. The chattel mortgage requirements of the various states are set forth in Section 12 of the wheat loan instructions (1939 CCC Wheat Form 1). Producers may obtain information and assistance from the county agricultural conservation committees in regard to the execution and filing of such chattel mortgages. Where the borrower is a tenant farmer, and the rye collateral is stored on the farm, the expiration date of the lease shall be given in Section 2 (c) of the chattel mortgage (1939 CCC Rye Form A–1). If the expiration date of the lease is prior to July 1, 1940, the landlord shall execute the Consent for Storage, Section 13 of 1939 CCC Rye Form A–1. The consent agreement shall also be signed by any other party or parties entitled to possession. Each producer must designate in Section 4 of the mortgage (1939 CCC Rye Form A–1) a shipping point reasonably convenient for the delivery of the rye as determined by the county committee. Notes and mortgages will not be acceptable which provide a shipping point other than the normal shipping point customarily used by the producers in the locality in which the rye was produced. A separate note and chattel mortgage must be submitted for rye stored on each quarter section of land. Commodity Credit Corporation will pay seven (7) cents per bushel for storing the rye for the period ending July 1, 1940, or the date of the delivery of such rye to Commodity Credit Corporation, whichever is earlier; provided, such delivery is made upon the demand or with the consent of Commodity Credit Corporation; provided further, such payment will be conditioned upon the delivery of the mortgaged rye of the quantity described in the chattel mortgage grading No. 2 or better or No. 3, provided the mortgaged rye originally graded No. 3 on test weight only.

§ 209.6 *Liens.* The rye collateral must be free and clear of all liens except in favor of the lienholders listed in the space provided therefor in 1939 CCC Rye Form A–1 or Form AB. The names of the holders of all existing liens on the pledged or mortgaged rye, such as landlord, laborers, threshers, or mortgagees, must be listed in the space provided therefor in the mortgage or loan agreement. The waiver and consent to the mortgage of the rye and the payment of the proceeds of the loan and the proceeds of the sale of the rye solely to the producer as contained in the mortgage must be signed personally by all lienholders listed or by their agents, whose duly executed authority must be securely attached. Whenever such waiver and consent, etc., is executed for a corporation by a designated officer thereof customarily authorized to execute such instruments, the duly executed authority need not be attached. (In lieu of signing the section of the chattel mortgage entitled "List of Lienholders and Their Waivers and Consent to Pledge", lienholders may sign 1939 CCC Rye Form AB, which must completely identify the related note.) The producer may direct in the Letter of Transmittal (1939 CCC Rye Form B) that the proceeds of the loan be made payable to him and/or such other person or concern as he may direct thereon. Producers should read carefully all real estate or other mortgages previously given by them in order to be sure that crops are not covered thereby. Any fraudulent misrepresentation of fact made in the execution of the note and mortgage and related forms shall render the producer personally liable for the amount of the loan and subject to the provisions of the United States Criminal Code.

§ 209.7 *Insurance.* In lieu of primary and secondary insurance, the producer will authorize Commodity Credit Corporation to deduct from the proceeds of the loan one-fifth of one (⅕ of 1) cent per bushel for the rye sealed as collateral to the loan. Such funds are to protect Commodity Credit Corporation against loss or impairment of the rye collateral from fire, lightning, cyclone, tornado, windstorm, inherent explosion, flood, hail and theft. The obligations of the producer in connection with such protection are set forth in the chattel mortgage.

§ 209.8 *County agricultural conservation committees.* Forms will be obtainable from county agricultural conservation committees in the above-named states or from any Loan Agency of the Reconstruction Finance Corporation hereafter listed. The chattel mortgage contains a certificate which must be signed in each instance by a member of the county committee of the county in which the rye is stored. Pursuant to instructions issued by the Secretary of Agriculture, the state and county committees will determine or cause to be determined, the quantity and grade of the rye collateral and the amount of the loan.

§ 209.9 *Reconstruction Finance Corporation Loan Agencies.* The following Loan Agencies of Reconstruction Finance Corporation will handle loans for Commodity Credit Corporation in the areas assigned to each Loan Agency:

| *Loan Agency* | *States Served* |
|---|---|
| Helena | Montana; |
| Minneapolis | Michigan, Minnesota, North Dakota, South Dakota and Wisconsin; |
| Omaha | Nebraska and Wyoming. |

§ 209.10 *Release of collateral.* The producer may obtain the return of notes secured by rye at any time prior to maturity upon the payment of the principal amount due thereon, plus accrued interest. In the case of such repayment, no allowance will be made for storage by Commodity Credit Corporation. The loan paper may be sent to an approved bank for collection or the producer may ascertain the amount due and remit directly to the Loan Agency of the Reconstruction Finance Corporation holding the paper. Partial releases will be made, provided all the rye in any one bin is released. In such cases, the producers must identify to the Loan Agency of the Reconstruction Finance Corporation the seal number of the bin to be released. Such releases will be made upon payment of the amount loaned on the particular bin of rye, plus interest.

(b) *Eligible rye.* Rye grading No. 2 or better or rye grading No. 3 solely on the factor of test weight but otherwise grading No. 2 or better, produced in 1939, beneficial title to which is and always has been in the eligible producer. Rye grading tough, ergoty, light smutty, smutty, light garlicky, or garlicky shall not be eligible for a loan.

(c) *Eligible storage.* Shall consist of farm bins and granaries which are of such substantial and firm construction as to afford safe storage of the rye for a period of two (2) years and permit effective fumigation for the destruction of insects and afford protection against rodents, other animals, thieves, and weather, as determined by the county agricultural conservation committees.

§ 209.2 *Areas.* Loans will be made on eligible rye stored on farms in the states of Michigan, Minnesota, Montana, Nebraska, North Dakota, South Dakota, Wisconsin and Wyoming.

§ 209.3 *Amount of loans.* The loan value for eligible rye grading No. 2 or better, or rye grading No. 3 solely on the factor of test weight but otherwise grading No. 2 or better, shall be twenty-two (22) cents per bushel less than the applicable farm storage loan value for No. 2 Hard Winter wheat (under the 1939 wheat loan program of Commodity Credit Corporation) or thirty-eight (38) cents per bushel, whichever is lower.

§ 209.4 *Maturity and interest rate.* All loans upon the security of rye will be made directly by Commodity Credit Corporation and the notes evidencing such loans will be payable on demand or in any event not later than April 30, 1940. All loans will bear interest at the rate of four (4) per cent per annum. Notes evidencing such loans must be dated on or before December 31, 1939.

§ 209.5 *Farm storage.* Rye stored on the farm must have been stored in the granary at least thirty (30) days prior to its inspection for measurement, sampling and sealing. In accordance with regulations issued by the Secretary of Agriculture, the state and county agricultural conservation committees will inspect and approve storage facilities and will arrange for measuring, sampling, grading and sealing the rye collateral in approved structures. Chattel mortgages covering farm-stored rye must be executed and filed in accordance with the applicable state law. The chattel mortgage requirements of the various states are set forth in Section 12 of the wheat loan instructions (1939 CCC Wheat Form 1). Producers may obtain information and assistance from the county agricultural conservation committees in regard to the execution and filing of such chattel mortgages. Where the borrower is a tenant farmer, and the rye [illegible] 1, 1940, the landlord shall execute the Consent for Storage, Section 13 of 1939 CCC Rye Form A–1. The consent agreement shall also be signed by any other party or parties entitled to possession. Each producer must designate in Section 4 of the mortgage (1939 CCC Rye Form A–1) a shipping point reasonably convenient for the delivery of the rye as determined by the county committee. Notes and mortgages will not be acceptable which provide a shipping point other than the normal shipping point customarily used by the producers in the locality in which the rye was produced. A separate note and chattel mortgage must be submitted for rye stored on each quarter section of land. Commodity Credit Corporation will pay seven (7) cents per bushel for storing the rye for the period ending July 1, 1940, or the date of the delivery of such rye to Commodity Credit Corporation, whichever is earlier; provided, such delivery is made upon the demand or with the consent of Commodity Credit Corporation; provided further, such payment will be conditioned upon the delivery of the mortgaged rye of the quantity described in the chattel mortgage grading No. 2 or better or No. 3, provided the mortgaged rye originally graded No. 3 on test weight only.

§ 209.6 *Liens.* The rye collateral must be free and clear of all liens except in favor of the lienholders listed in the space provided therefor in 1939 CCC Rye Form A–1 or Form AB. The names of the holders of all existing liens on the pledged or mortgaged rye, such as landlord, laborers, threshers, or mortgagees, must be listed in the space provided therefor in the mortgage or loan agreement. The waiver and consent to the mortgage of the rye and the payment of the proceeds of the loan and the proceeds of the sale of the rye solely to the producer as contained in the mortgage must be signed personally by all lienholders listed or by their agents, whose duly executed authority must be securely attached. Whenever such waiver and consent, etc., is executed for a corporation by a designated officer thereof customarily authorized to execute such instruments, the duly executed authority need not be attached. (In lieu of signing the section of the chattel mortgage entitled "List of Lienholders and Their Waivers and Consent to Pledge", lienholders may sign 1939 CCC Rye Form AB, which must completely identify the related note.) The producer may direct in the Letter of Transmittal (1939 CCC Rye Form B) that the proceeds of the loan be made payable to him and/or such other person or concern as he may direct thereon. Proof of the execution of [illegible] made in the execution of the note and mortgage and related forms shall render the producer personally liable for the amount of the loan and subject to the provisions of the United States Criminal Code.

§ 209.7 *Insurance.* In lieu of primary and secondary insurance, the producer will authorize Commodity Credit Corporation to deduct from the proceeds of the loan one-fifth of one (1/5 of 1) cent per bushel for the rye sealed as collateral to the loan. Such funds are to protect Commodity Credit Corporation against loss or impairment of the rye collateral from fire, lightning, cyclone, tornado, windstorm, inherent explosion, flood, hail and theft. The obligations of the producer in connection with such protection are set forth in the chattel mortgage.

§ 209.8 *County agricultural conservation committees.* Forms will be obtainable from county agricultural conservation committees in the above-named states or from any Loan Agency of the Reconstruction Finance Corporation hereafter listed. The chattel mortgage contains a certificate which must be signed in each instance by a member of the county committee of the county in which the rye is stored. Pursuant to instructions issued by the Secretary of Agriculture, the state and county committees will determine or cause to be determined, the quantity and grade of the rye collateral and the amount of the loan.

§ 209.9 *Reconstruction Finance Corporation Loan Agencies.* The following Loan Agencies of Reconstruction Finance Corporation will handle loans for Commodity Credit Corporation in the areas assigned to each Loan Agency:

| *Loan Agency* | *States Served* |
|---|---|
| Helena | Montana; |
| Minneapolis | Michigan, Minnesota, North Dakota, South Dakota and Wisconsin; |
| Omaha | Nebraska and Wyoming. |

§ 209.10 *Release of collateral.* The producer may obtain the return of notes secured by rye at any time prior to maturity upon the payment of the principal amount due thereon, plus accrued interest. In the case of such repayment, no allowance will be made for storage by Commodity Credit Corporation. The loan paper may be sent to an approved bank for collection or the producer may ascertain the amount due and remit directly to the Loan Agency of the Reconstruction Finance Corporation holding the paper. Partial releases will be made, provided all the rye in any one bin is released. In such cases, the producers must identify to the Loan Agency of the Reconstruction Finance Corporation the seal number of the bin to be released.

## TITLE 41—PUBLIC CONTRACTS

## DIVISION OF PUBLIC CONTRACTS

IN THE MATTER OF THE DETERMINATION OF THE PREVAILING MINIMUM WAGES IN THE SMALL ARMS, AMMUNITION, EXPLOSIVES AND RELATED PRODUCTS INDUSTRIES

These matters are before me pursuant to Section 1 (b) of the Act of June 30, 1936 (49 Stat. 2036; 41 U.S.C. Sup. III 35) entitled "An Act to provide conditions for the purchase of supplies and the making of contracts by the United States, and for other purposes" (hereinafter called the Act). The Public Contracts Board, created in accordance with Section 4 of the Act by Administrative Order dated October 6, 1936, held hearings on May 3, 1938 in the matter of the determination of the prevailing minimum wages in the Ammunition and Related Products Industry and in the Explosives Industry.

Notices of these hearings were sent to all known members of the industries mentioned, to trade unions, to trade publications, and to trade associations in the field. Invitations to attend the hearings were extended through the national press to all other interested parties.

Appearances were entered and testimony given at the hearing on ammunition and related products by members of the industry, by the Small Arms and Ammunition Manufacturers' Institute, and the Institute of Makers of Explosives; more than 75 per cent. of the industry by volume was represented at the hearing.

At the hearing on Explosives, appearances were entered and testimony was given by members of the industry and by the Institute of Makers of Explosives. Between 80 and 90 per cent., by volume, of the industry as defined was represented at the hearing.

Surveys of the Ammunition and Related Products Industry and of the Explosives Industry made by the Bureau of Labor Statistics, Department of Labor, were presented in evidence.

[1] 4 F.R. 2914 DI.

On the basis of the evidence the Board made its recommendation. Thereafter, the Administrator, Division of Public Contracts, circularized the Board's recommendations and gave the parties a reasonable period of time in which to register their objections thereto or their approval thereof before any determination in the matter should be made.

The Board advises me and the evidence indicates that blasting and detonating caps are generally not manufactured in plants making small arms ammunition, and that the wage structure prevailing in the manufacture of blasting and detonating caps varies from that prevailing in the manufacture of small arms ammunition. Accordingly, the matter of the prevailing minimum wages in the manufacture of blasting and detonating caps will be treated separately from that of the prevailing minimum wage in the manufacture of small arms ammunition, even though in the notice of hearing and in the survey made by the Bureau of Labor Statistics, they were treated together.

The information included in the survey of the small arms ammunition industry was collected by actual visits of field representatives of the Bureau to each plant covered. The survey covered 12 plants in all, 1 plant each in California, Ohio, Illinois, Minnesota, New York, and New Jersey; 3 plants in Pennsylvania; and 3 plants in Connecticut. In all, 4,065 employees engaged in the manufacture of ammunition were covered. This figure does not include the 1,758 employes covered by the survey who were engaged in the manufacture of blasting and detonating caps. The Census of Manufactures, 1935, indicates that at that time there were 13 establishments in the industry employing a total of 5,599 wage earners, but the Census figures include those who were engaged in the manufacture of blasting and detonating caps. It appears that the data included in the wage survey give an adequate picture of the wage structure prevailing in the manufacture of small arms ammunition.

The survey indicates that 6.3 percent of the wage earners receive under 37.5 cents an hour; 9.3 percent receive 37.5 cents and under 42.5 cents an hour; 19 percent receive 42.5 and under 47.5 cents an hour; 16 percent receives 47.5 and under 52.5 cents an hour. The Board recommended that the prevailing minimum wage be found to be 45 cents an hour.

Counsel for the Sporting Arms and Ammunition Manufacturers' Institute filed a brief objecting to the Board's recommendations. The brief sets forth that there was a slump in business in the summer of 1937, which resulted in the discharge of a number of employees in the lower-paid brackets, which condition was reflected in the statistics as taken in October 1937, and that the 45-cent wage is not in fact the prevailing wage that exists in the industry. The index of employment prepared by the Bureau of Labor Statistics in this and related industries shows that employment in October 1937 was only slightly lower than in September of that year, in which month employment was at its highest of any month since 1931.

The Board in reviewing the record in the light of objections received has advised me that it believes that some weight should be given to the concentration of wages in the 5-cent bracket below 42.5 cents and has accordingly recommended that the minimum be found to be 42.5 cents.

I have examined the findings and recommendations of the Board and the record of hearings, together with the briefs filed, and in the light of the facts I find the prevailing minimum wage for the manufacture of small arms ammunition to be 42.5 cents an hour or $17.00 per week of 40 hours, arrived at either upon a time or piece rate basis.

The Bureau of Labor Statistics' survey entitled Earnings and Hours in the Ammunition and Related Products Industry, October 1937, covered 1,758 wage earners engaged in the manufacture of blasting and detonating caps. When added to the 4,065 engaged in the manufacture of ammunition a total of 5,823 wage earners were included in the Bureau of Labor Statistics' survey. The Census of Manufactures, 1935, covered 5,599 wage earners engaged in the manufacture of ammunition, including blasting and detonating caps. It appears that the data included in this survey are adequate to show the wage structure prevailing in the manufacture of blasting and detonating caps.

This survey indicates that 18.9 per cent. of the wage earners engaged in the making of blasting and detonating caps receive wages in the wage interval of 47.5 to 52.5 cents an hour. Receiving wages below this interval are 10.6 percent of the wage earners, and 70.5 per cent. receive wages of 52.5 cents an hour or more.

Upon these facts, the Board recommended a minimum wage of 50 cents an hour for blasting and detonating caps.

Counsel for the Institute of Makers of Explosives objected to the Board's findings and recommendations for the reason that the period covered by the survey, October 1937, was allegedly not a normal month with respect to employees, and, secondly, that the finding and recommendation of the prevailing minimum wages has not resulted in findings and recommendations of the minimum which is prevailing in the industry.

In the light of the objections filed, the data in support of those objections, and upon review of the record, the Board is of the opinion that the prevailing minimum wage for the manufacture and supply of blasting and detonating caps, although within the interval of 47.5 to 52.5 cents, is 47.5 cents an hour. The Board advises me that in making this recommendation, it has recognized the downward pull exerted by the workers concentrated in the lower wage intervals.

I have examined the findings and recommendations of the Board and the record of the hearing, together with the briefs filed, and in the light of the facts I find the prevailing minimum wage for the manufacture of blasting and detonating caps to be 47.5 cents an hour or $19.00 per week of forty hours, arrived at either upon a time or piece rate basis.

The survey of earnings and hours in the Explosives Industry presented at the hearing covered employment in the industry during October 1937. The survey covered establishments in the industry employing 5 or more workers, and included 51 plants with a total employment of 3,814 wage earners. The Bureau of Census figures for 1935 shows that in that year there were 74 establishments in the industry with an average number of wage earners for the year of 4,570. The Bureau of Labor Statistics' survey covered 12 plants in Pennsylvania; 6 in Illinois; 4 in Washington; 3 each in California, Missouri, and Ohio; 2 each in Alabama, Arizona, Michigan, New Jersey, and Tennessee; and 1 each in Arkansas, Colorado, Indiana, Iowa, Kansas, Kentucky, Massachusetts, Utah, West Virginia, and Wisconsin. Of the 51 establishments covered by the survey, 32 plants employing 3,058 wage earners are classified in the dynamite branch, and 19 plants employing 756 wage earners are classified in the black powder branch of the industry. It would appear that the survey adequately shows the wage structure prevailing in the Explosives Industry.

The survey indicates that the unskilled employees in the industry constitute the minimum wage class. The average hourly earnings of unskilled wage earners covered by the survey are 62 cents an hour. The wages of the unskilled workers range from under 37.5 cents an hour to $1.075 and under $1.125, with the most significant concentration in the range between 57.5 and under 62.5 cents an hour where 20.6 per cent. of the unskilled employees are found. This is 3.6 per cent. more than are found in the next lower wage class, and 3.3 per cent. more than are found in the four lowest wage classes combined. The Board recommended a minimum wage of 60 cents an hour based upon the fact that there is no pronounced concentration of employees at any 5-cent interval below 57.5 cents an hour.

Counsel for the Institute of Makers of Explosives objected by brief to the Board's findings, setting forth the same objections referred to with respect to the Board's findings and recommendations of the prevailing minimum wage in the manufacture of blasting and detonating caps. With respect to the allegation that October of 1937 was not a normal month,

the index of employment shows that the index number for October 1937 is 91.8. This is only slightly lower than the 92.2 index number for September 1937, which was the highest reported for any month since 1931. Furthermore, the index number of payrolls in October 1937 is the highest reported for any month since 1931.

In the light of the objections filed, the data in support of those objections, and upon review of the record, the Board is of the opinion that the prevailing minimum wage for the manufacture and supply of explosives although within the interval of 57.5 to 62.5 cents an hour, is 57.5 cents an hour. The Board advises me that in making this recommendation it has recognized the downward pull exerted by the workers concentrated in the lower wage intervals.

I have examined the findings and recommendations of the Board and the record of hearing, together with the briefs filed, and in the light of the facts I find the prevailing minimum wage for the manufacture of explosives to be 57.5 cents an hour or $23.00 per week of forty hours, arrived at either upon a time or piece rate basis.

In the light of the foregoing I hereby determine:

(1) The prevailing minimum wage for persons employed in the manufacture and supply of ammunition and parts thereof for small arms, and such related products as saluting primers and aircraft engine starters, to be 42.5 cents an hour or $17.00 per week of forty hours, arrived at either upon a time or piece rate basis;

(2) The prevailing minimum wage for persons employed in the manufacture and supply of blasting and detonating caps to be 47.5 cents an hour or $19.00 per week of forty hours, arrived at either upon a time or piece rate basis;

(3) The prevailing minimum wage for persons employed in the manufacture and supply of explosives, including dynamite, permissible explosives (those approved by the United States Bureau of Mines for use in mines where dust and gas explosions are likely to occur), nitroglycerine, black blasting powder, pellet and fuse powder, and smokeless gun powder, to be 57.5 cents an hour or $23.00 per week of forty hours, arrived at either upon a time or piece rate basis.

This determination shall be effective and the minimum wages hereby established for the manufacture and supply of the commodities of the respective industries, shall apply to all contracts for such commodities with agencies of the United States Government subject to the provisions of the Public Contracts Act (49 Stat. 2036; 41 U.S.C. Sup. III 35), bids for which are solicited on or after October 19, 1939.

NOTICE OF RECONVENED HEARING

Whereas, applications have been made by the Cotton Textile Institute and sundry other parties under Section 14 of the Fair Labor Standards Act of 1938, 52 Stat. 1060, and Regulations—Part 522, as amended, (Regulations Applicable to the Employment of Learners Pursuant to Section 14 of the Fair Labor Standards Act)—issued by the Administrator thereunder for permission to employ learners in the textile industry at wages less than the minimum wage applicable under Section 6 of the Act; and

Whereas, after due notice,[1] a public hearing was heid on these applications in Washington, D. C., on November 28, 29 and 30, 1938 before Merle D. Vincent, a representative of the Administrator duly authorized to conduct said hearing and to determine:

(a) What, if any, occupation or occupations in the textile industry require a learning period; and

(b) Whether it is necessary in order to prevent curtailment of opportunities for employment, to provide for the employment of persons in occupations requiring a learning period at wage rates lower than the minimum wage applicable under Section 6 of the Fair Labor Standards Act of 1938, and

(c) If such necessity is found to exist, at what wages lower than the minimum wage applicable under Section 6, such employment of learners shall be permitted, and with what limitations as to time, number, proportion, and length of service; and

Whereas, new applications by representatives of certain branches of the textile industry, whose original applications were withdrawn following the aforesaid hearing, have been received; and

Whereas, it appears advisable that the aforesaid hearing be reopened for the purpose of considering the necessity, if any, of employing learners at subminimum wage rates in the textile industry, as defined below, or any branch thereof, under the minimum wage rates of 30 cents and 32½ cents an hour to become effective October 24, 1939;

Now, therefore, notice is hereby given that the aforesaid hearing will be reopened on October 12, 1939, at 10 a. m. in Room 208, 939 D Street NW., Washington, D. C., and Merle D. (a) What, if any, occupation or occupations in the textile industry, or branch thereof, require a learning period, and

(b) the factors which may have a bearing upon curtailment of opportunities for employment within the textile industry, or branch thereof, and

(c) under what limitations as to wages, time, number, proportion, and length of service special certificates may be issued to employers in the textile industry, or branch thereof, for whatever occupation or occupations, if any, are found to require a learning period.

As used in this notice, the term "textile industry" is defined to mean:

I. The following operations which constituted the definition of the term in the original notice of hearing (published in the FEDERAL REGISTER, November 10, 1938):

(a) the manufacturing or processing of yarn or thread and all processes preparatory thereto, and manufacturing, bleaching, dyeing, printing and other finishing of woven fabrics (other than carpets and rugs) from cotton, wool, silk, flax, jute or any synthetic fiber, or from mixtures of these fibers; except the chemical manufacturing of synthetic fiber and such related processing of yarn as is conducted in establishments manufacturing synthetic fiber;

(b) the manufacturing of batting, wadding or filling and the processing of

[1] 4 F.R. 2671 DL

waste from the fibers enumerated in clause (a);

(c) the manufacturing, bleaching, dyeing, or other finishing of pile fabrics (except carpets and rugs) from any fiber or yarn;

(d) the manufacturing or finishing of braid, net or lace from any fiber or yarn;

(e) the manufacturing of cordage, rope or twine from any fiber, and

II. Any other operations which are subject to the Textile Minimum Wage Order effective October 24, 1939.

At this reopened hearing opportunity to present evidence relevant to the above questions will be afforded any interested person provided the presiding officer, Merle D. Vincent, shall have received from such person prior to noon, October 11, 1939, a notice of intention to appear setting forth his name and address, and specifying the branch or branches of the textile industry to which his testimony will be directed and the approximate length of such presentation.

## FEDERAL POWER COMMISSION.

[Docket Nos. G-100, G-101, G-113, G-127]

CITY OF CLEVELAND, COMPLAINANT V. HOPE NATURAL GAS COMPANY, DEFENDANT; CITY OF AKRON, COMPLAINANT V. HOPE NATURAL GAS COMPANY, DEFENDANT; IN THE MATTER OF HOPE NATURAL GAS COMPANY; PENNSYLVANIA PUBLIC UTILITY COMMISSION, COMPLAINANT V. HOPE NATURAL GAS COMPANY, DEFENDANT

ORDER FIXING DATE OF HEARING

OCTOBER 3, 1939.

Commissioners: Clyde L. Seavey, Chairman; Claude L. Draper, Basil Manly, Leland Olds, John W. Scott.

It appearing to the Commission that:

(a) In Docket No. G-100, on July 6, 1938, the City of Cleveland, Ohio, and in Docket No. G-101, on July 25, 1938, the City of Akron, Ohio, filed complaints with the Commission against the Hope Natural Gas Company, alleging that the price charged by the Hope Natural Gas Company to The East Ohio Gas Company, an affiliated company, for natural gas sold and delivered at the Ohio River for resale to domestic, commercial and small industrial consumers in the cities of Cleveland and Akron and elsewhere, is excessive, unjust, unreasonable, greatly in excess of the price charged by the Hope Natural Gas Company to non-affiliated companies at wholesale for resale to domestic, commercial, and small industrial consumers, and greatly in excess of the price charged by Hope Natural Gas Company to The East Ohio Gas Company for resale to certain favored industrial consumers in Ohio and therefore unduly discriminatory between customers and between classes of service. Said complaints prayed for an investigation by this Commission and a finding that the price charged The East Ohio Gas Company by the Hope Natural Gas Company for gas sold and delivered at the Ohio River is excessive, unreasonable, and unjustly discriminatory, and for the fixing of a just, fair and reasonable rate;

(b) On August 18, 1938, and August 26, 1938, the Hope Natural Gas Company filed its answers to the complaints of the City of Cleveland and the City of Akron in Docket No. G-100 and Docket No. G-101, respectively, in which it denied that the price charged by the Hope Natural Gas Company to The East Ohio Gas Company for natural gas for resale to domestic, commercial, and small industrial consumers is excessive, unreasonable or discriminatory;

(c) In Docket No. G-113, on October 14, 1938, the Commission, on its own motion, adopted an order instituting an investigation of the Hope Natural Gas Company for the purpose of enabling the Commission (1) to determine, with respect to said company, whether, in connection with any transportation or sale of natural gas subject to the jurisdiction of the Commission, any rate, charge, or classification demanded, observed, charged or collected or any rule, regulation, practice or contract affecting such rate, charge, or classification, is unjust, unreasonable, unduly discriminatory, or preferential; and (2) if the Commission shall find that any such rate, charge, classification, rule, regulation, practice or contract is unjust, unreasonable, unduly discriminatory, or preferential, to determine and fix by appropriate order or orders just, reasonable and non-discriminatory rates, charges, classifications, rules, regulations, practices or contracts to be thereafter observed and in force;

(d) Said order instituting an investigation was duly served upon the Hope Natural Gas Company and was received by said company on October 15, 1938;

(e) In Docket No. G-127, on March 23, 1939, the Pennsylvania Public Utility Commission filed a complaint with the Commission against the Hope Natural Gas Company, alleging that the prices charged by the Hope Natural Gas Company to The Peoples Natural Gas Company, the Fayette County Gas Company and The Manufacturers Light and Heat Company, for natural gas sold and delivered at points on the Pennsylvania-West Virginia state line for resale in the State of Pennsylvania, are unlawful, excessive, unreasonable and discriminatory, and said complaint prays for an investigation by this Commission of said prices and for the fixing of just, fair and reasonable rates;

(f) On April 25, 1939, the Hope Natural Gas Company filed its answer to the complaint of the Pennsylvania Public

Utility Commission in Docket No. G–127, in which it denied that the prices charged by the Hope Natural Gas Company to The Peoples Natural Gas Company, the Fayette County Gas Company and The Manufacturers Light and Heat Company are unlawful, excessive, unreasonable and discriminatory;

(g) Hope Natural Gas Company has in course of preparation a restatement of the cost of its property and plant and representatives of the Commission have been informed that such restatement studies are substantially completed and will be entirely completed within a comparatively short time;

The Commission orders that:

(A) A public hearing in these proceedings be held commencing on December 4, 1939, at ten o'clock a. m., in the Hearing Room of the Federal Power Commission, Hurley-Wright Building, 1800 Pennsylvania Avenue, N. W., Washington, D. C., and at said public hearing, pursuant to the provisions of Sec. 50.63 of the Provisional Rules of Practice and Regulations Under the Natural Gas Act, the order of procedure will be for the Hope Natural Gas Company to open and close these proceedings with the presentation of its evidence relevant and material to the question whether, in connection with any transportation or sale of natural gas subject to the jurisdiction of the Commission, any rate, charge, or classification demanded, observed, charged or collected by said Hope Natural Gas Company, or any rule, regulation, practice or contract affecting such rates, charge, or classification, is unjust, unreasonable, unduly discriminatory, or preferential;

(B) Docket Nos. G–100, G–101, G–113 and G–127 be and they are hereby consolidated for purposes of hearing thereon;

(C) Hope Natural Gas Company is hereby requested to submit at said hearing the restatement of the cost of its property and plant mentioned in paragraph (g) of this order.

## FEDERAL TRADE COMMISSION.

*United States of America—Before Federal Trade Commission*

[Docket No. 3903]

IN THE MATTER OF NATIONAL GRAIN YEAST CORPORATION, RESPONDENT

COMPLAINT

Pursuant to the provisions of the Federal Trade Commission Act and pursuant to the provisions of an Act of Congress approved October 15, 1914, entitled "An Act to Supplement Existing Laws Against Unlawful Restraints and Monopolies and for Other Purposes" (U.S.C. Title 15, Section 13 of the Clayton Act) as amended, and by virtue of said authority vested in it by said acts, the Federal Trade Commission, having reason to believe that National Grain Yeast Corporation, hereinafter referred to as respondent, has violated the provisions of said Federal Trade Commission Act and subsections (a) and (c) of Section 2 of said Clayton Act as amended, and it appearing by it in respect thereof would be in the public interest, hereby issues its complaint stating its charges in that respect as follows:

*Count I*

PARAGRAPH 1. National Grain Yeast Corporation, is a corporation organized and existing under and by virtue of the laws of the State of New Jersey, with its principal office and place of business located at 810 Mill Street, Belleville, New Jersey.

PAR. 2. Respondent, since June 19, 1936, has been and now is engaged in the manufacture, sale and distribution of bakers' yeast. In the course and conduct of such sale and distribution it causes said yeast to be shipped and transported in commerce from its plant in the State of New Jersey to the purchasers thereof in and among the various states of the United States, and there is and has been at all times herein mentioned a current of trade and commerce in respondent's yeast between the state wherein respondent's plant is located and various other states of the United States.

PAR. 3. Said respondent in the course and conduct of its business since June 19, 1936, has been and is now in substantial competition with other corporations, individuals, partnerships and firms engaged in the business of manufacturing, selling and distributing bakers' yeast in commerce.

PAR. 4. In the course and conduct of its business as aforesaid the respondent has been and now is discriminating in price between different purchasers of its said product of like grade and quality, by giving and allowing certain purchasers of bakers' yeast used in the manufacture of bread and allied products, different prices than given or allowed other of its said purchasers competitively engaged one with the other, in the sale and distribution of bread and allied products within the various states of the United States. To illustrate, during the year of 1937 respondent sold 208,400 pounds of bakers' yeast to Krug Baking Company, 138 94th Avenue, Jamaica, Long Island, New York, at 11 cents per pound, and during the same period sold Dugan Brothers, 222nd Street and 98th Avenue, Queens, Long Island, New York, a competitor, 329,850 pounds of bakers' yeast at 10 cents per pound, less 1%, thus affording the last mentioned purchaser a saving of $3,628.35 during said period, upon the basis of the price charged the first mentioned purchaser. Also during the same period respondent sold Mersels Darling Bread Company, 565 Barry Street, Bronx, New York, 23,420 pounds of bakers' yeast at 13 cents per pound, and sold Pechter Baking Company, 173rd Street and Park Avenue, Bronx, New York, a competitor, 40,927 pounds of bakers' yeast at 11 cents per pound, thus affording the last mentioned purchaser a saving of $818.54 during said period, upon the basis of price charged to first mentioned purchaser.

PAR. 5. Further discrimination in price between different competing purchasers of its products is brought about as a result of respondent delivering large quantities of bakers' yeast to certain of its purchasers for which no specific charge is made, in addition to yeast actually sold and delivered to these same purchasers for which a specific price is charged, thus reducing the cost to said favored customers of the yeast actually purchased, while at the same time other purchasers competitively engaged in the sale of bread and allied products with the said favored purchasers and paying the same price per pound for said product, are not furnished such additional yeast. To illustrate, during the month of November, 1936, Saperstein, 676 Allerton Avenue, Bronx, New York, purchased 350 pounds of yeast at 13 cents per pound and in addition to said purchased yeast respondent delivered 290 pounds of yeast for which no charge was made, while during the same period Lang's, 691 Allerton Avenue, Bronx, New York, a competitor, purchased 342 pounds of bakers' yeast at 13 cents per pound and respondent delivered no additional yeast to said purchaser without charge.

PAR. 6. Respondent further discriminates in price between competing purchasers by granting cash discounts of 1% to 2% to certain of its purchasers which are not granted to others who pay in the same manner and within the same time as those receiving such discounts.

PAR. 7. The effect of such discrimination in price as set forth in Paragraphs Four, Five, and Six hereof has been or may be substantially to lessen competition in the line of commerce in which respondent and its competitors are engaged, and may be to injure, destroy or prevent competition in the sale and distribution of bread and allied products between those of respondent's purchasers who receive the benefits of such discriminations and competing purchasers who do not receive such benefits.

PAR. 8. The foregoing alleged acts and practices are in violation of Subsection (a) of Section 2 of the Clayton Act as amended.

*Count II*

PARAGRAPH 1. The allegations of Paragraphs One, Two and Three of Count I are hereby incorporated as though fully set forth.

PAR. 2. In the course and conduct of its business as aforesaid, respondent pursues a policy and practice of contracting with various bakers' associations under the terms of which contracts the said respondent sells its bakers' yeast to the members of said associations at prices fixed in said contracts and makes monthly payments to said associations of a commission or brokerage upon the sales to said members; that said payments so made inure to the benefit of the members of said associations through the payment of dividends to the members by the associations; that no services of any sort or character are rendered by said associations to respondent in connection with such sale or purchase of said yeast.

PAR. 3. The foregoing alleged acts and practices are in violation of subsection (c) of Section 2 of the Clayton Act, as amended.

*Count III*

PARAGRAPH 1. The allegations of Paragraphs One, Two and Three of Count I are hereby incorporated as though fully set forth.

PAR. 2. In the course and conduct of its business respondent during a period of more than three years last past has systematically given and offered to give gratuities consisting of liquor, cigars, meals, money, and other personal property and entertainment of various kinds to employees of bakers, both its customers and prospective customers and its competitors' customers and prospective customers, secretly and without the knowledge and consent of their employers, with the design and purpose of inducing said employees to purchase respondent's product and to refrain from purchasing the product of its competitors or to induce said employees to influence their respective employers to purchase the product of respondent and to refrain from purchasing that of respondent's competitors.

PAR. 3. The acts and practices of respondent as herein set forth are calculated to and have the capacity and tendency to induce the purchase of respondent's product by various bakers and have diverted trade from competitors of respondent, to the respondent herein.

PAR. 4. The aforesaid acts and practices of the respondent are all to the prejudice and injury of the public and of respondent's competitors and constitute unfair methods of competition in commerce and unfair and deceptive acts and practices in commerce within the intent and meaning of the Federal Trade Commission Act.

Wherefore, the premises considered, the Federal Trade Commission, on this 29th day of September, A. D., 1939, issues this, its complaint, against said respondent.

NOTICE

Notice is hereby given you, National Grain Yeast Corporation, respondent herein, that the 3rd day of November, A. D. 1939, at 2 o'clock in the afternoon, is hereby fixed as the time, and the offices of the Federal Trade Commission in the City of Washington, D. C., as the place, when and where a hearing will be had on the charges set forth in this complaint, at which time and place you will have the right, under said Act, to appear and show cause why an order should not be entered by said Commission requiring you to cease and desist from the violations of the law charged in the complaint.

You are notified and required, on or before the twentieth day after service upon you of this complaint, to file with the Commission an answer to the complaint. If answer is filed and if your appearance at the place and on the date above stated be not required, due notice to that effect will be given you. The Rules of Practice adopted by the Commission with respect to answers or failure to appear or answer (Rule VII) provide as follows:

In case of desire to contest the proceeding the respondent shall, within twenty (20) days from the service of the complaint, file with the Commission an answer to the complaint. Such answer shall contain a concise statement of the facts which constitute the ground of defense. Respondent shall specifically admit or deny or explain each of the facts alleged in the complaint, unless respondent is without knowledge, in which case respondent shall so state.

Failure of the respondent to file answer within the time above provided and failure to appear at the time and place fixed for hearing shall be deemed to authorize the Commission, without further notice to respondent, to proceed in regular course on the charges set forth in the complaint.

If respondent desires to waive hearing on the allegations of fact set forth in the complaint and not to contest the facts, the answer may consist of a statement that respondent admits all the material allegations of fact charged in the complaint to be true. Respondent by such answer shall be deemed to have waived a hearing on the allegations of fact set forth in said complaint and to have authorized the Commission, without further evidence, or other intervening procedure, to find such facts to be true, and if in the judgment of the Commission such facts admitted constitute a violation of law or laws as charged in the complaint, to make and serve findings as to the facts and an order to cease and desist from such violations. Upon application in writing made contemporaneously with the filing of such answer, the respondent in the discretion of the Commission, may be heard on brief, in oral argument, or both, solely on the question as to whether the facts so admitted constitute the violation or violations of law charged in the complaint.

In witness whereof, the Federal Trade Commission has caused this, its complaint, to be signed by its Secretary, and its official seal to be hereto affixed, at Washington, D. C., this 29th day of September, A. D. 1939.

## UNITED STATES CIVIL SERVICE COMMISSION.

CONDITION OF THE APPORTIONMENT AT CLOSE OF BUSINESS SATURDAY, SEPTEMBER 30, 1939

*Important.* Although the apportioned classified civil service is by law located only in Washington, D. C., it nevertheless includes only about half of the Federal Civilian positions in the District of Columbia. Positions in local post offices, customs districts and other field services outside of the District of Columbia which are subject to the Civil Service Act are filled almost wholly by persons who are local residents of the general community in which the vacancies exist. It should be noted and understood that so long as a person occupies, by original appointment, a position in the apportioned service, the charge for his appointment continues to run against his State of original residence. Certifications of eligibles are first made from States which are in arrears:

Whereas Section 301 (b) of the Sugar Act of 1937 provides, as one of the conditions for payment to producers of sugar beets and sugarcane, as follows:

Whereas the Secretary of Agriculture has held a number of public hearings[1] in the mainland cane sugar area for the purpose of receiving evidence likely to be of assistance to him in determining fair and reasonable wage rates for persons employed in the harvesting of sugarcane during the period from September 1, 1939, to June 30, 1940:

NOTICE OF OPPORTUNITY TO PETITION FOR REVIEW OF DETERMINATION DENYING APPLICATION FOR PARTIAL EXEMPTION OF THE BENTONITE CLAY (SWELLING TYPE) MINING INDUSTRY AS A SEASONAL INDUSTRY

Whereas, application has been made by the Arctic Circle Exploration Company, American Colloid Company, National Crushed Stone Association, Inc., National Sand and Gravel Association, National Industrial Sand Association, and sundry other parties (representative of various surface and open-cut mining industries) under Section 7 (b) (3) of the Fair Labor Standards Act of 1938, and Regulations, Part 526, as amended (Regulations applicable to Industries of a Seasonal Nature), issued by the Administrator thereunder, for partial exemption of the said industries from the maximum hours provisions of Section 7 (a) of said Act pursuant to Section 7 (b) (3) applicable to industries found by the Administrator to be of a seasonal nature; and

Whereas, a combined public hearing on the said applications was held before Harold Stein, the representative of the Administrator of the Wage and Hour Division, duly authorized to hear and determine whether or not any of the said industries or branches thereof is of a seasonal nature within the meaning of Section 7 (b) (3) of the Fair Labor Standards Act of 1938, and Part 526 of Regulations issued thereunder, the term "surface or open-cut mining industries" being defined to include the mining, quarrying, dredging, and excavating of various-named products from pit, bank and marine deposits but not to embrace any underground operations; and

Whereas, following such hearing, the said Harold Stein duly made his findings of fact and determined as follows in reference to the surface or open-cut mining of Bentonite clay (swelling type):

(1) that the excavating and hauling of swelling bentonite is not a separate industry but is integral with the milling of swelling bentonite; and

(2) assuming that the operations of excavating, hauling and milling swelling bentonite constitute a branch of an industry within the meaning of Sections 7 (b) (3) and 3 (h) of the Fair Labor Standards Act of 1938 and Section 526.2 of Regulations issued thereunder, the said branch of an industry operates continuously throughout the year and does not at any time cease production (as the term "production" is used in Regulations, Part 526, and is defined in Section 3 (j) of the Act), and is therefore not an industry of a "seasonal" nature within the meaning of Section 7 (b) (3) of the Act and Section 526.3 of the Regulations.

and on the basis thereof denied the application; and

Whereas, said Findings and Determination were duly filed with the Administrator on October 4, 1939, and are now on file in his Office, Room 5144, Department of Labor Building, Washington, D. C., and available for examination by all interested parties:

Now, therefore, pursuant to the provisions of Section 526.7 of the aforesaid Regulations, notice is hereby given that any person aggrieved by the said determination may, within fifteen days after the date this notice appears in the FEDERAL REGISTER, file a petition with the Administrator requesting that he review the action of the said representative upon the record of hearing before the said representative.

Signed at Washington, D. C., this 6th day of October 1939.

## AGRICULTURAL MARKETING SERVICE

### PART 60—AMENDMENT TO THE REGULATIONS GOVERNING THE INSPECTION AND CERTIFICATION OF RICE WITH RESPECT TO EQUAL-TO-TYPE CERTIFICATES

By virtue of the authority vested in the Secretary of Agriculture by the act of Congress entitled, "An Act making appropriations for the Department of Agriculture and for the Farm Credit Administration for the fiscal year ending June 30, 1940, and for other purposes," approved June 30, 1939 (Public No. 159—76th Congress), I, H. A. Wallace, Secretary of Agriculture, do hereby make, prescribe, publish and give public notice of the following amendment to the regulations governing the inspection and certification of rice, as heretofore promulgated, to become effective October 1, 1939, and to continue in force and effect so long as Congress shall provide the necessary authority therefor, unless amended or superseded by regulations hereafter prescribed and promulgated under such authority.

Strike out Section 60.22 (Reg. 3, Sec. 19) and insert in lieu thereof the following:

§ 60.22 *Equal-to-type certificate.* Upon application of an interested party and upon compliance with the provisions of sections 60.4–60.28, (Reg. 3), a rice inspection certificate may be issued by an inspector to state that the quality of a lot or a sample of rice is "equal to or better than" the quality of a type which has previously been placed on file and definitely identified in the office of the inspector, provided such inspection and certification meet the conditions set forth in either paragraphs (a) (1, 2, 3 and 4), (b), or (c) of this section.

(a)–1. The lot or sample to be certificated shall be equal to, or better than, the quality of the type according to all class, quality, and condition factors of the official rice standards of the United States, with the exception of moisture.

(a)–2. At the time of filing the type with the inspector, the depositor shall specify and file in writing with the inspector a statement of the maximum moisture content of any rice which he proposes to have inspected or to deliver against such type.

(a)–3. When the statement of moisture content filed by the depositor with the type specifies a maximum moisture content of 15 percent or less and when the lot or sample to be delivered or inspected against the type contains no more moisture than the maximum percentage so specified, the factor of moisture may be disregarded in making the certification.

(a)–4. When the statement of moisture content filed by the depositor with the type specifies a maximum moisture content in excess of 15 percent and when the lot or sample to be delivered or inspected against the type contains no more moisture than the maximum percentage so specified, the certificate shall clearly state the maximum percentage of moisture specified by the depositor also the actual moisture content of the lot or sample covered by the certificate.

(b) An equal-to-type certificate also may be issued to show that rice is "equal to or better than" a properly identified type according to one or more of the class, quality, and condition factors of the official rice standards of the United States or according to other authorized quality tests, provided the certificate clearly states the factors or tests used in making the inspection.

(c) An equal-to-type certificate also may be issued to show that rice is "equal to or better than" a properly identified type according to all of the class, quality, and condition factors of the official rice standards of the United States except for one or more such factors, provided the certificate clearly states the factors excepted in making the inspection.

All certificates issued under the provisions of this section shall clearly state the identity of the type.

In case any inspector finds that a lot or sample of rice offered for inspection under this section fails to meet the above requirements, the certificate issued pursuant to such inspection shall state that the rice is "not equal to type."

*Secretary.*

[C. A. A. Form No. ER–1, Adopted October 3, 1939.]

### REPORT OF OWNERSHIP OF STOCK AND OTHER INTERESTS REQUIRED BY SECTION 407 (c) OF THE ACT

#### INSTRUCTIONS

A. Section 407 (c) of the Civil Aeronautics Act of 1938 provides as follows:

"Each officer and director of an air carrier shall annually and at such other times as the Authority shall require transmit to the Authority a report describing the shares of stock or other interests held by him in any air carrier, any person engaged in any phase of aeronautics, or any common carrier, and in any person whose principal business, in purpose or in fact, is the holding of stock in, or control of, air carriers, other persons engaged in any phase of aeronautics, or common carriers."

B. Reports shall be filed annually on or before March 1st of each year, and shall be transmitted by each individual who was at any time during the preceding calendar year and at the time of making the report an officer or director of any air carrier. Such reports shall cover stocks and other interests held by such individuals at any time during the preceding calendar year in the persons mentioned in section 407 (c) of the Act, but need not cover any portion of said preceding calendar year covered by the reporting individual in any previous report filed pursuant to paragraph D hereof. However, the initial report filed on or before March 1, 1940, shall be transmitted by each individual who was at any time during the period from August 22, 1938 to December 31, 1939, inclusive, and at the time of making the report, an officer or director of any air carrier. Such initial report shall cover stocks and other interests held by such individuals at any time during the period from August 22, 1938 to December 31, 1939, inclusive, in the persons mentioned in section 407 (c) of the Act.

C. From and after January 1, 1940, each individual who is appointed or elected to the position of officer or director of any air carrier, and who has not transmitted to the Authority a report covering the preceding calendar year, shall transmit to the Authority, within 30 days after such appointment or election, a report covering the stocks and other interests held by him in the persons mentioned in section 407 (c) of the Act at any time from the beginning of the preceding calendar year to and including the date of the report. However, such report need not cover any portion of the preceding calendar year as may have been covered by the reporting individual in any previous report filed pursuant to this paragraph.

D. Upon good cause shown, the Authority may grant an extension of time for the filing of any report required to be filed hereunder.

E. Each report shall be prepared in triplicate. Two copies, which shall be properly executed and verified in accordance with the attached form of oath, shall be transmitted to the Bureau of Economic Regulation, Civil Aeronautics Authority, Washington, D. C. The third copy should be retained by the reporting individual for further reference in connection with correspondence with the Authority relating thereto.

F. Reports should be prepared on strong, durable paper 8½" by 10" in size, except that schedules may be larger but folded to that size.

G. The cover page of each report shall be in the form attached, designated "Form of cover page."

H. Insofar as practicable, reports should be typewritten, but if pen and ink are used, the ink should be black and of durable quality. All reports must be plainly legible.

I. The information called for by each item should be fully and accurately reported. Each response shall bear the same numerical or alphabetical designation as the item calling for the information. Comprehensive but succinct statements of the reporting individual's reasons for not fully reporting any information called for should be given. When the response to a particular item is "none," or where the item is not applicable, that fact should be so stated.

J. The reporting individual shall report direct and indirect interests, beneficial and non-beneficial interests, including interests (1) beneficially owned by him and held for him by any other person either in a "street name," or as trustee, or in any other capacity (2) beneficially owned by any other person and held by the reporting individual either as trustee, nominee, or in any other capacity (3) beneficially owned by the reporting individual and other persons (including but not limited to co-partnerships, trusts, joint tenancies, etc.).

K. In reporting interests in persons "whose principal business, in purpose or in fact, is the holding of stock in, or control of air carriers, other persons engaged in any phase of aeronautics, or common carriers," the reporting individual shall include all interests in any persons whose principal business, in purpose or in fact, is *dealing in* stocks of air carriers, other persons engaged in any phase of aeronautics, or common carriers.

L. In reporting the name of any corporation, the exact corporate name shall be used.

M. As used in this form:

(1) the term "interest" includes any type of security, including stocks, bonds, notes, debentures, evidence of indebtedness, or any options, warrants, or rights to subscribe to any stocks, as well as any other pecuniary or proprietary interest of any nature whatsoever. Each interest shall be fully and adequately described in each schedule.

(2) The term "person" has the meaning defined in the Civil Aeronautics Act of 1938 (any individual, firm, copartnership, corporation, company, association, joint stock association, or body politic; and includes any trustee, receiver, assignee, or other similar representative thereof.)

3. Unless the context otherwise requires, other words and phrases have the meaning defined in such Act.

N. All records of air carriers or of officers and directors of air carriers containing the information called for in the attached form of report shall be maintained by the reporting individual in such manner as to be readily accessible, and shall be made available to the Authority or its duly authorized representative upon request.

"No transfers or denominational exchanges in debentures covered by the foregoing call will be made on the books maintained by the Treasury Department on or after October 1, 1939. This does not affect the right of the holder of a debenture to sell and assign the debenture on or after October 1, 1939, and provision will be made for the payment of final interest due January 1, 1940, with the principal thereof to the actual owner, as shown by the assignments thereon.

"The Federal Housing Administrator hereby offers to purchase any called debentures at any time from October 1, to January 1, 1940, inclusive, at par and accrued interest, to date of purchase.

"Instructions for the presentation and surrender of debentures for redemption on or after January 1, 1940, or for purchase prior to that date will be given by the Secretary of the Treasury."

II. TRANSACTIONS IN SECOND-CALLED DEBENTURES

1. The debentures included in the foregoing notice of call for partial redemption on January 1, 1940, are hereby designated *second-called* 2¾ percent Mutual Mortgage Insurance Fund debentures, Series B, and are hereinafter referred to as *second-called* debentures.

2. Transfers and denominational exchanges in *second-called* debentures terminated at the close of business on September 30, 1939.

III. REDEMPTION OR PURCHASE

1. Holders of *second-called* debentures will be entitled to have such debentures redeemed and paid at par on January 1, 1940, with interest in full to that date, at the rate of $13.75 per $1,000. Interest on *second-called* debentures will cease on January 1, 1940.

2. Holders of *second-called* debentures have the privilege of presenting such debentures at any time prior to January 1, 1940, for purchase at par and accrued interest, at the rate of $.074728 per $1,000 per day from July 1, 1939, to date of purchase.

IV. RULES AND REGULATIONS GOVERNING REDEMPTION AND PURCHASE

1. The United States Treasury Department is the agent of the Federal Housing Administrator for the redemption and purchase of *second-called* debentures. In accordance with regulations adopted by the Federal Housing Administrator and approved by the Secretary of the Treasury, the assignment, redemption, and purchase of *second-called* debentures will be governed by the general regulations of the Treasury Department with respect to United States bonds and notes, so far as applicable, except as otherwise provided herein.

2. *Second-called* debentures presented for redemption on January 1, 1940, or for purchase prior to that date, must be assigned by the registered payees or assignees thereof or by their duly constituted representatives in the form indicated in paragraph 3 hereof, and should thereafter be presented and surrendered to any Federal Reserve bank or to the Division of Loans and Currency, Treasury Department, Washington, D. C., accompanied by appropriate written advice. (Use Form P.D. 1632 attached hereto.) The debentures must be delivered at the expense and risk of the holders. (See paragraph 8 of this section.) In all cases checks in payment of principal and final interest will be mailed to the address given in the form of advice accompanying the debentures when surrendered.

3. If the registered payee or an assignee holding under proper assignment from the registered payee desires that payment be made to him, the debentures should be assigned by such payee or assignee or by a duly constituted representative to "The Federal Housing Administrator for redemption" or to "The Federal Housing Administrator for purchase", according to whether the debentures are to be presented for redemption on January 1, 1940, or for purchase prior to that date. If it is desired for any reason that payment be made to some other person without intermediate assignment, the debentures should be assigned to "The Federal Housing Administrator for redemption (or purchase) for the account of ----------," inserting the name and address of the person to whom payment is to be made.

4. An assignment in blank or other assignment having similar effect will be recognized, but in that event payment will be made to the person surrendering the debenture for redemption or purchase since, under such an assignment, the debenture becomes in effect payable to bearer. Assignments in blank or assignments having similar effect should be avoided, if possible, in order not to lose the protection afforded by registration.

5. Final interest on any *second-called* debentures, whether purchased prior to, or redeemed on or after January 1, 1940, will be paid with the principal in accordance with the assignments on the debentures surrendered.

6. All assignments must be made on the debentures themselves unless otherwise directed by the Treasury Department. Detached assignments will be recognized and accepted in any particular case in which the use of detached assignments is specifically authorized by the Treasury Department. Any assignment not made upon the debenture is considered a detached assignment.

7. A *second-called* debenture registered in the name of, or assigned to, a corporation, will be paid to such corporation on or after January 1, 1940, upon an appropriate assignment for that purpose executed on behalf of the corporation by a duly authorized officer thereof. An assignment so executed and duly attested in accordance with Treasury Department regulations will ordinarily be accepted without proof of the officer's authority. In all cases coming under this provision payment will be made only by check drawn to the order of the corporation. Proof of the authority of the officer assigning on behalf of a corporation will be required, in accordance with the general regulations of the Treasury Department, in the case of assignments for purchase prior to January 1, 1940, and in case of assignments for redemption on or after January 1, 1940, for the account of any person other than the corporation.

8. Debentures presented for redemption or purchase under this circular must be delivered to a Federal Reserve bank or to the Division of Loans and Currency, Treasury Department, Washington, D. C., at the expense and risk of the holder. Debentures bearing restricted assignments may be forwarded by registered mail, but debentures bearing unrestricted assignments should be forwarded by registered mail insured or by express.

9. In order to facilitate the redemption of *second-called* debentures on January 1, 1940, any such debentures may be presented and surrendered in the manner herein prescribed in advance of that date but not before December 1, 1939. Such early presentation by holders will insure prompt payment of principal and interest when due.

V. GENERAL PROVISIONS

1. Any further information which may be desired regarding the redemption of *second-called* debentures under this circular may be obtained from any Federal Reserve bank or from the Division of Loans and Currency, Treasury Department, Washington, D. C., where copies of the Treasury Department's regulations governing assignments may be obtained.

2. As fiscal agents of the United States, Federal Reserve banks are authorized and requested to perform any necessary acts under this circular. The Secretary of the Treasury may at any time or from time to time prescribe supplemental and amendatory rules and regulations governing the matters covered by this circular, which will be communicated promptly to the registered owners of *second-called* debentures.

## DIVISION OF GRAZING

AMENDMENT OF THE FEDERAL RANGE CODE CONTAINING THE RULES FOR THE ADMINISTRATION OF GRAZING DISTRICTS UNDER THE TAYLOR GRAZING ACT, AS AMENDED[1]

Pursuant to the provisions of the Taylor Grazing Act of June 28, 1934 (48 Stat. 1269), as amended by the act of June 26, 1936 (49 Stat. 1976), and the act

[1] This document corrects the one appearing at page 4017 of the September 22 issue of the FEDERAL REGISTER.

of July 14, 1939, (Pub. No. 173, 76th Cong.), paragraphs a, c, d, and g of section 12 of the Federal Range Code, revised to August 31, 1938 (43 CFR, Sec. 501.12, a, c, d, and g) are amended to read as follows:

Section 12, Paragraph a. *Authorization for establishment; number of members; qualifications.* The Taylor Grazing Act provides that there shall be an advisory board of local stockmen in each grazing district. The regional grazier shall fix the number of members to be elected to such board in each district, such number to be not less than five and not more than twelve, exclusive of a wildlife representative who will not be elective but will be appointed by the Secretary of the Interior. The regional grazier may fix the number of district advisors to be elected as representatives of each class of stockmen, according to the kind of livestock owned, or may fix the number to be elected from each voting precinct established by him, or both: *Provided*, That the free-use licensees or permittees in each district will be entitled to one representative, who shall be a free-use licensee or permittee. All district advisors shall be elected in the manner herein provided and, excepting the wildlife representatives, shall be electors qualified to vote in the particular election. If a district is divided into precincts, an advisor representing a precinct shall qualify in the precinct in the same manner as in the district.

Section 12, Paragraph c. *Elections; qualifications of electors.* Only those persons who are qualified to receive regular, free-use, or nonuse licenses or permits will be allowed to vote in any election held pursuant to the act of July 14, 1939; *Provided*, That in any new grazing district hereinafter established and embracing areas not theretofore within any district, the electors will be those stockmen who, prior to the establishment of the district, were regularly accustomed to using the Federal range within said district. A minor may vote if otherwise qualified; *Provided*, That upon request by his natural or legal guardian his ballot may be cast by the guardian in the name of the minor. The judges at any election will be furnished by the representative of the Division of Grazing in charge with a list of all electors entitled to vote in the district. No one whose name does not appear on such list shall be allowed to vote; *Provided*, That anyone claiming that his name has been erroneously omitted from the list may obtain and mark a ballot which will be held uncounted until the regional grazier shall have had a further opportunity to determine whether or not the party was entitled to vote. If it is found that the party was entitled to vote, his ballot shall be counted, otherwise it shall be disregarded.

Section 12, Paragraph d. *Elections—judges; nominations; ballots; registration; challenges.* The representative of the Division of Grazing in charge of an election will choose three qualified electors to act as election judges. The electors present may then place in nomination the names of candidates, but ballots may be cast for any other person qualified to represent a particular class or precinct. Voting shall be only by ballots cast personally by qualified electors and proxies will not be recognized. Except as provided in paragraph c of this section, no elector shall receive a ballot until he has registered by signing opposite his name on the list of persons entitled to vote. Before receiving a ballot any elector may be challenged by any other elector qualified to vote in the district and thereupon the judges, or any of them, may require the elector challenged to answer such questions concerning his qualifications as a voter as may be deemed necessary. Upon his failure or refusal to answer such questions satisfactorily, he shall not be permitted to register or to receive a ballot. Each candidate may designate any qualified elector to remain within the polling places during the casting and counting of votes and the declaration of the results thereof, and such person may act as a challenger. Before any elector shall be permitted to deposit his completed ballot in the ballot box, the judges shall write "Voted" opposite his signature on the registration list.

Section 12, Paragraph g. *Appointment by Secretary of the Interior; oath and term of office; removal; vacancies.* No person elected as a district advisor may assume office until he has been appointed by the Secretary of the Interior and has taken an oath of office. Persons elected as district advisors at the first election after the establishment of a grazing district or after July 14, 1939, shall be divided as evenly as may be into three classes by lot by the regional grazier. Those in class 1 shall hold office for one year, those in class 2 for two years and those in class 3 for three years, and until their successors are elected and have qualified. Thereafter at each election the class whose term has expired shall be elected for a term of three years. The Secretary of the Interior may remove any district advisor from office for failure to discharge his duties or for the good of the service. Upon a vacancy occurring in the office of a district advisor other than a wildlife representative by reason of resignation, removal or otherwise, the board shall recommend the name of a person to fill the vacancy and such recommendation, together with that of the regional grazier, shall be transmitted to the Director, who shall consider the recommendation and, if he concurs, transmit it to the Secretary for his consideration. A person appointed by the Secretary to fill a vacancy shall hold office until the next regular election, when a successor shall be elected to serve for the remainder of the unexpired term, if any, of the member causing the vacancy. Wildlife representatives shall hold office without term and until a successor may be appointed by the Secretary.

### DEPARTMENT OF LABOR.

#### Children's Bureau.

NOTICE OF HEARING ON PROPOSED FINDING AND ORDER RELATING TO THE EMPLOYMENT OF MINORS BETWEEN 16 AND 18 YEARS OF AGE AS MOTOR-VEHICLE DRIVER OR HELPER UNDER THE FAIR LABOR STANDARDS ACT OF 1938

OCTOBER 6, 1939.

Whereas, section 12 (a) of the Fair Labor Standards Act of 1938 (Act of June 25, 1938, chapter 676, 52 Stat. 1060, U. S. Code, Supp. IV, title 29, section 201) prohibits the shipment or delivery for shipment of goods in commerce, as defined in the Act, which are produced in establishments situated in the United States in or about which within 30 days prior to the removal of such goods therefrom any oppressive child labor has been employed; and

Whereas, section 3 (l) of the said Act, which defines oppressive child labor, provides in part as follows:

(l) "Oppressive child labor" means a condition of employment under which (1) any employee under the age of sixteen years is employed by an employer . . . in any occupation, or (2) any employee between the ages of sixteen and eighteen years is employed by an employer in any occupation which the Chief of the Children's Bureau in the Department of Labor shall find and by order declare to be particularly hazardous for the employment of children between such ages or detrimental to their health or well-being; • • •

and

Whereas, the Chief of the Children's Bureau issued on November 3, 1938, a regulation prescribing the "Procedure Governing Determinations of Hazardous Occupations;"[1] and

Whereas, pursuant to the said regulation, an investigation has been conducted with respect to the hazardous nature of driving motor vehicles and of serving as helpers on such vehicles with special reference to the employment of minors between 16 and 18 years of age; and

WHEREAS, a report of the investigation has been submitted to the Chief of the Children's Bureau and is available for public inspection; and

WHEREAS, a finding and order relating to the occupations of motor-vehicle driver and helper has been proposed for final adoption by the Chief of the Children's Bureau under the authority of section 3 (l) of the said Act.

Now, therefore, notice is hereby given of a public hearing to be held on October 27, 1939, commencing at 10 o'clock a. m. in Room 3229, U. S. Department of Labor Building, Fourteenth Street and Constitution Avenue, Washington, D. C., before a presiding officer to be designated hereafter, at which interested parties will be given opportunity to appear and to be heard with respect to the said report and proposed finding and order. All parties desiring to appear at the hearing are requested to notify the Children's Bureau at least 5 days prior to the date fixed for hearing.

Copies of the said report and proposed finding and order are available to the public at the office of the Children's Bureau, United States Department of Labor, Washington, D. C.

*Proposed Finding and Order*

TITLE 29—LABOR

CHILDREN'S BUREAU

CHILD LABOR

PART 422. OCCUPATIONS PARTICULARLY HAZARDOUS FOR THE EMPLOYMENT OF MINORS BETWEEN 16 AND 18 YEARS OF AGE OR DETRIMENTAL TO THEIR HEALTH OR WELL-BEING

§ 422.2 *Motor-vehicle driver and helper*—(a) *Finding of fact.* By virtue of and pursuant to the authority conferred by section 3 (l) of the Fair Labor Standards Act of 1938[1] and pursuant to the regulation prescribing the "Procedure Governing Determinations of Hazardous Occupations;"[2] an investigation having been conducted with respect to the hazards for minors between 16 and 18 years of age of employment in the occupations of motor-vehicle driver and helper; a report of the investigation having been submitted to the Chief of the Children's Bureau showing that:

"1. Work on motor vehicles involves a high degree of accident risk for persons of all ages, a risk which is particularly high in the case of young persons, who are lacking in the experience and in the caution required for safety in motor-vehicle operation.

"2. Workmen's compensation experience generally shows for the occupational classifications representing motor-vehicle drivers and helpers a compensation cost higher than the average for manufacturing classifications.

"3. The opinion of experts in motor-vehicle safety and of others having practical experience in the field of motor-vehicle operation who were consulted in the course of the investigation is that employment as driver or as helper on

motor vehicles is especially hazardous for young persons.

"4. Motor-vehicle drivers between 16 and 18 years of age have been found to be involved in a larger number of fatal accidents in proportion to miles driven than drivers in any older age group. In a study covering fatal accidents within a 5-year period in one State the fatal-accident rate was found to be nine times greater for 16-year-old drivers and six times greater for 17-year-old drivers than for those 45 to 50 years of age, the age group with the lowest fatal-accident rate.

"5. Under many industry codes adopted pursuant to the National Industrial Recovery Act the work of motor-vehicle drivers and helpers was listed as a hazardous occupation and as such was prohibited for minors under 18 years of age.

"6. Acting pursuant to the authority conferred upon it by the Motor Carrier Act of 1935, the Interstate Commerce Commission has established as necessary for safety a minimum age of 21 years for motor-vehicle drivers, in regulations applicable to common carriers and contract carriers engaged in interstate commerce. An examiner for the Commission has recommended, after investigation and public hearing, that the same minimum age for motor-vehicle drivers be applied, with certain exceptions not here material, to private carriers engaged in interstate commerce.

"7. State legislation, which reflects public recognition of the special hazards incident to the driving of motor vehicles by young persons, has established the following standards:

(a) In each of the States and the District of Columbia there is a legal minimum age for drivers of motor vehicles which is higher than that for general employment, the legal minimum age for drivers being applicable to (1) all persons operating motor vehicles, or (2) persons operating motor vehicles as employees, or (3) persons operating motor vehicles for common, contract, or private carriers.

(b) In 28 States and the District of Columbia there is a minimum age of at least 18 years applicable to (1) all persons operating motor vehicles or (2) persons operating motor vehicles as employees.

"8. A minimum age of 18 years or higher for the employment of motor-vehicle drivers and helpers has been adopted voluntarily as a general policy by many employers and by the branch of organized labor especially concerned with employment in this field;"

* * * * *

Now, therefore, I, Katharine F. Lenroot, Chief of the Children's Bureau of the United States Department of Labor, hereby find that the occupations of motor-vehicle driver and helper are particularly hazardous for the employment of minors between 16 and 18 years of age.

(b) *Order.* Accordingly, I hereby declare that the occupations of motor-vehicle driver and helper are particularly hazardous for the employment of minors between 16 and 18 years of age.

*Definitions.* For the purpose of this order—

(1) The term "motor vehicle" shall mean any automobile, truck, truck-tractor, trailer, semitrailer, motorcycle, or similar vehicle propelled or drawn by mechanical power and designed for use as a means of transportation but shall not include any vehicle operated exclusively on rails.

(2) The term "driver" shall mean any individual who, in the course of his employment, drives a motor vehicle at any time.

(3) The term "helper" shall mean any individual, other than a driver, whose work in connection with the transportation or delivery of goods includes riding on a motor vehicle.

This order shall not justify noncompliance with any Federal or State law or municipal ordinance establishing a higher standard than the standard established herein. This order shall become effective on January 1, 1940, and shall be in force and effect until amended or repealed by order hereafter made and published by the Chief of the Children's Bureau.

KATHARINE F. LENROOT,
*Chief.*

## Wage and Hour Division.

### NOTICE OF OPPORTUNITY TO PETITION FOR REVIEW OF DETERMINATION DENYING APPLICATION FOR PARTIAL EXEMPTION OF THE WESTERN PINE INDUSTRY AS A SEASONAL INDUSTRY

Whereas, application has been made by the Western Pine Association under Section 7 (b) (3) of the Fair Labor Standards Act of 1938, and Regulations, Part 526, as amended (Regulations applicable to Industries of a Seasonal Nature), issued by the Administrator thereunder, for partial exemption of the Western Pine industry from the maximum hours provisions of Section 7 (a) of said Act pursuant to Section 7 (b) (3) applicable to industries found by the Administrator to be of a seasonal nature; and

Whereas, a public hearing[1] on said application was held before Harold Stein, the representative of the Administrator of the Wage and Hour Division, duly authorized to hear and determine whether or not the Western Pine industry or any branch thereof is of a seasonal nature within the meaning of Section 7 (b) (3) of the Fair Labor Standards Act of 1938, and Part 526 of Regulations issued thereunder; and

[1] 4 F.R. 2384 DI.

Whereas, following such hearing, the said Harold Stein duly made his findings of fact and determined as follows:

1. The Western Pine industry, as defined in the Notice of Hearing, includes the major operations of logging, sawmilling, and shipping, together with ancillary operations.

2. If it is assumed that logging, sawmilling and shipping appropriately constitute separate branches of the Western Pine industry:

(a) Some units in each of these three branches cease operation annually for three months or more primarily because the materials used are not available on account of climatic and other natural factors.

(b) The volume of production and employment of such units is substantial in logging and sawmilling but is not substantial in shipping.

(c) There is no substantial sub-branch of the shipping branch of the industry that ceases operation annually for three months or more.

(d) Data in the record on which any such sub-branch of logging and sawmilling might be defined are limited to data distinguishing between groups of units operating more than nine months and less than nine months respectively.

(e) Any sub-branches of logging and sawmilling that operate annually for as long as (even though not in excess of) nine months can not be found to be of a seasonal nature within the meaning of Section 7 (b) (3) of the Act and Part 526 of Regulations issued thereunder.

(f) No criteria exist in the record on which it can be found that there are sub-branches of any logging or sawmill branches of the Western Pine industry whose operations are limited to a period in such relation to the fourteen workweek exemption period provided by Section 7 (b) (3) of the Act as to justify a finding that any such sub-branch is of a seasonal nature within the meaning of Section 7 (b) (3) of the Act and Part 526 of regulations issued thereunder.

3. If it is assumed that logging, sawmilling, and shipping do not constitute separate branches but together constitute a single industry:

(a) Such industry as a whole does not at any time cease operation.

(b) No group of plants with any substantial output ceases production for even three months during the year.

(c) The group of plants which may cease production for even three months during the year do not have a sufficiently substantial output to constitute a branch of an industry.

and on the basis thereof denied the applications; and

Whereas, said Findings and Determination were duly filed with the Administrator on October 5, 1939, and are now on file in his Office, Room 5144, Department of Labor Building, Washington, D. C., and available for examination by all interested parties:

Now, therefore, pursuant to the provisions of Section 526.7 of the aforesaid Regulations, notice is hereby given that any person aggrieved by the said determination may, within fifteen days after the date this notice appears in the FEDERAL REGISTER, file a petition with the Administrator requesting that he review the action of the said representative upon the record of hearing before the said representative.

Signed at Washington, D. C., this 5th day of October 1939.

ELMER F. ANDREWS,

At said hearing the presiding officer announced that he would first hold a hearing for the purpose of receiving evidence upon the basis of which a regulation may be promulgated fixing and establishing a reasonable definition and standard of identity for the food commonly known as canned peaches.

3. In pursuance of such announcement, a hearing was held for the purpose of receiving evidence upon the basis of which a regulation may be promulgated fixing and establishing a reasonable definition and standard of identity for the food commonly known as canned peaches, and the hearing was continued with reference to the other proposals, to dates subsequently to be announced.

4. On April 17, 1939, at 2:15 p. m., the hearing on the definition and standard of identity proposal for canned cherries was convened and held on April 17 and 18, and at 1:35 p. m., on April 18, 1939, was adjourned until May 1, 1939, and resumed on May 1, 1939, and concluded on May 2, 1939, at 11:50 a. m. It was ordered that all evidence with reference to the sucrose-dextrose issue introduced in evidence at the hearing on the definition and standard of identity proposal for canned peaches be incorporated in this record. Page references to the record of the hearing conducted on May 1, 1939, and May 2, 1939, are cited as "C.R. —". All interested persons were notified, pursuant to the rules of procedure, of their opportunity to file proposed findings of fact and written argument.

5. Within the time announced at the hearing within which interested persons might file proposed findings of fact, written argument, or both, various interested persons filed proposed findings of fact, together with written argument in support thereof, based upon the evidence adduced at the hearing which, if granted, would modify the proposal contained in the FEDERAL REGISTER.

6. Pursuant to the rules of procedure, the presiding officer, therefore, makes this his report and suggests that the Secretary issue the regulation hereinafter set forth and make, on the basis of the substantial evidence of record at the hearing, the findings of fact herein contained as part of the order promulgating and making public such regulation.

*Suggested Findings*

1. Canned cherries are prepared from mature cherries. (R. pp. 22, 33, 62, 138)

2. Such cherries are of one of the following varietal groups: red sour, light colored sweet, dark colored sweet. (R. pp. 21–22, 33, 35–37, 59, 62, 68–71, 93, 96–99, 105, 107, 109, 138, 146, 169–171)

3. Cherries of different varietal groups are not canned together. (R. pp. 22, 33, 59, 138)

4. Each such varietal group of cherries has its own distinctive consumer uses. (R. pp. 22–23, 59, 76, 169–171)

5. Cherries of each such varietal group are an optional cherry ingredient of canned cherries. (R. pp. 23, 33, 59, 62, 76, 138, 169–171)

6. Such cherries are canned whole, either pitted or unpitted. (R. pp. 22, 33, 37–38, 52, 59, 62, 77, 94, 109, 138) Practically all light colored sweet and dark colored sweet cherries are canned unpitted. (R. pp. 139, 141) Pitted and unpitted cherries are never mixed in canning, except accidentally. (R. pp. 22, 59, 138) Each such form of units has its own distinctive consumer uses. (R. pp. 22–23, 59, 76, 109) Cherries of each such form of units are an optional cherry ingredient. (R. pp. 23, 33, 59, 62, 76, 109, 138)

7. Canned cherries contain a suitable liquid packing medium. (R. pp. 23, 33, 59–61, 62) Such an ingredient is essential. (R. pp. 24, 33, 59–61, 62)

8. Water is a suitable liquid packing medium. (R. pp. 24, 33, 61)

9. The natural juice of the cherry is a suitable liquid packing medium. (R. pp. 24, 33, 61)

10. A water solution of sugar is a suitable liquid packing medium. (R. pp. 24, 33, 61, 141); (Identity of Peaches, R. pp. 37, 38, 48, 53, 92, 156, 183, 214)

11. Sugar is defined in Webster's International Dictionary on page 2521 thereof (C.R., Other Interested Parties' Exhibit No. 4) as:

"1. A sweet crystallizable substance, colorless or white when pure, occurring in many plant juices, and forming an important article of human food—called specif. *cane sugar*, *sucrose*, and *saccharose*. The chief sources of sugar are the sugar cane and the sugar beet, the completely refined products of which are identical and form granulated sugar, loaf sugar, etc., of commerce. The cane juice, obtained by expression, is treated with lime to remove impurities, filtered, and evaporated to crystallization. The mother liquor, or molasses, is removed by draining (now usually) by a centrifugal. The crude yellowish or brown sugar thus obtained is usually refined at central plants by redissolving, clarifying, decolorizing, and recrystallizing. In the case of beets the sugar is removed by extraction with water (diffusion) and carried to the refined state in one operation. Crude cane sugar is often sold as brown sugar, but crude beet sugar has an unpleasant flavor. Some sugar is also made from palm trees, maple trees, etc. Sugar forms fine monoclinic crystals melting at 186° C. (367° F.), which dissolve in about half their weight of water at ordinary temperature. Chemically, it is a disaccharide of the formula $C_{12}H_{22}O_{11}$, formed by union of one molecule of dextrose with one of levulose. It does not reduce Fehling solution and does not ferment directly, but is converted by diastase (or by heating with acids) into the fermentable mixture called *invert sugar*. It is dextrorotatory, a property which is used in estimating the strength of its solution. Sugar is a food, and also serves as a condiment and preservative for other foods. See FOOD 1.

"2. By extension, any of a class of sweet, soluble compounds comprising the simpler carbohydrates. See Carbohydrate. The simple sugars, those not decomposable by hydrolysis, are called *monosaccharides*. Complex sugars are formed by the condensation of two, three, or four molecules of simple sugar and are called *disaccharides*, *trisaccharides*, and *tetrasaccharides*. For the structure and classification of simple sugar, see Monosaccharide. Among the important natural sugars are *sucrose* (See def. 1), or *cane sugar*, *dextrose* (d-*glucose*), or *grape sugar*, *levulose* (d-*fructose*), or *fruit sugar*, *lactose*, or *milk sugar*, and *maltose*, or *malt sugar*. Some of these, and also many others, have been made synthetically."

12. Prior to the hearing, a letter was addressed to the Secretary of Agriculture asking for a definition of the word "sugar" as used in the proposal, which letter was answered under the signature of the Secretary of Agriculture, which answer reads as follows and is Other Interested Parties' Exhibit No. 2, Identity of Peaches:

"We have your letter of March 30 referring to proposals for food standards to be considered at public hearings on April 10, 1939. You inquire as to our interpretation of the words 'Water solution of sugar, of 25° Brix or more' and 'Water solution of sugar, of less than 25° Brix' as used in these proposals.

"The word 'sugar' as used therein refers to sugar as defined in the current advisory definition and standard of identity for sugar under the present Food and Drugs Act, which you will find on page 11 of the enclosed F.D. 2, definition 1, under 'A. Sugar and Sugar Products.'

These are merely proposals. The final standards will be based on evidence adduced at the public hearing and any interested party is, of course, invited to submit proposals for other packing mediums."

13. In S.R.A., F.D. No. 2, Rev. 5 (Other Interested Parties' Exhibit No. 2, Identity of Peaches), under "Sugars and Related Substances", the following appears:

"A. Sugar and Sugar Products.

"1. *Sugar.* Sucrose (saccharose) obtained chiefly from sugarcane and sugar beets. Granulated, loaf, cut, milled, and powdered sugars are different forms of sugar, containing at least 99.5 percent of sucrose."

Under "B. Dextrose and Related Products", the following appears:

"1. *Dextrose.* The product chiefly made by the hydrolysis of starch or a starch-containing substance, followed by processes of refining and crystallization.*

"a. Anhydrous dextrose contains not less than 99.5 percent of dextrose and not more than 0.5 percent of moisture.

"b. Hydrated dextrose contains not less than 90 percent of dextrose and not more than 10 percent of moisture, including water of crystallization.

14. Starch is a polysaccharide. Sucrose is a disaccharide. Dextrose and levulose are monosaccharides. (C.R. p. 32)

15. Polysaccharides such as starch have a higher caloric value per gram than the disaccharides such as sucrose, and the disaccharides have a higher caloric value per gram than the monosaccharides such as dextrose and levulose. (C.R. p. 32)

16. By the dictionary definition, the simple sugars, monosaccharides, are not decomposable by hydrolysis. (C.R., Other Interested Parties' Exhibit No. 4)

17. Sugar, as described in the Encyclopedia Britannica on page 523 (C.R., Other Interested Parties' Exhibit No. 5), applies to over 100 substances, having distinctive properties and scientific names; for example, sucrose, glucose, fructose, lactose, maltose, etc.

18. "As ordinarily understood, of course, by chemists, and physiologists, sugar is just one of the breakdown products of two other large nutritive ingredients, namely, ordinary starch from plants, and starch from animals. Now as they are digested or hydrolized, you get ultimately a double sugar, nutritively it is like cane sugar, or beet sugar, and then when they are inverted, further changed into the form that they are absorbed and actually utilized in the body, we have dextrose and levulose, so that beginning with starch you have the double sugars, maltose and fructose, and then you have the simple sugars, which is the ultimate product.

"There are other forms of sugars that can be utilized by various bacteria, but not by man." (Identity of Peaches, Carlson p. 159)

19. Crystalline dextrose manufacture was made commercially possible in 1923 by the granting of the Newkirk patents (October 23, 1923; September 16, 1924; January 6, 1925) on corn starch hydrolysis and the economical separation of high purity dextrose from the converter liquors. (Identity of Peaches, Other Interested Parties' Exhibit No. 3)

20. Not until 1926 was chemically pure dextrose accepted by the United States Pharmacopoeia. (Identity of Peaches, Other Interested Parties' Exhibit No. 3)

21. Not until 1930, when the Secretary of Agriculture ruled that refined dextrose (corn sugar) could be used in the manufacture of food products without label declaration, was the utilization of dextrose by canners, preservers, beverage manufacturers and allied food industries seriously considered. (Identity of Peaches, Other Interested Parties' Exhibit No. 3)

22. In 1930, the Secretary of Agriculture ruled:

"Corn sugar (dextrose) when sold in packages must be labeled as such; when sold in bulk must be declared as such; but the use of pure refined corn sugar as an ingredient in the packing, preparation, or processing of any article of food in which sugar is a recognized element need not be declared upon the label of any such product.

"Nothing in this ruling shall be construed to permit the adulteration or imitation of any natural product such as honey by the addition of any sugar or other ingredient whatever.

"The term 'sugar', with or without the parenthetical expression 'sucrose', as used in the definitions to designate the sweetening agent in manufactured food products, is to be interpreted, wherever necessary to effect the purpose of the foregoing decision, as including dextrose (pure, refined corn sugar)." (Identity of Peaches, Other Interested Parties' Exhibit No. 1)

23. The great bulk of consumers regard "sugar" as the common or usual name of sucrose, i. e., cane or beet sugar. (Identity of Peaches, R. pp. 53, 132, 177, 350, 360, 397, 404, 416, 424, 442, 453, 461, 465, 472)

24. Within the past 3½ years, refined corn sugar (dextrose) has been used in the canning of cherries. (Identity of Peaches, R. p. 275)

25. Prior to that time, cane or beet sugar (sucrose) was the only sugar used in the canning of cherries. (Identity of Peaches, R. pp. 275–276); (Identity of Peaches, Other Interested Parties' Exhibit No. 3)

26. The simple sugar, dextrose, is now obtainable by hydrolysis from corn starch; is called "refined corn sugar"; and is now used in combination with cane or beet sugar (sucrose) in a water solution as a liquid packing medium for canned cherries. (Identity of Peaches, R. p. 275); (Identity of Peaches, Other Interested Parties' Exhibits Nos. 3 and 4)

27. Refined corn sugar (dextrose) and cane or beet sugar (sucrose) differ in sweetness, in food value, in manner of absorption, in solubility, and their solutions differ in viscosity, in osmotic pressure, and in boiling temperature. (Identity of Peaches, R. pp. 66–67, 174–175, 177, 257, 260–261, 265, 333–345, 347, 370–371, 398, 427, 499–500, 513–517); (C. R. pp. 21, 22, 52, 53, 54, 55, 57); (Identity of Peaches, Other Interested Parties' Exhibit No. 3) A water solution of refined corn sugar (dextrose) as the liquid packing medium cannot be used alone in the canning of cherries. The maximum amount of refined corn sugar (dextrose) which has been so used for commercial purposes, in combination with cane or beet sugar (sucrose), is 33⅓% refined corn sugar (dextrose) and 66⅔% cane or beet sugar (sucrose) or cane and beet sugar (sucrose). (Identity of Peaches, R. pp. 199–200, 258, 275) Refined corn sugar (dextrose) is not as sweet as cane or beet sugar (sucrose), being generally regarded as from 50% to 75% as sweet as cane or beet sugar (sucrose). (Identity of Peaches, R. pp. 66–67, 174–175, 217, 260–261, 499–500, 513–517) Consumers are accustomed to gauge sweetness according to that of cane or beet sugar (sucrose). (Identity of Peaches, R. p. 218)

28. Refined corn sugar (dextrose) sells on the open market at a cheaper price than cane or beet sugar (sucrose). (Identity of Peaches, R. pp. 189, 239); (C.R. p. 58); (C.R., Affidavits of A. B. Saroni, H. P. Nachtrieb, and Phillip Kelley)

29. Another sugar, refined corn sugar (dextrose), is now used in the canning of cherries as well as cane sugar and beet sugar (sucrose), and it will promote honesty and fair dealing in the interest of consumers to differentiate between the kinds of sugars used in preparing the liquid packing medium of canned cherries. (Identity of Peaches, R. pp. 398, 406, 424, 426–427, 437, 471)

30. A label statement of the origin of such sugars used in preparing such liquid packing medium will promote honesty and fair dealing in the interest of the consumer. (Identity of Peaches, R. pp. 424, 492)

31. The use of the qualifying words "cane sugar", "beet sugar", followed by their chemical name "sucrose", and "refined corn sugar", followed by its chemical name "dextrose", will promote honesty and fair dealing in the interest of the consumer. (Identity of Peaches, R. pp. 41, 42, 57, 58, 71, 100, 102, 120, 121, 132, 163, 229, 239, 404, 425, 450, 453); (C.R. pp. 67–69)

32. A water solution of sugar is used not only as a liquid packing medium but also as a sweetening agent. (R. pp. 24, 61, 158–159); (Identity of Peaches, R. pp. 72, 163, 172, 174, 175, 231, 256)

33. Such sweetening agent is called sirup. (R. pp. 24, 33, 61, 141); (Identity of Peaches, R. pp. 71, 120)

34. There are four water solutions of cane or beet sugar (sucrose) or cane and beet sugar (sucrose) known as sirups to consumers and used in the industry, to wit: light, medium, heavy, and extra heavy. (R. pp. 24, 141); (Identity of Peaches, R. pp. 120, 121, 126, 131, 229, 297, 425) It is a customary trade and consumer practice so to distinguish them. (R. pp. 26–27, 141–142); Identity of Peaches, R. pp. 41, 61, 131, 229, 424) Such sirups are measured and distinguished by their specific gravity as determined by the Brix hydrometer. The Brix hydrometer is a reliable instrument for testing specific gravity of liquid solutions and is in general use. (R. pp. 25–26, 33, 141); (Identity of Peaches, R. pp. 40, 136) In the case of all cherries, either sweet or sour, a water solution of cane or beet sugar (sucrose) or cane and beet sugar (sucrose) which does not show a reading of 10° on the Brix hydrometer does not sweeten the finished canned cherries sufficiently to be known as a sirup for this food. (R. pp. 25, 33, 100, 109, 140, 142, 145, 153–155, 161–167)

35. In the case of sweet cherries, when such sirups are prepared from cane or beet sugar (sucrose) or cane and beet sugar (sucrose), they have, respectively, the following readings on the Brix hydrometer: not less than 10° but less than 20°, not less than 20° but less than 30°, not less than 30° but less than 40°, and not less than 40°; in the case of red sour cherries, when such sirups are prepared from cane or beet sugar (sucrose) or cane and beet sugar (sucrose), they have, respectively, the following readings on the Brix hydrometer: not less than 10° but less than 20°, not less than 20° but less than 30°, and not less than 30°; but when such sirups are prepared from a mixture of cane or beet sugar (sucrose) or cane and beet sugar (sucrose) and refined corn sugar (dextrose), they do not have the above readings on the Brix hydrometer because of the difference in sweetness between refined corn sugar (dextrose) and cane or beet sugar (sucrose). However, the Brix reading of a sucrose sirup equivalent in sweetness to that of any such mixture is obtained by adding the percent by weight of cane or beet sugar (sucrose), or both, in such mixture to two-thirds of the percent by weight of refined corn sugar (dextrose) in such solution. Such calculated Brix readings (sucrose equivalents) are identical with the limits above set forth. (R. pp. 25, 33, 100, 109, 140, 142, 145, 153–155, 161–167)

36. Due to the fact that in canned cherries which have been prepared with a liquid packing medium consisting of a water solution of cane or beet sugar (sucrose) or cane and beet sugar (sucrose), there will be present in addition to sucrose, due to inversion, levulose and dextrose and that in canned cherries which have been prepared with a liquid packing medium consisting of a water solution of a mixture of cane or beet sugar (sucrose) or cane and beet sugar (sucrose) and refined corn sugar (dextrose), there will likewise be present sucrose, and due to inversion, levulose and dextrose, the consumer would have no way of telling, from an examination of the finished canned cherries, the optional sugar ingredient used. It will, therefore, promote honesty and fair dealing in the interest of the consumer to require a label statement of the optional sugar ingredient used in the preparation of the liquid packing medium. (Identity of Peaches, R. p. 492)

37. The common or usual names of such sirups are light sirup, medium sirup, heavy sirup, and extra heavy sirup. (R. pp. 27, 139–140, 163, 167–168); (Identity of Peaches, R. pp. 41, 42, 57, 58, 71, 100, 102, 120, 121, 132, 163, 229, 239, 404, 425, 450, 458); (C. R. pp. 67–69)

38. In the case of sweet cherries, the liquid of the finished canned cherries is not more than 35° as determined by the Brix hydrometer; in the case of red sour cherries, the liquid of the finished canned cherries is not more than 45° as determined by the Brix hydrometer. (R. pp. 28–29, 33)

39. Canned cherries may or may not be seasoned. (R. pp. 30, 33, 61, 62)

40. Spice is a suitable seasoning agent. (R. pp. 31, 140)

41. Flavoring is a suitable seasoning agent. (R. pp. 31, 140)

42. A vinegar is a suitable seasoning agent. (R. pp. 139, 140, 147–148)

43. Such seasoning agents are used singly or in combination. (R. p. 31)

44. It is essential that canned cherries be sealed in a container. (R. pp. 31–32)

45. It is essential to so process canned cherries by heat as to prevent spoilage. (R. p. 32)

46. Honesty and fair dealing in the interest of the consumer requires that the optional cherry ingredient, the optional liquid packing medium, and the optional seasoning ingredients be declared on the label. (R. pp. 32, 52, 74–77, 99, 102–104, 109, 111–112, 139–141, 148–152, 153–155)

47. The common or usual names of the three varietal groups of cherries are red sour, light sweet, and dark sweet. (R. pp. 22, 35–37, 44–46, 51, 68–75, 80–82, 89, 93, 96–99, 102–103, 105, 107, 109, 111–112, 114–115, 117–118, 119–124, 130, 138, 146–147, 148–152, 183–211)

48. The common or usual name of pitted cherries is the name of the varietal group qualified by the term "pitted." (R. pp. 23, 37–38, 40–41, 51, 52, 79–80, 85, 109, 139, 141)

49. The common or usual name of unpitted cherries is the name of the varietal group unqualified by the term "unpitted", except in the case of red sour cherries. (R. pp. 23, 37–38, 79–80, 109, 139, 141)

50. The common or usual name of water is water. (R. pp. 27, 48–49, 76, 90–91, 109, 112, 139)

51. The common or usual name of the natural juice of the cherry is cherry juice. (R. pp. 27, 140)

52. The common or usual name of sucrose is sugar; and the common or usual name of dextrose is refined corn sugar (dextrose). (Identity of Peaches, R. pp. 53, 61, 177, 215, 351, 367, 372, 373, 397, 398, 404, 416, 424, 461, 465, 510); (C. R. pp. 48, 49, 70)

53. The common or usual name of spice used as a seasoning is spice. (R. pp. 31, 140, 143, 155)

54. The common or usual name of flavoring used as a seasoning is flavoring. (R. pp. 31, 140)

55. The common or usual name of a vinegar used as a seasoning is vinegar. (R. pp. 139, 140, 148)

56. Honesty and fair dealing in the interest of the consumer require that when spices, flavoring, or vinegar are used that the label bear the words "Spiced", or "With Added Spice", or "Spice Added"; "With Added Flavoring", or "Flavoring Added"; "With Added Vinegar", or "Vinegar Added"; as the case may be; but if two or more of such optional ingredients are present, such words may be combined as, for example, "With Added Spice, Flavoring and Vinegar". In lieu of the words "Spice" or "Spiced" and "Flavoring", the common or usual name of the spice or flavoring may be used. (R. p. 140)

57. Honesty and fair dealing in the interest of the consumer require that wherever the name "cherries" appears on the label so conspicuously as to be easily seen under customary conditions of purchase, the names of the optional ingredients present shall immediately and conspicuously precede or follow such name, without intervening written, printed, or graphic matter, except that the specific varietal name of the cherries may so intervene. (R. pp. 32–33, 140)

*Suggested Conclusion in the Form of a Regulation*

Upon the basis of the foregoing findings of fact, the following reasonable definition and standard of identity for the food commonly known as canned cherries is hereby suggested to be promulgated as a regulation:

§ 27.030 *Canned cherries—Identity; label statement of optional ingredients.* (a) Canned cherries are the food prepared from mature cherries of one of the following varietal groups: red sour, light sweet, dark sweet. They may be pitted or unpitted. Pitted cherries of

* When derived from cornstarch, dextrose is known commercially as refined corn sugar."

each such varietal group, and unpitted cherries of each such varietal group, are an optional cherry ingredient. To one such ingredient is added one of the optional ingredients:

(7) In the case of sweet cherries or red sour cherries, a water solution of cane sugar (sucrose), of not less than 10° Brix but less than 20° Brix;

(8) In the case of sweet cherries or red sour cherries, a water solution of beet sugar (sucrose), of not less than 10° Brix but less than 20° Brix;

(9) In the case of sweet cherries or red sour cherries, a water solution of cane and beet sugar (sucrose), of not less than 10° Brix but less than 20° Brix;

(10) In the case of sweet cherries or red sour cherries, a water solution of cane sugar (sucrose) and refined corn sugar (dextrose) having a cane sugar (sucrose) equivalent of not less than 10° but less than 20° Brix. Such cane sugar (sucrose) equivalent is calculated by adding the percent by weight of cane sugar (sucrose) in such solution to two-thirds of the percent by weight of refined corn sugar (dextrose) in such solution;

(11) In the case of sweet cherries or red sour cherries, a water solution of beet sugar (sucrose) and refined corn sugar (dextrose) having a beet sugar (sucrose) equivalent of not less than 10° but less than 20° Brix. Such beet sugar (sucrose) equivalent is calculated by adding the percent by weight of beet sugar (sucrose) in such solution to two-thirds of the percent by weight of refined corn sugar (dextrose) in such solution;

(12) In the case of sweet cherries or red sour cherries, a water solution of cane and beet sugar (sucrose) and refined corn sugar (dextrose) having a cane and beet sugar (sucrose) equivalent of not less than 10° but less than 20° Brix. Such cane and beet sugar (sucrose) equivalent is calculated by adding the percent by weight of cane and beet sugar (sucrose) in such solution to two-thirds of the percent by weight of refined corn sugar (dextrose) in such solution;

(13) In the case of sweet cherries, a water solution of cane sugar (sucrose), of not less than 20° Brix but less than 30° Brix; in the case of red sour cherries, a water solution of cane sugar (sucrose), of not less than 20° Brix but less than 40° Brix;

(14) In the case of sweet cherries, a water solution of beet sugar (sucrose), of not less than 20° Brix but less than 30° Brix; in the case of red sour cherries, a water solution of beet sugar (sucrose), of not less than 20° Brix but less than 40° Brix;

(15) In the case of sweet cherries, a water solution of cane and beet sugar (sucrose), of not less than 20° Brix but less than 30° Brix; in the case of red sour cherries, a water solution of cane and beet sugar (sucrose), of not less than 20° Brix but less than 40° Brix;

(16) In the case of sweet cherries, a water solution of cane sugar (sucrose) and refined corn sugar (dextrose) having a cane sugar (sucrose) equivalent of not less than 20° but less than 30° Brix; in the case of red sour cherries, a water solution of cane sugar (sucrose) and refined corn sugar (dextrose) having a cane sugar (sucrose) equivalent of not less than 20° but less than 40° Brix. Such cane sugar (sucrose) equivalent is calculated by adding the percent by weight of cane sugar (sucrose) in such solution to two-thirds of the percent by weight of refined corn sugar (dextrose) in such solution;

IN THE MATTER OF PORTLAND GAS & COKE COMPANY

NOTICE OF AND ORDER FOR HEARING

An application pursuant to section 6 (b) of the Public Utility Holding Company Act of 1935, having been duly filed with this Commission by the above-named party;

*It is ordered*, That a hearing on such matter be held on October 23, 1939, at 10:00 o'clock in the forenoon of that day, at the Securities and Exchange Building, 1778 Pennsylvania Avenue, NW., Washington, D. C. On such day the hearing-room clerk in room 1102 will advise as to the room where such hearing will be held. At such hearing, if in respect of any declaration, cause shall be shown why such declaration shall become effective.

*It is further ordered*, That James G. Ewell or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said Act and to a trial examiner under the Commission's Rules of Practice to continue or postpone said hearing from time to time.

Notice of such hearing is hereby given to such declarant or applicant and to any other person whose participation in such proceeding may be in the public interest or for the protection of investors or consumers. It is requested that any person desiring to be heard or to be admitted as a party to such proceeding shall file a notice to that effect with the Commission on or before October 19, 1939.

The matter concerned herewith is in regard to the proposed issuance and sale by Portland Gas & Coke Company, a direct subsidiary of American Power & Light Company, a registered holding company, and an indirect subsidiary of Electric Bond and Share Company, also a registered holding company, of 6,000 shares Common Stock, without par value, and the proposed extensions of maturities from January 1, 1940 to January 1, 1950 of the applicant's First and Refunding Mortgage Five Per Cent Gold Bonds due January 1, 1940 in the principal amount of $9,674,000 (including $3,000,000 principal amount held in treasury and pledged under the applicant's Indenture and Deed of Trust to secure a like principal amount of 4½% Bonds hereinafter mentioned) and of the applicant's First Lien and General Mortgage Gold Bonds, Series of "4½'s due 1940" in the aggregate principal amount of $3,000,000.

The common stock proposed to be issued is not to be underwritten but is to be sold privately to American Power & Light Company at $100 per share. The applicant plans to utilize the $600,000 derived from the issuance of this sale for the further expansion of its by-product business. The agreement by American Power & Light Company to purchase such common stock is dependent upon the Extension Plan (hereinafter referred to) becoming operative.

The Extension Plan and Deposit Agreement, as proposed, provides, among other things, for the following:

(1) Extension of the maturity of both the First and Refunding Mortgage Five Per Cent Gold Bonds, due January 1, 1940, and the First Lien and General Mortgage Gold Bonds, 4½'s due January 1, 1940 for ten years to January 1, 1950;

(2) A new cash sinking fund which will retire at least $1,700,000 or approximately 18% of the outstanding bonds in the ten years of the extension period;

(3) No additional bonds shall be issued under either the First and Refund-

ing Mortgage or the First Lien and General Mortgage;

(4) Dividends on the capital stock shall only be paid out of earnings accruing after December 31, 1939;

(5) Net Earnings will be available for the payment of dividends only after an amount equal to 13½% of the gross revenues from the sale of gas shall be expended or accrued for maintenance and provisions for retirement; and

(6) If and when the Extension Plan becomes operative, American Power & Light Company will purchase for cash six thousand (6,000) additional shares of the common stock of Portland Gas & Coke Company for six hundred thousand dollars ($600,000), the proceeds to be devoted to the extent required, to the installation of certain by-product plant additions.

The Extension Plan and Deposit Agreement pursuant to which the maturities of the bonds heretofore mentioned will be extended provides, that at any time on or before December 4, 1939, any holder or registered owner of one or more of the Five Per Cent Bonds or 4½% Bonds may become a party to the Deposit Agreement by presenting such bonds to designated banks who will serve as agents for the purpose of accepting such deposits. The Board of Directors of the applicant may from time to time in its discretion extend the time within which holders or registered owners of bonds may become parties to the Deposit Agreement, but not to a date later than January 31, 1940, unless the Extension Plan shall become operative in accordance with the terms thereof on or before January 31, 1940 in which event such time shall be extended without action by the applicant, for a period of thirty days from and after the date upon which the Extension Plan shall so become operative. If, and when, any such extension of time is made by the company the company agrees that it will, within two weeks thereafter, mail written notice thereof to each of the agents thereunder.

The Extension Plan shall be considered operative if within the time specified in the paragraph immediately above,

(a) the holders or registered owners of the 5% Bonds and 4½% Bonds of a combined aggregate principal amount of not less than $9,190,300 (which is 95% of the total principal amount of said bonds now outstanding with the public) shall have become parties thereto; or

(b) the holders or registered owners of the 5% Bonds and 4½% Bonds of a combined aggregate principal amount of not less than $8,706,600 (which is 90% of the total principal amount of said bonds now outstanding with the public) shall have become parties thereto, and the Board of Directors of the applicant in its discretion shall have by resolution declared the Extension Plan operative.

The application states that no special fees or commissions have been or are expected to be paid in connection with the proposed issuance and sale of the common stock or the proposed exchange and extensions of maturities other than statutory fees and except fees required to be paid to the depository agents. No fees or commissions will be paid for the solicitation of bondholders. The applicant estimates the total expenses to be incurred in connection with the proposed issuance and sale and extensions at $90,000.

In addition to the bonds, the maturities of which are proposed to be extended, the applicant has outstanding in the hands of the public $371,000 principal amount First Mortgage 5% Gold Bonds due 1951. The applicant also has issued and outstanding 54,580 shares 7% Preferred Stock and 8,712 shares 6% Preferred Stock.

The proposed transactions will be presented for approval to The Public Utilities Commission of Oregon and The Department of Public Service of Washington.

By the Commission.

At a regular session of the Securities and Exchange Commission, held at its office in the City of Washington, D. C., on the 6th day of October, A. D. 1939.

IN THE MATTER OF BICKFORD, INC., LAMAR, COLO.

MEMORANDUM OPINION AND ORDER REVOKING REGISTRATION

This is a proceeding pursuant to Section 15 (b) of the Securities Exchange Act of 1934 to determine whether or not the registration of Bickford, Inc., a corporation organized under the laws of Colorado, should be revoked or suspended.

After appropriate notice, a hearing was held, pursuant to the Commission's order, on May 31, 1939, at Denver, Colorado. Registrant was not represented at the hearing by any of its officers or directors or by counsel, although notice of the hearing was served upon N. K. Bickford, president of the registrant. The trial examiner has filed an advisory report in which he found that Bickford, president and controlling stockholder of the registrant, had been convicted, on March 17, 1939, of larceny, a felony under the laws of the State of Colorado, as a result of conduct arising out of the business of a broker and dealer in securities. The trial examiner has also found that the registrant had wilfully violated Rule X-15B-2 in failing to inform the Commission of Bickford's conviction. On an independent review of the record we adopt the foregoing findings of the trial examiner, and find further that it is in the public interest to revoke the registration of Bickford, Inc., as a broker and dealer.

It is therefore ordered, pursuant to Section 15 (b) of the Securities Exchange Act of 1934 that the registration of Bickford, Inc., a Colorado corporation, be and the same is hereby revoked.

By the Commission.

### TITLE 7—AGRICULTURE

### BUREAU OF ENTOMOLOGY AND PLANT QUARANTINE

[B. E. P. Q.—Q. 64]

MEXICAN FRUITFLY QUARANTINE

REVISION OF REGULATIONS

*Introductory Note*

The following revision of the Mexican fruitfly regulations adds the counties of Dimmit, La Salle, and Webb, in Texas, to the regulated area because of the discovery of infestation, and requires that grapefruit, as a condition of interstate movement from these three counties, be harvested each year during the period from September to February, inclusive, and that a host-free period be maintained in these counties during the remainder of the year. These local control measures are provided under Texas State regulations.

The harvesting season for other host fruits remains the same as heretofore throughout the regulated area, namely, from September to May, inclusive, with the host-free requirement in effect during the remainder of the year.

Some slight modifications have been made in other regulations, chiefly for clarity. Former regulations 2 and 4 have been discontinued and the present regulations have been renumbered accordingly.

*Summary*

The interstate shipment of grapefruit, oranges, and all other citrus fruits, except lemons and sour limes, from the regulated area is prohibited unless a Federal permit has been issued therefor (regulation 3). The permits may be limited as to destination, and when so limited are not valid for shipment to other points except to diversion points for diversion to authorized destinations (regulation 4 (*f*)).

Peaches, apples, pears, plums, quinces, apricots, mangoes, sapotas, guavas, mameys, ciruelas, and fruit of species of the genus *Sargentia* are prohibited interstate shipment from the regulated area. There are no restrictions on the shipment of lemons or sour limes (regulation 3).

The conditions of certification, including maintenance of host-free periods, and sanitation measures, as well as the type of containers required in shipping, are specified in regulations 4 and 5. For marking requirements see regulation 6.

Applications for permits should be made to the Bureau of Entomology and Plant Quarantine, 503 Rio Grande National Life Building, Harlingen, Tex.

SECTION 301.64—NOTICE OF QUARANTINE NO. 64 (REVISED)

I, Henry A. Wallace, Secretary of Agriculture, have determined that it is necessary to quarantine the State of Texas to prevent the spread of an injurious insect known as the Mexican fruitfly (*Anastrepha ludens* Loew), new to and not heretofore widely prevalent or distributed within and throughout the United States.

Now, therefore, under authority conferred by the Plant Quarantine Act of August 20, 1912 (37 Stat. 315), as amended by the act of Congress approved March 4, 1917 (39 Stat. 1134, 1165), and having duly given the public hearing required thereby, I do quarantine the said State of Texas, effective on and after October 15, 1937, and by this Notice of Quarantine No. 64 do order that no fruits of any variety shall be shipped, offered for shipment to a common carrier, received for transportation, or carried by a common carrier, or carried, transported, moved, or allowed to be moved interstate from the said quarantined State in manner or method or under conditions other than those prescribed in the rules and regulations promulgated pursuant thereto or under such modification thereof as may be issued by the Chief of the Bureau of Entomology and Plant Quarantine as hereinafter provided: *Provided*, That the restrictions of this quarantine and of the rules and reg-

§ 301.64–2 *Regulated area.* In accordance with the provisos to Notice of Quarantine No. 64, the Secretary of Agriculture designates as regulated area the counties of Brooks, Cameron, Dimmit, Hidalgo, La Salle, Webb, and Willacy in the State of Texas, and that portion of Jim Wells County, Tex., lying south of Highway 141 and a line projected due west to the Jim Wells-Duval County line from the point where Highways 141 and 66 intersect.*

*Regulation 3*

§ 301.64–3 *Restrictions on the interstate movement of fruit from the regulated area*—(a) *Permits required.* Grapefruit, oranges, and other citrus fruits, except lemons and sour limes, shall not be moved interstate from a regulated area into or through any point outside thereof unless a permit has been issued therefor by the United States Department of Agriculture.

(b) *Movement of noncitrus hosts prohibited.* Peaches, apples, pears, plums, quinces, apricots, mangoes, sapotas (see regulation 1 (c) (sec. 301.64–1)), guavas, mameys, ciruelas, and fruits of species of the genus *Sargentia* shall not be moved interstate from the regulated area and no permits will be issued for such movement.

*Regulation 4*

§ 301.64–4 *Conditions governing the issuance of permits.* Permits for the interstate movement of grapefruit, oranges, and other restricted citrus fruits from the regulated area may be issued upon determination by the inspector that the proposed movement does not involve risk of spread of the Mexican fruitfly. Such determination will be based on compliance with the following conditions:

(a) *Grove inspection and sanitation.* The grove in which the fruit was produced shall be maintained in compliance with the host-free requirement of these regulations and shall be kept free from drops and windfalls during such periods and time as the Chief of the Bureau of Entomology and Plant Quarantine may direct. Such drops and windfalls shall be buried under at least 18 inches of tamped soil, or otherwise disposed of in manner and method prescribed by the Chief of the Bureau of Entomology and Plant Quarantine. The grove shall further be maintained in compliance with such other requirements as may be enforced by the State of Texas for the suppression of Mexican fruitfly infestation. Permits may be issued for the interstate movement of fruit produced only in such groves as have been inspected within 30 days prior to the movement of the fruit concerned and have been found free from Mexican fruitfly infestation.

(b) *Packing-house requirements.* The packer and shipper shall maintain his packing plant in compliance with the sanitation requirements of the State of Texas issued for the suppression of the Mexican fruitfly. The packer shall also maintain a complete record of all receipts and sales or shipments of host fruits, subject to examination by the inspector.

(c) *Applications.* Persons desiring to purchase, pack, or move grapefruit, oranges, or other restricted citrus fruits interstate from the regulated area shall make application for a permit to the office of the Bureau of Entomology and Plant Quarantine, Harlingen, Tex., as far as possible in advance of the probable date of shipment. Applications shall show the nature and quantity of the fruit it is proposed to move, together with the location at which it will be packed, the name and address of the shipper, and a list of all groves, together with the names and addresses of the owners, from which fruit for packing will be obtained. Each applicant shall file with his application a signed statement in which he agrees (1) to notify the inspector of all additional groves from which fruit for packing will be obtained, (2) not to pack or ship fruit from any grove until he has received written notification from the inspector that the grove has been maintained in compliance with the regulations issued under this quarantine, and (3) to discontinue packing and shipping the fruit from any grove on notification from the inspector of the discovery of an infestation of the Mexican fruitfly in such grove or adjoining groves or of failure on the part of the owner or manager of such grove to comply with any condition of these regulations.

(d) *Containers.* Permits will be issued for the interstate movement of only such fruit as is packed in containers customarily used in the regulated area for the commercial shipment of citrus fruits, and of such nature as will permit the inspector to identify the contents thereof.

(e) *Sterilization may be required.* Sterilization of host fruits in manner and by method prescribed by the Chief of the Bureau of Entomology and Plant Quarantine may be required as a condition for the issuance of permits for interstate movement thereof when in his judgment the shipments concerned might involve risk of spread of the Mexican fruitfly.

(f) *Destination limitations.* Permits may be limited as to destination and when so limited the fruits covered thereby shall not be moved interstate from the regulated area, directly or indirectly, either in the original containers or otherwise, to destinations other than those authorized in such permits, except to the usual diversion points for diversion to authorized destinations only.

(g) *Cancelation of permits.* Permits issued under these regulations may be withdrawn or canceled and further permits refused, whenever in the judgment of the Bureau of Entomology and Plant Quarantine, the further use of such permits might result in the dissemination of the Mexican fruitfly. After any such permit is withdrawn or has expired, the further use of any permit tags issued thereunder is prohibited.*

*Regulation 5*

§ 301.64–5 *Conditions required in the regulated area.* The interstate movement of grapefruit, oranges, and other restricted citrus fruit from the regulated area under permits issued by the United States Department of Agriculture will be conditioned on the State of Texas providing for and enforcing the following control measures in manner and by method approved by the United States Department of Agriculture, namely:

Harvesting Season

(a) The harvesting season of host fruits within the regulated area shall begin on the 1st day of September of each year and end at midnight on April 30 of the following year except that in Dimmit, La Salle, and Webb Counties, the harvesting period for grapefruit shall end on the last day of February: *Provided*, That the harvesting period in any regulated area shall be subject to such modification as to duration as may be authorized by the Chief of the Bureau of Entomology and Plant Quarantine when in his judgment such modification does not involve risk of spread of the Mexican fruitfly.

Host-free Period

(b) A host-free period shall be maintained each year beginning on the 1st day of May and continuing through the last day of August, in the regulated area, except that in Dimmit, La Salle, and Webb Counties, the host-free period for grapefruit shall begin on the 1st day of March and continue through the last day of August: *Provided*, That the host-free period in any regulated area shall be subject to such modification as to duration as may be authorized by the Chief of the Bureau of Entomology and Plant Quarantine when in his judgment such modification does not involve risk of spread of the Mexican fruitfly.

Prior to such host-free period each year, all restricted citrus fruit shall be removed from the tree for immediate sale or shipment, or for retention in fly-proof storage approved by the Chief of the Bureau of Entomology and Plant Quarantine, and all other host fruits shall be destroyed either following removal from the trees or by destruction of the trees themselves.

No host fruits shall be permitted to remain on trees or to exist elsewhere within a regulated area at any time during such host-free period except immature citrus fruits which in the judgment of the Chief of the Bureau of Entomology and Plant Quarantine are not susceptible to infestation by the Mexican fruitfly.

Infested Zones

(c) Upon the determination of a Mexican fruitfly infestation within a regulated area, which in the judgment of the Chief of the Bureau of Entomology and Plant Quarantine constitutes a risk of spread of such fly, an infested zone shall be designated by the State of Texas subject to approval by the United States Department of Agriculture and all host fruits in susceptible stages of maturity produced within such zone shall be destroyed or processed in such a manner as to render them free from infestation.*

*Regulation 6*

§ 301.64–6 *Marking requirements.* Every crate, box, or other container of host fruit moved interstate under these regulations shall have securely attached thereto a shipping permit issued under the provisions of regulation 4, (sec. 301.64–4), and shall be subject to such other marking as may be required by the inspector.

Each shipment of six or more crates, boxes, or other containers of host fruit moved interstate under these regulations shall, in addition to the shipping permit on each such container, be accompanied by a master permit showing the number of containers and either the license number and destination of the vehicle or the name, number, and destination of the freight car or other carrier, as the case may be.*

*Regulation 7*

§ 301.64–7 *Inspection in transit.* Any car, vehicle, basket, box, crate, or other container, moved interstate, which contains or which the inspector has probable cause to believe contains articles the movement of which is prohibited or restricted by these regulations, shall be subject to inspection by inspectors at any time or place.*

*Regulation 8*

§ 301.64–8 *Shipments for experimental or scientific purposes.* Articles subject to restriction in these regulations may be moved interstate for experimental or scientific purposes, on such conditions and under such safeguards as may be prescribed by the Chief of the Bureau of Entomology and Plant Quarantine. The container of articles so moved shall bear, securely attached to the outside thereof, an identifying tag from the Bureau of Entomology and Plant Quarantine showing compliance with such conditions.*

These revised rules and regulations shall be effective on and after October 16, 1939, and shall supersede the rules and regulations promulgated October 14, 1937.

Done at the city of Washington this 10th day of October 1939.

Whereas, Section 301 (d) of the Sugar Act of 1937, approved September 1, 1937, provides, as one of the conditions for payment to producers of sugar beets and sugarcane, as follows:

That the producer on the farm who is also, directly or indirectly, a processor of sugar beets or sugarcane, as may be determined by the Secretary, shall have paid, or contracted to pay under either purchase or toll agreements, for any sugar beets or sugarcane grown by other producers and processed by him at rates not less than those that may be determined by the Secretary to be fair and reasonable after investigation and due notice and opportunity for public hearing.

Whereas, The Secretary of Agriculture, on June 28, 1939, held a public hearing in Clewiston, Florida, for the purpose of receiving evidence likely to be of assistance to him in determining fair and reasonable prices for the 1939 crop of Florida sugarcane:

Now, therefore, I, H. A. Wallace, Secretary of Agriculture, after investigation and consideration of the evidence obtained at the aforesaid hearing and all other information before me, do hereby make the following determination:

§ 802.22d *Fair and reasonable prices for the 1939 crop of Florida sugarcane.* Fair and reasonable prices for the 1939 crop of Florida sugarcane, to be paid by processors who, as producers, apply for payments under the Sugar Act of 1937, shall be not less than the prices set forth in the Standard Florida Sugarcane Purchase Contract with cooperative participation supplement now used by the United States Sugar Corporation: *Provided, however,* That, when 10 cc. of the crusher juice of any sugarcane are titrated against a N/10 solution of NaOH, using phenolphthalein as an indicator, and it requires more than 2.25 cc. of N/10 NaOH to neutralize the acidity in the crusher juice, a deduction may be made in settlement, based upon decreased boiling house efficiency, at a rate not in excess of 3.775 per centum of the payment herein provided for for each .25 cc. of acidity above 2.25 cc., but not in excess of 4.50 cc. (intervening fractions computed to the nearest mutiple of .05 cc.). (Sec. 301, 50 Stat. 909; 7 U.S.C., Sup. IV, 1131)

Done at Washington, D. C., this 10th day of October 1939. Witness my hand and the seal of the Department of Agriculture.

### Part 802—Sugar Determinations

DETERMINATION OF FAIR AND REASONABLE PRICES FOR THE 1939 CROP OF LOUISIANA SUGARCANE FOR SUGAR

Whereas, Section 301 (d) of the Sugar Act of 1937, approved September 1, 1937, provides, as one of the conditions for payment to producers of sugar beets and sugarcane, as follows:

That the producer on the farm who is also, directly or indirectly, a processor of sugar beets or sugarcane, as may be determined by the Secretary, shall have paid, or contracted to pay under either purchase or toll agreements, for any sugar beets or sugarcane grown by other producers and processed by him at rates not less than those that may be determined by the Secretary to be fair and reasonable after investigation and due notice and opportunity for public hearing.

Whereas, The Secretary of Agriculture held public hearings in Louisiana for the purpose of receiving evidence likely to be of assistance to him in determining fair and reasonable prices for the 1939 crop of Louisiana sugarcane for sugar:

Now, therefore, I, H. A. Wallace, Secretary of Agriculture, after investigation and consideration of the evidence obtained at the aforesaid hearings and all other information before me, do hereby make the following determination:

§ 802.22e (a) *Fair and reasonable prices for the 1939 crop of Louisiana sugarcane for sugar.* Fair and reasonable prices for the 1939 crop of Louisiana sugarcane shall be (when the price of 96° raw sugar, duty-paid basis, is 3½¢ per pound) not less than $1.00 per ton of standard sugarcane for each 1¢ of (1) the average of the weekly quotations of 96° raw sugar, duty-paid basis, on the Louisiana Sugar & Rice Exchange and the Cane Products Trade Association Exchange for the week in which such sugarcane is delivered, or (2) the simple average of the weekly quotations of 96° raw sugar, duty-paid basis, on the Louisiana Sugar & Rice Exchange and the Cane Products Trade Association Exchange (or upon such quotations as the Secretary may elect for the purpose) for the weeks from September 29, 1939 to April 18, 1940, as may be agreed upon: *Provided, however,*

(i) That for each decline of ¼ cent in the price of one pound of 96° raw sugar, below 3.50 cents per pound, the price of standard sugarcane shall be reduced by not more than 3 per centum, with intervening prices in proportion, unless the price of sugar falls below 2.75 cents, in which case no further reduction shall be made;

(ii) That for an advance of ¼ cent in the price of one pound of 96° raw sugar, duty-paid basis, above 3.50 cents per pound, the price of standard sugarcane shall be increased by not less than 3 per centum, with intervening prices in proportion, unless the price of raw sugar exceeds 3.75 cents per pound, in which case settlement shall be made on the basis of $1.03 for each 1 cent of the price;

(iii) That the premiums paid for sugarcane of the 1939 crop containing more sucrose in the normal juice than that defined as standard sugarcane, shall be not less than those paid by such processor during the 1938 crop year;

(iv) That the discounts applicable to sugarcane of the 1939 crop containing less sucrose in the normal juice than that defined as standard sugarcane shall be not greater than those applied in connection with the 1938 crop; and

(v) That deductions based upon decreased boiling house efficiency may be made for frozen sugarcane accepted by the processor (it being understood that cane shall not be considered as frozen even after being subjected to freezing temperature unless and until there is evidence of damage having taken place because of the freeze) at a rate not in excess of 3.775 per centum of the payment, computed as aforesaid, for each .25 cc. of acidity above 2.25 cc. but not in excess of 4.50 cc. (analyzed in accordance with the established methods of the area, with intervening fractions computed to the nearest multiple of .05 cc.).

(b) *Definitions and general provisions.* For purposes of this determination:

(1) Standard sugarcane shall be sugarcane containing no more sucrose in the normal juice than was defined as standard sugarcane by the processor in his sugarcane purchase contract, or contracts, verbal or written, used in the year 1938.

(2) Costs, such as hoisting and weighing of sugarcane, shall be absorbed by the producer or processor, as the case may be, who absorbed such costs in 1937, but nothing in this paragraph shall be construed as prohibiting negotiations with respect to the level of such costs, subject upon appeal, to review by the Secretary of Agriculture or his authorized agent in the event of changes unfair to either producer or processor.

(3) Where the only available practicable means of transportation are rail facilities and the distance to the nearest factory is in excess of 50 miles, the cost of transportation may, by mutual consent of the interested parties, and subject to review by the Secretary of Agriculture or his authorized agent, be shared by the processor and producer.

(4) The processor shall not, through any subterfuge or device whatsoever, reduce the returns from the 1939 crop of Louisiana sugarcane to the grower below those determined above. (Sec. 301, 50 Stat. 909; 7 U.S.C., Sup. IV, 1131)

Whereas, a hearing on said petitions was held before the Administrator on September 12, 1939, after due notice;[1] and

Whereas, following said hearing the Administrator duly made findings of fact, copies of which are available for inspection in Room 5144, Department of Labor, Washington, D. C.

Effective on or after October 24, 1939, Special Certificates permitting employment of learners at sub-minimum rates in stitching operations in the apparel industry shall be issued by the Chief of the Hearings and Exemption Section of the Wage and Hour Division upon the following terms to all plants in the industry making application therefor representing that experienced workers are not available to the plant, *unless* experienced workers are found to be available:

"(a) Learners employed under the certificate shall not exceed 5 percent of the total number of workers in the plant engaged in stitching operations in the divisions of the apparel industry considered here provided, however, that employment of as many as five learners may be authorized in any certificate.

"(b) No learner shall be employed under the certificate longer than 8 weeks.

"(c) Learners employed under the certificate shall be paid at a rate not less than 22½ cents an hour *and*, in plants where experienced operators are paid on a piecework rate, shall be paid at least the same piecework rate and shall receive earnings paid on this rate if in excess of the 22½-cent minimum.

"(d) Only learners shall be employed at a subminimum wage under the certificate and no learner shall be employed under the certificate unless hired when an experienced worker was not available.

"(e) No learners shall be employed at a subminimum wage under the certificate until and unless the certificate is posted and kept posted in a conspicuous place in the plant in which learners are employed.

"3. The Chief of the Hearings and Exemption Section shall cancel as of the date of issue any special certificate issued pursuant to this order if found that such certificate was issued when experienced workers were available and shall cancel prospectively or as of the date of violation a certificate if found that any of its terms have been violated or that skilled workers have become available.

"4. In this order the term 'learner' means a person who has not been previously employed for more than 8 weeks in the aggregate during the preceding three years upon a stitching operation in the apparel industry; and the term 'apparel industry' includes men's, women's, infants' and children's apparel and accessories, excepting gloves, boots and shoes, millinery, knitted wear and hosiery."

EXPLANATION OF REGULATIONS APPLICABLE TO EMPLOYMENT OF LEARNERS

AMENDMENT

The following is a revision of paragraph VI of the Explanation of Regulations Applicable to Employment of Learners issued by the Administrator and published in the FEDERAL REGISTER May 23, 1939.[1] This revised paragraph shall become a part of the Explanation and supersede paragraph VI as originally issued.

*VI. Curtailment of Opportunities for Employment*

The Administrator is authorized to provide for the employment of learners at a wage lower than the statutory minimum wage only to the extent necessary to prevent curtailment of opportunities for employment. No application will be deemed to set forth a necessity to prevent curtailment of such opportunities unless it clearly states that the applicant has made diligent efforts to secure experienced workers and is unable to obtain them. No certificate will be issued if it is found that experienced workers are available.

No application (except as indicated below) will be deemed to set forth a necessity to employ learners at subminimum wage rates unless it clearly establishes that the employment at the minimum wage applicable under Section 6 of the Act of the number of workers sought to be employed as learners would be so burdensome that a reasonable employer in the circumstances of the applicant would not ordinarily hire the additional inexperienced employees for operation of new plants, plant expansion, or to replace normal plant labor turnover, thus making probable a resultant curtailment of opportunities for employment. Unless the application establishes such a necessity, no certificate will be issued.

However, if, as a result of an industry hearing held pursuant to Section 522.4 or Section 522.13 of the regulations, it has been found necessary to authorize the employment of learners at subminimum wage rates in the industry in which the applicant desires to employ learners, the applicant need not offer proof of his need for a special certificate, as required above, except as to any number of learners sought to be employed in excess of the number or percentage for which a need has been determined after such industry hearing. In all cases, however, the application must clearly state that the applicant has made diligent efforts to secure experienced workers and is unable to obtain them.

## TITLE 30—MINERAL RESOURCES

## BITUMINOUS COAL DIVISION

[Order No. 284]

AN ORDER DIRECTING DISTRICT BOARDS FOR DISTRICTS NO. 1 TO 20, INCLUSIVE, 22 AND 23, TO PROPOSE AND TO SUBMIT TO THE DIRECTOR PRICE CLASSIFICATIONS AND MINIMUM PRICES FOR COALS PRODUCED BY CODE MEMBERS WITHIN THE DISTRICT AND NOT HERETOFORE CLASSIFIED

Pursuant to the Bituminous Coal Act of 1937 (particularly Section 4, Part II thereof), it is hereby ordered that:

(1) The District Board for each of Districts No. 1 to 20, inclusive, 22 and 23, shall forthwith proceed to consider and propose, and shall submit to the Director of the Bituminous Coal Division, United States Department of the Interior, in accordance with the rules and regulations prescribed herein, a price classification for each kind, quality and size of coal produced within the respective district by code members who have accepted the code prior to the date of this order, for which coal no classification has heretofore been proposed and submitted by the District Board.

(2) Each of the aforesaid District Boards, upon receipt of notification after the date of this order that any producer has accepted the code or that any code member is producing coal at a mine within the respective district, at which mine such code member did not theretofore produce coal, shall forthwith proceed to consider and propose, and shall submit to the Director, in accordance with the rules and regulations prescribed herein, a price classification for each kind, quality, and size of coal produced by such code member at a mine within the respective district, for which coal no classification has theretofore been proposed and submitted by the District Board. Price classifications and minimum prices proposed by a District Board pursuant to this order or pursuant to any prior order of the Commission or the Division shall apply, for the purpose for which such classifications and prices were proposed, to the particular coals classified, whether or not ownership or operation of the mine at which such coals are produced changes during or after such classification.

(3) Price classifications proposed pursuant to paragraph (1) or (2) hereof shall be incorporated in a schedule to be prepared by the District Board, which schedule shall, in addition to the price classifications, set forth a proposed minimum price for each kind, quality and size of coal produced at the mine, and shall also give the following information: the name of the mine, the State and county in which the mine is located, the seams mined, the modes of transportation used by the mine, the names of the railroads, if any, which are available for the shipment of coal from the mine, and in so far as practicable, the approximate tonnage moved by each customary mode of transportation for the years 1937 and 1938, the geographic areas into which the mine ships or is expected to ship coal, and any special and unusual features in the preparation or marketing of coal from such mine. Such schedule of proposed price classifications and proposed minimum prices, together with the underlying data upon which they are predicated, shall be submitted to the Director.

(4) The following rules and regulations shall govern the proposal and submission of price classifications and minimum prices pursuant to this order:

RULES AND REGULATIONS FOR THE PROPOSAL OF PRICE CLASSIFICATIONS AND MINIMUM PRICES

(a) All price classifications for coals in a particular district shall be expressed in the terms of the symbols and minimum prices contained in the schedules of minimum prices for such district heretofore approved by the National Bituminous Coal Commission to serve as a basis for coordination. If, in order to express properly the relationship between the coals thus classified and other coals produced within the district, the District Board deems it necessary to vary or qualify the symbols or minimum prices contained in such schedules, it shall indicate the reasons for so doing. If any classification proposed for a particular coal is lower than the lowest classification theretofore approved by the Commission to serve as a basis for coordination for coals mined in the same seam and the same subdistrict, the reasons for such variation must be fully stated and supported by data.

(b) The District Board shall transmit its schedule of proposed price classifications and minimum prices to each code member in the district within the following periods: With respect to coals classified under paragraph (1) hereof, not more than seven (7) days after the date of this order. With respect to coals classified under paragraph (2) hereof, not more than seven (7) days after the receipt of notification of code membership or of the production of coal by the code member at a mine at which such code member did not theretofore produce coal, as the case may be.

(c) After transmission of such schedules to code members and prior to the submission thereof to the Director, the District Board may arrange to receive protests from code members within the district, may conduct such investigations, and may hold such conferences or hearings as in the judgment of the District Board are advisable or proper in the formulation of the schedules in conformity with the requirements of subsection (a) of Part II, Section 4 of the Act. Protests of code members shall, if permitted, be filed with the District Board within seven (7) days from the date of submission of such schedules to them. Each District Board may make such changes, corrections or additions in such schedules as in its judgment may be deemed proper, and a copy of such changes, corrections or additions shall be transmitted to each code member in the district not later than the date of the submission of the schedules to the Director.

(d) Schedules of proposed price classifications and minimum prices, together with all changes, corrections and additions thereto, shall be submitted to the Director, together with twenty-five (25) copies thereof, within the following periods of time: With respect to classifications proposed under paragraph (1) hereof, not more than twenty-five (25) days after the date of this order. With respect to classifications proposed under paragraph (2) hereof, not more than twenty-five (25) days after receipt of notification of code membership or of the production of coal by the code member at a mine at which such code member did not theretofore produce coal, as the case may be.

(e) Prior to the submission of the aforesaid schedules to the Director, the District Board shall mail five (5) copies of such schedules to each of the other districts referred to in paragraph (1) hereof. Each schedule submitted to the Director shall be accompanied by an affidavit from the Secretary of the District Board, averring compliance with the provisions of this order.

(f) Each schedule shall include the following clause:

"NOTE: The prices in this schedule have been proposed by the District Board pursuant to the provisions of Order No. 284 issued by the Bituminous Coal Division on October 10, 1939. Said order is effective only until the effective date of minimum prices to be established by the Division."

(5) Any code member or District Board who is dissatisfied with any proposed price classification or minimum price submitted pursuant to this order, may file with the Director, at his office in Washington, D. C., and with the District Board, not later than seven (7) days after receiving a copy of the schedule of price classifications and minimum prices, a written protest setting forth the reasons for dissatisfaction, together with the supporting data. The Director will then provide for a proper procedure to the end that the coals classified and priced in the schedules submitted pursuant to this order may duly be covered by and included within the schedules of effective minimum prices to be established by the Division.

(6) This order shall be effective only until the establishment of effective minimum prices by the Division.

*United States of America—Before Federal Trade Commission*

[Docket No. 3912]

IN THE MATTER OF P. LORILLARD COMPANY
RESPONDENT

COMPLAINT

The Federal Trade Commission, having reason to believe that the respondent named in the caption hereof, and hereinafter more particularly designated and described, since June 19, 1936, has violated and is now violating the provisions of Section 2 of the Clayton Act as amended by the Robinson-Patman Act, approved June 19, 1936 (U.S.C., title 15, sec. 13), hereby issues this, its complaint, stating its charges with respect thereto as follows:

I

PARAGRAPH 1. Respondent is a corporation of the state of New Jersey. Its principal office is at 119 West 40th Street, New York City, New York. Its business is that of manufacturing, selling, and distributing cigarettes, little cigars, cheroots, cigarette tobacco, smoking tobacco, scrap, plug, fine cut and long cut tobacco, cigars, and other tobacco products and sundries. It has places of business, factories, and warehouses in Jersey City, New Jersey, and in other places and states.

PAR. 2. At all times during the period hitherto, since June 19, 1936, respondent maintained and is now maintaining a continuous course of trade and commerce in said products among and between the several states in which respondent has had and now has places of business, factories and warehouses, and between each of such states and the several other states of the United States and the District of Columbia. Respondent, continuously during said period, while engaged in its business aforesaid, and in commerce, namely, trade and commerce as aforesaid, in the course of such commerce, sold, shipped, and distributed its products from the states in which respondent has had and now has places of business, factories, and warehouses, to various purchasers of its products, namely, distributors of tobacco products, located in such states and in the several other states of the United States and the District of Columbia, for use, consumption, and resale therein.

PAR. 3. Respondent, during the period aforesaid, as and when it determined to accept an order for its products and charge it to a certain distributor, designated such distributor as a "direct customer", known also sometimes as a "direct buying customer", and placed such distributor on its list, called a "direct list", and sometimes as a "list of direct customers". Among the purchasers of respondent's products on its "direct list" are jobbers and some retailers such as chain stores. Among the purchasers of respondent's products "not on direct list" are subjobbers and some retailers such as independent drug, grocery, and cigar stores. The latter purchasers are sometimes called "indirect customers" and "indirect buying customers", and include all distributors of respondent's products except those on its "direct list."

Respondent has extended and is now extending the relationship of seller and customer between it and retail distributors "not on direct list", by means of its many dealings with such distributors, in connection with the sale of its products, and particularly by the use of its many salesmen, sometimes referred to as "missionary men". Such salesmen have made many sales to such distributors. Respondent has shipped its products to many retail distributors "not on direct list", upon receipt of their orders instructing respondent to make such delivery, and to make its charges therefor against a particular jobber on respondent's "direct list" (such shipments being sometimes called "drop shipments"). Retail distributors to whom such sales are made, those to whom such shipments are made, and those with whom respondent has had dealings in connection with the sale of its products, are, by reason of respondent's acts and practices, in fact, customers of, and purchasers from, respondent. By means of such sales, shipments, and other dealings, respondent also extends its control over the prices at which its products are sold by all retail distributors to consumers. For illustration of a common practice of respondent in this connection, on November 9, 1937, respondent shipped to Poole Dry Goods Company of Springfield, Massachusetts, a retail distributor "not on direct list", pursuant to an order taken by one of its missionary men, a quantity of its tobacco products, and sent its invoice for such purchase to its jobber, Nemrow Bros., Inc., of said city calling for payment of $456.02, less discounts of 10% and 2%, or $402.22. Said shipment included fifty thousand Old Gold cigarettes priced in said invoice at $302.50, less discounts of 10% and 2%, or $275.62. Said shipment included 31 dozen 10¢ packages of Union Leader tobacco for which no charge was made in said invoice. Respondent's regular standard price to jobbers in said city for said Union Leader tobacco was $30.69, less discounts of 10% and 2%, or $27.06, and for all the tobacco products included in said shipment, it was $486.71, less discounts of 10% and 2%, or $429.28. Payment for said shipment was made by Poole Dry Goods Company by payment to said jobber, Nemrow Bros., Inc., of $456.02, less discounts of 10% and 1%, or $406.32. Respondent thus sold said tobacco products to Poole Dry Goods Company at a lower price than it was then selling products of the same kind and in the same quantities to jobbers in said city. Soon after such shipment was received by Poole Dry Goods Company, prominent advertisements were placed by it in the daily newspapers of Springfield, Massachusetts, offering Old Gold cigarettes at 11½¢ a package and $1.14 for a carton of ten packages, and such cigarettes were then sold to consumers in Springfield, Massachusetts, at such prices.

PAR. 4. Respondent, during the period aforesaid, listed the prices of its tobacco products and sundries in descriptive price lists published and distributed by it from time to time, and offered and allowed, as regular discounts from such prices, a 10 per cent discount, sometimes called a "trade discount", and after the deduction of such discount, a 2 per cent discount, sometimes called a "cash discount". List prices as reduced by such discounts are sometimes referred to as "standard prices". Respondent's standard prices serve as a basis for the standard prices of wholesalers and retailers.

Deviations from such standard prices have been effected by respondent during the period aforesaid as follows:

(a) Respondent's salesmen called upon certain retail distributors of respondent's products "not on direct list" and then and there solicited orders for certain of respondent's tobacco products from some of said distributors thus called upon; and upon taking orders from such distributors included in such orders substantial quantities of respondent's products of standard grade and quality and of material value, without making any specific charge therefor (such transactions being sometimes called "deals", "free deals", "combinations", and "gratis"). In some instances said salesmen made immediate delivery of such orders to the respective purchasers. In all other cases respondent's salesmen arranged to have the products included in such orders shipped by respondent directly to the respective purchasers (such transactions being sometimes called "drop shipment deals", and such shipments "drop shipments"). In cases where such orders were taken for delivery by the drop shipment method, the respective purchasers from whom such orders were taken, following the practices developed by respondent in such transactions, made arrangements with some particular jobber on respondent's "direct list" to have their respective orders charged to such jobber, and to pay such jobber the amount of their respective orders, being the list price of such products less an agreed amount. The amount which the retail distributors paid for the tobacco products included in such orders was, according to the practices thus developed, a sum substantially less than the amount which other competing retail distributors paid to jobbers of respondent's products for an equal quantity of tobacco products of like grade and quality purchased by them at the same time.

(b) Respondent made an allowance, to certain distributors of its tobacco products, namely, owners and operators of vending machines, of 32½¢ for each thousand of its cigarettes purchased by such distributors for sale in vending machines. In other instances respondent made an allowance to such distributors of $2.00 a year for the period of time that respondent's cigarettes were sold in each of such machines. Payment of such allowances was made by respondent upon being furnished proof satisfactory to it of the purchase by such distributors of such cigarettes. In cases where such distributors were not on respondent's "direct list", the cigarettes thus sold were shipped and payment was made therefor in the same manner as in the other drop shipment sales described above. The amount which such owners and operators of vending machines thus paid for such cigarettes was, according to the practices thus developed, a sum substantially less than the amount which other competing distributors selling at retail paid to jobbers of respondent's products for an equal quantity of similar cigarettes purchased by them at the same time.

PAR. 5. By means of acts and practices, as aforesaid, and particularly those described above in paragraph four, respondent, during the period aforesaid, discriminated in price between different purchasers of commodities, to-wit, tobacco products, of like grade and quality; one or more of the purchases involved in such discriminations were in commerce; and such commodities were sold for use, consumption and resale within the United States and the District of Columbia. Respondent is now discriminating in price as aforesaid. The effect of such discriminations may be to injure, destroy and prevent competition with the purchasers from respondent who received the benefit of such discriminations and with the customers of such purchasers. Such discriminations constitute a violation of Subsection (a) of Section 2 of the Act of Congress aforesaid.

II

And the Federal Trade Commission, as and for a further and second count of its complaint, states:

PARAGRAPH 1. The Federal Trade Commission repeats and re-alleges as a part of this second count of this complaint, each and all of the allegations contained in paragraphs one, two, and three, of count one of this complaint, with like effect as if herein fully repeated, and incorporates herein all the facts therein set forth.

PAR. 2. Respondent, during said period, made and is now making valuable payments and gave and is now giving valuable considerations to certain distributors, such as chain stores and other retailers, selected by respondent for the furnishing by them of services and facilities, such as counter and window displays, for the advertising of respondent's products. Such payments and considerations were not and are not now available to other distributors competing in the distribution of respondent's products. Said practices were conducted in such manner as to result in giving certain distributors exclusively the benefits accruing from said payments and considerations.

For example, in carrying out such practices, respondent paid in 1937, as charged aforesaid, for window and counter displays, running one week each month, $2,314.50, per month, to Walgreen Drug Company, of Chicago, Illinois.

PAR. 3. By means of acts and practices, as aforesaid, and particularly those described above in paragraph two, respondent, during the period aforesaid, contracted to pay and paid, and is now contracting to pay and paying, to and for the benefit of certain of its customers, certain valuable payments and considerations, as compensation for, and in consideration for, certain services and facilities furnished by and through such customers in connection with the handling, sale, and offering for sale, of the tobacco products manufactured, sold, and offered for sale by respondent. Such payments and considerations were not, and are not now, available on proportionately equal terms to all other customers of respondent competing in the distribution of such products, and constitute a violation of Subsection (d) of Section 2 of the Act of Congress aforesaid.

III

And the Federal Trade Commission, as and for a further and third count of its complaint, states:

PARAGRAPH 1. The Federal Trade Commission repeats and re-alleges as a part of this third count of this complaint, each and all of the allegations contained in paragraphs one, two, and three, of count one of this complaint, with like effect as if herein fully repeated, and incorporates herein all the facts therein set forth.

PAR. 2. Respondent has allowed and is now allowing some direct customers a period of time of a certain definite length, for example, 60 days, for payment on a 2 per cent discount basis, sometimes called a "cash discount", of products ordered by and charged to them which it has not allowed and is not now allowing to other direct customers. The allowance of time for payment as aforesaid constitutes a service to respondent's customers which becomes of greater value as the length of such time is extended.

For example, respondent allowed, as charged aforesaid, its jobber Eli Witt Cigar Company, Tampa, Florida, 60 days for payment on said cash discount basis and, following its general rule applicable to jobbers, allowed other jobbers, competing in the distribution of respondent's products with said favored jobber, 10 days for payment on such basis.

PAR. 3. By means of acts and practices, as aforesaid, and particularly by the furnishing of the services described above in paragraph two, respondent, during the period aforesaid, discriminated and is now discriminating in favor of certain purchasers against certain other purchasers of respondent's products bought by them for resale. Such services were and are now furnished by respondent to such favored purchasers upon terms not accorded to all purchasers on proportionately equal terms, in violation of Subsection (e) of Section 2 of the Act of Congress aforesaid.

Wherefore, the premises considered, the Federal Trade Commission, on the 5th day of October, A. D., 1939, issues its complaint against said respondent.

NOTICE

Notice is hereby given you, P. Lorillard Company, respondent herein, that the 10th day of November, A. D., 1939, at 2 o'clock in the afternoon, is hereby fixed as the time, and the offices of the Federal Trade Commission in the City of Washington, D. C., as the place, when and where a hearing will be had on the charges set forth in this complaint, at which time and place you will have the right, under said Act, to appear and show cause why an order should not be entered by said Commission requiring you to cease and desist from the violations of the law charged in the complaint.

You are notified and required, on or before the twentieth day after service upon you of this complaint, to file with the Commission an answer to the complaint. If answer is filed and if your appearance at the place and on the date above stated be not required, due notice to that effect will be given you. The Rules of Practice adopted by the Commission with respect to answers or failure to appear or answer (Rule VII) provide as follows:

In case of desire to contest the proceeding the respondent shall, within twenty (20) days from the service of the complaint, file with the Commission an answer to the complaint. Such answer shall contain a concise statement of the facts which constitute the ground of defense. Respondent shall specifically admit or deny or explain each of the facts alleged in the complaint, unless respondent is without knowledge, in which case respondent shall so state.

* * * * *

Failure of the respondent to file answer within the time above provided and failure to appear at the time and place fixed for hearing shall be deemed to authorize the Commission, without further notice to respondent, to proceed in regular course on the charges set forth in the complaint.

If respondent desires to waive hearing on the allegations of fact set forth in the complaint and not to contest the facts, the answer may consist of a statement that respondent admits all the material allegations of fact charged in the complaint to be true. Respondent by such answer shall be deemed to have waived a hearing on the allegations of fact set forth in said complaint and to have authorized the Commission, without further evidence, or other intervening procedure, to find such facts to be true, and if in the judgment of the Commission such facts admitted constitute a violation of law or laws as charged in the complaint, to make and serve findings as to the facts and an order to cease and desist from such violations. Upon application in writing made contemporaneously with the filing of such answer, the respondent, in the discretion of the Commission, may be heard on brief, in oral argument, or both, solely on the question as to whether the facts so admitted constitute the violation or violations of law charged in the complaint.

In witness whereof, the Federal Trade Commission has caused this, its complaint, to be signed by its Secretary, and its official seal to be hereto affixed, at Washington, D. C., this 5th day of October, A. D. 1939.

By the Commission.

[Docket No. 3913]

IN THE MATTER OF BROWN & WILLIAMSON TOBACCO CORPORATION, RESPONDENT

COMPLAINT

The Federal Trade Commission, having reason to believe that the respondent named in the caption hereof, and hereinafter more particularly designated and described, since June 19, 1936, has violated and is now violating the provisions of Section 2 of the Clayton Act as amended by the Robinson-Patman Act, approved June 19, 1936 (U.S.C., title 15, sec. 13), hereby issues this, its complaint, stating its charges with respect thereto as follows:

I

PARAGRAPH 1. Respondent is a corporation of the state of Delaware. Its principal office is at 1600 West Hill Street, Louisville, Kentucky. Its business is that of manufacturing, selling, and distributing cigarettes, snuff, cigarette tobacco, smoking tobacco, plug tobacco, and other tobacco products and sundries. It has places of business, factories, and warehouses in Louisville, Kentucky, and in other places and states.

PAR. 2. At all times during the period hitherto, since June 19, 1936, respondent maintained and is now maintaining a continuous course of trade and commerce in said products among and between the several states in which respondent has had and now has places of business, factories and warehouses, and between each of such states and the several other states of the United States and the District of Columbia. Respondent, continuously during said period, while engaged in its business aforesaid, and in commerce, namely, trade and commerce as aforesaid, in the course of such commerce, sold, shipped, and distributed its products from the states in which respondent has had and now has places of business, factories, and warehouses, to various purchases of its products, namely, distributors of tobacco products, located in such states and in the several other states of the United States and the District of Columbia, for use, consumption, and resale therein.

PAR. 3. Respondent, during the period aforesaid, as and when it determined to accept an order for its products and charge it to a certain distributor, designated such distributor as a "direct customer", known also sometimes as a "direct buying customer", and placed such distributor on its list, called a "direct list", and sometimes as a "list of direct customers". Among the purchasers of respondent's products on its "direct list" are jobbers and some retailers such as chain stores. Among the purchasers of respondent's products "not on direct list" are subjobbers and some retailers such as independent drug, grocery, and cigar stores. The latter purchasers are sometimes called "indirect customers" and "indirect buying customers", and include all distributors of respondent's products except those on its "direct list".

Respondent has extended and is now extending the relationship of seller and customer between it and retail distributors "not on direct list", by means of its many dealings with such distributors, in connection with the sale of its products, and particularly by the use of its many salesmen, sometimes referred to as "missionary men". Such salesmen have made many sales to such distributors. Respondent has shipped its products to many retail distributors "not on direct list", upon receipt of their orders instructing respondent to make such delivery, and to make its charges therefor against a particular jobber on respondent's "direct list" (such shipments being sometimes called "drop shipments"). Retail distributors to whom such sales are made, those to whom such shipments are made, and those with whom respondent has had dealings in connection with the sale of its products, are, by reason of respondent's acts and practices, in fact, customers of, and purchasers from, respondent. By means of such sales, shipments, and other dealings, respondent also extends its control over the prices at which its products are sold by all retail distributors to consumers. For illustration of a common practice of respondent in this connection, on May 23, 1938, respondent shipped to May's Cut Rate Drug Stores, of Atlanta, Georgia, a retail distributor "not on direct list", pursuant to an order taken by one of its missionary men, a quantity of its tobacco products and sent its invoice for such purchase to its jobber, McCollum Brothers of said city, calling for a payment of $49.21, less discounts of 10% and 2%, or $43.41. Said shipment included a quantity of tobacco for which no charge was made in said invoice. Respondent's regular standard price to jobbers in said city for the latter tobacco was $4.00, less discounts of 10% and 2%, or $3.53, and for all the tobacco products included in said shipment, it was $53.21, less discounts of 10% and 2%, or $46.94. Payment for said shipment was made by May's Cut Rate Drug Stores by payment to said jobber, McCollum Brothers, of $49.21, less discounts of 10% and 1%, or $43.85. Respondent thus sold said tobacco products to May's Cut Rate Drug Stores at a lower price than it was then selling products of the same kind and in the same quantities to jobbers in said city. After such shipment was received by May's Cut Rate Drug Stores, such stores offered respondent's Raleigh Cork Tip Cigarettes at 15c a package, and such cigarettes were then sold to consumers in Atlanta, Georgia, at such price.

PAR. 4. Respondent, during the period aforesaid, listed the prices of its tobacco products and sundries in descriptive price lists published and distributed by it from time to time, and offered and allowed, as regular discounts from such prices, a 10 percent discount, sometimes called a "trade discount", and after the deduction of such discount, a 2 percent discount, sometimes called a "cash discount". List prices as reduced by such discounts are sometimes referred to as "standard prices." Respondent's standard prices serve as a basis for the standard prices of wholesalers and retailers.

Deviations from such standard prices have been effected by respondent during the period aforesaid as follows:

(a) Respondent's salesmen called upon certain retail distributors of respondent's products "not on direct list" and then and there solicited orders for certain of respondent's tobacco products from some of said distributors thus called upon; and upon taking orders from such distributors included in such orders substantial quantities of respondent's products of standard grade and quality and of material value, without making any specific charge therefor (such transactions being sometimes called "deals", "free deals", "combinations", and "gratis"). In some instances said salesmen made immediate delivery of such orders to the respective purchasers. In all other cases respondent's salesmen arranged to have the products included in such orders shipped by respondent directly to the respective purchasers (such transactions being sometimes called "drop shipment deals", and such shipments "drop shipments"). In cases where such orders were taken for delivery by the drop shipment method, the respective purchasers from whom such orders were taken, following the practices developed by respondent in such transactions, made arrangements with some particular jobber on respondent's "direct list" to have their respective orders charged to such jobber, and to pay such jobber the amount of their respective orders, being the list price of such products less an agreed amount. The amount which the retail distributors paid for the tobacco products included in such orders was, according to the practices thus developed, a sum substantially less than the amount which other competing retail distributors paid to jobbers of respondent's products for an equal quantity of tobacco products of like grade and quality purchased by them at the same time.

(b) Respondent made an allowance, to certain distributors of its tobacco products, namely, owners and operators of vending machines, of 50¢ for each thousand of its cigarettes purchased by such distributors for sale in vending machines. In cases where such distributors were not on respondent's "direct list", the cigarettes thus sold were shipped and payment was made therefor in the same manner as in the other drop shipment sales described above. The amount which such owners and operators of vending machines thus paid for such cigarettes was according to the practices thus developed, a sum substantially less than the amount which other competing distributors selling at retail paid to jobbers of respondent's products for an equal quantity of similar cigarettes purchased by them at the same time.

PAR. 5. By means of acts and practices, as aforesaid, and particularly those described above in paragraph 4, respondent, during the period aforesaid, discriminated in price between different purchasers of commodities, to-wit, tobacco products, of like grade and quality; one or more of the purchases involved in such discriminations were in commerce; and such commodities were sold for use, consumption and resale within the United States and the District of Columbia. Respondent is now discriminating in price as aforesaid. The effect of such discriminations may be to injure, destroy and prevent competition with the purchasers from respondent who received the benefit of such discriminations and with the customers of such purchasers. Such discriminations constitute a violation of Subsection (a) of Section 2 of the Act of Congress aforesaid.

II

And the Federal Trade Commission, as and for a further and second count of its complaint, states:

PARAGRAPH 1. The Federal Trade Commission repeats and re-alleges as a part of this second count of this complaint, each and all of the allegations contained in paragraphs one, two, and three, of count one of this complaint, with like effect as if herein fully repeated, and incorporates herein all the facts therein set forth.

PAR. 2. Respondent, during said period, made and is now making valuable payments and gave and is now giving valuable considerations to certain distributors, such as chain stores and other retailers, selected by respondent for the furnishing by them of services and facilities, such as counter and window displays, for the advertising of respondent's products. Such payments and considerations were not and are not now available to other distributors competing in the distribution of respondent's products. Said practices were conducted in such manner as to result in giving certain distributors exclusively the benefits accruing from said payments and considerations.

For example, in carrying out such practices, respondent paid in 1938, as charged aforesaid, for window displays, $9,393.60, for the months of March and April, 1938, to The Great Atlantic & Pacific Tea Company of New York City, New York; $687.50, for the months of March and April, 1938, to Goldblatt Bros., Inc., of Chicago, Illinois; and $1,861.50, for the months of March and April, 1938, to The Owl Drug Company of San Francisco, California.

PAR. 3. By means of acts and practices, as aforesaid, and particularly those described above in paragraph two, respondent, during the period aforesaid, contracted to pay and paid, and is now contracting to pay and paying, to and for the benefit of certain of its customers, certain valuable payments and considerations, as compensation for, and in consideration for, certain services and facilities furnished by and through such customers in connection with the handling, sale, and offering for sale, of the tobacco products manufactured, sold, and offered for sale by respondent. Such payments and considerations were not, and are not now, available on proportionately equal terms to all other customers of respondent competing in the distribution of such products, and constitute a violation of Subsection (d) of Section 2 of the Act of Congress aforesaid.

III

And the Federal Trade Commission, as and for a further and third count of its complaint, states:

PARAGRAPH 1. The Federal Trade Commission repeats and re-alleges as a part of this third count of this complaint, each and all of the allegations contained in paragraphs one, two, and three, of count one of this complaint, with like effect as if herein fully repeated, and incorporates herein all the facts therein set forth.

PAR. 2. Respondent has allowed and is now allowing some direct customers a period of time of a certain definite length, for example, 60 days, for payment on a 2 per cent discount basis, sometimes called a "cash discount", of products ordered by and charged to them which it has not allowed and is not now allowing to other direct customers. The allowance of time for payment as aforesaid constitutes a service to respondent's customers which becomes of greater value as the length of such time is extended.

For example, respondent allowed, as charged aforesaid, its jobber Eli Witt Cigar Company, Tampa, Florida, 60 days for payment on said cash discount basis and, following its general rule applicable to jobbers, allowed other jobbers, competing in the distribution of respondent's products with said favored jobber, 10 days for payment on such basis.

PAR. 3. By means of acts and practices, as aforesaid, and particularly by the furnishing of the services described above in paragraph two, respondent, during the period aforesaid, discriminated and is now discriminating in favor of certain purchasers against certain other purchasers of respondent's products bought by them for resale. Such services were and are now furnished by respondent to such favored purchasers upon terms not accorded to all purchasers on proportionately equal terms, in violation of Subsection (e) of Section 2 of the Act of Congress aforesaid.

Wherefore, the premises considered, the Federal Trade Commission, on this 5th day of October, A. D., 1939, issues its complaint against said respondent.

NOTICE

Notice is hereby given you, Brown & Williamson Tobacco Corporation, respondent herein, that the 10th day of November, A. D., 1939, at 2 o'clock in the afternoon, is hereby fixed as the time, and the offices of the Federal Trade Commission in the City of Washington, D. C., as the place, when and where a hearing will be had on the charges set forth in this complaint, at which time and place you will have the right, under said Act, to appear and show cause why an order should not be entered by said Commission requiring you to cease and desist from the violations of the law charged in the complaint.

You are notified and required, on or before the twentieth day after service upon you of this complaint, to file with the Commission an answer to the complaint. If answer is filed and if your appearance at the place and on the date above stated be not required, due notice to that effect will be given you. The Rules of Practice adopted by the Commission with respect to answers or failure to appear or answer (Rule VII) provide as follows:

In case of desire to contest the proceeding the respondent shall, within twenty (20) days from the service of the complaint, file with the Commission an answer to the complaint. Such answer shall contain a concise statement of the facts which constitute the ground of defense. Respondent shall specifically admit or deny or explain each of the facts alleged in the complaint, unless respondent is without knowledge, in which case respondent shall so state.

* * * * *

Failure of the respondent to file answer within the time above provided and failure to appear at the time and place fixed for hearing shall be deemed to authorize the Commission, without further notice to respondent, to proceed in regular course on the charges set forth in the complaint.

If respondent desires to waive hearing on the allegations of fact set forth in the complaint and not to contest the facts, the answer may consist of a statement that respondent admits all the material allegations of fact charged in the complaint to be true. Respondent by such answer shall be deemed to have waived a hearing on the allegations of fact set forth in said complaint and to have authorized the Commission, without further evidence, or other intervening procedure, to find such facts to be true, and if in the judgment of the Commission such facts admitted constitute a violation of law or laws as charged in the complaint, to make and serve findings as to the facts and an order to cease and desist from such violations. Upon application in writing made contemporaneously with the filing of such answer, the respondent, in the discretion of the Commission, may be heard on brief, in oral argument, or both, solely on the question as to whether the facts so admitted constitute the violation or violations of law charged in the complaint.

In witness whereof, the Federal Trade Commission has caused this, its complaint, to be signed by its Secretary, and its official seal to be hereto affixed, at Washington, D. C., this 5th day of October, A. D. 1939.

By the Commission.

*United States of America—Before Federal Trade Commission*

[Docket No. 3914]

IN THE MATTER OF R. J. REYNOLDS TOBACCO COMPANY, RESPONDENT

COMPLAINT

The Federal Trade Commission, having reason to believe that the respondent named in the caption hereof, and hereinafter more particularly designated and described, since June 19, 1936, has violated and is now violating the provisions of Section 2 of the Clayton Act as amended by the Robinson-Patman Act, approved June 19, 1936 (U.S.C., title 15, sec. 13), hereby issues this, its complaint, stating its charges with respect thereto as follows:

I

PARAGRAPH 1. Respondent is a corporation of the state of New Jersey. Its principal office is in Winston-Salem, North Carolina. Its business is that of manufacturing, selling, and distributing cigarettes, cigarette tobacco, smoking tobacco, plug, twist and scrap tobacco, and other tobacco products and sundries. It has places of business, factories, and warehouses in Winston-Salem, North Carolina, and in other places and states.

PAR. 2. At all times during the period hitherto, since June 19, 1936, respondent maintained and is now maintaining a continuous course of trade and commerce in said products among and between the several states in which respondent has had and now has places of business, factories and warehouses, and between each of such states and the several other states of the United States and the District of Columbia. Respondent, continuously during said period, while engaged in its business aforesaid, and in commerce, namely, trade and commerce as aforesaid, in the course of such commerce, sold, shipped, and distributed its products from the states in which respondent has had and now has places of business, factories, and warehouses, to various purchasers of its products, namely, distributors of tobacco products, located in such states and in the several other states of the United States and the District of Columbia, for use, consumption, and resale therein.

PAR. 3. Respondent, during the period aforesaid, as and when it determined to accept an order for its products and charge it to a certain distributor, designated such distributor as a "direct customer", known also sometimes as a "direct buying customer", and places such distributor on its list, called a "direct list", and sometimes as a "list of direct customers". Among the purchasers of respondent's products on its "direct list" are jobbers and some retailers such as chain stores. Among the purchasers of respondent's products "not on direct list" are subjobbers and some retailers such as independent drug, grocery, and cigar stores. The latter purchasers are sometimes called "indirect customers" and "indirect buying customers", and include all distributors of respondent's products except those on its "direct list".

Respondent has extended and is now extending the relationship of seller and customer between it and retail distributors "not on direct list", by means of its many dealings with such distributors, in connection with the sale of its products, and particularly by the use of its many salesmen, sometimes referred to as "missionary men". Such salesmen have made many sales to such distributors. Respondent has shipped its products to many retail distributors "not on direct list", upon receipt of their orders instructing respondent to make such delivery, and to make its charges therefor against a particular jobber on respondent's "direct list" (such shipments being sometimes called "drop shipments"). Retail distributors to whom such sales are made, those to whom such shipments are made, and those with whom respondent has had dealings in connection with the sale of its products, are, by reason of respondent's acts and practices, in fact, customers of, and purchasers from, respondent. By means of such sales, shipments, and other dealings, respondent also extends its control over the prices at which its products are sold by all retail distributors to consumers. For illustration of a common practice of respondent in this connection, on January 26, 1939, one of respondent's missionary men sold to retail distributors "not on direct list", in Indianapolis, Indiana, Prince Albert Tobacco at $1.08 per dozen. Respondent was then selling said tobacco to jobbers in said city at its regular standard price of $1.27½ per dozen, less 10% and 2%, or approximately $1.12½ per dozen. Respondent thus sold said tobacco to such retail distributors at a lower price than it was then selling the same tobacco in the same and in larger quantities to jobbers in said city. Immediately after such sales were made, respondent's posters were affixed at prominent positions on the windows of such retail distributors, offering the regular 15¢ size package of Prince Albert Tobacco at 10¢ a package, and such tobacco was then sold to consumers in Indianapolis, Indiana, at ten cents a package.

PAR. 4. Respondent, during the period aforesaid, listed the prices of its tobacco products and sundries in descriptive price lists published and distributed by it from time to time, and offered and allowed, as regular discounts from such prices, a 10 per cent discount, sometimes called a "trade discount", and after the deduction of such discount, a 2 per cent discount, sometimes called a "cash discount". List prices as reduced by such discounts are sometimes referred to as "standard prices." Respondent's standard prices serve as a basis for the standard prices of wholesalers and retailers.

Deviations from such standard prices have been effected by respondent during the period aforesaid as follows:

(a) Respondent's salesmen called upon certain retail distributors of respondent's products "not on direct list" and then and there solicited orders for certain of respondent's tobacco products from some of said distributors thus called upon; and upon taking orders from such distributors included in such orders substantial quantities of respondent's products of standard grade and quality and of material value, without making any specific charge therefor (such transactions being sometimes called "deals", "free deals", "combinations", and "gratis"). In some instances said salesmen made immediate delivery of such orders to the respective purchasers. In all other cases respondent's salesmen arranged to have the products included in such orders shipped by respondent directly to the respective purchasers (such transactions being sometimes called "drop shipment deals", and such shipments "drop shipments"). In cases where such orders were taken for delivery by the drop shipment method, the respective purchasers from whom such orders were taken, following the practices developed by respondent in such transactions, made arrangements with some particular jobber on respondent's "direct list" to have their respective orders charged to such jobber, and to pay such jobber the amount of their respective orders, being the list price of such products less an agreed amount. The amount which the retail distributors paid for the tobacco products included in such orders was, according to the practices thus developed, a sum substantially less than the amount which other competing retail distributors paid to jobbers of respondent's products for an equal quantity of tobacco products of like grade and quality purchased by them at the same time.

PAR. 5. By means of acts and practices, as aforesaid, and particularly those described above in paragraph four, respondent, during the period aforesaid, discriminated in price between different purchasers of commodities, to-wit, tobacco products, of like grade and quality; one or more of the purchases involved in such discriminations were in commerce; and such commodities were sold for use, consumption and resale within the United States and the District of Columbia. Respondent is now discriminating in price as aforesaid. The effect of such discriminations may be to injure, destroy and prevent competition with the purchasers from respondent who received the benefit of such discriminations and with the customers of such purchasers. Such discriminations constitute a violation of Subsection (a) of Section 2 of the Act of Congress aforesaid.

II

And the Federal Trade Commission, as and for a further and second count of its complaint, states:

PARAGRAPH 1. The Federal Trade Commission repeats and re-alleges as a part of this second count of this complaint, each and all of the allegations contained in paragraphs one, two, and three, of count one of this complaint, with like effect as if herein fully repeated, and incorporates herein all the facts therein set forth.

PAR. 2. Respondent, during said period, made and is now making valuable payments and gave and is now giving valuable considerations to certain distributors, such as chain stores and other retailers, selected by respondent for the furnishing by them of service and facilities, such as counter and window displays, for the advertising of respondent's products. Such payments and considerations were not and are not now available to other distributors competing in the distribution of respondent's products. Said practices were conducted in such manner as to result in giving certain distributors exclusively the benefits accruing from said payments and considerations.

For example, in carrying out such practices, respondent paid in 1937, as charged aforesaid, for window displays, $5,600.00 on May 17, 1937, and $325.00 per month from June 1, 1937, to Katz Drug Company, Inc., of Kansas City, Missouri, and $3,600.00 on July 29, 1937, and $350.00 per month from August 1, 1937, to Sun Ray Drug Company, of Philadelphia, Pennsylvania.

PAR. 3. By means of acts and practices, as aforesaid, and particularly those described above in paragraph two, respondent, during the period aforesaid, contracted to pay and paid, and is now contracting to pay and paying, to and for the benefit of certain of its customers, certain valuable payments and considerations, as compensation for, and in consideration for, certain services and facilities furnished by and through such customers in connection with the handling, sale, and offering for sale, of the tobacco products manufactured, sold, and offered for sale by respondent. Such payments and considerations were not, and are not now, available on proportionately equal terms to all other customers of respondent competing in the distribution of such products, and constitute a violation of Subsection (d) of Section 2 of the Act of Congress aforesaid.

III

And the Federal Trade Commission, as and for a further and third count of its complaint, states:

PARAGRAPH 1. The Federal Trade Commission repeats and re-alleges as a part of this third count of this complaint, each and all of the allegations contained in paragraphs one, two, and three, of count one of this complaint, with like effect as if herein fully repeated, and incorporates herein all the facts therein set forth.

PAR. 2. Respondent has allowed and is now allowing some direct customers a period of time of a certain definite length, for example, 60 days, for payment on a 2 per cent discount basis, sometimes called a "cash discount", of products ordered by and charged to them which it has not allowed and is not now allowing to other direct customers. The allowance of time for payment as aforesaid constitutes a service to respondent's customers which becomes of greater value as the length of such time is extended.

For example, respondent allowed, as charged aforesaid, its jobber Ell Witt Cigar Company, Tampa, Florida, 60 days for payment on said cash discount basis and, following its general rule applicable to jobbers, allowed other jobbers, competing in the distribution of respondent's products with said favored jobber, 10 days for payment on such basis.

PAR. 3. By means of acts and practices, as aforesaid, and particularly by the furnishing of the services described above in paragraph two, respondent, during the period aforesaid, discriminated and is now discriminating in favor of certain purchasers against certain other purchasers of respondent's products bought by them for resale. Such services were and are now furnished by respondent to such favored purchasers upon terms not accorded to all purchasers on proportionately equal terms, in violation of Subsection (e) of Section 2 of the Act of Congress aforesaid.

Wherefore, the premises considered, the Federal Trade Commission, on this 6th day of October, A. D. 1939, issues its complaint against said respondent.

NOTICE

Notice is hereby given you, R. J. Reynolds Tobacco Company, respondent herein, that the 10th day of November, A. D., 1939, at 2 o'clock in the afternoon, is hereby fixed as the time, and the offices of the Federal Trade Commission in the City of Washington, D. C., as the place, when and where a hearing will be had on the charges set forth in this complaint, at which time and place you will have the right, under said Act, to appear and show cause why an order should not be entered by said Commission requiring you to cease and desist from the violations of the law charged in the complaint.

You are notified and required, on or before the twentieth day after service upon you of this complaint, to file with the Commission an answer to the complaint. If answer is filed and if your appearance at the place and on the date above stated be not required, due notice to that effect will be given you. The Rules of Practice adopted by the Commission with respect to answers or failure to appear or answer (Rule VII) provide as follows:

In case of desire to contest the proceeding the respondent shall, within twenty (20) days from the service of the complaint, file with the Commission an answer to the complaint. Such answer shall contain a concise statement of the facts which constitute the ground of defence. Respondent shall specifically admit or deny or explain each of the facts alleged in the complaint, unless respondent is without knowledge, in which case respondent shall so state.

* * * * *

Failure of the respondent to file answer within the time above provided and failure to appear at the time and place fixed for hearing shall be deemed to authorize the Commission, without further notice to respondent, to proceed in regular course on the charges set forth in the complaint.

If respondent desires to waive hearing on the allegations of fact set forth in the complaint and not to contest the facts, the answer may consist of a statement that respondent admits all the material allegations of fact charged in the complaint to be true. Respondent by such answer shall be deemed to have waived a hearing on the allegations of fact set forth in said complaint and to have authorized the Commission, without further evidence, or other intervening procedure, to find such facts to be true, and if in the judgment of the Commission such facts admitted constitute a violation of law or laws as charged in the complaint, to make and serve findings as to the facts and an order to cease and desist from such violations. Upon application in writing made contemporaneously with the filing of such answer, the respondent, in the discretion of the Commission, may be heard on brief, in oral argument, or both, solely on the question as to whether the facts so admitted constitute the violation or violations of law charged in the complaint.

In witness whereof, the Federal Trade Commission has caused this, its complaint, to be signed by its Secretary, and its official seal to be hereto affixed, at Washington, D. C., this 6th day of October, A. D., 1939.

By the Commission.

*United States of America—Before Federal Trade Commission*

[Docket No. 3915]

IN THE MATTER OF LARUS & BROTHER COMPANY, INC., RESPONDENT

COMPLAINT

The Federal Trade Commission, having reason to believe that the respondent named in the caption hereof, and hereinafter more particularly designated and described, since June 19, 1936, has violated and is now violating the provisions of Section 2 of the Clayton Act as amended by the Robinson-Patman Act, approved June 19, 1936, (U.S.C., title 15, sec. 13), hereby issues this, its complaint, stating its charges with respect thereto as follows:

I

PARAGRAPH 1. Respondent is a corporation of the state of Virginia. Its principal office is at 22nd and Cary Streets, Richmond, Virginia. Its business is that of manufacturing, selling, and distributing cigarettes, cigarette tobacco, smoking tobacco, and chewing tobacco, and other tobacco products and sundries. It has places of business, factories, and warehouses in Richmond, Virginia, and in other places and states.

PAR. 2. At all times during the period hitherto, since June 19, 1936, respondent maintained and is now maintaining a continuous course of trade and commerce in said products among and between the several states in which respondent has had and now has places of business, factories and warehouses, and between each of such states and the several other states of the United States and the District of Columbia. Respondent, continuously during said period, while engaged in its business aforesaid, and in commerce, namely, trade and commerce as aforesaid, in the course of such commerce, sold, shipped, and distributed its products from the states in which respondent has had and now has places of business, factories, and warehouses, to various purchasers of its products, namely, distributors of tobacco products, located in such states and in the several other states of the United States and the District of Columbia, for use, consumption, and resale therein.

PAR. 3. Respondent, during the period aforesaid, as and when it determined to accept an order for its products and charge it to a certain distributor, designated such distributor as a "direct customer", known also sometimes as a "direct buying customer", and placed such distributor on its list, called a "direct list", and sometimes as a "list of direct customers". Among the purchasers of respondent's products on its "direct list" are jobbers and some retailers such as chain stores. Among the purchasers of respondent's products "not on direct list" are subjobbers and some retailers such as independent drug, grocery, and cigar stores. The latter purchasers are sometimes called "indirect customers" and "indirect buying customers", and include all distributors of respondent's products except those on its "direct list".

Respondent has extended and is now extending the relationship of seller and customer between it and retail distributors "not on direct list", by means of its many dealings with such distributors, in connection with the sale of its products, and particularly by the use of its many salesmen, sometimes referred to as "missionary men". Such salesmen have made many sales to such distributors. Respondent has shipped its products to many retail distributors "not on direct list", upon receipt of their orders instructing respondent to make such delivery, and to make its charges therefor against a particular jobber on respondent's "direct list" (such shipments being sometimes called "drop shipments"). Retail distributors to whom such sales are made, those to whom such shipments are made, and those with whom respondent has had dealings in connection with the sale of its products, are, by reason of respondent's acts and practices, in fact, customers of, and purchasers from, respondent. By means of such sales, shipments, and other dealings, respondent also extends its control over the prices at which its products are sold by all retail distributors to consumers. For illustration of a common practice of respondent in this connection, on March 23, 1938, respondent shipped to Army & Navy Department Store, of Pittsfield, Massachusetts, a retail distributor "not on direct list", pursuant to an order taken by one of its missionary men, a quantity of its tobacco products, and sent its invoice for such purchase to its jobber, Dearstyne Bros. Tobacco Co., of Albany, New York, calling for payment of $49.09, less discounts of 10% and 2%, or $43.31. Said shipment included two thousand Domino Cigarettes, one-half dozen packages of Luxury tobacco, three dozen 2-ounce packages of Keg tobacco and one dozen packages Hi Plane tobacco, priced in said invoice at $13.84, less discounts of 10% and 2%, or $12.22 and a quantity of Edgeworth tobacco, priced in said invoice at $36.25, less discounts of 10% and 2% or $31.09. Said shipment also included ten tins of Edgeworth tobacco for which no charge was made in said invoice. Respondent's standard price to jobbers selling in said city for said quantity of Edgeworth tobacco was $1.29, less discounts of 10% and 2%, or $1.14, and for all the tobacco products included in said shipment, $50.38, less discounts of 10% and 2% or $44.45. Payment for said shipment was made by Army & Navy Department Store to said jobber, Dearstyne Bros. Tobacco Co., of $49.09, less a discount, of 9%, or $44.68. After such shipment was received by Army & Navy Department Store, it offered the 15¢ size package of Edgeworth tobacco for 10¢, and the one pound tin of Edgeworth tobacco at $1.05, and such tobacco was then sold to consumers in Pittsfield, Massachusetts at such prices.

PAR. 4. Respondent, during the period aforesaid, listed the prices of its tobacco products and sundries in descriptive price lists published and distributed by it from time to time, and offered and allowed, as regular discounts from such prices, a 10 per cent discount, sometimes called a "trade discount", and after the deduction of such discount, a 2 per cent discount, sometimes called a "cash discount". List prices as reduced by such discounts are sometimes referred to as "standard prices." Respondent's standard prices serve as a basis for the standard prices of wholesalers and retailers.

Deviations from such standard prices have been effected by respondent during the period aforesaid as follows:

(a) Respondent's salesmen called upon certain retail distributors of respondent's products "not on direct list" and then and there solicited orders for certain of respondent's tobacco products from some of said distributors thus called upon; and upon taking orders from such distributors included in such orders substantial quantities of respondent's products of standard grade and quality and of material value, without making any specific charge therefor (such transactions being sometimes called "deals", "free deals", "combinations", and "gratis"). In some instances said salesmen made immediate delivery of such orders to the respective purchasers. In all other cases respondent's salesmen arranged to have the products included in such orders shipped by respondent directly to the respective purchasers (such transactions being sometimes called "drop shipment deals", and such shipments "drop shipments"). In cases where such orders were taken for delivery by the drop shipment method, the respective purchasers from whom such orders were taken, following the practices developed by respondent in such transactions made arrangements with some particular jobber on respondent's "direct list" to have their respective orders charged to such jobber, and to pay such jobber the amount of their respective orders, being the list price of such products less an agreed amount. The amount which the retail distributors paid for the tobacco products included in such orders was, according to the practices thus developed, a sum substantially less than the amount which other competing retail distributors paid to jobbers of respondent's products for an equal quantity of tobacco products of like grade and quality purchased by them at the same time.

PAR. 5. By means of acts and practices, as aforesaid, and particularly those described above in paragraph four, respondent, during the period aforesaid, discriminated in price between different purchasers of commodities, to-wit, tobacco products, of like grade and quality; one or more of the purchases involved in such discriminations were in commerce; and such commodities were sold for use, consumption and resale within the United States and the District of Columbia. Respondent is now discriminating in price as aforesaid. The effect of such discriminations may be to injure, destroy and prevent competition with the purchasers from respondent who received the benefit of such discriminations and with the customers of such purchasers. Such discriminations constitute a violation of Subsection (a) of Section 2 of the Act of Congress aforesaid.

II

And the Federal Trade Commission, as and for a further and second count of its complaint, states:

PARAGRAPH 1. The Federal Trade Commission repeats and re-alleges as a part of this second count of this complaint, each and all of the allegations contained in paragraphs one, two, and three, of count one of this complaint, with like effect as if herein fully repeated, and incorporates herein all the facts therein set forth.

PAR. 2. Respondent, during said period, made and is now making valuable payments and gave and is now giving valuable considerations to certain distributors, such as chain stores and other retailers, selected by respondent for the furnishing by them of services and facilities, such as counter and window displays, for the advertising of respondent's products. Such payments and considerations were not and are not now available to other distributors competing in the distribution of respondent's products. Said practices were conducted in such manner as to result in giving certain distributors exclusively the benefits accruing from said payments and considerations.

For example, in carrying out such practices, respondent paid in 1938, as charged aforesaid, for window displays, $1,000.00 per month to United Cigar-Whelan Drug Stores Corporation, New York City.

PAR. 3. By means of acts and practices, as aforesaid, and particularly those described above in paragraph two, respondent, during the period aforesaid, contracted to pay and paid, and is now contracting to pay and paying, to and for the benefit of certain of its customers, certain valuable payments and considerations, as compensation for, and in consideration for, certain services and facilities furnished by and through such customers in connection with the handling, sale, and offering for sale, of the tobacco products manufactured, sold, and offered for sale by respondent. Such payments and considerations were not, and are not now, available on proportionately equal terms to all other customers of respondent competing in the distribution of such products, and constitute a violation of Subsection (d) of Section 2 of the Act of Congress aforesaid.

III

And the Federal Trade Commission, as and for a further and third count of its complaint, states:

PARAGRAPH 1. The Federal Trade Commission repeats and re-alleges as a part of this third count of this complaint, each and all of the allegations contained in paragraphs one, two, and three, of count one of this complaint, with like effect as if herein fully repeated, and incorporates herein all the facts therein set forth.

PAR. 2. Respondent has allowed and is now allowing some direct customers a period of time of a certain definite length, for example, 60 days, for payment on a 2 per cent discount basis, sometimes called a "cash discount", of products ordered by and charged to them which it has not allowed and is not now allowing to other direct customers. The allowance of time for payment as aforesaid constitutes a service to respondent's customers which becomes of greater value as the length of such time is extended.

For example, respondent allowed, as charged aforesaid, its jobber Eli Witt Cigar Company, Tampa, Florida, until the 10th of the month succeeding the month of purchase for payment on said cash discount basis and, following its general rule applicable to jobbers, allowed other jobbers, competing in the distribution of respondent's products with said favored jobber, 10 days for payment on such basis.

PAR. 3. By means of acts and practices, as aforesaid, and particularly by the furnishing of the services described above in paragraph two, respondent, during the period aforesaid, discriminated and is now discriminating in favor of certain purchasers against certain other purchasers of respondent's products bought by them for resale. Such services were and are now furnished by respondent to such favored purchasers upon terms now accorded to all purchasers on proportionately equal terms, in violation of Subsection (e) of Section 2 of the Act of Congress aforesaid.

Wherefore, the premises considered, the Federal Trade Commission, on this 6th day of October, A. D., 1939, issues its complaint against said respondent.

NOTICE

Notice is hereby given you, Larus & Brother Company, Inc., respondent herein, that the 10th day of November, A. D., 1939, at 2 o'clock in the afternoon, is hereby fixed as the time, and the offices of the Federal Trade Commission in the City of Washington, D. C., as the place, when and where a hearing will be had on the charges set forth in this complaint, at which time and place you will have the right, under said Act, to appear and show cause why an order should not be entered by said Commission requiring you to cease and desist from the violations of the law charged in the complaint.

You are notified and required, on or before the twentieth day after service upon you of this complaint, to file with the Commission an answer to the complaint. If answer is filed and if your appearance at the place and on the date above stated be not required, due notice to that effect will be given you. The Rules of Practice adopted by the Commission with respect to answers or failure to appear or answer (Rule VII) provide as follows:

In case of desire to contest the proceeding the respondent shall, within twenty (20) days from the service of the complaint, file with the Commission an answer to the complaint. Such answer shall contain a concise statement of the facts which constitute the ground of defense. Respondent shall specifically admit or deny or explain each of the facts alleged in the complaint, unless respondent is without knowledge, in which case respondent shall so state.

* * * * *

Failure of the respondent to file answer within the time above provided and failure to appear at the time and place fixed for hearing shall be deemed to authorize the Commission, without further notice to respondent, to proceed in regular course on the charges set forth in the complaint.

If respondent desires to waive hearing on the allegations of fact set forth in the complaint and not to contest the facts, the answer may consist of a statement that respondent admits all the material allegations of fact charged in the complaint to be true. Respondent by such answer shall be deemed to have waived a hearing on the allegations of fact set forth in said complaint and to have authorized the Commission, without further evidence, or other intervening procedure, to find such facts to be true, and if in the judgment of the Commission such facts admitted constitute a violation of law or laws as charged in the complaint, to make and serve findings as to the facts and an order to cease and desist from such violations. Upon application in writing made contemporaneously with the filing of such answer, the respondent, in the discretion of the Commission, may be heard on brief, in oral argument, or both, solely on the question as to whether the facts so admitted constitute the violation or violations of law charged in the complaint.

In witness whereof, the Federal Trade Commission has caused this, its complaint, to be signed by its Secretary, and its official seal to be hereto affixed, at Washington, D. C., this 6th day of October, A. D. 1939.

By the Commission.

*United States of America—Before Federal Trade Commission*

[Docket No. 3919]

IN THE MATTER OF PHILIP MORRIS & COMPANY, LTD., INC., RESPONDENT

COMPLAINT

The Federal Trade Commission, having reason to believe that the respondent named in the caption hereof, and hereinafter more particularly designated and described, since June 19, 1936, has violated and is now violating the provisions of Section 2 of the Clayton Act as amended by the Robinson-Patman Act, approved June 19, 1936 (U.S.C., title 15, sec. 13), hereby issues this, its complaint, stating its charges with respect thereto as follows:

I

PARAGRAPH 1. Respondent is a corporation of the state of Virginia. Its principal office is at 119 Fifth Avenue, New York City, New York. Its business is that of manufacturing, selling, and distributing cigarettes, cigarette tobacco, smoking tobacco, and other tobacco products and sundries. It has places of business, factories, and warehouses in Richmond, Virginia, and in other places and states.

PAR. 2. At all times during the period hitherto, since June 19, 1936, respondent maintained and is now maintaining a continuous course of trade and commerce in said products among and between the several states in which respondent has had and now has places of business, factories and warehouses, and between each of such states and the several other states of the United States and the District of Columbia. Respondent, continuously during said period, while engaged in its business aforesaid, and in commerce, namely, trade and commerce as aforesaid, in the course of such commerce, sold, shipped, and distributed its products from the states in which respondent has had and now has places of business, factories, and warehouses, to various purchasers of its products, namely, distributors of tobacco products, located in such states and in the several other states of the United States and the District of Columbia, for use, consumption, and resale therein.

PAR. 3. Respondent, during the period aforesaid, as and when it determined to accept an order for its products and charge it to a certain distributor, designated such distributor as a "direct customer", known also sometimes as a "direct buying customer", and placed such distributor on its list, called a "direct list", and sometimes as a "list of direct customers". Among the purchasers of respondent's products on its "direct list" are jobbers and some retailers such as chain stores. Among the purchasers of respondent's products "not on direct list" are subjobbers and some retailers such as independent drug, grocery, and cigar stores. The latter purchasers are sometimes called "indirect customers" and "indirect buying customers", and include all distributors of respondent's products except those on its "direct list".

Respondent has extended and is now extending the relationship of seller and customer between it and retail distributors "not on direct list", by means of its many dealings with such distributors, in connection with the sale of its products, and particularly by the use of its many salesmen, sometimes referred to as "missionary men". Such salesmen have made many sales to such distributors. Respondent has shipped its products to many retail distributors "not on direct list", upon receipt of their orders instructing respondent to make such delivery, and to make its charges therefor against a particular jobber on respondent's "direct list" (such shipments being sometimes called "drop shipments"). Retail distributors to whom such sales are made, those to whom such shipments are made, and those with whom respondent has had dealings in connection with the sale of its products, are, by reason of respondent's acts and practices, in fact, customers of, and purchasers from, respondent. By means of such sales, shipments, and other dealings, respondent also extends its control over the prices at which its products are sold by all retail distributors to consumers.

PAR. 4. Respondent, during the period aforesaid, listed the prices of its tobacco products and sundries in descriptive price lists published and distributed by it from time to time, and offered and allowed, as regular discounts from such prices, a 10 per cent discount, sometimes called a "trade discount", and after the deduction of such discount, a 2 per cent discount, sometimes called a "cash discount". List prices as reduced by such discounts are sometimes referred to as "standard prices." Respondent's standard prices serve as a basis for the standard prices of wholesalers and retailers.

Deviations from such standard prices have been effected by respondent during the period aforesaid as follows:

(a) Respondent solicited orders for cigarettes from certain of said distributors, namely, owners and operators of vending machines, for sale in vending machines, and agreed to pay to them 50¢ for each thousand of its cigarettes purchased by them for sale in such machines. Respondent made such payments upon being furnished proof satisfactory to it of the purchase by such distributors of such cigarettes. When such distributor was on respondent's "direct list", respondent sent its invoice for such cigarettes to such distributor. When such distributor was not on respondent's "direct list", respondent sent its invoice for such cigarettes to the jobber on respondent's "direct list" selected by such distributor as the one to whom such order should be charged, and shipped such cigarettes directly to such distributor (such shipments being sometimes called "drop shipments"). Respondent also shipped cigarettes for sale in vending machines to jobbers on its "direct list", upon receipt of orders from them for such cigarettes, and sent its invoices covering such orders to such jobbers. The amount which such owners and operators of vending machines thus paid for such cigarettes was, according to the practices thus developed, a sum substantially less than the amount which other competing distributors selling at retail paid to jobbers of respondent's products for an equal quantity of similar cigarettes purchased by them at the same time.

PAR. 5. By means of acts and practices, as aforesaid, and particularly those described above in paragraph four, respondent, during the period aforesaid, discriminated in price between different purchasers of commodities, to-wit, tobacco products, of like grade and quality; one or more of the purchases involved in such discriminations were in commerce; and such commodities were sold for use, consumption and resale within the United States and the District of Columbia. Respondent is now discriminating in price as aforesaid. The effect of such discriminations may be to injure, destroy and prevent competition with the purchasers from respondent who received the benefit of such discriminations and with the customers of such purchasers. Such discriminations constitute a violation of Subsection (a) of Section 2 of the Act of Congress aforesaid.

II

And the Federal Trade Commission, as and for a further and second count of its complaint, states:

PARAGRAPH 1. The Federal Trade Commission repeats and re-alleges as a part of this second count of this complaint, each and all of the allegations contained in paragraphs one, two, and three, of count one of this complaint, with like effect as if herein fully repeated, and incorporates herein all the facts therein set forth.

PAR. 2. Respondent, during said period, made and is now making valuable payments and gave and is now giving valuable considerations to certain distributors, such as chain stores and other retailers, selected by respondent for the furnishing by them of services and facilities, such as counter and window displays, for the advertising of respondent's products. Such payments and considerations were not and are not now available to other distributors competing in the distribution of respondent's products. Said practices were conducted in such manner as to result in giving certain distributors exclusively the benefits accruing from said payments and considerations.

For example, in carrying out such practices, respondent paid in 1938, as charged aforesaid, for window displays, $22,500.00 to Walgreen Drug Company, of Chicago, Illinois; $1,800.00 to Hook Drug Company, of Indianapolis, Indiana; and $4,800.00 to Sontag Drug Stores, of Hollywood, California.

PAR. 3. By means of acts and practices, as aforesaid, and particularly those described above in paragraph two, respondent, during the period aforesaid, contracted to pay and paid, and is now contracting to pay and paying, to and for the benefit of certain of its customers, certain valuable payments and considerations, as compensation for, and in consideration for, certain services and facilities furnished by and through such customers in connection with the handling, sale, and offering for sale, of the tobacco products manufactured, sold, and offered for sale by respondent. Such payments and considerations were not, and are not now, available on proportionately equal terms to all other customers of respondent competing in the distribution of such products, and constitute a violation of Subsection (d) of Section 2 of the Act of Congress aforesaid.

III

And the Federal Trade Commission, as and for a further and third count of its complaint, states:

PARAGRAPH 1. The Federal Trade Commission repeats and re-alleges as a part of this third count of this complaint, each and all of the allegations contained in paragraphs one, two, and three, of count one of this complaint, with like effect as if herein fully repeated, and incorporates herein all the facts therein set forth.

PAR. 2. Respondent has allowed and is now allowing some direct customers a period of time of a certain definite length, for example, 30 days, for payment on a 2 per cent discount basis, sometimes called a "cash discount", of products ordered by and charged to them which it has not allowed and is not now allowing to other direct customers. The allowance of time for payment as aforesaid constitutes a service to respondent's customers which becomes of greater value as the length of such time is extended.

For example, respondent allowed, as charged aforesaid, its jobber Eli Witt Cigar Company, Tampa, Florida, until the 20th of the month succeeding the month of purchase for payment on said cash discount basis and, following its general rule applicable to jobbers, allowed other jobbers, competing in the distribution of respondent's products with said favored jobber, 10 days for payment on such basis.

PAR. 3. By means of acts and practices, as aforesaid, and particularly by the furnishing of the services described above in paragraph two, respondent, during the period aforesaid, discriminated and is now discriminating in favor of certain purchasers against certain other purchasers of respondent's products bought by them for resale. Such services were and are now furnished by respondent to such favored purchasers upon terms not accorded to all purchasers on proportionately equal terms, in violation of Subsection (e) of Section 2 of the Act of Congress aforesaid.

Wherefore, the premises considered, the Federal Trade Commission, on this 7th day of October, A. D., 1939, issues its complaint against said respondent.

NOTICE

Notice is hereby given you, Philip Morris & Company, Ltd., Inc., respondent herein, that the 10th day of November, A. D., 1939, at 2 o'clock in the afternoon, is hereby fixed as the time, and the offices of the Federal Trade Commission in the City of Washington, D. C., as the place, when and where a hearing will be had on the charges set forth in this complaint, at which time and place you will have the right, under said Act, to appear and show cause why an order should not be entered by said Commission requiring you to cease and desist from the violations of the law charged in the complaint.

You are notified and required, on or before the twentieth day after service upon you of this complaint, to file with the Commission an answer to the complaint. If answer is filed and if your appearance at the place and on the date above stated be not required, due notice to that effect will be given you. The Rules of Practice adopted by the Commission with respect to answers or failure to appear or answer (Rule VII) provide as follows:

In case of desire to contest the proceeding the respondent shall, within twenty (20) days from the service of the complaint, file with the Commission an answer to the complaint. Such answer shall contain a concise statement of the facts which constitute the ground of defense. Respondent shall specifically admit or deny or explain each of the facts alleged in the complaint, unless respondent is without knowledge, in which case respondent shall so state.

* * * * *

Failure of the respondent to file answer within the time above provided and failure to appear at the time and place fixed for hearing shall be deemed to authorize the Commission, without further notice to respondent, to proceed in regular course on the charges set forth in the complaint.

If respondent desires to waive hearing on the allegations of fact set forth in the complaint and not to contest the facts, the answer may consist of a statement that respondent admits all the material allegations of fact charged in the complaint to be true. Respondent by such answer shall be deemed to have waived a hearing on the allegations of fact set forth in said complaint and to have authorized the Commission, without further evidence, or other intervening procedure, to find such facts to be true, and if in the judgment of the Commission such facts admitted constitute a violation of law or laws as charged in the complaint, to make and serve findings as to the facts and an order to cease and desist from such violations. Upon application in writing made contemporaneously with the filing of such answer, the respondent, in the discretion of the Commission, may be heard on brief, in oral argument, or both, solely on the question as to whether the facts so admitted constitute the violation or violations of law charged in the complaint.

In witness whereof, the Federal Trade Commission has caused this, its complaint, to be signed by its Secretary, and its official seal to be hereto affixed, at Washington, D. C., this 7th day of October, A. D., 1939.

By the Commission.

## TITLE 24—HOUSING CREDIT

### UNITED STATES HOUSING AUTHORITY

PART 634—PERSONNEL REQUIREMENTS FOR SUPERVISION AND INSPECTION OF PROJECT DURING CONSTRUCTION*†

Sec.
634.0 Scope and content.
634.1 General factors to be considered in setting up the supervisory and inspection staff for the project.
634.2 Hypothetical project and supervisory and inspection staff recommended therefor.

§ 634.0 *Scope and content.* The size and composition of the staff needed for supervision and inspection will depend upon the numerous factors and combinations of factors involved in the particular project. Section 634.1 below sets forth the general factors which, in conjunction, will ordinarily determine the personnel required to insure competent and adequate supervision and inspection. Section 634.2 below describes a hypothetical project and indicates the size and composition of the supervisory and inspection staff which will ordinarily be needed for such a project.*† [Introduction]

§ 634.1 *General factors to be considered in setting up the supervisory and inspection staff for the project.* (a) *Volume of construction.* The term "volume of construction", as used herein, refers to the size of the project expressed in terms of its development cost. The volume of construction involved in the project determines to a great extent the personnel needed for supervision and inspection. Thus, a project costing $5,000,000 will ordinarily require a larger staff than one costing $3,500,000 or any other amount substantially smaller than $5,000,000. The volume of construction is one of the most important factors to be considered, although neither the size nor the composition of the supervisory and inspection staff depends upon the volume of construction or any other single factor.

(b) *Nature of materials and construction.* Complicated and unusual construction systems, or a wide variety of materials and equipment, will increase the amount of supervision and inspection required. Thus, a $5,000,000 project involving relatively few and simple processes might be adequately supervised and inspected with a smaller staff than a $4,000,000 project involving numerous types of materials and complex equipment.

(c) *Number of construction contracts involved.* The local authority should endeavor to keep the number of construction contracts down to a minimum. If the general construction is under one or more contracts and there are separate contracts for the heating, the plumbing, the electrical work, the landscape work, and other items, the supervisory and inspection staff may find it necessary to do much of the coordination work which would normally be the responsibility of the general contractor. Any such coordination work which devolves upon the staff will decrease the amount of time available for actual supervision and inspection and may require additions to its personnel.

(d) *Distribution of construction operations.* The area covered by the construction operations may affect the personnel required for supervision and inspection. Most USHA-aided projects extend over an area larger than that normally required for construction involving similar expenditures. The local housing authority should make certain that the contractor organizes his operations so as to overcome, so far as practicable, the difficulties incident to the supervision and inspection of construction operations over an enlarged area.

(e) *Competency and general attitude of contractors, subcontractors, and labor employed.* Although the local authority should act generally upon the assumption that the contractor, his subcontractors, and the labor employed will all be efficient and cooperative, the local authority should anticipate the fact that it may sometimes become necessary to strengthen the supervisory and inspection staff because of the various trades by the general contractor.

(f) *Nature of plans and specifications.* The attention of local authorities is invited to the fact that inadequate and poorly prepared plans and specifications, particularly plans and specifications which are not properly coordinated, constitute sources of disputes, delays, extras, and claims. Such factors not only consume a large part of the time of the inspection and supervisory staff during construction, but will often require the retention of at least a portion of the staff after construction has been substantially completed and the period of settlement has begun.

(g) *Extent to which construction materials and equipment meet specifications.* The extent to which the construction materials and equipment generally meet specification requirements is an important factor in determining the size of the supervisory and inspection staff. Materials and equipment used in construction must always be inspected at source or upon delivery. Inspection is sometimes necessary at both points. Normally there will be many borderline cases of noncompliance with contract specifications and it is impossible to determine, in advance, the exact time which may be needed to inspect material and equipment prior to use. However, the local authority should have the contract specifications made as simple and concise as practicable. Complex or ambiguous specifications increase the difficulty of determining whether the material and equipment meet contract requirements, may often cause disputes and delays and may, in certain cases, require additions to the supervisory and inspection staff.

(h) *Delays in construction.* Delays in construction due to general causes will not ordinarily require increased personnel. Such delays will, however, increase the time of service for the supervision and inspection staff and thus increase the total cost of its services. Delays due to prolonged strikes often result in increased activity upon the resumption of work. This increase in activity may require increased supervision and inspection personnel until the normal rate of operations is resumed.*† [Par. I]

§ 634.2 *Hypothetical project and supervisory and inspection staff recommended therefor.* In order to guide the local housing authority in determining the inspection and supervisory staff required for its particular project or projects, this paragraph outlines a hypothetical project and sets up the supervisory and inspection staff which will ordinarily be needed to insure the "competent and adequate architectural or engineering supervision and inspection" required by the "Terms and Conditions".

(a) *Characteristics of the hypothetical project.* The main features of the project are as follows:

(1) The total development cost is $3,000,000.

(2) The project consists of row houses and apartment buildings arranged in a relatively compact area.

(3) There are no serious foundation problems.

(4) The construction of the project is all fireproof (i. e., masonry exterior bearing walls; solid slab concrete or combination tile and concrete joists, floor construction and interior supporting columns and beams of concrete; solid plaster partitions with metal base; metal door bucks; steel or concrete stairs; asphalt tile and linoleum floors) and simple finish is generally used throughout.

(5) There is one central heating plant, and the existing system of utilities is generally adequate.

(6) All the construction work, including the work to be performed by the mechanical trades, is under one general contract, leaving only the purchase and installation of some equipment, such as ranges and refrigerators, and the contracting for landscape work for the future.

(7) The general contractor and his subcontractors are known to be efficient and reliable, and the available labor is competent.

(8) Good brick and other masonry materials are available locally and there are dependable sources of good quality ready-mixed concrete. The local or nearby markets supply good metal, wood, roofing and other products.

(9) The plans and specifications for the project have been well prepared and checked.

(b) *Recommended supervision and inspection personnel for the hypothetical project.* The project described above will ordinarily require a supervisory and inspection staff including at least the following:

(1) *A general superintendent.* This employee should be placed in general charge of supervision and inspection of construction and office routine on the project site. His background should include experience as a general contractor, general contractor's superintendent, or as an architect. He should be a good organizer, should be the type to inspire cooperation on the part of his subordinates, and should possess the tact, sound judgment, sense of fairness, and the degree of firmness necessary for proper relationship with the contractor.

(2) *A chief building and materials inspector.* This employee should be in direct charge of the subordinate inspectors and should assign their duties and oversee their work and should himself be active in the inspection of materials and workmanship. His qualifications should, in general, be similar to those of the general superintendent.

(3) *Assistant building and materials inspectors.* This phase of supervision and inspection will ordinarily require the equivalent, in time, of two men for the entire period of the construction work. Preferably these employees should be experienced in the trades they will inspect and should have general experience in construction.

(4) *A mechanical inspector for plumbing and heating.* This employee should be in direct charge of the inspection of these phases of construction. He should have a background of broad experience, practical and theoretical, in these trades.

(5) *An assistant mechanical inspector for plumbing and heating.* This phase of supervision and inspection will ordinarily require the equivalent, in time, of one employee for one and one-half years. The qualifications of this employee should be approximately the same as those set forth for the mechanical inspector for plumbing and heating.

(6) *A mechanical inspector for electrical work.* This employee should be in direct charge of supervision and inspection of electrical installation. He should have a background of broad practical and theoretical experience in this trade.

This supervisory and inspection staff comprises the minimum personnel which will ordinarily be required for a project such as the one outlined above. The local authority may find it necessary or advisable temporarily to expand this staff if the contractor is accelerating special phases of construction work, such as masonry, or if the normal program of construction is disrupted.*† [Par. II]

* * * * *

SEC. 3791. RULES AND REGULATIONS.

(a) AUTHORIZATION.—

* * * * *

(2) IN CASE OF CHANGE IN LAW. The Commissioner may make all such regulations, not otherwise provided for, as may have become necessary by reason of any alteration of law in relation to internal revenue. * * *

§ 317.1 *Scope of regulations.* These regulations deal with the tax imposed with respect to certain hydraulic mining, the debris from which flows into or is in whole or in part restrained by dams or other works erected for the detention of debris by the California Debris Commission in the area drained by the Sacramento and San Joaquin river systems in the State of California.

More specifically these regulations apply to hydraulic mining the debris from which flows into or is in whole or in part restrained by debris dams or other works erected or to be erected by the California Debris Commission on tributaries of the Sacramento River as follows: (a) the debris dam or works known as "North Fork" on the North Fork of the American River, just above the confluence of the North and Middle Forks of the American River, located in Placer County, State of California; (b) the debris dam or works known as "Upper Narrows" on the Yuba River, just above the confluence of the Yuba and Feather Rivers, located in Nevada and Yuba Counties, State of California; and (c) the debris dam or works known as "Ruck-a-Chucky" on the Middle Fork of the American River, just above the confluence of the Middle and North Forks of the American River, located in Placer and Eldorado Counties, State of California.*†

§ 317.2 *Definitions.* As used in these regulations:

(a) The term "Act" means "An Act to create the California Debris Commission and regulate hydraulic mining in the State of California" approved March 1, 1893, as amended, 27 Stat. 507; 34 Stat. 1001; 48 Stat. 1118.

(b) The term "person" means an individual, a trust, estate, partnership, company or corporation.

(c) The term "Secretary" means the Secretary of the Treasury.

(d) The term "Commissioner" means the Commissioner of Internal Revenue.

(e) The term "collector" means the collector of internal revenue.

(f) The terms "hydraulic mining" and "mining by the hydraulic process" shall have the meaning and application given said terms in the State of California.

(g) The term "taxable year" means the twelve-month period ending on August 31st of each year for which the tax imposed by the Act is payable.*†

§ 317.3 *Rates of tax.* Under the Act the California Debris Commission will determine and prescribe with respect to each debris dam or other works the rate of tax payable in the area served by the particular debris dam or works. The Secretary of War will notify the Secretary of the Treasury of the rate of tax fixed with respect to each debris dam or works as such rate becomes known.

The tax is payable annually on the basis of the number of cubic yards mined from the natural bank by the hydraulic process during the taxable year.*†

§ 317.4 *Liability for the tax.* Liability for tax attaches to any person engaged at any time during the taxable year in hydraulic mining in an area served by any of the debris dams or other works identified in section 317.1 if the debris from such mining operations is in whole or in part restrained by any of such debris dams or works.*†

§ 317.5 *Ascertainment of quantity mined.* Each person engaged in hydraulic mining operations within the scope of the tax shall make or cause to be made appropriate surveys of the premises on which such hydraulic mining operations are conducted for the purpose of determining the cubic yardage mined from the natural bank. Such surveys shall be made at the beginning and end of hydraulic mining operations in each taxable year by a licensed engineer or other qualified agency having prior approval of the California Debris Commission, and shall conform to requirements prescribed by the California Debris Commission.*†

§ 317.6 *Returns.* Every person liable for tax for any taxable year shall prepare for such year a return in triplicate on Form 1 (California Debris) in accordance with the instructions thereon and in accordance with these regulations.

The return shall show the identity of the particular dam or other works restraining debris from the mine; the name and location of the mine; the name and address of the person to whom the California Debris Commission has issued a license to operate the mine; the number and date of the license; the name and address of the owner of the mine; the dates on which hydraulic mining operations began and ended during the taxable year for which the return is made; the number of cubic yards mined by the hydraulic process at the mine during the taxable year; the rate of tax per cubic yard determined by the California Debris Commission applicable to the particular mine; the amount of tax due and payable (cubic yards mined multiplied by the rate of tax per cubic yard).

With each return there must be submitted a supporting affidavit of the person who made the surveys at the mine for the mining season covered by the return (see section 317.5), stating that such surveys were made in accordance with requirements prescribed by the California Debris Commission.

The return shall be made under oath and verified before an officer duly authorized to administer oaths.*†

§ 317.7 *Due date and place for filing returns and paying tax.* The return for each taxable year shall be filed in triplicate with, and the tax shall be paid to, the Collector at San Francisco, California, on or before September 30th of each year. The tax is due and payable on such date without assessment by the Commissioner or notice from the collector.*†

§ 317.8 *Penalties and interest.* In the case of failure to file a return within the prescribed time, a certain percentage of the amount of the tax is added to the tax unless the return is later filed and failure to file the return within the prescribed time is shown to the satisfaction of the Commissioner to be due to reasonable cause and not to willful neglect. The amount to be added to the tax is 5 per cent if the failure is for not more than 30 days, with an additional 5 per cent for each additional 30 days or fraction thereof during which failure continues, not to exceed 25 per cent in the aggregate.

Where assessment is made, and payment is not made within 10 days after the issuance of the first notice and demand (Form 17), there will accrue under section 3655 of the Internal Revenue Code a 5 per cent penalty and interest at the rate of 6 per cent per annum computed upon the entire assessment from the date of issuance of Form 17 until date of payment.

If a claim for abatement is filed with the collector within 10 days after the date of the issuance of the first notice and demand, the 5 per cent penalty does not attach. If the assessment is not paid within 10 days after receipt of notice of rejection of the claim, the 5 per cent penalty applies. The filing of the claim does not stay the running of interest, which continues to run for the full period that intervenes between the date of the first notice and demand and the date of payment.

If a false or fraudulent return be willfully made, the penalty under section 3612 of the Internal Revenue Code is 50 per cent of the total tax due. For other penalties see section 3616 of the Internal Revenue Code.*†

*Commissioner of Internal Revenue.*

Approved and adopted, October 11, 1939.

JOHN W. HANES,
*Acting Secretary of the Treasury.*

## COUNTERVAILING DUTIES ON BRITISH SUGAR

T. D. 49355, ANNOUNCING THE NET AMOUNTS OF BOUNTIES OR GRANTS ON BRITISH REFINED SUGAR DECLARED PURSUANT TO THE PROVISIONS OF SECTION 303 OF THE TARIFF ACT OF 1930 AND INSTRUCTING COLLECTORS OF CUSTOMS TO COLLECT ADDITIONAL DUTIES EQUAL TO SUCH NET AMOUNTS OF BOUNTIES OR GRANTS, SUPPLEMENTED[1]

*To Collectors of Customs and Others Concerned:*

The Bureau is in receipt of official information to the effect that a new schedule of duty payments and drawback rates on British sugar became effective on April 25, 1939. The rates now in effect grant allowances in certain instances in excess of the amounts of duties collected on the imported raw sugar.

Since the excesses of drawback over the duties collected constitute bounties within the meaning of section 303 of the Tariff Act of 1930, I have estimated, determined, and hereby declare the net amounts of such bounties per pound of refined sugar from the United Kingdom of Great Britain and Northern Ireland to be as follows:

(1) When the British drawback of customs duty is allowed at the rate of 11s 8d per cwt. of 112 pounds, the net amount of the bounty is:

1.25d minus (1.18393027d × the percentage of sucrose in imported sugar.)

(2) When the British drawback of customs duty is allowed at the rate of 7s 4.7d per cwt. of 112 pounds, the net amount of the bounty is:

.79196429d minus (.74963368d × the percentage of sucrose in imported sugar.)

(3) When the British drawback of customs duty is allowed at the rate of 3s 11.4d per cwt. of 112 pounds, the net amount of the bounty is:

.42321429d minus (.41163764d × the percentage of sucrose in imported sugar.)

Collectors of customs, therefore, will collect additional duties on British refined sugar equal to the net amounts of the bounties or grants in accordance with the rate or rates applicable as set forth above when imported directly or indirectly and entered for consumption, or withdrawn from warehouse for consumption, after the publication of this decision in the weekly Treasury Decisions.

The declarations of bounty herein published are supplemental to those published in T. D. 49355[2] which declarations remain in full force and effect in respect of sugar imported from Great Britain and Northern Ireland upon which drawback was paid at any of the rates specified therein.

Consular invoices covering refined sugar produced in the United Kingdom and imported into the United States shall show the rate or rates of the drawback claimed or allowed, or to be claimed or allowed, thereon. (Sec. 303, 46 Stat. 687; 19 U.S.C., 1303)

[3] This information is required only where the cash wage actually paid is less than the minimum wage required by the Act. The reasonable cost of board, lodging, and other facilities as part of wages, is defined and delimited by regulations of the Wage and Hour Division: Part 531—(Regulations determining the reasonable cost of board, lodging and other facilities pursuant to sec. 3 (m) of the Fair Labor Standards Act). This matter is dealt with further in Interpretative Bulletin No. 3 of the Wage and Hour Division.

[4] Whether a contract requiring employees to account for tips is legal is a question for the courts to decide. The Wage and Hour Division is not taking a position on this question but is requiring records that will protect both employer and employee whatever the ultimate judicial decision on the validity of such a contract may be.

NOTICE OF HEARING WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND ORDER REGULATING HANDLING OF ONIONS GROWN IN THE STATE OF COLORADO

Whereas, under Public Act No. 10, 73rd Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, notice of hearing is required in connection with a proposed marketing agreement or a proposed order, and the General Regulations, Series A, No. 1, as amended,[1] of the Agricultural Adjustment Administration, United States Department of Agriculture, provide for such notice; and

Whereas, the Secretary of Agriculture has reason to believe that the execution of a marketing agreement and the issuance of an order will tend to effectuate the declared policy of said act with respect to such handling of onions grown in the State of Colorado as is in the current of interstate or foreign commerce, or which directly burdens, obstructs, or affects such commerce:

Now, therefore, pursuant to the said act and said general regulations, notice is hereby given of a hearing to be held on a proposed marketing agreement and a proposed order regulating such handling of onions grown in the State of Colorado, in the District Court Room, Pueblo County Court House, Pueblo, Colorado, at 9:30 a. m., m. s. t., October 20, 1939.

This public hearing is for the purpose of receiving evidence as to the general economic conditions which may necessitate regulation in order to effectuate the declared policy of the act and as to the specific provisions which a marketing agreement and order should contain.

The proposed marketing agreement and the proposed order each provides, in similar terms, a plan for the regulation of such handling of the aforesaid onions as is in the current of interstate or foreign commerce, or which directly burdens, obstructs, or affects such commerce. Among other matters relating to such regulation, the proposed marketing agreement and order provide for: (a) the establishment of an Administrative Committee consisting of producer members and handler members; (b) regulation of shipments of any variety or varieties of onions by grades or sizes or combinations thereof; (c) inspection of shipments by an authorized representative of the Federal-State Inspection Service during periods when regulation is in effect; (d) levying of assessments by the Administrative Committee to cover expenses of administration; and (e) reports to the Administrative Committee by handlers.

It is hereby declared that an emergency exists in the handling of onions in the aforesaid area, and that a shorter period of notice than fifteen (15) days is therefore required; and it is hereby determined that the period of notice given is reasonable under the circumstances.

Copies of the proposed marketing agreement and order may be procured from the Hearing Clerk, Office of the Solicitor, United States Department of Agriculture, in Room 0310 South Building, Washington, D. C., or may be there inspected.

§ 200 *Eligibility to participate in low income programs.* No person certified as eligible for public assistance and able to obtain food order stamps under the applicable regulations and conditions made and prescribed by the Secretary on April 21, 1939, as amended,[1] shall be eligible to receive food order stamps hereunder; but nothing herein contained shall preclude the issuance of food order stamps to persons receiving public assistance and otherwise eligible hereunder. Notwithstanding any provision hereunder, no applicant shall be certified as eligible to participate in the low income food stamp program who has liquid assets in an amount sufficient to support and maintain himself and his family for a reasonable period of time as determined by the Corporation.

§ 201 *Issuance of orange colored and blue surplus food order stamps.* (1) Orange colored and blue surplus food order stamps shall be issued to an applicant therefor providing the applicant is the only member of a low income family, as determined by the Secretary, filing an application. The Corporation shall provide the form of sworn application and all determinations and certifications as to eligibility to participate in the food stamp plan shall be made by the certifying agency from the face of the application and from such other duly recorded evidence as the certifying agency may deem material.

(2) Applicants certified as eligible shall renew their applications in the form and manner provided and at such intervals as the Corporation may determine after the date of the filing of the original or preceding application. Applicants (a) not certified as eligible or (b) desiring to file changes in net family income due to seasonal adjustments or for other reasons may renew their applications in the form and manner required at intervals of not less than one month from the date of the original or preceding application.

(3) All applications received by the certifying agency shall be numbered in order of receipt and shall be reviewed and certification made or refused in such order, unless, for reasons indicated to the applicant upon his request, it is administratively desirable that the usual order of review be changed. If, after a reasonable time, but in no event more than fifteen days after receipt of the application, no action has been taken thereon, the applicant may appeal, orally or in writing, to the local representative of the Corporation, setting forth that action upon his application has been delayed and requesting expeditious consideration thereof; whereupon the local representative shall consider the merits of the appeal, and, notwithstanding any procedure provided hereunder or in any agreement or otherwise, take such action to expedite consideration or otherwise as the local representative or the Corporation may deem warranted.

(4) If the certifying agency determines as to any applicant that he is ineligible to participate in the food stamp plan, the certifying agency shall state in writing and attach to the application the reasons for such determination. In the event that the certifying agency is other than the local representative, any applicant whose application has been rejected may appeal, orally or in writing, to the local representative, who shall, within five days after the making of such appeal, affirm, modify or reverse the action of the certifying agency and the certifying agency shall be governed accordingly.

(5) Persons eligible to receive food order stamps shall, when so required, prior to the issuance of such stamps, present evidence of certification of eligibility to participate; and shall purchase or obtain orange colored food order stamps no more than and no less than once each calendar month: *Provided, however,* That the Corporation may provide for the issuance of food order stamps on less than a monthly basis if, in its judgment, a monthly basis would work a hardship on certain low income or groups of low income families.

(6) After the issuance of the second book or series of books of food order stamps to any eligible person, no book or series of books shall be issued to such person unless there has been turned in to the issuing agency the covers of the individual book or series of books together with the proper certification of the holder provided for therewith; thereafter, no holder shall be eligible to receive further books unless he has in like manner, with like certification, turned in the covers of all books previously issued to him except the last book immediately preceding. In the event that the holder loses the cover of any book, he shall be eligible to receive further books only upon execution and presentation to the issuing agency in the form required of (a) a sworn affidavit that he has lost the covers and (b) a certification similar to that contained upon the covers. If the holder, because of failure to purchase food order stamps at the intervals required, is unable to turn in the required stamp book covers, he shall be deemed eligible to receive further books only if in the judgment of the Corporation or its authorized representative, the holder refrained from purchasing or retaining stamps because of a substantial or emergency need, or it is desirable that he be deemed eligible in order to effectuate the food distribution plan.

§ 202 *Designation of surplus agricultural commodities or products thereof.* The Corporation shall from time to time prepare bulletins in which there shall be designated the agricultural commodities and products thereof found by the Secretary to be surplus food. Such bulletins shall be published in the FEDERAL REGISTER and furnished to food retailers and wholesalers through their local organizations and trade publications, and to local newspapers and interested persons upon request.

§ 203 *Payment of claims supported by properly presented food order stamps.* Any retail food store merchant, who either personally or through his agent or representative, delivers food or surplus food to an authorized holder of food order stamps in accordance with the conditions made herein shall be entitled, in the event a claim for payment is made and presented, properly supported by such stamp cards, vouchers, and other forms as the Corporation may provide, to receive payment from funds held by or for the Corporation for orange colored or blue surplus food order stamps at the rate of twenty-five (25¢) cents for each such stamp, provided the Corporation is satisfied that a proper claim has been made. The determination of the Corporation as to the propriety of any claim, or the satisfaction of any condition hereunder, shall be final.

§ 204 *Refunds.* In the event that food order stamps are not presented for delivery of food thereon, the Corporation shall make proportionate refunds on orange colored food order stamps if returned to the Corporation by the person to whom originally issued together with blue surplus food order stamps in the same ratio in which received.

§ 205 *Agreements.* The Corporation may enter into such agreements or undertakings and, in addition to the officers and employees of the Corporation and of the United States Department of Agriculture, utilize such duly authorized public or private agencies and instrumentalities, or the personnel thereof, as it may deem necessary and proper in the effectuation of the food stamp plan.

§ 206 *Confidential information.* All information furnished to or acquired by the Corporation, or any representative or certifying or issuing or other agency or contracting party thereof, in connection with the food stamp plan, shall be kept confidential by the recipients thereof and by all officers and employees of the Corporation or of the Department of Agriculture, and only such information so furnished or acquired as the Corporation determines to be relevant to the effectuation of the food stamp plan shall be disclosed by them. Nothing herein contained shall be deemed to prohibit (a) the issuance of general statements, which statements do not identify the information furnished by any person, or (b) the publication by direction of the Corporation of the name of any person violating these regulations and conditions, together with a statement of the particular provisions of these regulations and conditions violated by such person.

*Article III—Conditions*

§ 300 *Amount and ratio of orange colored and blue surplus food order stamps available to any eligible applicant.* Any applicant certified in accordance with these regulations and conditions as eligible to participate in the low income food stamp program in Shawnee, Oklahoma, who, when required, has presented evidence of such certification, shall purchase or obtain in lieu of money payment, orange colored food order stamps for any current calendar month, of a total value of approximately one dollar and fifty cents ($1.50) per week for himself and for each member of his family: *Provided, however,* That in the event such family has a net current annual income of seven hundred and fifty dollars ($750.00) or less, the applicant shall not be required to purchase or obtain orange colored food order stamps in excess of one dollar ($1.00) per week for himself and for each member of such family: *Provided, further,* That if it is determined by the Corporation that as to certain designated family groups, any of the foregoing requirements as to the amount of orange colored food order stamps would result in the expenditure of an amount in excess of forty per centum (40%) of the current net income of such families as contained in the respective filed applications, the Corporation shall fix such minima for such designated family groups as will effectuate the food order stamp program: *Provided, further,* That any applicant for any such designated family shall be permitted, if he so desires, to purchase or obtain in lieu of money payment a total maximum of orange colored food order stamps of a total value up to but not to exceed approximately one dollar and fifty cents ($1.50) per week for each such applicant and for each member of his family in such designated family groups. Any applicant purchasing or obtaining orange colored food order stamps shall be given blue surplus food order stamps in the ratio of one blue surplus food stamp for each two orange colored food stamps purchased or obtained. As used in this section, "net current annual income" or "current net income" shall be determined on a basis established by the Corporation from filed applications.

§ 301 *Food obtainable by use of orange colored and blue surplus food order stamps.* Orange colored food order stamps may be used in any retail food store for any food, as defined herein, sold in such stores, including agricultural commodities and the products thereof found by the Secretary to be surplus food. Blue surplus food order stamps may be used in any such store only for food products found by the Secretary to be surplus food and so designated.

§ 302 *Limitations on use of stamps and food obtained thereby.* Except for eligible milk merchants, no retail food store merchant, nor any manager, clerk, assistant or other person acting for him, shall accept either orange colored food order stamps or blue surplus food order stamps unless detached in the presence of such person at the time that the food or surplus food is delivered to the person authorized to receive such food. Food order stamps shall not be used for food which in the usual course of business is consumed on the premises of any retail food store; nor shall such stamps be sold, or used for any purpose or to effect any arrangement, agreement, scheme or device other than that provided herein, not excluding the payment of accounts or debts previously incurred for food or other commodities delivered or services rendered. Food or surplus food delivered to any eligible applicant by virtue of the presentation of food order stamps shall be consumed by such applicant and his family in the normal course of consumption of food or surplus food by such applicant or family.

§ 303 *Duty of retail food store merchants or their representatives.* Nothing contained herein shall, in any manner, be interpreted or construed to relieve any retail food store merchant, or any manager, clerk, assistant or other person acting for him, from the duty of making every reasonable effort to determine that the person presenting stamps for food or surplus food is the person whose name appears on the book of stamps, or an authorized representative of such person, and of requiring satisfactory identification if he has any reason to doubt the identity of the person or his right to possession of the stamps.

[1] 4 F.R. 1716 DI.

§ 304 *Change.* No retail food store merchant, and no manager, clerk, assistant or other person acting for him, shall give change in currency or otherwise in connection with food delivered for food order stamps or, except as provided in this section, deliver food of a value less than either a single stamp or a multiple thereof: *Provided, however,* That if such merchant or person so desires, he may extend credit in the form approved by the Corporation or the local representative of the Corporation for future delivery of food or surplus food, as the case may be, for the balance of the face value of an orange colored or blue surplus food order stamp, if the food delivered is of a value less than either a single stamp or a multiple thereof.

§ 305 *United States Post Office, wholesalers and banks.* The United States Post Office, wholesalers or banks may act as agents for retail food merchants in presenting to the Corporation claims for payment for food delivered to holders of food order stamps. The United States Post Office may, if authorized, act as agent for the Corporation in connection with payment upon such claims if properly presented.

§ 306 *Penalties.* Any person who makes or causes to be made or presents or causes to be presented, for payment or approval to or by any person or officer in the Corporation or anyone acting as agent for the Corporation, any claim upon the Corporation for payment of orange colored or blue surplus food order stamps, knowing such claim to be false, fictitious, or fraudulent, or in violation of the conditions herein contained; or whoever, in connection with the obtaining, holding, presentation, use and payment upon orange colored or blue surplus food order stamps, shall knowingly and willfully falsify or conceal or cover up by any trick, scheme, or device a material fact, or make or cause to be made any false or fraudulent statements or representations, or make or use or cause to be made or used, any false stamp, stamp book, stamp card, certificate, voucher, bill, account, or claim, knowing the same to contain any fraudulent or fictitious statement or entry or to be in violation of the conditions herein contained shall be subject to the fines and punishment as provided in the United States Criminal Code and elsewhere and shall be denied further participation in any matter or respect concerning orange colored or blue surplus food order stamps or the food distribution plan based thereon.

*Article IV—Construction*

§ 400 *Administrative interpretations.* The Corporation, in its discretion, may promulgate and issue administrative interpretations of any of the regulations and conditions herein contained and such interpretations, when duly issued and public notice given, shall be binding in the same manner and to the same extent as the regulations and conditions.

§ 401 *Derogation of rights.* Nothing contained in these regulations and conditions, or in any administrative interpretation thereof, shall be construed to be in derogation or modification of the right of the Secretary, the Corporation, or of the United States to exercise any jurisdiction or power granted by law.

In testimony whereof, I have hereunto set my hand and caused the official seal of the Department of Agriculture to be affixed hereto, in the city of Washington, District of Columbia, this 14th day of October 1939.

[SEAL] HARRY L. BROWN,
*Acting Secretary of Agriculture.*

## TITLE 25—INDIANS

## OFFICE OF INDIAN AFFAIRS

### PART 223—REGULATIONS GOVERNING DISBURSEMENT OF KLAMATH JUDGMENT FUND AND THE PAYMENTS IN LIEU OF ALLOTMENTS

Pursuant to the authority vested in me by the Act of June 1, 1938 (52 Stat. 605), and the Act of August 7, 1939 (Pub. No. 325, 76th Cong., 1st Sess.) the following regulations governing disbursement of the Klamath Judgment Fund and the Payments in Lieu of Allotments are hereby promulgated:

§ 223.1 *Approval of programs.* The superintendent of the Klamath Reservation, to the extent permitted by this part, shall approve or disapprove of all plans or programs submitted by Indians for disbursement of pro-rata shares of the Klamath Judgment Fund and the payments in lieu of allotment. Should the superintendent disapprove the plan or program, in whole or in part, the individual concerned shall have the right to appeal, through the superintendent, to the Commissioner of Indian Affairs. The superintendent shall promptly forward all appeals thus filed to the Commissioner of Indian Affairs with his comments. Preference shall be given by the superintendent to programs: (a) for the construction or improvement of Indian homes; (b) to provide better living conditions; (c) to establish the Indian in such enterprise or undertaking as will, with his resources, training, education and ability, best enable him to succeed in providing for himself and family; and (d) to provide a better education for those desirous of obtaining higher education. No plan or program for the expenditure of a sum of less than $25.00 shall be considered by the superintendent.

§ 223.2 *Repayment of loans.* The superintendent shall draw checks against the funds of an individual for the repayment of all debts due by him, according to the terms of the agreement signed by the individual, to the United States or to the Klamath Tribes. If the individual has borrowed from the Klamath Loan Fund, repayment of all or a part of which loan is not due under the loan agreement, an amount equal to the unpaid balance of the loan, plus interest computed at the rate and for the term agreed upon in the loan agreement, shall be withheld by the superintendent, except that it may be paid over to the individual for use under this part with the written consent of the Klamath Loan Board.

§ 223.3 *Use of judgment fund shares.* The superintendent may expend individual shares of the judgment fund for: purchase of land; improvement of land acquired or already held by the Indian; erection and improvement of suitable homes; purchase of building material, farming equipment, livestock, feed, food, seed, grain, tools, machinery, implements, household goods, bedding, clothing, and any other equipment or supplies necessary to enable the Indian to fit himself for or to engage in farming, livestock raising, industry, or such other pursuits or vocations, including education, as will enable him to become self-supporting; and health.

§ 223.4 *Use of payments in lieu of allotment.* The superintendent may expend the payments in lieu of allotment of individual Indians, for: industrial and agricultural assistance and the construction and improvement of homes, including the purchase of land and interests in land, building material, farming equipment, industrial equipment, trucks, livestock, feed, food, seed, tools, machinery, implements, household goods, bedding, clothing, and any other equipment or supplies necessary to enable the Indian to fit himself for or to engage in farming, livestock raising, industry, or such other industrial or agricultural pursuits or avocations as will enable him to become self-supporting; educational advancement; and financial assistance in case of illness, death, or other emergency.

§ 223.5 *Authority to withhold funds.* The superintendent may stop disbursement of funds in the execution of an approved program when he believes that the program or expenditure will not result in benefit to the Indian, and he may require either further justification for carrying out the program theretofore approved or the submission of a new program.

§ 223.6 *Family programs.* The funds of a husband and wife, and of any other adults in a family group, may be used in the execution of a family program, provided the written consent of each individual is filed with the superintendent. The available funds of a minor may be used in the execution of such family program, only if (a) the funds of such minors are used solely in the development, repair or maintenance of real or personal property owned by said minor or held in trust for him, or in the creation, development or completion of a project or undertaking or in the production of a gain or profit which will inure directly to the benefit of such minor; (b) the title to any real property or fixtures, purchased wholly or in part with his money is held in trust for him: *Provided*, That a minor's funds may not be used in the purchase of real property or fixtures unless seventy-five (75%) per cent or more of the purchase price is paid from his funds; or (c) the adults convey to the United States in trust for such minor sufficient real or personal property to assure, insofar as is possible, that the minor upon attaining majority will have, in lieu of the money, property of a value equal to that of his funds used in the execution of the program. The superintendent shall not approve a family program which involves the transfer to a minor, in exchange for his funds, of assets of a nature which will not be useful to him.

§ 223.7 *Limitations upon superintendent's authority.* The superintendent shall not, without the approval of the Commissioner of Indian Affairs: (a) approve any family plan or program for the expenditure of more than $3,800; (b) expend more than $500 of a minor's funds; (c) approve a plan or program for the purchase of land or interests in land; or (d) approve of a plan or program for the purchase of a passenger automobile. Authority for the expenditure of amounts in excess of those authorized in Sections 223.8, 223.9 and 223.10 must be obtained from the Commissioner of Indian Affairs. No funds shall be expended, except as provided in this part, without the approval of the Commissioner of Indian Affairs. Requests for authorization from the Commissioner of Indian Affairs shall be submitted by the superintendent with a full explanation of the circumstances, the program, and his report.

§ 223.8 *Allowances for support.* The superintendent may, upon a proper showing, make expenditures for monthly allowances for maintenance and support at a rate of not to exceed $150 per quarter for adults or $100 per quarter for minors. Allowances to minors must be solely for their direct benefit.

§ 223.9 *Medical, dental, and surgical treatment.* The superintendent may expend not to exceed $500 from the funds of any adult or minor to cover medical, dental, surgical, or hospital treatment, including nurse's services.

§ 223.10 *Education.* The superintendent may transfer to the superintendent of a non-reservation school not more than $350 for the use of a minor, including tuition, board and room, while in attendance at such school. The superintendent may expend not to exceed $350 a year from the funds of any minor for his tuition, board and room, and other expenses in a government, private or mission school. The superintendent shall give special attention to the educational needs of children and young people.

§ 223.11 *Funds not available for payment of certain debts.* Debts, except those to the United States and the Klamath Tribes, incurred by Indians prior to August 7, 1939, shall not be paid from any funds made available from the Klamath Judgment Fund. Debts of Indians will not be paid from the funds to be disbursed under this part unless previously authorized by the superintendent, except in emergency cases necessitating medical treatment or in the payment of last illness or funeral expenses,[1] as authorized in this part, and in any other exceptional cases where specific authority is granted by the Commissioner of Indian Affairs.

§ 223.12 *Issuance of purchase orders.* The superintendent may issue orders to Indians who are mentally incompetent or clearly incapable of acting for their best interest. The orders shall be headed "To Any Dealer" and the total sum to be expended shall be clearly shown. In addition, a detailed list of the goods, wares and merchandise to be purchased shall be set out therein. A notation shall be added to the effect that no cash shall be given to the Indian under any circumstances. The superintendent may also pay to the individual to whom the order is issued not more than $5.00 in cash to enable him to travel by convenient means to a locality where the goods may be purchased.

§ 223.13 *Disposition of funds in event of death.* The funds remaining to the credit of a deceased Indian shall be carried to the credit of the estate of such individual until his heirs have been determined. After payment of all proper claims against the funds, including reimbursable or other debts due the United States or the Tribes, the balance, including any sum to his credit on the books of the Indian Office, will be transferred to the individual accounts of the heirs in accordance with the heirship findings of the Secretary of the Interior. Such funds shall be expended in accordance with this part. The Superintendent may disburse not to exceed $50 per month for the support of the widow of a decedent; $50 per month for the support of the minor children of a decedent, and $50 per month for the support of orphaned minors. Before making the disbursement, the superintendent shall reasonably satisfy himself that the recipients are the probable heirs to the estate, that they are in actual need of assistance, and that the value of the estate is sufficient to justify such payments. Complete record of such disbursements must be reported by the superintendent to the examiner of inheritance and by the latter considered and included in his report in the probate proceedings.

§ 223.14 *Certain minors' funds unavailable.* The sum of $1,500 of each unallotted, minor Indian entitled to payment in lieu of allotment is not available during the minority of such Indian for the purposes of this part. Said sum is subject to the conditions and requirements of Sec. 2 of the Act of June 1, 1938 (52 Stat. 605), as amended by Sec. 2b of the Act of August 7, 1939 (Pub. No. 325, 76th Congress, 1st Session). No part of the $500 of each minor's share of the judgment fund is available for the purposes of this part. This share of each minor's funds shall be held intact during his minority, as provided for in Sec. 1 of the Act of August 7, 1939.

§ 223.15 *Definition of "minor."* The term "minor" shall include all members of the tribe less than twenty-one years of age, except those eighteen years of age or over and who are married or have families of their own to support.

§ 223.16 *Branding.* Livestock purchased, except horses, shal be branded I.D. and also with the individual brand of the Indian. All personal property purchased shall be covered by a bill of sale in the name of the superintendent in trust for the individual, as provided for in Part 221.27.

§ 223.17 *Transfer of funds.* The superintendent may transfer to the superintendent of another reservation the funds dealt with in this part to the credit of any Indian where such Indian is a resident within the jurisdiction of

DECLARATION OF POLICY IN DISBURSEMENT OF THE KLAMATH JUDGMENT FUND AND THE PAYMENTS IN LIEU OF ALLOTMENTS

OCTOBER 3, 1939.

The Klamath Judgment Fund, as well as the Payments in Lieu of Allotment, represent the cash equivalent of land. The judgment fund is a payment to the Tribe as a whole to recompense it for the taking of the Yamsey Mountain tract, and should be treated by the Klamath Indians as a capital asset, in the nature of land, and thus to be conserved. The payments made to individuals in lieu of an allotment of land are, as the name indicates, money paid to the individual to provide a capital basis for his efforts to become self-supporting.

Congress has authorized the pro-ration of a portion of the judgment fund to living Indians for their use to foster their development and education, and to enable them to become self-supporting. The use of the money payment in lieu of allotment has been similarly restricted by the language of the statute. The objects for which the individual portions of the judgment fund and the payments in lieu of allotment may be expended have been strictly limited and defined by the Acts of Congress as indicated by the following extracts from the two acts.

Purchase of land; improvement of lands acquired or already held by the Indian; erection and improvement of suitable homes; repayment of any loans received from the United States or from the Klamath tribal funds; purchase of building material, farming equipment, livestock, feed, food, seed, grain, tools, machinery, implements, household goods, bedding, clothing, and any other equipment or supplies necessary to enable the Indians to fit themselves for or to engage in farming, livestock, industry, or such other pursuits or vocations, including education, as will enable them to become self-supporting; and health purposes: *Provided, however*, That the funds of the aged, infirm, decrepit, and incapacitated members, and of minors, may be used for their proper maintenance and support. The remainder of the share of each minor Indian shall be held intact until such Indian reaches his majority, when it, together with interest at the rate of 4 per centum per annum, shall be available for expenditure for the purposes specified herein. As herein used, the term "minor" shall include all members of the tribe less that twenty-one years of age, except that minors eighteen years of age or over and who are married or have families of their own to support, shall be regarded as adults. On the death of any enrolled member, adult, or minor, the sum on deposit to his credit shall be distributed as personal property, and shall be available for expenditure by the distributees only for the purposes herein authorized: *Provided, however*, That of the aforesaid $2,000 to be prorated to each person, $100 shall be paid to each member of said tribes as a per capita payment, free from the aforesaid restrictions, under rules and regulations prescribed by the Secretary of the Interior.

SEC. 3. The payments herein authorized shall be deposited to the credit of the individual Indian money accounts of such Indians subject to expenditure by such Indians, under such rules and regulations as the Secretary of the Interior may prescribe for (1) industrial and agricultural assistance, and the construction and improvement of homes, including the purchase of land and interests in land, building material, farming equipment, industrial equipment, trucks, livestock, feed, food, seed, tools, machinery, implements, household goods, bedding, clothing, and any other equipment or supplies necessary to enable the Indians to fit themselves for or to engage in the farming, livestock industry, or such other industrial or agricultural pursuits or avocations as will enable them to become self-supporting; (2) the educational advancement of such Indians; (3) financial assistance in cases of illness, death, or other emergency; (4) the repayment of reimbursable debts previously contracted; or (5) security for or the repayment of loans made to such Indians from any Klamath revolving loan fund now existent or which shall hereafter be created.

The programs to be developed must, therefore, be in accord with such congressional policy, which apply equally to those who may reside at Klamath or any other jurisdiction and those who by reason of having received patents in fee or otherwise are residing outside of the jurisdiction of any Indian superintendent.

Production of income, which may be used without the restrictions imposed by the present regulations, is dependent upon the success of the enterprise in which the individual invests his capital. Individuals should use great care and thought in determining the uses to which their share of the judgment fund, or payment in lieu of allotment, will be put, with a view to obtaining the greatest amount of income for him over the longest possible period.

During the time the Klamath Loan Fund has been in operation many loans were made with the knowledge that repayments would come from the money payments in lieu of allotment. After these payment funds have been utilized there will be no assured future cash payments from tribal funds or other sources of sufficient size to warrant extending substantial credit to a borrower by the Klamath Loan Board. Hereafter the credit of a borrower will depend upon the showing he has made under his program and the assets which he can tender the Loan Board as security for the repayment of his obligation. Individuals should and must give thought to means of carefully preserving the asset value of the money made available under these acts and regulations so that if further loans are required in the future they may be obtained from the Klamath Loan Fund.

The money here involved represents a substantial part of the heritage of living Indians, which it has been, and is, the policy of the Department to conserve. The Department's policy has been approved by Congress in the two applicable acts. In order that the value of this heritage may be of the greatest benefit to the present generation and be preserved for future generations, those responsible for the preparation and consideration of the plans for the expenditure of these funds are charged with the duty of safeguarding such funds and of giving careful consideration to any and all plans for their use in order to assist the Indian in making progress to the end that he may become self-supporting.

The heads of the various divisions at the agency will advise with and assist any individual in the preparation of his plan or program. In the ordinary case, approval of the plan or program will be expedited by taking it up with the division head, most familiar with the type of program contemplated, before it is submitted to the Superintendent.

After the individual has carefully prepared his program for the expenditure of all, or a portion, of his available funds, with special regard to the question of whether the purposes for which he desires to expend the money are authorized by the applicable Act of Congress, he shall present the same to the superintendent.

In all family plans or programs which contemplate the use of funds of minors or adults (other than the head of the family and his wife) attention must be given to the probability that in the future such minors or adults may desire to create a new home or to develop their individual plans or programs on their own allotments or on land they may acquire. Care should be exercised so that the normal development of such individuals will not be impeded.

E. K. BURLEW,
*Acting Secretary of the Interior.*

## FEDERAL TRADE COMMISSION.

*United States of America—Before Federal Trade Commission*

[Docket No. 3921]

IN THE MATTER OF LIGGETT & MYERS TOBACCO COMPANY, INC., RESPONDENT

COMPLAINT

The Federal Trade Commission, having reason to believe that the respondent named in the caption hereof, and hereinafter more particularly designated and described, since June 19, 1936, has violated and is now violating the provisions of Section 2 of the Clayton Act as amended by the Robinson-Patman Act, approved June 19, 1936 (U.S.C., title 15, sec. 13), hereby issues this, its complaint, stating its charges with respect thereto as follows:

I

PARAGRAPH 1. Respondent is a corporation of the state of New Jersey. Its principal office is at 212 Fifth Avenue, New York City, New York. Its business is that of manufacturing, selling, and distributing cigarettes, cigarette tobacco, smoking tobacco, plug, twist, fine cut and scrap tobacco, little cigars, and other tobacco products and sundries. It has places of business, factories, and warehouses in Durham, North Carolina, and in other places and states.

PAR. 2. At all times during the period hitherto, since June 19, 1936, respondent maintained and is now maintaining a continuous course of trade and commerce in said products among and between the several states in which respondent has had and now has places of business, factories and warehouses, and between each of such states and the several other states of the United States and the District of Columbia. Respondent, continuously during said period, while engaged in its business aforesaid, and in commerce, namely, trade and commerce as aforesaid, in the course of such commerce, sold, shipped, and distributed its products from the states in which respondent has had and now has places of business, factories, and warehouses, to various purchasers of its products, namely, distributors of tobacco products, located in such states and in the several other states of the United States and the District of Columbia, for use, consumption, and resale therein.

PAR. 3. Respondent, during the period aforesaid, as and when it determined to accept an order for its products and charge it to a certain distributor, designated such distributor as a "direct customer", known also sometimes as a "direct buying customer", and placed such distributor on its list, called a "direct list", and sometimes as a "list of direct customers." Among the purchasers of respondent's products on its "direct list" are jobbers and some retailers such as chain stores. Among the purchasers of respondent's products "not on direct list" are subjobbers and some retailers such as independent drug, grocery, and cigar stores. The latter purchasers are sometimes called "indirect customers" and "indirect buying customers", and include all distributors of respondent's products except those on its "direct list."

Respondent has extended and is now extending the relationship of seller and customer between it and retail distributors "not on direct list", by means of its many dealings with such distributors, in connection with the sale of its products, and particularly by the use of its many salesmen, sometimes referred to as "missionary men." Such salesmen have made many sales to such distributors. Respondent has shipped its products to many retail distributors "not on direct list", upon receipt of their orders instructing respondent to make such delivery, and to make its charges therefor against a particular jobber on respondent's "direct list" (such shipments being sometimes called "drop shipments." Retail distributors to whom such sales are made, those to whom such shipments are made, and those with whom respondent has had dealings in connection with the sale of its products, are, by reason of respondent's acts and practices, in fact, customers of, and purchasers from, respondent. By means of such sales, shipments, and other dealings, respondent also extends its control over the prices at which its products are sold by all retail distributors to consumers. For illustration of a common practice of respondent in this connection, on January 12, 1939, one of respondent's missionary men sold to retail distributors "not on direct list", in Indianapolis, Indiana, Velvet Tobacco at $1.12 per dozen, with one package free with each dozen, or at approximately $1.03½ per dozen. Respondent was then selling said tobacco to jobbers in said city at its regular standard price of $1.27½ per dozen, less 10% and 2%, or approximately $1.12½ per dozen. Respondent thus sold said tobacco to such retail distributors at a lower price than it was then selling the same tobacco in the same and in larger quantities to jobbers in said city. Immediately after such sales were made, respondent's posters were affixed at prominent positions on the windows of such retail distributors reading "Velvet Tobacco, 10¢. Regular 15¢ Size", and such tobacco was then sold to consumers in Indianapolis, Indiana, at 10¢ a package.

PAR. 4. Respondent, during the period aforesaid, listed the prices of its tobacco products and sundries in descriptive price lists published and distributed by it from time to time, and offered and allowed, as regular discounts from such prices, a 10 per cent discount, sometimes called a "trade discount", and after the deduction of such discount, a 2 per cent discount, sometimes called a "cash discount." List prices as reduced by such discounts are sometimes referred to as "standard prices." Respondent's standard prices serve as a basis for the standard prices of wholesalers and retailers.

Deviations from such standard prices have been effected by respondent during the period aforesaid as follows:

(a) Respondent's salesmen called upon certain retail distributors of respondent's products "not on direct list" and then and there solicited orders for certain of respondent's tobacco products from some of said distributors thus called upon; and upon taking orders from such distributors included in such orders substantial quantities of respondent's products of standard grade and quality and of material value, without making any specific charge therefor (such transactions being sometimes called "deals", "free deals", "combinations", and "gratis"). In some instances said salesmen made immediate delivery of such orders to the respective purchasers. In all other cases respondent's salesmen arranged to have the products included in such orders shipped by respondent directly to the respective purchasers (such transactions being sometimes called "drop shipment deals", and such shipments "drop shipments"). In cases where such orders were taken for delivery by the drop shipment method, the respective purchasers from whom such orders were taken, following the practices developed by respondent in such transactions, made arrangements with some particular jobber on respondent's "direct list" to have their respective orders charged to such jobber, and to pay such jobber the amount of their respective orders, being the list price of such products less an agreed amount. The amount which the retail distributors paid for the tobacco products included in such orders was, according to the practices thus developed, a sum substantially less than the amount which other competing retail distributors paid to jobbers of respondent's products for an equal quantity of tobacco products of like grade and quality purchased by them at the same time.

PAR. 5. By means of acts and practices, as aforesaid, and particularly those described above in paragraph four, respondent, during the period aforesaid, discriminated in price between different purchasers of commodities, to-wit, tobacco products, of like grade and quality; one or more of the purchases involved in such discriminations were in commerce; and such commodities were sold for use, consumption and resale within the United States and the District of Columbia. Respondent is now discriminating in price as aforesaid.

The effect of such discriminations may be to injure, destroy and prevent competition with the purchasers from respondent who received the benefit of such discriminations and with the customers of such purchasers. Such discriminations constitute a violation of Subsection (a) of Section 2 of the Act of Congress aforesaid.

II

And the Federal Trade Commission, as and for a further and second count of its complaint, states:

PARAGRAPH 1. The Federal Trade Commission repeats and re-alleges as a part of this second count of this complaint, each and all of the allegations contained in paragraphs one, two, and three, of count one of this complaint, with like effect as if herein fully repeated, and incorporates herein all the facts therein set forth.

PAR. 2. Respondent, during said period, made and is now making valuable payments and gave and is now giving valuable considerations to certain distributors, such as chain stores and other retailers, selected by respondent for the furnishing by them of services and facilities, such as counter and window displays, for the advertising of respondent's products. Such payments and considerations were not and are not now available to other distributors competing in the distribution of respondent's products. Said practices were conducted in such manner as to result in giving certain distributors exclusively the benefits accruing from said payments and considerations.

For example, in carrying out such practices, respondent paid in 1937, as charged aforesaid, for window displays, $59,560.00 to D. A. Schulte, Inc.

PAR. 3. By means of acts and practices, as aforesaid, and particularly those described above in paragraph two, respondent, during the period aforesaid, contracted to pay and paid, and is now contracting to pay and paying, to and for the benefit of certain of its customers, certain valuable payments and considerations, as compensation for, and in consideration for, certain services and facilities furnished by and through such customers in connection with the handling, sale, and offering for sale, of the tobacco products manufactured, sold, and offered for sale by respondent. Such payments and considerations were not, and are not now, available on proportionately equal terms to all other customers of respondent competing in the distribution of such products, and constitute a violation of Subsection (d) of Section 2 of the Act of Congress aforesaid.

III

And the Federal Trade Commission, as and for a further and third count of its complaint, states:

PARAGRAPH 1. The Federal Trade Commission repeats and re-alleges as a part of this third count of this complaint, each and all of the allegations contained in paragraphs one, two, and three, of count one of this complaint, with like effect as if herein fully repeated, and incorporates herein all the facts therein set forth.

PAR. 2. Respondent has allowed and is now allowing some direct customers a period of time of a certain definite length, for example, 60 days, for payment on a 2 per cent discount basis, sometimes called a "cash discount", of products ordered by and charged to them which it has not allowed and is not now allowing to other direct customers. The allowance of time for payment as aforesaid constitutes a service to respondent's customers which becomes of greater value as the length of such time is extended.

For example, respondent allowed, as charged aforesaid, its jobber Eli Witt Cigar Company, Tampa, Florida, 60 days for payment on said cash discount basis and, following its general rule applicable to jobbers, allowed other jobbers, competing in the distribution of respondent's products with said favored jobber, 10 days for payment on such basis.

PAR. 3. By means of acts and practices, as aforesaid, and particularly by the furnishing of the services described above in paragraph two, respondent, during the period aforesaid, discriminated and is now discriminating in favor of certain purchasers against certain other purchasers of respondent's products bought by them for resale. Such services were and are now furnished by respondent to such favored purchasers upon terms not accorded to all purchasers on proportionately equal terms, in violation of Subsection (e) of Section 2 of the Act of Congress aforesaid.

Wherefore, the premises considered, the Federal Trade Commission, on this 11th day of October, A. D., 1939, issues its complaint against said respondent.

NOTICE

Notice is hereby given you, Liggett & Myers Tobacco Company, Inc., respondent herein, that the 17th day of November, A. D. 1939, at 2 o'clock in the afternoon, is hereby fixed as the time, and the offices of the Federal Trade Commission in the City of Washington, D. C., as the place, when and where a hearing will be had on the charges set forth in this complaint, at which time and place you will have the right, under said Act, to appear and show cause why an order should not be entered by said Commission requiring you to cease and desist from the violations of the law charged in the complaint.

You are notified and required, on or before the twentieth day after service upon you of this complaint, to file with the Commission an answer to the complaint. If answer is filed and if your appearance at the place and on the date above stated be not required, due notice to that effect will be given you. The Rules of Practice adopted by the Commission with respect to answers or failure to appear or answer (Rule VII) provide as follows:

In case of desire to contest the proceeding the respondent shall, within twenty (20) days from the service of the complaint, filed with the Commission an answer to the complaint. Such answer shall contain a concise statement of the facts which constitute the ground of defense. Respondent shall specifically admit or deny or explain each of the facts alleged in the complaint, unless respondent is without knowledge, in which case respondent shall so state.

* * * * *

Failure of the respondent to file answer within the time above provided and failure to appear at the time and place fixed for hearing shall be deemed to authorize the Commission, without further notice to respondent, to proceed in regular course on the charges set forth in the complaint.

If respondent desires to waive hearing on the allegations of fact set forth in the complaint and not to contest the facts, the answer may consist of a statement that respondent admits all the material allegations of fact charged in the complaint to be true. Respondent by such answer shall be deemed to have waived a hearing on the allegations of fact set forth in said complaint and to have authorized the Commission, without further evidence, or other intervening procedure, to find such facts to be true, and if in the judgment of the Commission such facts admitted constitute a violation of law or laws as charged in the complaint, to make and serve findings as to the facts and an order to cease and desist from such violations. Upon application in writing made contemporaneously with the filing of such answer, the respondent, in the discretion of the Commission, may be heard on brief, in oral argument, or both, solely on the question as to whether the facts so admitted constitute the violation or violations of law charged in the complaint.

By the Commission.

[Docket No. 3922]

IN THE MATTER OF STEPHANO BROTHERS
RESPONDENT

COMPLAINT

The Federal Trade Commission, having reason to believe that the respondent named in the caption hereof, and hereinafter more particularly designated and described, since June 19, 1936, has violated and is now violating the provisions of Section 2 of the Clayton Act as amended by the Robinson-Patman Act, approved June 19, 1936 (U.S.C., title 15, sec. 13), hereby issues this, its complaint, stating its charges with respect thereto as follows:

PARAGRAPH 1. Respondent is a corporation of the state of Pennsylvania. Its principal office is at 1014 Walnut Street, Philadelphia, Pennsylvania. Its business is that of manufacturing, selling, and distributing cigarettes and other tobacco products and sundries. It has places of business, factories, and warehouses in Philadelphia, Pennsylvania, and in other places and states.

PAR. 2. At all times during the period hitherto, since June 19, 1936, respondent maintained and is now maintaining a continuous course of trade and commerce in said products among and between the several states in which respondent has had and now has places of business, factories and warehouses, and between each of such states and the several other states of the United States and the District of Columbia. Respondent, continuously during said period, while engaged in its business aforesaid, and in commerce, namely, trade and commerce as aforesaid, in the course of such commerce, sold, shipped, and distributed its products from the states in which respondent has had and now has places of business, factories, and warehouses, to various purchasers of its products, namely, distributors of tobacco products, located in such states and in the several other states of the United States and the District of Columbia, for use, consumption, and resale therein.

PAR. 3. Respondent, during the period aforesaid, as and when it determined to accept an order for its products and charge it to a certain distributor, designated such distributor as a "direct customer", known also sometimes as a "direct buying customer", and placed such distributor on its list, called a "direct list", and sometimes as a "list of direct customers". Among the purchasers of respondent's products on its "direct list" are jobbers and some retailers such as chain stores. Among the purchasers of respondent's products "not on direct list" are subjobbers and some retailers such as independent drug, grocery, and cigar stores. The latter purchasers are sometimes called "indirect customers" and "indirect buying customers", and include all distributors of respondent's products except those on its "direct list".

Respondent has extended and is now extending the relationship of seller and customer between it and retail distributors "not on direct list", by means of its many dealings with such distributors, in connection with the sale of its products, and particularly by the use of its many salesmen, sometimes referred to as "missionary men". Such salesmen have made many sales to such distributors. Respondent has shipped its products to many retail distributors "not on direct list", upon receipt of their orders instructing respondent to make such delivery, and to make its charges therefor against a particular jobber on respondent's "direct list" (such shipments being sometimes called "drop shipments"). Retail distributors to whom such sales are made, those to whom such shipments are made, and those with whom respondent has had dealings in connection with the sale of its products, are, by reason of respondent's acts and practices, in fact, customers of, and purchasers from, respondent. By means of such sales, shipments, and other dealings, respondent also extends its control over the prices at which its products are sold by all retail distributors to consumers.

PAR. 4. Respondent, during said period, made and is now making valuable payments and gave and is now giving valuable considerations to certain distributors, such as chain stores and other retailers, selected by respondent for the furnishing by them of services and facilities, such as counter and window displays, for the advertising of respondent's products. Such payments and considerations were not and are not now available to other distributors competing in the distribution of respondent's products. Said practices were conducted in such manner as to result in giving certain distributors exclusively the benefits accruing from said payments and considerations.

For example, in carrying out such practices, respondent paid in 1937, as charged aforesaid, for window displays, $2,500.00 per month, to United Cigar-Whelan Drug Stores Corporation, of New York City, and $625.00, per month, to D. A. Schulte, Inc., New York City.

PAR. 5. By means of acts and practices, as aforesaid, and particularly those described above in paragraph four, respondent, during the period aforesaid, contracted to pay and paid, and is now contracting to pay and paying, to and for the benefit of certain of its customers, certain valuable payments and considerations, as compensation for, and in consideration for, certain services and facilities furnished by and through such customers in connection with the handling, sale, and offering for sale, of the tobacco products manufactured, sold, and offered for sale by respondent. Such payments and considerations were not, and are not now, available on proportionately equal terms to all other customers of respondent competing in the distribution of such products, and constitute a violation of Subsection (d) of Section 2 of the Act of Congress aforesaid.

Wherefore, the premises considered, the Federal Trade Commission, on this 11th day of October, A. D. 1939, issues its complaint against said respondent.

NOTICE

Notice is hereby given you, Stephano Brothers, respondent herein, that the 17th day of November, A. *United States of America—Before Federal Trade Commission*

[Docket No. 3926]

IN THE MATTER OF FEDERAL YEAST CORPORATION

COMPLAINT

The Federal Trade Commission, having reason to believe that the party respondent named in the caption hereof and hereinafter more particularly designated and described, since June 19, 1936, has violated and is now violating the provisions of Section 2 of the Clayton Act, as amended by the Robinson-Patman Act approved June 19, 1936 (U.S.C. Title 15, Section 13), hereby issues its complaint, stating its charges with respect thereto as follows:

PARAGRAPH 1. Respondent Federal Yeast Corporation is a corporation organized and existing under and by virtue of the law of the State of Maryland, having its principal office and plant located at Colgate-Highlandtown, P. O. Baltimore, Maryland.

PAR. 2. Respondent since June 19, 1936, has been and now is engaged in the manufacture, sale and distribution of baker's yeast. In the course and conduct of such sale and distribution it caused said yeast to be shipped and transported in commerce from its plant in the State of Maryland to purchasers thereof in and among the various states of the United States and there has been at all times herein mentioned a current of trade and commerce in respondent's yeast between the state wherein respondent's plant is located and various other states of the United States.

PAR. 3. Said respondent in the course and conduct of its business since June 19, 1936, has been and is now in substantial competition with other corporations, individuals, partnerships and firms engaged in manufacturing, selling and distributing baker's yeast, in commerce.

PAR. 4. In the course and conduct of its business as aforesaid, the respondent has been and now is discriminating in price between different purchasers of its said product of like grade and quality, by giving and allowing certain purchasers of baker's yeast used in the manufacture of bread and allied products, different prices than given or allowed other of its said purchasers competitively engaged one with the other, in the sale and distribution of bread and allied products within the various states of the United States. To illustrate, during the year of 1937 respondent sold 5,681 pounds of baker's yeast to Benkert's Bakery, 3012 30th Ave., Long Island City, N. Y., at 13¢ per pound and during the same period sold Sabriett Food Products Company, 90 E. Third St., New York City, N. Y., a competitor, 10,910 pounds of baker's yeast at 11¢ per pound and 27,710 pounds of baker's yeast at 10¢ per pound, thus affording the last mentioned purchaser a saving of $1,049.50 during said period upon the basis of price charged to first mentioned purchaser.

PAR. 5. Further discrimination in price between different competing purchasers of its product is brought about as a result of respondent delivering large quantities of baker's yeast to certain of its purchasers for which no specific charge is made in addition to yeast actually sold and delivered to these same purchasers for which a specific price is charged, thus reducing the cost to said favored customers of the yeast actually purchased, while at the same time other purchasers competitively engaged in the sale of bread and allied products with the said favored purchasers and paying the same price per pound for said product are not furnished such additional yeast. To illustrate, during the month of December 1936, Kallik, 1018 Intervale Ave., New York City, N. Y., purchased 1,171 pounds of baker's yeast at 13¢ per pound and in addition to said purchased yeast respondent delivered 115 pounds of baker's yeast for which no charge was made, while during the same period Your Baking, 1141 Burnett Place, New York City, N. Y. a competitor, purchased 915 pounds of baker's yeast at 13¢ per pound and respondent delivered no additional yeast to said purchaser without charge.

PAR. 6. Respondent further discriminates in price between competing purchasers by granting cash discounts of 1% to 2% to certain of its purchasers which are not granted to others who pay in the same manner and within the same time as those receiving such discounts.

PAR. 7. The effect of such discriminations in price as set forth in Paragraphs Four, Five and Six hereof has been or may be substantially to lessen competition in the line of commerce in which respondent and its competitors are engaged and may be to injure, destroy or prevent competition in the sale and distribution of bread and allied products between those of respondent's purchasers who receive the benefits of such discriminations and competing purchasers who do not receive such benefits.

PAR. 8. The foregoing alleged acts and practices are in violation of subsection (a) of Section 2 of the Clayton Act as amended.

Wherefore, the premises considered, the Federal Trade Commission on this 13th day of October, A. D. 1939, issues its complaint against said respondent.

NOTICE

Notice is hereby given you, Federal Yeast Corporation, respondent herein, that the 17th day of November, A. D. 1939, at 2 o'clock in the afternoon, is hereby fixed as the time, and the offices of the Federal Trade Commission in the City of Washington, D. C., as the place, when and where a hearing will be had on the charges set forth in this complaint, at which time and place you will have the right, under said Act, to appear and show cause why an order should not be entered by said Commission requiring you to cease and desist from the violations of the law charged in the complaint.

You are notified and required, on or before the twentieth day after service upon you of this complaint, to file with the Commission an answer to the complaint. If answer is filed and if your appearance at the place and on the date above stated be not required, due notice to that effect will be given you. The Rules of Practice adopted by the Commission with respect to answers or failure to appear or answer (Rule VII) provide as follows:

In case of desire to contest the proceeding the respondent shall, within twenty (20) days from the service of the complaint, file with the Commission an answer to the complaint. Such answer shall contain a concise statement of the facts which constitute the ground of defense. Respondent shall specifically admit or deny or explain each of the facts alleged in the complaint, unless respondent is without knowledge, in which case respondent shall so state.

* * * * *

Failure of the respondent to file answer within the time above provided and failure to appear at the time and place fixed for hearing shall be deemed to authorize the Commission, without further notice to respondent, to proceed in regular course on the charges set forth in the complaint.

If respondent desires to waive hearing on the allegations of fact set forth in the complaint and not to contest the facts, the answer may consist of a statement that respondent admits all the material allegations of fact charged in the complaint to be true. Respondent by such answer shall be deemed to have waived a hearing on the allegations of fact set forth in said complaint and to have authorized the Commission, without further evidence, or other intervening procedure, to find such facts to be true, and if in the judgment of the Commission such facts admitted constitute a violation of law or laws as charged in the complaint, to make and serve findings as to the facts and an order to cease and desist from such violations. Upon application in writing made contemporaneously with the filing of such answer, the respondent, in the discretion of the Commission, may be heard on brief, in oral argument, or both, solely on the question as to whether the facts so admitted constitute the violation or violations of law charged in the complaint.

In witness whereof, the Federal Trade Commission has caused this, its complaint, to be signed by its Secretary, and its official seal to be hereto affixed, at Washington, D. C., this 13th day of October, A. D. 1939.

II. DESCRIPTION OF NOTES

1. The notes will be dated November 2, 1939, and will bear interest from that date at the rate of 1 percent per annum, payable on a semiannual basis on May 15 and November 15 in each year until the principal amount becomes payable, the first coupon being dated May 15, 1940. They will mature November 15, 1941, and will not be subject to call for redemption prior to maturity.

2. These notes are issued under the authority of the act approved March 8, 1938, (Public No. 442—75th Congress) as amended, which provides that these notes shall be fully and unconditionally guaranteed both as to interest and principal by the United States; that they shall be deemed and held to be instrumentalities of the Government of the United States, and as such they and the income derived therefrom shall be exempt from Federal, State, municipal, and local taxation (except surtaxes, estate, inheritance, and gift taxes); and that the notes shall be lawful investments and may be accepted as security for all fiduciary, trust, and public funds the investment or deposit of which shall be under the authority or control of the United States or any officer or officers thereof.

3. The authorizing act further provides that in the event the Commodity Credit Corporation shall be unable to pay upon demand, when due, the principal of, or interest on, such obligations, the Secretary of the Treasury shall pay to the holder the amount thereof which is authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, and thereupon to the extent of the amount so paid the Secretary of the Treasury shall succeed to all the rights of the holders of such obligations.

4. Bearer notes with interest coupons attached will be issued in denominations of $1,000, $5,000, $10,000 and $100,000. The notes will not be issued in registered form.

III. SUBSCRIPTION AND ALLOTMENT

1. Subscriptions will be received at the Federal Reserve banks and branches and at the Treasury Department, Washington, and should be accompanied by notes of Series C tendered for payment, to a par amount equal to the par amount of notes of Series E subscribed for. Banking institutions generally may submit subscriptions for account of customers, but only the Federal Reserve banks and the Treasury Department are authorized to act as official agencies. The Secretary of the Treasury reserves the right to close the books as to any or all subscriptions or classes of subscriptions at any time without notice.

2. The Secretary of the Treasury reserves the right to reject any subscription, in whole or in part, to allot less than the amount of notes applied for, to make allotments in full upon applications for smaller amounts and to make reduced allotments upon, or to reject, applications for larger amounts, or to adopt any or all of said methods or such other methods of allotment and classification of allotments as shall be deemed by him to be in the public interest; and his action in any or all of these respects shall be final. Subject to these reservations, all subscriptions will be allotted in full. Allotment notices will be sent out promptly upon allotment.

IV. PAYMENT

1. Payment at par for notes subscribed for hereunder must be made on or before November 2, 1939, or on later allotment, and may be made only through application of the proceeds of payment of a like par amount of notes of Series C, maturing November 2, 1939, tendered hereunder.

WHEREAS twenty-one years ago, on November 11, 1918, the nations then engaged in the World War agreed to an armistice terminating hostilities; and

WHEREAS Senate Concurrent Resolution 18, Sixty-ninth Congress, passed June 4, 1926 (44 Stat. 1982), reads in part:

"That the President of the United States is requested to issue a proclamation calling upon the officials to display the flag of the United States on all Government buildings on November 11 and inviting the people of the United States to observe the day in schools and churches, or other suitable places, with appropriate ceremonies expressive of our gratitude for peace and our desire for the continuance of friendly relations with all other peoples"

and the act approved May 13, 1938 (52 Stat. 351), provides that "the 11th day of November in each year, a day to be dedicated to the cause of world peace and to be hereafter celebrated and known as Armistice Day, is hereby made a legal public holiday"; and

WHEREAS, in the tragic situation in which the world finds itself today, with the destructive forces of war once again unleashed, it is appropriate for the people of the United States to reflect upon that hour of November 11, 1918, when the voices of war were silenced, and to look forward even now to a time when a just and enduring peace shall be established among all the peoples of the earth;

NOW, THEREFORE, I, FRANKLIN D. ROOSEVELT, President of the United States of America, do hereby direct that on November 11, 1939, the flag of the United States be displayed on all Government buildings, and I invite the people of the United States to observe the day in schools and churches, or other suitable places, with appropriate ceremonies.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of the United States of America to be affixed.

## FEDERAL TRADE COMMISSION.

*United States of America—Before Federal Trade Commission*

[Docket No. 3927]

IN THE MATTER OF THE AMERICAN TOBACCO COMPANY, RESPONDENT

COMPLAINT

The Federal Trade Commission, having reason to believe that the respondent named in the caption hereof, and hereinafter more particularly designated and described, since June 19, 1936, has violated and is now violating the provisions of Section 2 of the Clayton Act as amended by the Robinson-Patman Act, approved June 19, 1936 (U.S.C., title 15, sec. 13), hereby issues this, its complaint, stating its charges with respect thereto as follows:

I

PARAGRAPH 1. Respondent is a corporation of the state of New Jersey. Its principal place of business is at 111 Fifth Avenue, New York City, New York. Its business is that of manufacturing, selling, and distributing cigarettes, cigarette tobacco, smoking tobacco, chewing tobacco, scrap, twist and plug tobacco, little cigars, cigars, and other tobacco products and sundries. It has places of business, factories, and warehouses in Durham, North Carolina, and in other places and states.

PAR. 2. At all times during the period hitherto, since June 19, 1936, respondent maintained and is now maintaining a continuous course of trade and commerce in said products among and between the several states in which respondent has had and now has places of business, factories and warehouses, and between each of such states and the several other states of the United States and the District of Columbia. Respondent, continuously during said period, while engaged in its business aforesaid, and in commerce, namely, trade and commerce as aforesaid, in the course of such commerce, sold, shipped, and distributed its products from the states in which respondent has had and now has places of business, factories, and warehouses, to various purchasers of its products, namely, distributors of tobacco products, located in such states and in the several other states of the United States and the District of Columbia, for use, consumption, and resale therein.

PAR. 3. Respondent, during the period aforesaid, as and when it determined to accept an order for its products and charge it to a certain distributor, designated such distributor as a "direct customer", known also sometimes as a "direct buying customer", and placed such distributor on its list, called a "direct list", and sometimes as a "list of direct customers". Among the purchasers of respondent's products on its "direct list" are jobbers and some retailers such as chain stores. Among the purchasers of respondent's products "not on direct list" are subjobbers and some retailers such as independent drug, grocery, and cigar stores. The latter purchasers are sometimes called "indirect customers" and "indirect buying customers", and include all distributors of respondent's products except those on its "direct list".

Respondent has extended and is now extending the relationship of seller and customer between it and retail distributors "not on direct list", by means of its many dealings with such distributors, in connection with the sale of its products, and particularly by the use of its many salesmen, sometimes referred to as "missionary men". Such salesmen have made many sales to such distributors. Respondent has shipped its products to many retail distributors "not on direct list", upon receipt of their orders instructing respondent to make such delivery, and to make its charges therefor against a particular jobber on respondent's "direct list" (such shipments being sometimes called "drop shipments"). Retail distributors to whom such sales are made, those to whom such shipments are made, and those with whom respondent has had dealings in connection with the sale of its products, are, by reason of respondent's acts and practices, in fact, customers of, and purchasers from, respondent. By means of such sales, shipments, and other dealings, respondent also extends its control over the prices at which its products are sold by all retail distributors to consumers. For illustration of a common practice of respondent in this connection, on May 6, 1938, respondent shipped to Poole Dry Goods Company of Springfield, Massachusetts, a retail distributor "not on direct list", pursuant to an order taken by one of its missionary men, a quantity of its tobacco products, and sent its invoice for such purchase to its jobber, Nemrow Bros., Inc., of said city, calling for payment of $752.60, less discounts of 10% and 2%, or $663.80. Said shipment included one hundred ten thousand six hundred Lucky Strike cigarettes priced in said invoice at $691.25 less discounts of 10% and 2%, or $609.69. Said shipment included 10 dozen 15¢ tins of Half and Half tobacco for which no charge was made in said invoice. Respondent's regular standard price to jobbers in said city for said Half and Half tobacco was $12.75, less discounts of 10% and 2%, or $11.24, and for all the tobacco products included in said shipment, it was $765.35, less discounts of 10% and 2%, or $675.05. Payment for said shipment was made by Poole Dry Goods Company by payment to said jobber, Nemrow Bros., Inc., of $752.60, less discounts of 10% and 1%, or $670.57. Respondent thus sold said tobacco products to Poole Dry Goods Company at a lower price than it was then selling products of the same kind and in the same quantities to jobbers in said city. After such shipment was received by Poole Dry Goods Company, prominent advertisements were placed by it in the daily newspapers of Springfield, Massachusetts, offering Lucky Strike cigarettes at 11½¢ a package, and $1.14 for a carton of ten packages, and such cigarettes were then sold to consumers in Springfield, Massachusetts, at such prices.

PAR. 4. Respondent, during the period aforesaid, listed the prices of its tobacco products and sundries in descriptive price lists published and distributed by it from time to time, and offered and allowed, as regular discounts from such prices, a 10 per cent discount, sometimes called a "trade discount", and after the deduction of such discount, a 2 per cent discount, sometimes called a "cash discount". List prices as reduced by such discounts are sometimes referred to as "standard prices". Respondent's standard prices serve as a basis for the standard prices of wholesalers and retailers.

Deviations from such standard prices have been effected by respondent during the period aforesaid as follows:

(a) Respondent's salesmen called upon certain retail distributors of respondent's products "not on direct list" and then and there solicited orders for certain of respondent's tobacco products from some of said distributors thus called upon; and upon taking orders from such distributors included in such orders substantial quantities of respondent's products of standard grade and quality and of material value, without making any specific charge therefor (such transactions being sometimes called "deals", "free deals", "combinations", and "gratis"). In some instances said salesmen made immediate delivery of such orders to the respective purchasers. In all other cases respondent's salesmen arranged to have the products included in such orders shipped by respondent directly to the respective purchasers (such transactions being sometimes called "drop shipment deals", and such shipments "drop shipments"). In cases where such orders were taken for delivery by the drop shipment method, the respective purchasers from whom such orders were taken, following the practices developed by respondent in such transactions, made arrangements with some particular jobber on respondent's "direct list" to have their respective orders charged to such jobber, and to pay such jobber the amount of their respective orders, being the list price of such products less an agreed amount. The amount which the retail distributors paid for the tobacco products included in such orders was, according to the practices thus developed, a sum substantially less than the amount which other competing retail distributors paid to jobbers of respondent's products for an equal quantity of tobacco products of like grade and quality purchased by them at the same time.

PAR. 5. By means of acts and practices, as aforesaid, and particularly those described above in paragraph four, respondent, during the period aforesaid, discriminated in price between different purchasers of commodities, to-wit, tobacco products, of like grade and quality; one or more of the purchases involved in such discriminations were in commerce; and such commodities were sold for use, consumption and resale within the United States and the District of Columbia. Respondent is now discriminating in price as aforesaid. The effect of such discriminations may be to injure, destroy and prevent competition with the purchasers from respondent who received the benefit of such discriminations and with the customers of such purchasers. Such discriminations constitute a violation of Subsection (a) of Section 2 of the Act of Congress aforesaid.

II

And the Federal Trade Commission, as and for a further and second count of its complaint, states:

PARAGRAPH 1. The Federal Trade Commission repeats and re-alleges as a part of this second count of this complaint, each and all of the allegations contained in paragraphs one, two, and three, of count one of this complaint, with like effect as if herein fully repeated, and incorporates herein all the facts therein set forth.

PAR. 2. Respondent, during said period, made and is now making valuable payments and gave and is now giving valuable considerations to certain distributors, such as chain stores and other retailers, selected by respondent for the furnishing by them of services and facilities, such as counter and window displays, for the advertising of respondent's products. Such payments and considerations were not and are not now available to other distributors competing in the distribution of respondent's products. Said practices were conducted in such manner as to result in giving certain distributors exclusively the benefits accruing from said payments and considerations.

For example, in carrying out such practices, respondent paid in 1938, as charged aforesaid, for window displays, $91,890.00 to United Cigar-Whelan Stores Corporation, of New York City, New York; $18,910.00 to Liggett Drug Company, Inc., of New York City, New York; and $5,838.69 to Crown Drug Company, of Kansas City, Missouri.

PAR. 3. By means of acts and practices, as aforesaid, and particularly those described above in paragraph two, respondent, during the period aforesaid, contracted to pay and paid, and is now contracting to pay and paying, to and for the benefit of certain of its customers, certain valuable payments and considerations, as compensation for, and in consideration for, certain services and facilities furnished by and through such customers in connection with the handling, sale, and offering for sale, of the tobacco products manufactured, sold, and offered for sale by respondent. Such payments and considerations were not, and are not now, available on proportionately equal terms to all other customers of respondent competing in the distribution of such products, and constitute a violation of Subsection (d) of Section 2 of the Act of Congress aforesaid.

III

And the Federal Trade Commission, as and for a further and third count of its complaint, states:

PARAGRAPH 1. The Federal Trade Commission repeats and re-alleges as a part of this third count of this complaint, each and all of the allegations contained in paragraphs one, two, and three, of count one of this complaint, with like effect as if herein fully repeated, and incorporates herein all the facts therein set forth.

PAR. 2. Respondent has allowed and is now allowing some direct customers a period of time of a certain definite length, for example, 60 days, for payment on a 2 per cent discount basis, sometimes called a "cash discount", of products ordered by and charged to them which it has not allowed and is not now allowing to other direct customers. The allowance of time for payment as aforesaid constitutes a service to respondent's customers which becomes of greater value as the length of such time is extended.

For example, respondent allowed, as charged aforesaid, its jobber Eli Witt Cigar Company, Tampa, Florida, 30 days for payment on said cash discount basis and, following its general rule applicable to jobbers, allowed other jobbers, competing in the distribution of respondent's products with said favored jobber, 10 days for payment on such basis.

PAR. 3. By means of acts and practices, as aforesaid, and particularly by the furnishing of the services described above in paragraph two, respondent, during the period aforesaid, discriminated and is now discriminating in favor of certain purchasers against certain other purchasers of respondent's products bought by them for resale. Such services were and are now furnished by respondent to such favored purchasers upon terms not accorded to all purchasers on proportionately equal terms, in violation of Subsection (e) of Section 2 of the Act of Congress aforesaid.

Wherefore, the premises considered, the Federal Trade Commission, on this 13th day of October, A. D., 1939, issues its complaint against said respondent.

NOTICE

Notice is hereby given you, The American Tobacco Company, respondent herein, that the 17th day of November, A. D. 1939, at 2 o'clock in the afternoon is hereby fixed as the time, and the offices of the Federal Trade Commission in the City of Washington, D. C., as the place, when and where a hearing will be had on the charges set forth in this complaint, at which time and place you will have the right, under said Act, to appear and show cause why an order should not be entered by said Commission requiring you to cease and desist from the violations of the law charged in the complaint.

You are notified and required, on or before the twentieth day after service upon you of this complaint, to file with the Commission an answer to the complaint. If answer is filed and if your appearance at the place and on the date above stated be not required, due notice to that effect will be given you. The Rules of Practice adopted by the Commission with respect to answers or failure to appear or answer (Rule VII) provide as follows:

In case of desire to contest the proceeding the respondent shall, within twenty (20) days from the service of the complaint, file with the Commission an answer to the complaint. Such answer shall contain a concise statement of the facts which constitute the ground of defense. Respondent shall specifically admit or deny or explain each of the facts alleged in the complaint, unless respondent is without knowledge, in which case respondent shall so state.

* * * * *

Failure of the respondent to file answer within the time above provided and failure to appear at the time and place fixed for hearing shall be deemed to authorize the Commission, without further notice to respondent, to proceed in regular course on the charges set forth in the complaint.

If respondent desires to waive hearing on the allegations of fact set forth in the complaint and not to contest the facts, the answer may consist of a statement that respondent admits all the material allegations of fact charged in the complaint to be true. Respondent by such answer shall be deemed to have waived a hearing on the allegations of fact set forth in said complaint and to have authorized the Commission, without further evidence, or other intervening procedure, to find such facts to be true, and if in the judgment of the Commission such facts admitted constitute a violation of law or laws as charged in the complaint, to make and serve findings as to the facts and an order to cease and desist from such violations. Upon application in writing made contemporaneously with the filing of such answer, the respondent, in the discretion of the Commission, may be heard on brief, in oral argument, or both, solely on the question as to whether the facts so admitted constitute the violation or violations of law charged in the complaint.

In witness whereof, the Federal Trade Commission has caused this, its complaint, to be signed by its Secretary, and its official seal to be hereto affixed, at Washington, D. C., this 13th day of October, A. D., 1939.

By the Commission.

IN THE MATTER OF ATLANTIC SEABOARD CORPORATION, AMERE GAS UTILITIES COMPANY, VIRGINIA GAS DISTRIBUTION CORPORATION, AND COLUMBIA GAS & ELECTRIC CORPORATION

NOTICE OF AND ORDER FOR HEARING

Applications and declarations pursuant to sections 5 (d), 7 and 10 and Rules U-12C-1, U-12D-1 and U-12F-1 of the Public Utility Holding Company Act of 1935, having been duly filed with this Commission by the above-named parties;

*It is ordered*, That a hearing on such matter be held on November 3, 1939, at 10:00 o'clock in the forenoon of that day, at the Securities and Exchange Building, 1778 Pennsylvania Avenue NW., Washington, D. C. On such day the hearing-room clerk in room 1102 will advise as to the room where such hearing will be held. At such hearing, if in respect of any declaration, cause shall be shown why such declaration shall become effective.

*It is further ordered*, That James G. Ewell or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said Act and to a trial examiner under the Commission's Rules of Practice to continue or postpone said hearing from time to time.

Notice of such hearing is hereby given to such declarant or applicant and to any other person whose participation in such proceeding may be in the public interest or for the protection of investors or consumers. It is requested that any person desiring to be heard or to be admitted as a party to such proceeding shall file a notice to that effect with the Commission on or before October 28, 1939.

The matter concerned herewith is in regard to certain proposed transactions by (a) Columbia Gas & Electric Corporation, a registered holding company; (b) Atlantic Seaboard Corporation, a registered holding company and wholly owned subsidiary of Columbia Gas & Electric Corporation; and (c) Amere Gas Utilities Company, Virginia Gas Distribution Corporation (public utility companies) and Virginia Gas Transmission Corporation (non-public utility company) wholly owned subsidiaries of Atlantic Seaboard Corporation, namely:

(1) Atlantic Seaboard will sell to Columbia for $6,183,872.70 in cash, all of the common stock and indebtedness of Amere Gas Utilities Company, Virginia Gas Distribution Corporation, and Virginia Gas Transmission Corporation;

(2) Atlantic Seaboard will acquire from Columbia, as a capital contribution, $1,295,000 principal amount of Atlantic Seaboard's presently outstanding 6% Income Demand Notes;

(3) Atlantic Seaboard will increase its authorized common stock, $10 par value, from 200,000 to 350,000 shares; will sell 300,000 shares of such stock and $3,048,000 principal amount of 6% Mortgage Notes to Columbia for $6,048,000 in cash;

The proceeds of such sales plus a small amount of Treasury funds are to be used to retire Atlantic Seaboard's presently outstanding indebtedness. The purpose of the capital contribution is to enable Atlantic Seaboard to create special capital surplus to absorb any charges to surplus which may be required in order to eliminate certain debatable items in the property account as at January 1, 1938.

Upon consummation of the above transactions, Atlantic Seaboard requests an order pursuant to Section 5 (d) of the Act, declaring that it has ceased to be a holding company. Atlantic Seaboard will retain its corporate entity but will devote itself to the operation of its pipe line facilities.

(4) Amere Gas Utilities Company will acquire from Columbia, as a capital contribution, $59,000 of Amere's presently outstanding 6% Income Demand Loan Account (open account);

(5) Amere Gas Utilities Company will reclassify its authorized 2,000 shares of common stock, no par value, into 20,000 shares of common stock, $10 par value, will increase such 20,000 shares of common stock to 35,000 shares and will sell 34,950 shares of such stock and $360,000 principal amount of 6% Mortgage Notes to Columbia for $709,500 in cash;

(6) Virginia Gas Distribution Corporation will acquire from Columbia, as a capital contribution, $148,000 of its 6% Income Demand Loan Account (open account);

(7) Virginia Gas Distribution Corporation will decrease its authorized no par common stock from 10,000 to 5,000 shares and will reclassify said 5,000 shares into 50,000 shares of common stock, $10 par value, will sell 49,900 shares of the $10 par common stock and $433,000 principal amount of its 6% Mortgage Notes to Columbia for $932,000 in cash;

(8) Virginia Gas Transmission Corporation will acquire from Colombia, as a capital contribution, $667,000 of its 6% Income Demand Loan Account (open account) and

(9) Virginia Gas Transmission Corporation will reclassify its authorized 10,000 shares of no par common stock into 10,000 shares of common stock, $10 par value; will increase such par common stock to 200,000 shares and will sell 199,990 shares of $10 par common stock and $1,446,000 principal amount of its 6% Mortgage Notes to Columbia for $3,445,900 in cash.

The proceeds of the sales by Amere Gas Utilities Company, Virginia Gas Distribution Corporation and Virginia Gas Transmission Corporation are to be used by each of the companies to retire its outstanding demand indebtedness. The purpose of the capital contributions is to enable each of the companies to create special capital surplus accounts to absorb any charges to surplus which may be required in order to eliminate certain debatable items in the property account as at January 1, 1938.

The creation of all the capital surplus accounts are in furtherance of a plan of Columbia Gas & Electric Corporation to place its accounts and those of its subsidiaries in such a position that the assets of the system can, if required by regulatory bodies be written down to and carried at their estimated original cost (cost to the person first devoting the property to public service). The plan of Columbia was considered by the Commission in the matter of Columbia Gas & Electric Corporation, File No. 43-160, Holding Company Act Release No. 1417.

By the Commission.

WHEREAS section 8 of the Joint Resolution approved August 31, 1935, as amended by the Joint Resolution approved May 1, 1937 (50 Stat. 127; U.S.C., Sup. IV, title 22, sec. 245e), provides:

"Whenever, during any war in which the United States is neutral, the President shall find that special restrictions placed on the use of the ports and territorial waters of the United States by the submarines or armed merchant vessels of a foreign state, will serve to maintain peace between the United States and foreign states, or to protect the commercial interests of the United States and its citizens, or to promote the security of the United States, and shall make proclamation thereof, it shall thereafter be unlawful for any such submarine or armed merchant vessel to enter a port or the territorial waters of the United States or to depart therefrom, except under such conditions and subject to such limitations as the President may prescribe.
